The total spending authorized by those bills comes to some $3.5 billion less than the amount that was requested of us for those exact functions by the President last March.

What does he demand? He has not told us wherein he finds these figures in this bill unacceptable to him. Would he not be willing to allow this bill to go into effect, that being the manifest will of the Senate, as well as the House, for a period of time that preserves the Government from falling over the precipice?

If we had other figures, if we knew what the President would accept, perhaps we could consider them. And I think the minority leader has that responsibility if he offers a motion to recommit. In the absence of such information, we have no honorable choice but to support the product of the conference.

Mr. CONTE. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, if I might engage the distinguished chairman of the committee in a simple exchange here, as the gentleman knows, I would be prepared to offer a straight motion to recommit. There have been those who have inquired why it would not be with instructions of some sort, to bail us out of this situation.

We have a scope problem here, if we were to take the current continuing resolution and extend it for 15 days. We also have a scope problem if we were to take the resolution that has been before us today and extend it for 15 days. That could be obviated, however, if the motion to recommit would prevail. The committee would go back and, of course, then we would have to fashion a rule quickly. That takes two-thirds, and I know there would be little notice, but it could be done.

I would like to ask the distinguished chairman of the committee what his feelings are on a short-range extension?

□ 1530

Mr. WHITTEN. May I say to my colleague, the minority leader, with whom I have worked very closely through the years, I speak from my heart when I say that the most serious thing facing me and facing us, in my opinion, is the executive branch and the legislative branch getting at loggerheads. I am talking about not this particular action, but just getting to where we are completely at cross purposes.

If we can prevent that, I think we render a great service.

I was asked just a moment ago by one of my colleagues from Tennessee about the possibility of extending the resolution now before us and changing the date of July 15 to a short period while we find out what the objection is. I am serious when I say if we can prevent a complete breakdown between the executive and the legislative, I think we will render a great public service.

If the Speaker saw fit to have a brief recess, where I could talk to the leadership on this side and see what they thought about it, I think it is worth considering.

Offhand I am not in any shape to say yes or no, but it does offer some possibility of perhaps preventing what looks like a complete stalemate between the executive and the legislative. I do not know whether the Speaker will see fit to have a short recess while we discuss other alternatives.

Mr. CONTE. Mr. Speaker, I want to ask my chairman a question.

I do not feel that there is a scope problem. We could offer a motion to recommit for a continuing resolution to a date certain, December 15. As I see it, under amendment 71, section 140, it says:

> Notwithstanding any other provision of this joint resolution, this resolution, other than section 101, 142, 144, shall expire on March 30, 1982.

Therefore, that is standing there naked and it would be in order to amend that to make it December 15 or December 18, 1981.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Mississippi.

Mr. WHITTEN. What I was saying and I should not take the view of ruling it out but other alternatives are possible.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Texas.

Mr. WRIGHT. I thank the gentleman for yielding.

My suggestion of a moment ago that we ought to have some instructions in the motion to recommit does not deal with the date. It is not a question of the date, it is a question of the substance. What is it that the President wants us to do?

Mr. CONTE. I would like to get from my chairman whether he feels—and I know there is no one that knows more about parliamentary rules than the gentleman from Mississippi, being here 40 years—it would be in order to have a motion to recommit with instructions to make the continuing resolution until December 15?

Mr. WHITTEN. In the first place, the gentleman is asking me about the rules. I am not an expert on the rules, but I presume any motion to recommit with instructions could go to any part of the instrument we are dealing with.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. YATES. The gentleman was in the conference. The gentleman was one of the leaders to get the conference report signed. Everybody followed the gentleman's leadership. Why does the gentleman want a change at this time? What is it that the President wants? Nobody knows what he wants.

Mr. CONTE. Listen, I spoke on my feelings on this conference report and they have not changed a bit. But I think that we should know, and now I ask, in view of the fact that I did not get an answer, Mr. Speaker, I ask a parliamentary inquiry.

PARLIAMENTARY INQUIRY

The SPEAKER. The gentleman from Massachusetts (Mr. CONTE) will state his parliamentary inquiry.

Mr. CONTE. Mr. Speaker, the parliamentary inquiry is that on a motion to recommit can the date for the continuing resolution, the expiration date of July 15, be changed to an earlier date before July 15?

The SPEAKER. That motion could only be considered by unanimous request because it would not be within the scope of the differences between the two Houses which have been committed to conference regarding termination dates.

Mr. CONTE. I thank the Chair. That is the answer I want.

Mr. WHITTEN. Mr. Speaker, I do not feel that I could recommend that. I would be glad to discuss it if we had a brief recess but the Members do not seem to wish that. I personally would not be in a position to agree.

Mr. DAUB. Mr. Speaker, I rise today in vigorous opposition to the proposal included in the conference report on the continuing resolution which would give the Members of this body a raise in pay.

How can we ask our constituents to sacrifice for the good of a Nation—while—at the same time we raise our salaries. This proposal amounts to a cynical confidence trick on the American taxpayer.

Mr. Speaker, the power of this body to enrich its Members at public expense is an awesome one. When this power is exercised—the issue ought to be faced squarely, and publicly—not as it is presented here today, buried in the back pages of a budget document filled with the real issues of the day.

I recognize the gravity of the situation we find ourselves in today. The funding deadline draws dangerously near. How easy it would be to take advantage of this situation—which, frankly, we have created—and hide behind the budget deadline while voting our personal wallets—rather than the public will.

Mr. WHITTEN. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

MOTION TO RECOMMIT OFFERED BY MR. MICHEL

Mr. MICHEL. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the conference report?

Mr. MICHEL. I am, Mr. Speaker.

The SPEAKER. Did the gentleman sign the report?

Mr. MICHEL. The gentleman did not have a chance to.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. MICHEL moves to recommit the conference report on the joint resolution, House Joint Resolution 357, to the committee of conference.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and the Speaker announced that the noes appeared to have it.

RECORDED VOTE

Mr. MICHEL. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 184, noes 215, not voting 34, as follows:

[ROLL No. 332]

AYES—184

Archer	Evans (IA)	Martin (IL)

□ 1550

The Clerk announced the following pairs:

On this vote:

Mr. Vander Jagt for, with Mr. Biaggi against.

Mr. Madigan for, with Mr. Mollohan against.

Mr. Myers for, with Mr. Lantos against.

Mr. Paul for, with Mr. AuCoin against.

Mr. Wampler for, with Mr. Mattox against.

Mr. Winn for, with Mrs. Chisholm against.

Until further notice:

Mr. Reuss with Mr. Phillip Burton.

Mr. Jones of Oklahoma with Mr. Simon.

Mr. Fuqua with Mr. Santini.

Mr. Hughes with Mr. Aspin.

Mr. Rose with Mr. Jones of North Carolina.

Mr. HEFTEL changed his vote from "aye" to "no."

Mr. YOUNG of Alaska changed his vote from "no" to "aye."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the conference report.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. LOTT. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 205, nays 194, answered "present" 1, not voting 33, as follows:

[Roll No. 333]

□ 1600

The Clerk announced the following pairs:

On this vote:

Mr. Lantos for, with Mr. Hughes against.

Mr. Biaggi for, with Mr. Daniel B. Crane against.

Mr. AuCoin for, with Mr. Duncan against.

Mrs. Chisholm for, with Mr. Hagedorn against.

Mr. Mollohan for, with Mr. Myers against.

Mr. Mattox for, with Mr. Roth against.

Until further notice:

Mr. Reuss with Mr. Phillip Burton.

Mr. Santini with Mr. Fuqua.

Mr. Rose with Mr. Jones of North Carolina.

Mr. Simon with Mr. Aspin.

Mr. EMERY changed his vote from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AMENDMENTS IN DISAGREEMENT

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 11: Page 3, line 16, strike out all after "House" down to and including "1981" in line 22.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 11 and concur therein with an amendment, as follows: In lieu of the matter stricken by said amendment, insert the following: ": *Provided further*, That, in addition to the sums otherwise made available by this paragraph the following additional sums are hereby appropriated:

"for low income home energy assistance program, $140,000,000;

"for the foster care program authorized by title IV of the Social Security Act, $75,000,000: *Provided*, That the provisions contained in the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriation Act for Fiscal Year 1982 (H.R. 4560), as reported by the Senate Committee on Appropriations on November 9, 1981, related to a limitation on entitlement to payments under parts A and E of title IV of the Social Security Act and transfer of funds under parts B and E of such title (contained in H.R. 4560 as so reported beginning with "provided" on page 39, line 17, and ending on page 40, line 8) shall not be applicable with respect to any sums appropriated pursuant to this joint resolution;

"for the family medicine residency training programs authorized by section 786 of the Public Health Service Act, $10,000,000;

"for the Community Services Block Grant, $62,552,000;

"for the State Block Grant authorized by chapter 2 of the Education Consolidation and Improvement Act of 1981, $140,000,000: *Provided further*, That the College Housing Loan Program shall operate under the terms and conditions as contained in H.R. 4560 as passed the House October 6, 1981, except that the gross commitments for the principal amount of direct loans shall not exceed $75,000,000".

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, I want to make certain that I clearly understand the final decisions regarding child welfare and foster care payments in the continuing resolution. It is my understanding that the Senate receded to the House and agreed to maintain the provisions in Public Law 96-272, the Adoption Assistance and Child Welfare Act of 1980, regarding titles IV-B and IV-E. This means that the Senate language which put a cap on foster care, far below the reconciliation provisions, and made changes in the allocation formula and the requirements for transfer of funds were dropped, and the House provisions prevailed. Specifically this means:

First. An appropriation for title IV-B, child welfare services, of $163.5 million;

Second. Funds for titles IV-A/E of $246 million with the entitlement language retained; and

Third. Funding for adoption assistance of $5 million with entitlement language.

This final agreement maintains the flexibility in Public Law 96-272 and protects implementation of the changes in the child welfare system which Congress worked on for 5 years. These changes have already proven cost effective in demonstration projects conducted at the State and local levels and have supported the basic premise in Public Law 96-272 that the provision of specified services can reduce the need for costly out-of-home care for dependent, neglected, and abused children.

The provisions in this law have been reaffirmed many times by Congress: In the overwhelming vote for final passage, in approval of the full appropriation for the law in 1981, and in fully protecting the law and its funding levels in the Omnibus Reconciliation Act. I am pleased that once again

Congress has reaffirmed its commitment to this important piece of legislation by protecting the law in the continuing resolution.

□ 1610

And we overcame that on our bill that we passed in 1980?

Mr. WHITTEN. We did, yes.

Mr. ROUSSELOT. So in this conference we are not changing our 1980 law on foster care; is that correct?

Mr. WHITTEN. That is correct.

Mr. ROUSSELOT. Did the conferees also remove the cap?

Mr. WHITTEN. That will be done.

Mr. ROUSSELOT. Mr. Speaker, I thank the gentleman from Mississippi (Mr. WHITTEN), and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 15: Page 4, strike out all after line 19 over to and including line 4 on page 5 and insert:

"Such amounts as may be necessary for projects or activities provided for in the Foreign Assistance and Related Programs Appropriations Act, 1982, at a rate for operations and to the extent and in the manner as provided for in such Act as passed the Senate on November 17, 1981, as if such Act had been enacted into law, notwithstanding section 10 of Public Law 91-672, and section 15(a) of the State Department Basic Authorities Act of 1956."

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 15 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following:

"(b) Such amounts as may be necessary for continuing programs and activities, not otherwise provided for, which were conducted in the fiscal year 1981, for which provision was made in section 101(b) of Public Law 96-536 regarding foreign assistance and related programs, notwithstanding section 10 of Public Law 91-672, and section 15(a) of the State Department Basic Authorities Act of 1956, at a rate for operations not in excess of the current rate or the rate provided for in the budget estimate, whichever is lower, and under the more restrictive authority: *Provided,* That the following additional sums are hereby appropriated: $300,000,000 for Foreign Military Credit Sales, $100,000,000 for the Economic Support Fund, and $100,000,000 for the Export-Import Bank of the United States."

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. LONG of Maryland. Mr. Speaker, this amendment restores the House position on foreign assistance programs, which passed the House at a spending rate of either the current level, or the budget request, whichever is lower.

This approach results in probably the lowest spending level that is reasonably possible.

In addition to maintaining the House position the amendment adds $500 million—$300 million for critically needed military assistance programs, $100 million for the Economic Support Fund, and $100 million for the Export-Import Bank.

I did not support this amendment in conference, but rather supported the approach of the chairman of the committee, Mr. WHITTEN. His approach, which I understand was at the request of the President, was to provide the entire $500 million for critically and urgently needed security assistance needs.

However, a majority of the House conferees preferred the amendment that is now before the House. In an effort to compromise I would urge that the amendment be adopted. The amendment can take care of the immediate security assistance needs of such countries as Egypt, Sudan, Turkey, Portugal, and others on a temporary basis until a regular bill is enacted. I believe that a large majority of conferees on both sides of the aisle and in both bodies believe this is an absolute minimum.

Mr. Speaker, even if this amendment is adopted, it will fall far short of the funds which the administration and the other body think are absolutely necessary for the conduct of U.S. foreign policy and support of the Export-Import Bank.

And frankly, I believe these low levels are our best assurances for bringing a foreign assistance bill to the House floor for consideration. During the last 2 days, the chairman of the committee has received specific assurances from the House leadership that a foreign assistance bill will be called up during the time we are in session in December.

This will give the administration time to do the things that are absolutely necessary to secure vital support for the bill from this side of the aisle.

Mr. Speaker, a foreign assistance bill did not come to the House floor last year and thus far has not been scheduled this year. These events have placed the other body in an understandably difficult and frustrating position.

In large part because of this frustration the other body passed the foreign assistance appropriation bill, an act which contravened longstanding practices and constitutional interpretations and an act which I totally oppose. However, I do understand why they did this.

We need a regular Foreign Assistance Appropriations Act—one that is fully debated and open to amendment in both bodies. I intend to do everything I can to achieve this and I hope I will be joined in this by my colleagues on both sides of the aisle in both bodies and by the administration whose active work and support will be essential.

The SPEAKER. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 29: Page 6, line 15, after "law" insert:

"(44) Notwithstanding any other provision of this Act, including any other provision of this title, any agency may, before December 31, 1981, transfer to salaries and expenses from other sources made available to it by this Act, such amounts as may be required if the aggregate amount available for salaries and expenses, after such transfer, does not exceed the amount contained for such purposes in this Act before the application of the changes contained in title V: *Provided,* That such transfers shall be subject to the approval of the Committees on Appropriations."

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendent be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN Moves that the House recede from its disagreement to the amendment of the Senate numbered 29 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment insert the following:

(40) Notwithstanding any other provision of this Act, including any other provision of this title, any agency may before December 31, 1981, transfer to salaries and expenses from other sources made available to it by this Act, such amounts as may be required if the aggregate amount available for salaries and expenses, after such transfer, does not exceed the amount contained for such purposes in this Act before the application of the changes contained in title V: *Provided,* That such transfers shall be subject to the approval of the Committees on Appropriations: *Provided further,* That in the Department of Housing and Urban Development not to exceed (1) $34,000,000 shall be available for data processing services, (2) 12 full-time permanent positions and 16 staff years shall be available for the Immediate Office of the Assistant Secretary for Administra-

tion, and (3) 26 full-time permanent positions and 27 staff years shall be available for the Office of the Assistant Secretary for Legislation and Congressional Relations: *Provided further*, That in the National Aeronautics and Space Administration not to exceed (1) 150 full-time permanent positions shall be available for the Office of the Comptroller and (2) 120 full-time permanent positions shall be available for the Office of External Relations: *Provided further*, That in the Veterans' Administration not to exceed (1) $1,500,000 shall be available for the Office of Planning and Program Evaluation and (2) 649 staff years shall be available for the Supply Service.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 32: Page 7, strike out lines 7 to 15, inclusive.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 32 and concur therein with an amendment, as follows: Restore the matter striken by said amendment, amended to change section "(i)" as follows: "(ii)".

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 37: Page 7, after line 24, insert:

(l) Notwithstanding those provisions of section 305 of H.R. 4120 made applicable by subsection (k) of this section, nothing in such provisions shall (or shall be construed to) require that the rate of salary or basic pay, payable to any individual for or on account of services performed after November 30, 1981, be limited or reduced to an amount which is less than—

(A) $59,500.00, in case such individual has an office or position the salary or pay for which is (I) fixed at a rate which is equal to or greater than the rate of basic pay for level III of the Executive Schedule under section 5314 of title 5, United States Code, or (II) limited to a maximum rate which is equal to or greater than the rate of basic pay for such level III (or to a percentage of such maximum rate) by reason of any provision of law (other than any of the provisions of section 305 of H.R. 4120 made applicable by subsection (k) of this section) or congressional resolution:

(B) $58,500.00, in case such individual has an office or position the salary or pay for which is (I) fixed at a rate which is equal to or greater than the rate of basic pay for level IV of the Executive Schedule under section 5315 of title 5, United States Code, or (II) limited to a maxmum rate which is equal to or greater than the rate of basic pay for such level IV (or to a percentage of such maximum rate) by reason of any provision of law (other than any of the provisions of section 305 of H.R. 4120 made applicable by subsection (k) of this section) or congressional resolution; or

(C) $57,500.00, in case such individual has an office or position the salary or pay for which is (I) fixed at a rate which is equal to or greater than the rate of basic pay for level V of the Executive Schedule under section 5316 of title 5, United States Code, or (II) limited to a maximum rate which is equal to or greater than the rate of basis pay for such level V (or to a percentage of such a maximum rate) by reason of section 5308 of title 5, United States Code, or any provision of law (other than any of the provisions of section 305 of H.R. 4120 made applicable by subsection (k) of this section) or congressional resolution.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House insist on its disagreement to the amendment of the Senate numbered 37.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. FAZIO). All those in favor say "aye," opposed "no."

The ayes have it. The motion is agreed to.

The Clerk will report the next amendment in disagreement.

Mr. CONTE. Mr. Speaker, I have a motion at the desk. I have a motion. I was standing, Mr. Speaker.

The SPEAKER. To what amendment does the gentleman have a motion?

Mr. CONTE. Senate amendment No. 37.

The SPEAKER. The Chair will state that the House has already disposed of that amendment.

Mr. CONTE. I was standing here seeking recognition, Mr. Speaker.

Mr. Speaker, what was the decision?

The SPEAKER. The gentleman may have been standing, but he was not seeking recognition, in the opinion of the Chair.

Mr. CONTE. What was the outcome of that, Mr. Speaker?

The SPEAKER. Senate amendment No. 37 was disagreed to.

Mr. CONTE. And I was standing with a motion, Mr. Speaker.

The SPEAKER. The Chair recognized that there were three or four others standing, and the gentleman was in a conversation with one of his colleagues, and was not asking for recognition.

Mr. CONTE. Mr. Speaker, I am sorry about that.

The SPEAKER. Well, the Chair is sorry.

The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 39: Page 9, after line 5, insert:

SEC. 108. Notwithstanding any other provision of this joint resolution, $869,240,000 is appropriated under this joint resolution for payment to the Postal Service Fund, of which $230,000,000 shall be available for public service costs and $639,240,000 shall be available for revenue foregone on free and reduced rate mail, of which $20,000,000 shall be available for revenue foregone under section 3626 of title 39, United States Code, with respect to the rates of postage for any class of mail or kinds of mailer under former sections 4358, 4554(b), and 4554(c) of such title.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. ASHBROOK. Mr. Speaker, I object. If we do not know what is going on here, I object.

The SPEAKER. Objection is heard. The Clerk will read the amendment.

The Chair understands that the reading of the amendment has been completed, and the Chair recognizes the gentleman from Mississippi (Mr. WHITTEN) for a motion.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 39 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

"SEC. 108. Notwithstanding any other provision of this joint resolution, except sec. 140, $869,240,000 is appropriated under this joint resolution for payment to the Postal Service Fund, of which $230,000,000 shall be available for public service costs and $639,240,000 shall be available for revenue forgone on free and reduced rate mail.

"Notwithstanding any other provision of law, the Postal Service shall promptly adjust preferred rates so as to recover the difference between the amount which would have been authorized to be appropriated under section 2401(c) of title 39, United States Code had this provision not been enacted, and the $639,240,000 hereby appropriated. Such adjustments shall be made in accordance with the following subsections.

"(a) As provided in Section 1723 of the Omnibus Budget Reconciliation Act of August 13, 1981, the first $104,000,000 of the difference in appropriations is to be recovered by adjustment of the rates for the class of mail under former sections 4452(b) and 4452(c) of title 39, United States Code.

"(b) $56,760,000 is to be recovered through proportional adjustment based on the remaining phasing appropriation for any class of mail sent at a free or reduced rate under section 3217 or section 3626 of title 39, under the Federal Voting Assistance Act of 1955 or under the Overseas Citizens Voting Rights Act of 1975.

"(c) The adjustments made under subsections (a) and (b) shall be further adjusted so that $20,000,000 is applied to lessen the adjustment under subsection (b) for any class of mail or kind of mailer under former sections 4358, 4554(b), and 4554(c) of title 39, United States Code."

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 40: Page 9, after line 5, insert:

SEC. 109. No funds made available pursuant to this joint resolution may be used to accomplish or implement a proposed reorganization of the Bureau of Alcohol, Tobacco and Firearms before March 15, 1982. Such reorganization plan may be implemented after March 15, 1982, unless disapproved by the House and Senate Committees on Appropriations.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mrs. FENWICK. Mr. Speaker, I object. We cannot hear the amendment. We do not know what it is.

The SPEAKER. The Clerk will continue to read the amendment.

The Clerk concluded the reading of the amendment.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 40 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

"SEC. 109. No funds made available pursuant to this continuing resolution may be used to accomplish or implement a proposed reorganization of the Bureau of Alcohol, Tobacco and Firearms before March 30, 1982. Such reorganization plan may be implemented after March 30, 1982, unless disapproved by the House and Senate Committees on Appropriations: *Provided further*, That of the funds made available by this Continuing Resolution for the Bureau of Alcohol, Tobacco and Firearms, $15,000,000 shall be available solely for the enforcement of the Federal Alcohol Administration Act during fiscal year 1982."

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 43: Page 9, after line 5, insert:

SEC. 112. (a) None of the funds appropriated by this Act may be used to—

(1) enforce Revenue Ruling 81-216 or the proposed amendments to Income Tax Regulations § 1.103-7 and § 1.103-10 which were published in the Federal Register on October 8, 1981, or

(2) propose, promulgate, or enforce any ruling or regulation reaching the same result as, or a result similar to, such Revenue Ruling or Regulations, in connection with a qualified issue, or

(3) issue rulings or regulations which treat as exempt from taxation under section 103(b)(6) of the Internal Revenue Code of 1954 any interest earned on an obligation the proceeds of which are used for a disqualified facility.

(b)(1) For purposes of subsection (a), the term "qualified issue" means a single issue (whether or not part of a composite or multiple series of issues)—

(A) all of the obligations of which are directly or indirectly guaranteed or secured by—

(i) a State or political subdivision thereof or an instrumentality of either, or

(ii) in the case of an issue all of the proceeds of which are used for agricultural purposes, a qualified person (within the meaning of section 46(c)(8)(D) of the Internal Revenue Code of 1954 determined without regard to clauses (iii) and (iv) thereof), and

(B) none of the proceeds of which are used in connection with a disqualified facility or a facility with respect to which, at any time before January 1, 1987—

(i) any disqualified person used more than 5 percent of the facilty, or

(ii) more than 25 percent of the facility is (in the aggregate) used by disqualified persons.

For purposes of subparagraph (B), use by a related person (within the meaning of section 103(b)(6)(C) of such Code) shall be treated as use by the disqualified person.

(2)(A) For purposes of paragraph (1), the term "disqualified person" means a person (other than an exempt person within the meaning of section 103(b)(3) of such Code) which has aggregate capital expenditures for any purpose which, for the period beginning October 1, 1979, and ending September 30, 1982, exceed $25,000,000.

(B) For purposes of determining the aggregate capital expenditures of any person under subparagraph (A), there shall be taken into account the capital expenditures of all persons which are—

(i) related persons (within the meaning of section 103(b)(6)(C) of such Code) with respect to such person; or

(ii) guarantors of any portion of the issue with respect to which a determination is being made under this subsection other than a guarantor which—

(I) is a State or a political subdivision thereof or an instrumentality of either, or

(II) in the case of an issue all of the proceeds of which are used for agricultural purposes, a person described in paragraph (1)(A)(ii).

(C) For purposes of this paragraph, the term "capital expenditures" has the meaning given such term by section 103(b)(6)(D) of such Code, except that such term shall not include any amount paid or incurred by the taxpayer which constitutes a qualified research expense (within the meaning of section 44F(b) of such Code).

(c) For purposes of subsection (a) and subparagraph (b)(1)(B), a "disqualified facility" is any private or commercial—

(i) golf course,

(ii) country club,

(iii) massage parlor, or

(iv) tennis club.

(d) It is the sense of the Senate that after August 23, 1981, and until Congress enacts legislation which affects section 103(b)(6) of such Code, the Secretary of the Treasury or his delegate should in all cases enforce any ruling or regulation described in subsection (a) (1) or (2) in a manner consistent with the provisions of subsection (a).

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 43 and concur therein with an amendment, as follows: In lieu of the language proposed in (b)(1)(A) by said amendment insert the following: "all of the obligations of which are directly or indirectly guaranteed or secured in whole or in part by".

And after section (b)(2)(B)(ii)(II) insert the following:

"(III) One or more financial institutions which are not related persons (within the meaning of section 103(b)(6)(C) of such Code to the user of the proceeds of the issue."

The SPEAKER. Without objection, the motion is agreed to.

Mr. ROSTENKOWSKI. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Mr. ROSTENKOWSKI. Mr. Speaker, I rise to express strong reservations about this amendment.

The SPEAKER. The Chair understands this is a matter in which the gentleman from Illinois is interested.

Mr. ASHBROOK. A point of order, Mr. Speaker. The gentleman could not hear the Speaker's important announcement.

Mr. ROSTENKOWSKI. Mr. Speaker, I reserve the right to object on the last amendment.

The SPEAKER. The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, I yield to the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Speaker, I rise to express my strong reservations with respect to the matter contained in Senate amendment No. 43 on which the conferees are recommending that the House recede and concur

with an amendment. My objections are both procedural and substantive in nature.

The amendment attempts to prohibit in certain circumstances the enforcement of revenue ruling 81-216, and regulations reaching the same result.

The amendment would prohibit the enforcement of the ruling in the case of bonds which are backed by a State or locality where the proceeds of the bonds are not to be used by very large corporations—with more than $25 million in capital expenditures, worldwide, in a 3-year period.

First of all, on procedural grounds, we have a Senate floor amendment which attempts to negate a proper interpretation by the Internal Revenue Service of a substantive provision of the tax laws by limiting the discretion of the Service in its internal use of its administrative moneys.

Not only is the amendment not properly within the purview of the appropriations process, but the conferees have even gone to the point of expanding its scope to broaden its impact. Those of us on the tax writing committees find this to be improper and, in a sense, irresponsible inasmuch as the matter addressed by the amendment is a complex one with policy implications which should be carefully reviewed by the tax-writing committees prior to the taking of congressional action.

In a more important sense, I would like to inform my colleagues that it is my view that the action recommended by the conferees in accepting this amendment will have no substantive effect. It will not result in the issuance of bonds which would be prohibited absent the existence of this appropriations rider. It should be pointed out that, inasmuch as this language in no way amends the Internal Revenue Code, it cannot affect the legal basis under which bonds can be issued under existing law. Since it is customary for bond counsel to issue opinions on the legal basis for the tax exemption of the bonds in question, I wanted to make this statement at this time so that no bond counsel or potential purchasers would improperly construe that this simple funds limitation has the effect of legalizing the bonds in question. Once the continuing resolution expires, the IRS will be able to enforce the revenue ruling in question, revenue ruling 81-216, even as to the interest earned on bonds issued during the period of this appropriations freeze.

I would want to inform my colleagues that I have discussed this issue at great length with the chairman of the Senate Committee on Finance who shares my view that this language is ineffectual in achieving the purpose which it seeks to accomplish. The sole effect of this language is to delay IRS action in this area. It cannot and does not, the sense of the Senate language relating to future periods notwithstanding, change the underlying law which in the end controls the legal basis for the granting of the tax exemption.

It is unfortunate for the entire legislative process that one or two law firms specializing in the processing of these transactions have attempted to modify the tax laws without going through the appropriate committees which Congress established to deal with the tax laws. In so doing, they have added nothing—except confusion to the whole area of tax-exempt bonds.

Mr. WHITTEN. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, I have no knowledge of the item the gentleman has discussed. I would ask the subcommittee chairman, the gentleman from California (Mr. ROYBAL), if he has any comments.

Mr. ROYBAL. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from California.

Mr. ROYBAL. Mr. Speaker, this matter was discussed thoroughly in conference. The reason that we brought it back in disagreement is because we have agreed with the arguments just presented by the chairman of the Ways and Means Committee. We thought we would give him an opportunity to present the facts with regard to the situation.

I really do not know what can be done at this particular moment. However, that will depend entirely upon the chairman of the committee. Again I must repeat that there was a great, long discussion, and we were assured by the conferees from the other body that this matter had been taken up, that the vote on their side was 97 to 2. Therefore, they were adamant in their position.

Since we could not meet with an agreement, we brought it back in disagreement giving the chairman of the committee an opportunity to present some views.

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Illinois.

Mr. ROSTENKOWSKI. Mr. Speaker, the conference committee has not only accepted the amendment but has broadened the scope of the amendment that was offered on the Senate floor. Let me reiterate that the amendment really does not have any effect. It does not change the law, only the ability of the IRS to enforce it for the short run. Bond counsels should still not issue any opinions that these are tax-exempt bonds.

I appreciate the understanding of the gentleman from California on this matter. He understands the jurisdiction of the Committee on Ways and Means on this issue and has been quite cooperative with us notwithstanding the persistence of the other body.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I hope the House can support the House conferees on this matter and agree to recede to the amendment of the Senate. This amendment pertains to multiple lots of small-issue industrial revenue bonds. I believe many Members of the House are aware of Revenue Ruling 81-216 which was issued by the IRS this past August and which was followed by a rulemaking notice issued in the October 8 Federal Register, the effect of which has been to deny tax exemption for multiple lots of small-issue industrial revenue bonds. The proposed amendment would prohibit the IRS from enforcing Revenue Ruling 81-216 and the subsequent rulemaking.

Mr. Speaker, it is our intention in agreeing to this amendment to preempt either the authority of the IRS or the jurisdiction of the legislative committees. Rather it is our intention to preserve prerogatives of the Congress in this matter.

This past spring the Ways and Means Oversight Subcommittee held a series of hearings on issues pertaining to the use of small-issue industrial revenue bonds. As we moved into the summer months and began work on the tax bill, many Members thought that the small issue IRB question would be addressed in that bill. However, time constraints and the complexity of the issue resulted in a decision not to try to work small issue IRB's into the tax bill but rather to take the matter up separately later in this session.

Unfortunately, following on the heels of this congressional decision to put off consideration of small issue IRB's until later in the year, the IRS on August 24 issued Revenue Ruling 81-216 and followed this with a rulemaking notice, which has cast a serious shadow of doubt in the financial community about the tax status, and therefore the marketability, of multiple lots of small issue IRB's.

Small issue IRB's which are bonds of less than $1 million, have been used very effectively by State and local economic development agencies to attract new business. Conversely these small issue IRB's have proven to be a useful tool for small businesses who might otherwise be locked out of the capital markets because of high interest rates. In the last 3 years in my State alone some $1 billion in industrial revenue bonds have helped small businesses and local development projects add 40,000 jobs. And this experience in my State is not unique. This has been happening across the country. Clearly small-issue industrial revenue bonds

have become an important mechanism for keeping small businesses in the private capital market.

During the April Ways and Means Committee hearings many witnesses testified that small-issue industrial revenue bonds are needed perhaps now more than ever in the face of recent cutbacks in other Federal assistance programs for small business, distressed areas, and rural localities.

Moreover as high interest rates continue to force commercial banks to seek shorter maturation in their portfolios, it is becoming increasingly difficult for small businesses to find affordable long term financing. Small issue IRB's are one way small businesses have been able to remain in the market.

The Treasury Department has argued against the IRB program because of the revenue losses to the Federal Treasury due to the nontaxable nature of interest paid to the purchasers of these bonds. Many different sets of figures, all reported to be the most accurate, have been floated as to the amount of these losses. However, what would be just as interesting but which the Treasury has not produced are estimates of the amount of revenues received by the Treasury Department as a direct result of the increased economic activity generated by IRB-financed projects. The economic activity generated by these projects in the form of wages and company profits helps the Treasury directly in additional tax collections and indirectly through lower spending for unemployment compensation and other forms of public assistance. These gains to the Federal Treasury are an offset to the revenue losses from the Federal taxes foregone on bond interest income.

However, the amendment before you does not require you to make a decision today about the merits of small-issue industrial revenue bonds as a financing mechanism. The amendment before you has only one purpose and that purpose is to buy time for the Congress to work its own will on this matter.

This amendment does not change existing law. It simply prohibits the IRS from enforcing its own interpretation of the law. Without this amendment to prohibit enforcement of IRS Ruling 81-216, we will be allowing the IRS to do our legislating for us.

Again let me say that we are not trying to preempt the prerogatives of the legislative committees. What we are trying to do is to insure that the future of small-issue industrial revenue bonds is determined by the legislative committees and the Congress as a whole and not by the IRS.

I urge my colleagues in the House to accept this amendment in the same good faith in which your managers on this continuing resolution have agreed to it.

Mr. Speaker, I would like to mention that on amendment No. 37 on which I rose and had hoped the Chair would recongize me, I must explain why I rose. I rose because I had a motion at the desk to have the 4.8-percent pay increase apply to the executive branch of the Federal Government.

The SPEAKER. The gentleman is aware that a motion to reconsider is in order at an appropriate time prior to disposition of all the amendments?

Mr. CONTE. I thank the Speaker. I may do that if I can work it out.

Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. MILLER).

Mr. MILLER of Ohio. I thank the gentleman for yielding. As far as amendment 43 is concerned, the amendment we are talking about right now, whereby the conference would stop IRS from putting into effect the regulatory change prohibiting the clustering of small issue industrial revenue bonds, all we do is tell the IRS "You shall not put that regulation into effect." I would think the chairman of the Ways and Means Committee would like the idea because it will give him time to hold the hearings, to make the final determination as to what should be done, and it would not be done by regulation by IRS.

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentleman from Illinois.

Mr. ROSTENKOWSKI. I should imagine that the gentleman would agree that the Ways and Means Committee, the tax-writing committee, should write this language and should look at this. All I want to reiterate is that any tax bond issue tomorrow is not going to be exempt as a result of this language.

What this does, it just curtails the dollar flow in the enforcement of this provision until such time as the continuing resolution is concluded and then the law is not changed. That is why I see no reason for this. I think it is unnecessary, and I thank the gentleman for yielding.

Mr. MILLER of Ohio. The gentleman is, of course, correct that substantive law is not changed by this amendment. That would, I think, make the amendment less offensive to the chairman of the Ways and Means Committee. We are not writing tax law here. We are simply sending an executive branch agency a message through the vehicle of this amendment. Admittedly, an appropriations bill is not the ideal vehicle for sending this message. But what we are saying is that we do not want money appropriated in this bill to be used to enforce Revenue Ruling 81-216 or the proposed regulations. Such instructions have been sent to executive branch agencies in the past through appropriations bills, and they have been successful.

I yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 44: Page 9, after line 5, insert:

SEC. 113. It is the sense of the Senate that the President of the United States should not include in his recommendations for revenue enhancements any recommendations which would have the effect of reducing Federal tax incentives for energy conservation or the development of renewable energy sources.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 44 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate Amendment No. 48: Page 9, after line 5, insert:

SEC. 117. Notwithstanding any provision of this joint resolution, the funds made available by this joint resolution which would be available under H.R. 4560, entitled "Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982", for school assistance in federally affected areas under title III of such Act shall be available under the authority and conditions set forth in H.R. 4560 as reported to the Senate on November 9, 1981.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 48 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 117. Notwithstanding any other provision of this joint resolution, the funds made available by this joint resolution which would be available under H.R. 4560,

entitled "Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982", for school assistance in federally affected areas under title III of such Act shall be available under the authority and conditions set forth in H.R. 4560 as passed the House on October 6, 1981: *Provided*, That the total amount available for entitlements under section 3(a) of the Act of September 30, 1950, as amended, is amended so as to permit payment to any local education agency under such section 3(a) not to exceed 90 per centum of the amount of such payment for fiscal year 1981, unless the entitlement for such agency is determined under section 3(d)(2)(B) of such Act: *Provided further*, That the provisions of section 3(d)(2)(B) shall be fully funded and not subject to rateable reduction: *Provided further*, That the provisions of section 5(c) shall not apply.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 49: Page 9, after line 5, insert:

SEC. 118. Notwithstanding section 1903(s) of the Social Security Act, all medicaid payments to the States for Indian health service facilities as defined by section 1911 of the Social Security Act shall be paid entirely by Federal funds and notwithstanding section 1903(t) of the Social Security Act, all medicaid payments to the States for Indian health service facilities shall not be included in the computation of the target amount of Federal medicaid expenditures.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 49 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 53: Page 9, after line 5, insert:

SEC. 122. Notwithstanding any other provision of this joint resolution, appropriations for salaries and expenses in this joint resolution for the Department of Health and Human Services are hereby reduced by $21,800,000.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 53 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 122. Notwithstanding any other provision of this joint resolution, appropriations for salaries and expenses in this joint resolution for the Department of Health and Human Services are hereby reduced by $21,800,000: *Provided*, That none of this reduction shall be taken from activities supported under the budget account entitled "Social Security Administration, Limitation on Administrative Expenses" or from funds available for the administration of the Medicare program.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 57: Page 9, after line 5, insert:

SEC. 126. For each fiscal year (beginning with the fiscal year which ends September 30, 1982), the Secretary of the Senate is authorized to expend from the contingent fund of the Senate such amount as may be necessary to enable the Secretary to obtain from the General Services Administration the services of a professional archivist. Such services shall be obtained on a reimbursable basis and shall not be obtained except with the consent of the General Services Administration and the Committee on Rules and Administration.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 57 and concur therein with an amendment, as follows: In lieu of the section number named in said amendment, insert "125-128".

Mr. CONTE. Mr. Speaker, I seek recognition to speak on amendment No. 57.

The SPEAKER. The gentleman from Massachusetts is recognized.

Mr. CONTE. I yield such time as he may consume to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Speaker, let me discuss on the basis of clarifying the position of the conferees a provision in the conference report dealing with the Mine Safety and Health Act.

The conference report includes a provision, added by the other body, which has the effect of transferring safety and health enforcement from MSHA to OSHA over the surface construction activities of independent contractors at minesites. This provision is a refinement of an amendment which I offered on the Labor-HHS appropriations bill, H.R. 4560. My amendment, which passed the House by a vote of 254 to 165, did two things. First, it transferred from MSHA to OSHA enforcement over surface construction at a minesite. Second, it transferred from MSHA to OSHA safety and health enforcement over surface mining of stone, clay, collodial phosphate, sand, and gravel.

It is my understanding that my amendment to the Labor-HHS appropriations bill, since it represented a restriction on authority, was incorporated by reference into the continuing appropriations resolution. Thus, the conference report on the continuing resolution does two things:

First, it provides that no funds shall by used by MSHA with respect to regulating surface mining of stone, clay, colloidal phosphate, sand, or gravel.

Second, it reflects a modification of the other part of my original amendment to the Labor-HHS appropriations bill, so that now no funds shall be used by MSHA to regulate the surface construction activities of independent contractors at minesites.

Is this a correct interpretation of the conference report?

Mr. CONTE. The gentleman from California (Mr. ROUSSELOT) is correct in his interpretation of the conference report.

It is noted that the other body in considering the continuing resolution viewed the resolution as incorporating your MSHA amendment to the Labor-HHS appropriations bill, H.R. 4560. The Senator from Pennsylvania, Mr. SPECTER, offered an amendment to in effect strike out the amendment of the gentleman from California (Mr. ROUSSELOT). The other body, however, by a 35-to-63 vote, rejected the amendment of the Senator from Pennsylvania, Mr. SPECTER.

As the gentleman from California (Mr. ROUSSELOT) correctly observed, the other body did modify his amendment somewhat with respect to surface construction. This was done through an amendment offered by the Senator from Montana, Mr. MELCHER.

The conferees intend that the conference report will have the effect of requiring the Occupational Safety and Health Administration to assume enforcement responsibility over the surface mining of stone, clay, colloidal phosphate, sand, and gravel as well as over the construction activities of independent contractors at the surface of minesites. It is the intention of the conferees that the funding limitation in the continuing resolution effectively precludes MSHA from exercising its statutory authority with respect to these activities. Accordingly, the provision—section 4(b)(1)—of the Occupational Safety and Health Act which now operates to preclude OSHA from applying to such activities would in a sense be deactivated. OSHA would indeed assume safety and health enforcement responsibility.

Mr. CONTE. Mr. Speaker, I yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

□ 1630

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 70: Page 9, after line 5, insert:

SEC. 139. Notwithstanding any other provision of law or of this joint resolution:

(a)(1) Subchapter V of chapter 55 of title 5, United States Code, is amended by adding the following new section 5546a after section 5546:

"§ 5546a. Operational responsibility differential for employees of the Federal Aviation Administration

"(a) An employee of the Federal Aviation Administration, as such term is defined in subsection (b) of this section, shall be eligible for an operational responsibility differential equal to five percent of his rate of basic pay, and such differential is in addition to and not in lieu of any other premium pay to which the employee may be entitled.

"(b) For purposes of this section, the term 'employee' includes:

"(1) persons occupying positions not lower than the GS-9 level in the air traffic controller series in air traffic control centers or terminals or in flight service stations, persons occupying positions not lower than the GS-9 or WG-10 level in airway facilities sectors, and persons occupying flight inspection crewmember positions not lower than the GS-11 level in flight inspection field offices,

the duties of whose positions are determined by the Federal Aviation Administrator to be directly involved in or responsible for the operation or maintenance of the air traffic control system; and

"(2) persons occupying flight test pilot positions not lower than the GS-12 level in regions or centers, the duties of whose positions are determined by the Federal Aviation Administrator to be unusually taxing and critical to the advancement of safety in the national airspace system.

The Federal Aviation Administrator may prescribe regulations to determine the application of this subsection.

"(c) The provisions of section 5547 of this title relating to limitation of premium pay shall not apply to an employee of the Federal Aviation Administration who is eligible for the operational responsibility differential authorized by this section.".

(2) The analysis of subchapter V of chapter 55 of title 5, United States Code, is amended by inserting the following new item after section 5546:

"SEC. 5546a. Operational responsibility differential for employees of the Federal Aviation Administration.".

(b)(1) Subchapter V of chapter 55 of title 5, United States Code, is amended by adding the following new section 5546b after section 5546a:

"§ 5546b. Operational currency pay for air traffic controllers

"An employee of the Federal Aviation Administration, classified in the air traffic controller series, who is employed in an air traffic control center or terminal and who is not required as a condition of his employment to be certified by the Federal Aviation Administrator as medically qualified for and proficient in the separation and control of air traffic shall be eligible to receive upon attaining such certification of medical and proficiency qualifications an operational currency differential of 1.6 percent of his rate of basic pay while so certified.".

(2) The analysis of subchapter V of chapter 55 of title 5, United States Code, is amended by inserting the following new item after section 5546a:

"SEC. 5546b. Operational currency pay for air traffic controllers.".

(c)(1) Subchapter V of chapter 55 of title 5, United States Code, is amended by adding the following new section 5546c following section 5546b:

"§ 5546c. Pay for on-the-job training by air traffic controllers

"An air traffic controller selected by the Federal Aviation Administration and assigned to provide on-the-job training to another air traffic controller who is directly involved in the separation and control of live air traffic shall be eligible to receive premium pay at a rate equal to 10 percent of his rate of basic pay for the time that he provides such training, and such premium pay shall be in addition to and not in lieu of any other premium pay to which the air traffic controller may be entitled.".

(2) The analysis of subchapter V of chapter 55 of title 5, United States Code, is amended by inserting the following new section after section 5546b:

"Sec. 5446c. Pay for on-the-job training by air traffic controllers.".

(d)(1) Subchapter V of chapter 55 of title 5, United States Code is amended by adding the following new section 5546d after section 5546c:

"§ 5546d. Premium pay for loss of meal period

"An air traffic controller or a flight service station specialist, employed by the Federal Aviation Administration, working a regularly scheduled 8-hour period of service and who is required by his supervisor to work that 8-hour period without a 30 minute meal break shall be paid one-half hour at the rate of one and one-half times his rate of basic pay. The meal period shall be granted during the fourth through sixth hour of such 8-hour period.".

(2) The analysis of subchapter V of chapter 55 of title 5, United States Code, is amended by inserting the following new item after section 5546c:

"Sec. 5546d. Premium pay for loss of meal period.".

(e) Section 5532 of title 5, United States Code, is amended by adding a new subsection (f) to read as follows:

"(f) Notwithstanding any other provision of law, retired members of a uniformed service who are temporarily employed in an air traffic control function or in a related training function during a period determined by the Federal Aviation Administrator to require special air traffic recruitment efforts shall be entitled to continue to receive full retired or retainer pay in addition to the salary for the position occupied. The provisions of this subsection shall be effective until December 31, 1984.".

(f) Section 8344 of title 5, United States Code, is amended by adding a new subsection (f) to read as follows:

"(f) Notwithstanding any other provision of law, an annuitant, receiving an annuity from the Fund, upon appointment to a position in an air traffic control function or in a related training function during a period determined by the Federal Aviation Administrator to require special air traffic recuitment efforts, shall be entitled to continue to receive the full amount of the annuity in addition to the salary for the position occupied. The provisions of this subsection shall only be applicable to annuitants who filed an application for retirement with their employing agency before August 3, 1981 or whose retirement from the Civil Service occurred before August 3, 1981. The provisions of this subsection shall be effective until December 31, 1984.".

(g) Section 4109 of title 5, United States Code, is amended by adding a new subsection (c) to read as follows:

"(c) Notwithstanding subsection (a)(1) of this section, the Federal Aviation Administrator may pay a person undergoing training as an air traffic controller at that employee's rate of basic pay for time the employee is assigned to training in excess of 40 hours in a workweek.".

(h) Section 8339(e) of title 5, United states Code, is amended by striking the period at the end of the second sentence and adding the following in lieu thereof: ", except that this provision shall not apply to an individual who has received a refund of civil service retirement deductions pursuant to section 8342 of this title covering any period in which he was employed as an air traffic controller, unless the individual redeposits the amounts refunded pursuant to section 8334(d) of this title.".

(i) The amendments made by subsections (a), (a)(2), (e), and (f) of this joint resolution shall take effect as of August 3, 1981, commencing with shifts beginning on or after 5:00 a.m. eastern daylight time. The amendments made by other subsections of this joint resolution shall take effect on the first day of the first applicable pay period which begins after the date of enactment of this joint resolution, except for subsection (h) which shall be effective upon enactment.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House insist on its disagreement to the amendment of the Senate numbered 70.

PREFERENTIAL MOTION OFFERED BY MR. COUGHLIN

Mr. COUGHLIN. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. COUGHLIN moves that the House recede from its disagreement to the amendment of the Senate numbered 70 and concur therein.

Mr. FORD of Michigan. Mr. Speaker, I demand a division of the question.

The SPEAKER. The question will be divided.

The gentleman from Mississippi (Mr. WHITTEN) is entitled to 30 minutes.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. Mr. Speaker, this nongermane amendment added by the other body, more than any in recent memory, deserves to be soundly defeated.

This amendment represents a backdoor, end-run, slip-it-through-in-the-middle-of-the-night effort by the Secretary of Transportation. This is an effort to circumvent the House and its committee system and preclude Members of this body from giving careful consideration to some very controversial matters.

Just Thursday, the ranking minority member of the Committee on Post Office and Civil Service, the gentleman from Illinois, introduced this proposal at the request of the administration. This introduction followed a meeting he and I had that same day to discuss plans for hearings and expeditious consideration of the legislation. Only hours later, that very same day, the whole package was added to the continuing resolution with virtually no debate in the other body.

The Secretary told me last night he had nothing to do with the action of the other body. I find that hard to believe. I understand from many of my colleagues he has also been implying that neither I nor the ranking member of the committee have any objection to this legislative end run. This is not true. This proposal has many controversial parts. It should be considered under the usual procedures. Let me tell you what it does.

First, it adds at least $57.5 million in pay and benefits to this year's budget. And remember, the offer made last June to the controllers was only $40 million. If that was sufficient last June, why do we need to provide more now? This needs to be studied.

The proposal sets a very dangerous precedent in that it would permit civil service and military retirees who return to work at the FAA to collect both full pay and a full annuity. This is a door we may not wish to open, for once opened it may be hard to close.

The bill also provides new pay differentials and exempts many FAA employees from the premium pay cap.

I have never been one to oppose additional pay and benefits for Federal workers. Quite the contrary, I always support those proposals. I also am confident that the members of my committee are anxious to do whatever is necessary and responsible to facilitate recovery of the air traffic control system. But, at the same time we must carefully consider the effect that singling out one small group of employees for special treatment can have on the other 2 million Federal employees whose pay has been capped and whose benefits have recently been reduced by this Congress. Let me point out the dichotomy we will create if we agree to this amendment.

Under the Lewis bill, a GS-15, step 1, supervisory controller, airways facilities engineer servicing computers, or flight service station specialist providing weather information to general aviation pilots, who works the evening shift next Thursday (Thanksgiving) will be paid at an annual rate of pay for that day determined as follows:

Base pay	$46,685
5-percent "responsibility" differential	2,334
10-percent "night shift" differential	4,668
Holiday premium pay	46,685
Total	100,372

If the individual happens to be a former retired civil servant or retired member of the Armed Forces, he will receive his pension on top of his pay for that day.

In contrast, a GS-15 FBI agent or NASA engineer, or a four-star general working the same day and the same hours will be capped at $50,112.50, or $57,500 if the pay cap is adjusted in the conference report.

This additional pay may be nice but will not solve the problems facing the air traffic control system. Enactment of the Lewis bill will not result in a single, new, fully checked out controller manning a scope in a center or tower next month, in time to help out with the winter crunch we all know is coming. It will not shorten the 4- to 5-year period required to train controllers for major air traffic control centers. In fact, it excludes instructors at the FAA Academy from the special pay provisions, and this has caused a serious morale problem among those who must train the 7,000 or 8,000 new recruits needed to eventually rebuild the system. This proposal is not a quick fix for the problems facing the FAA, no matter what anyone says.

Every provision in this complicated, complex proposal may be meritorious. We simply do not know if this is the case. The proposal simply deserves more than a few brief minutes of consideration in the other body and the brief time we can give it here.

Why are we suddenly in such a rush? Ask yourself this. If the August 3 strike truly created an emergency situation requiring this legislation, why did the Secretary wait a full 3 months, until November 2, before ever sending a proposal to the Congress? And having sent it, why did he then wait another 3 weeks before asking the ranking minority member of the House committee with jurisdiction, the gentleman from Illinois, to introduce it? The Secretary has hardly behaved like a man faced with an emergency.

Finally, and I am sure my colleagues will agree with me on this, the Secretary has made a serious error in the way he has handled this matter. There are no better friends of Federal workers than the members of the Committee on Post Office and Civil Service. No committee is more sympathetic to their concerns and their needs. By trying to circumvent the committee, the Secretary has certainly made it more difficult for us to handle this legislation.

If after appropriate and thorough consideration, the committee brings this legislation to the floor, it will have the extra burden of showing why it now supports legislation it opposed as part of the continuing resolution. This will be a difficult burden to bear, and if it proves too great and the Lewis bill does not become law, the responsibility for that will rest with the Secretary, not the Congress.

Mrs. SCHROEDER. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Speaker, I rise in strong opposition to the motion to recede and concur to the Senate provision on air traffic controller pay. At very least, including this provision in the continuing resolution is a terrible way to legislate.

The provision added in the other body is the complete text of H.R. 5038 introduced by Mr. DERWINSKI on Thursday. The proposal came up as a recommendation from the administration to deal with one of the problems currently facing the air traffic control system. Nevertheless, the legislation does not deal with the most serious problems facing the system, costs a great deal to implement, and provides such a wide range of new benefits to employees that serious legislative consideration is a must.

The Federal Aviation Administration says the provision will cost nearly $60 million in fiscal year 1982. The long-term costs to the retirement system and the budget have not yet been computed. Since no new money is

provided for FAA in this bill, this $60 million will have to come out of its already tight budget. Where will it come from? My information is that passage of this provision will result in an enormous reduction in force at FAA. Who will go, I don't know. Will it be the employees who make sure that the in-flight radar and ground guides are functioning properly? Will it be the employees who make sure that airports are kept in a safe condition? Will it be the employees who test all this equipment from the air? The dangers of a RIF in FAA are so great to the flying public that I will not support this legislation until I know where the money to pay for it is going to come from.

Currently, within the air traffic control system, we have 6,000 or 7,000 very tired air traffic controllers. Virtually all of them have been working 48 hours a week since August 3. No letup is in sight. Training of new controllers will, under the best circumstances, take a couple of years before the first new trainee is able to operate on a full performance level. The results from the first class at Oklahoma City are much worse than anyone expected. Seventy-two entered the class. Twenty-four made it past their first exams. While this means that FAA has kept up standards, it also means that replacing the fired controllers will be a much more long-term occupation than promised.

Providing those working with extra compensation is a short-term way of improving their morale. But, it is just a tiny part of what has to be done to restore the system. Since we are under severe budgetary constraints, I want to make sure that the $60 million this provision will cost is the best use of $60 million for the safety of the flying public. The legislative process is ideally suited for the task of finding out whether this program of benefits is the best use of the money. Why not let it work? Oppose this motion.

Mr. CONYERS. Mr. Speaker, will gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Speaker, I would like to compliment my colleague, the gentleman from Michigan, for casting the understanding of this amendment separate from the air traffic controllers strike and the differences that arose out of it. I think common good judgment about how we structure the Federal pay system is behind the gentleman's motivation, and I totally support him in that regard.

Mr. FORD of Michigan. Mr. Speaker, I would like to say, in defense of the administration who concocted this, that I do not accuse them for 1 minute of trying to do anything special for air traffic controllers. This has nothing to do with the strike, it has nothing to do with any union. There is, as a matter of fact, no union representing these employees any longer. That union has been disbarred.

Mr. OBERSTAR. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Speaker, the gentleman has properly pointed out the manifest unfairness of this attempt to fund a pay increase for the air controllers; it certainly is unfair to other Federal employees. But there is another matter here that I think is important, which should be pointed out, that this whole package totals up to $57.5 million, which is about $18 million more than they were willing to offer the PATCO people a couple of months ago. The administration, which took a strike rather than offer a dollar more than their $40 million package to PATCO 4 months ago, is now asking Congress to appropriate a 40-percent increase over that package for less than half as many controllers.

Look at the figures: 6,000 air controllers today are being offered $57.5 million, while 16,000 controllers were offered $40 million a few months ago. And this new package is not going to get the Nation's air traffic system a single new controller. All we will be doing with this pay and benefits increase is to give a bonus to a select class of Government employees, some of whom are strikebreakers.

Mr. Speaker, I dislike this backdoor approach to the air controller issue. Instead of trying to slip a pay package through in the dark and waning hours of this session, the administration ought to take a forthright approach. They ought to come up before the authorizing committees of Congress and testify on the legislation they want, and answer the hard questions about the condition of the air traffic system.

The administration wants to have it both ways. On the one hand, they have been telling us for weeks that the system is safe. Now they have passing the word that there is an emergency out there, and they need this pay package to keep the system going. This midnight bonus is not going to make the system safer by one iota.

Other speakers will point out other inequities of this proposal, so I will not go into more detail, with time limited as it is.

I urge defeat of the motion to recede and caucus.

Mr. FORD of Michigan. The accurate figures are that this would apply to about 6,000 controllers. You can take your own pencil and divide $57.5 million by 6,000 controllers and you get some idea of what the impact is.

But the important consideration is that we are operating on a budget resolution that set expenditure levels for 3 years, and that is the estimated cost for the first year. Presumably, if we are successful in getting the system back up to speed, we will have twice as many controllers in a couple of years as we have now, and the cost for those controllers will be in proportion to that increase.

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Arizona.

□ 1640

Mr. UDALL. I want to associate myself with the remarks of the gentleman from Michigan and congratulate him on getting on top of this thing quickly. This illustrates everything that is bad about these midnight conference reports. Somewhere, somebody has a little old amendment. It takes one little group of Federal employees who have already had the 4.8 percent that everybody else is getting and takes the people who are under the pay cap now and sets them aside and said for this little special group here is a goodie and it is not Christmas yet.

This amendment ought to be defeated.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

Mr. Speaker, regardless of how Members decide, they ultimately are going to vote; there is a serious budget problem that is involved with this amendment.

This amendment would provide for $57½ million to be paid, but the language of the amendment says, "shall be eligible."

That establishes an entitlement. The Parliamentarian has indicated that that is essentially a new entitlement that we are providing here.

The first budget resolution requires that if there is going to be a new entitlement, it has to be within the ceilings established by the committees. The committee in this case has not established a new entitlement to allow for this $57½ million. Therefore, under section 305 of the budget resolution, the entire resolution would be held at the desk as required by 302 and would not be passed because there is no entitlement that allows for this provision.

Members ought to be aware of that fact in the event that the resolution does reach the point of passing both Houses.

Mr. TAYLOR. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Missouri.

Mr. TAYLOR. I thank my chairman for yielding.

There is one point I would like to clarify. I believe the chairman indicated that this cost would be approxi-

mately $900. That was based on the division of the air traffic controllers into the amount of money; is that true?

Mr. FORD of Michigan. Well, the bill does not apply just to air traffic controllers, it applies to many more employees of FAA than air traffic controllers.

We can only estimate, because the Congressional Budget Office has not had time to cost this out for us, and the administration has no cost figures for it, except the figures in an earlier conference report, which is $7.5 million and we worked it out on the basis of 6,000 controllers to whom we know it would be applicable, some will get a little increase and some will get a large increase. When we average $57 million out by 6,000 controllers, it comes out to $9,500.

Mr. TAYLOR. Is it not also true that this will be spread among more than 6,000 people? Actually we are talking about 24,000 people, because it includes, under the scope of this amendment, as I understand, and of the bill that was originally intended for the committee, and I tend to agree with the gentleman's reservation on that. Actually we are talking about 24,000 people, which included the flight service station, professional specialists, and other groups. That brings that total to which this money would be divided, not among 8,000 employees, but among 24,000 employees and, in fact, would amount to $2,200 per employee instead of $9,700?

Mr. FORD of Michigan. The gentleman may be correct. But, we are not talking about $57 million to pay the salary of these people. We are talking about an increase of $57.5 million in benefits over the present level, which is already in this year's budget.

This $57.5 million is not to pay for new controllers. It is to pay additional compensation to people already on the job.

So we probably cannot divide the $57.5 million among the number of people who, by definition, are affected by the amendment, since we do not know all classes of FAA employees involved.

Mr. TAYLOR. It is to pay those who stayed on the job, who did not strike, together with the other classified people who work——

Mr. FORD of Michigan. It is also to pay the managers and other employees who did not belong to the union.

It may pay everybody over there except the employees who punch the typewriters.

Mr. TAYLOR. But the point remains there are 24,000 union employees who will benefit by this amendment if it is passed?

Mr. FORD of Michigan. No.

Mr. TAYLOR. About 17,000?

Mr. FORD of Michigan. No; there are no longer any union employees who are air traffic controllers.

Mr. TAYLOR. Are not the flight service station specialists and the professional air specialists AFL-CIO union employees?

Mr. FORD of Michigan. The gentleman is a member of my committee. He may have contact with such a union. I could not answer that.

Mr. TAYLOR. I assure the gentleman that those people are members of the union and they support it also.

Mr. FORD of Michigan. I have no idea how many other FAA employees are involved.

Ms. OAKAR. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentlewoman from Ohio.

Ms. OAKAR. I thank the gentleman for yielding.

I certainly want to join the gentleman in supporting the gentleman's opposition to amendment No. 70. It is very controversial. It would benefit only a handful of Federal employees. It grants these employees special pay and special benefits that have been denied other Federal workers. It appears to provide an 11.4-percent pay increase for some while at the same time more than 2 million other Federal employees this year alone experienced $6 billion in cuts in pay and benefits for fiscal year 1982.

Now, I know that the Secretary of Transportation has been calling day and night on this issue, because we have not had one hearing on this issue and we have not had a minute of debate until this time today. I know he is characterizing this amendment as a simple procedural change in pay and benefit structure for these employees.

Believe me, it is not simple. It is not a procedural change. It is a major—and I want to repeat this—and if this is the way we want to legislate without any congressional hearing, for a handful of Federal employees at the dismay of the rest of the Federal employees, fine, but it is a major departure from the established pay and benefit system that Congress is supposed to establish.

Secretary Lewis claims this extraordinary method of passing legislation is necessary to reward these controllers who stayed on the job. But, for the record, Secretary Lewis did not submit this legislation to my subcommittee, nor to the full committee for consideration. And the legislation was only introduced on the House side last Thursday. And as the chairman pointed out, it has not even been introduced at all on the Senate side.

So, let us not usurp proper proceedings of our House's jurisdiction. This is a comprehensive change in the Federal salary schedule and the House deserves oversight and deserves a markup of a bill. And I certainly urge the rejection and join my chairman in his eloquent comment concerning this.

Mr. FORD of Michigan. I would like to ask the Members of the House to vote "no" on the Coughlin motion to recede.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. SAVAGE).

Mr. SAVAGE. Mr. Speaker, I just wanted to join in support of the gentleman from Michigan (Mr. FORD) because this proposal is indeed a deceit not to benefit our controllers but to encourage retirees and others to strike break, to take away benefits for which the air controllers are fighting. And it is interesting that the President, who was supported by the air controllers union, is now opposed to them, and I am in support of them despite the fact that the air controllers need an affirmative action program to increase the proportion of blacks among its membership.

I only hope that in all good faith and fair reciprocity if they do win they remember that Gus SAVAGE spoke for them and will consider some affirmative action in the future.

We must know that prices have gone up more rapidly than wages in this country, and if we are going to worry about the defense of America we must provide the working people, who built this Nation, with a reason to defend it. And without unions, with union busting, prices will either further outstrip wages at the time when families have both husband and wife working and cannot make ends meet. This body should not permit the President to turn it into a union-busting body.

Mr. COUGHLIN. Mr. Speaker, I yield 5 minutes to the distinguished ranking minority member of the Appropriations Committee, the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, on August 3 of this year, air travelers of this Nation experienced a shock to their flying lifestyle. This country's air traffic controllers for a number of reasons made a very agonizing decision to walk off their jobs, and whether we agree with the more than 11,000 men and women who have participated in this action or not, the fact remains that some 5,400 controllers, 3,000 supervisory personnel, decided to remain in their positions.

Mr. Speaker, many of those dedicated men and women, at great personal sacrifice, worked very long, hard, arduous hours. Many picked up their families, many moved to different locations where the staffing needs were the greatest. The pay package before us—these are the facts—represents an average of 6.6 percent—not 50 percent—6.6-percent pay improvement for working controllers and not 50 percent.

□ 1650

Mr. Speaker, all of us here go home nearly every weekend, some all the

way to California, me to Massachusetts. We fly in those airplanes. We made a deal, the Government made a deal with those controllers in those towers. When I fly home, I want those controllers to know that I am going to carry out my part of the bargain and I am not going to shirk it here today and not give them their pay raise. I think that every one of your constituents feel the same way.

So today, let us live up to their expectations, give them what they have coming, give them their 6.6 percent and the other fringe benefits, whether you agree or disagree with the strike, give them what they have coming to them.

The pay package before you today represents an average 6.5-percent pay improvement for working controllers. In fact, it equals the tentative contract that was agreed to by PATCO negotiations in June of this year. I respect and honor the objections of my colleagues that say the manner in which this package is before us violates the committee system. There is no question that exceptions to our normal legislative process should not be taken lightly.

But the outstanding and dedicated work of those people who have kept our air traffic system operating should also not be taken lightly. They have given much of themselves, they have quickly adapted to changes in their routines, they should not be denied this modest pay package which averages some 6.6-percent pay increase. The package also provides coverage for air traffic control specialists in terminals, centers, and flight service stations, flight inspection crew members, electronic technicians, engineers, and related employees.

There may be some in this Chamber who say that we need not feel pressured into acting on this proposal just because the other body included it into the continuing resolution. I agree that we should not enact the proposal in deference to the Senate; rather, we should enact it because it is the right thing to do at this time.

As many of you are aware, the transportation appropriations conference report, which is referenced in this resolution, provides for $58 million for this pay package; it had already been considered.

We certainly could wait and allow this package to take the normal course of events, but what would be gained? We could congratulate ourselves that the process has been served, but we certainly would not be congratulating those who have sacrificed so much.

Mr. Speaker, I urge the membership to recede to the Senate on this amendment.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to my good friend, the gentleman from California.

Mr. ROUSSELOT. I thank my colleague for yielding.

Is it not true that this is basically what the union leaders had originally agreed to? Additionally several of those air controllers agreeing to abide by the law and not strike were promised that same raise.

Mr. CONTE. Exactly.

Mr. ROUSSELOT. Well, then, I cannot understand why we are not then just going right ahead with the raise. I think my colleague, the gentleman from Michigan, is terribly confused again.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield, since the gentleman referred to me?

Mr. CONTE. Yes, I yield to my good friend, the gentleman from Michigan.

Mr. FORD of Michigan. The confusion is on that side. The people that are covered by this never have belonged to a union, unless they did in years gone by. This covers managers, the managing people.

Mr. CONTE. Well, let me say this. Again, I repeat, for you and your people back home, who are going to do a lot of traveling for Thanksgiving to see their children and grandchildren; I ask this question: Do you want those controllers up there mad at you?

All right, let us make it safe for them and give them what they have coming.

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. Mr. Speaker, I want to compliment the gentleman from Massachusetts for that outstanding display of loyalty to his administration. I take his comments with that thought in mind.

I would like to say, however, that if he can find one nickel in this amendment that will put one additional controller in a control tower between now and the expiration of this resolution, I will walk off and congratulate him.

It does not add one single body to the force of people who are supposed to protect our safety. If it did, we would be on this floor taking a much different position.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Let me just make one point of clarification. I fully concur with the chairman of the full committee.

Mr. Speaker, I rise in opposition to amendment No. 70 to the continuing resolution. This nongermane amendment to the continuing resolution makes substantive changes in the air traffic controllers' pay and benefit system and should not be approved without any hearings or indeed one moment of debate.

Amendment No. 70 is a very controversial and complex change in the pay and benefit system for a handful of Federal employees. It grants those employees special pay and special benefits that have been denied other Federal workers. It appears to provide for an 11.4-percent pay increase for some while, at the same time, more than 2 million other Federal employees have lost almost $6 billion in pay and benefits for fiscal year 1982.

This amendment exempts certain FAA employees from the premium pay cap, exempts them from the dual compensation laws relating to military retirees, and it exempts them from the reemployed annuitant provisions of existing law.

As most Members realize, the Committee on Post Office and Civil Service has been trying for months to solve the air traffic control problems in a reasonable, responsible manner. Our committee knows only too well what is needed to bring the system back to full strength in a prudent, safe way. Certainly, the House does not wish to move in a manner that might jeopardize our efforts to resolve this potentially explosive situation. Certainly, the House does not want to spend $58 million to implement this amendment without any more deliberation than what has taken place so far.

As chair of the Subcommittee on Compensation and Employee Benefits, the subcommittee that would have jurisdiction over the proposal, I believe amendment No. 70 is bad legislation. It contains technical flaws and totally circumvents the authority of the authorizing committee. It is an outrageous way to pass legislation, regardless of the merits of the amendment.

I know the Secretary of Transportation is characterizing this amendment as a simple procedural change in the pay-and-benefit structure for FAA employees. Believe me, it is not a simple procedural change. It is a major departure from the established pay-and-benefits system for Federal workers.

Secretary Lewis has claimed this extraordinary method of passing this legislation is necessary to reward air traffic controllers who stayed on the job and because this matter has been dragging on since the August 3 strike. For the record, Secretary Lewis did not submit this legislation to my subcommittee for consideration and the legislation was only introduced in the House on Thursday of this week by request of the administration (H.R. 5038).

The Secretary knows only too well what a complex, controversial piece of legislation this amendment really is and I urge its rejection.

Let us not usurp proper proceedings of the House jurisdiction. This is a comprehensive change in the Federal salary schedule and deserves House oversight and a markup of bills. Therefore, I urge rejection of this amendment.

Mr. McEWEN. Mr. Speaker, will the gentlewoman yield?

Ms. OAKAR. I will be happy to yield.

Mr. McEWEN. Following the gentlewoman's comments, am I correct in assuming that it is her position that the 4.8-percent increase for the air traffic controllers is more than sufficient and adequate?

Ms. OAKAR. No. That is not what I am saying. The issue is not whether these FAA employees deserve more than a 4.8-percent pay raise. We would like to have a hearing on this issue.

What I am saying, I am a Member of Congress and I believe we have the right to legislate and it is our jurisdiction to set up a salary scale, not to have it tagged on by the Secretary of Transportation who is afraid to have a congressional hearing on an issue that is very sensitive. Let us not shirk our duties as Members of Congress. We certainly promised early hearings on the administration's pay package.

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, may I say the committee's motion was to insist. What we are debating now is a preferential motion, and my all means we should vote against the perferential motion.

In addition to the other things which have been pointed out, if this matter were to carry, it would have the effect of hampering the operation of Congress because the resolution would have to remain at the Speaker's desk under the provisons of the budget resolution.

Mr. Speaker, I yield 3 minutes to the gentleman from Indiana (Mr. BENJAMIN).

Mr. BENJAMIN. Mr. Speaker, I urge my colleagues to reject the preferential motion and insist on the House disagreement to Senate amendment 70 and join with me to oppose that provision of the Senate version of the continuing resolution which incorporates the provisions of H.R. 5038, a bill introduced in the House on November 19, just 3 days ago.

That bill, submitted at the request of the administration, proposes up to 11.6 percent in additional pay for certain air traffic controller personnel and includes several very controversial provisions. For example, in the bill and under the Senate provision, a GS-15, step 1, supervisory controller, airways facilities engineer servicing computers or a flight service station specialist providing weather information to general aviation pilots, who works the evening shift on Thanksgiving Day will be paid at an annual rate of pay for that day determined as follows:

Base pay	$46,685
5 percent responsibility differential	2,334
10 percent night differential	4,668
Holiday premium pay	46,685
Total	100,372

Under this same Senate provision, if the employee is a former retired civil servant or retired member of the Armed Forces, he will also receive his pension in addition to the above-outlined pay scale.

In contrast, a GS-15 FBI agent on an investigation, a NASA engineer working on the Columbia Space Shuttle, or a four-star general in charge of a NATO maneuver on Thanksgiving Day during the same hours is capped at $50,112.50—or $57,000 if the pay cap is adjusted in this conference report.

In addition, the Senate provision would allow a retired air traffic controller to return to his position at the Federal Aviation Administration and receive a full salary in addition to his full annuity through December 31, 1984. This same provison applies to retired military controllers.

In summary, this proposal exempts certain FAA employees from the premium pay cap, from dual compensation laws relating to military retirees, and from the reemployed annuitant provisions of existing law. How is it possible to defend these broad exemptions without a full examination in the hearing process and in light of the sacrifices being asked of all other Federal employees?

While no cost estimate is yet available from the Congressional Budget Office, it is estimated by the Committee on Post Office and Civil Service that the cost of implementing the administration's proposal will be in excess of $50 million in the first year and more than that amount in succeeding years. I am sure that my colleagues agree with me that a full and detailed testimony from the administration is necessary as to why on July 31, 1 day before the beginning of the air traffic controller's strike, the administration would require a $40 million pay package for approximately 16,000 controllers as partial settlement of the contract while the present Senate provison is requesting in excess of $50 million for approximately 7,000 to 8,000 controllers and other facilities employees.

Finally, there appears to be a difference of opinion between the administration officials and our principal colleagues in the House. Both Chairman FORD and Chairlady OAKAR share my view that the continuing resolution is an inappropriate vehicle for legislation which is as complex and far-reaching as that of H.R. 5038 and Senate amendment 70.

The administration has been less than candid in its approach to the enactment of a benefit package for air controllers. They now urge us to act on an emergency basis. The emergency, if any, is created by certain Department of Transportation policymakers who demonstrated an ability to fire but not to properly and appropriately prosecute a pledge through the legislative channels. We will count this as practice without prejudice—let them try again with the authorizing committees.

Mr. PEYSER. Mr. Speaker, will the gentleman yield?

Mr. BENJAMIN. I yield to the gentleman from New York.

Mr. PEYSER. I thank the gentleman for yielding.

I want to understand, as the continuing resolution now stands is there any money for this payment in this present continuing resolution as it now stands?

Mr. BENJAMIN. What we have done is reduce the FAA account and then upon the insistence of the gentleman from Pennsylvania (Mr. COUGHLIN), we earmarked $57½ million for controller pay. However, in the continuing resolution, this account was reduced by $20 million and our approach in the conference was to disagree with our Senate colleagues.

Mr. PEYSER. Basically, if we vote to put these people in, we are going to be spending more money than we had anticipated basically in spending. We have already defeated this.

Mr. BENJAMIN. There is no doubt that if we adopt the conference motion, that we will have to come back with a supplemental appropriation.

Mr. COUGHLIN. Mr. Speaker, I yield 8 minutes to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. At the administration's request, I introduced legislation to increase pay and benefits for air traffic controllers and other airways systems personnel. Obviously, on Senate initiative, there was to be a new game plan—a plan which has complicated the legislative process.

The amendment in question was one of the multiple 11th-hour additions to the continuing resolution adopted by the other body. Specifically, the amendment added to the resolution the entire air traffic controller package which I introduced in this body Thursday. I do not believe that any substantive changes were made.

I applaud and support the air traffic controllers, supervisors, flight station personnel, and technicians who have continued to perform in admirable fashion despite difficult circumstances. I, for one, believe they merit increased compensation.

The legislative proposal I introduced is important and deserves support. The package includes a 6.6-percent increase for working air traffic controllers. That 6.6-percent improvement equals the tentative contract that was agreed to by the PATCO negotiations in June 1981.

The chairman of the Post Office and Civil Service Committee and I were prepared to implement what we considered was the correct procedure for processing this legislation.

I support the administration's effort to rebuild the air traffic control system and to restore it to prestrike capacity.

Mr. Speaker, this is not an easy subject, so without meaning to imply any attitude of disrespect for any previous speakers, let me first set the record straight.

It is true, as the gentleman from Michigan (Mr. FORD) said, that legislation had been introduced and we had reached a tentative agreement as to hearings which would be held in the second week of December.

We also agreed in general as to some of the witnesses that we would call. We understood, frankly, between us the sensitivity of the issue.

□ 1700

Then the Senate acted and incorporated the bill that was introduced in the House, into the Senate bill. So I find myself in a position of questioning whether my loyalty lies to House procedures or whether my loyalty lies to the legislative goal. And obviously, once one separates oneself from the detached world of the legislative arena, one realizes that it is the final goal that is important, not any addiction to procedure. So I have to reach my conclusion in that fashion.

Now, let us get a few other facts straight, because the debate has been handled with cleverness, not necessarily with facts.

Let me remind the Members that on August 3 PATCO commenced an illegal strike. I assume nobody will challenge that statement because it was illegal.

Second, at that point approximately 3,000 PATCO members continued to work, along with approximately 2,500 non-PATCO controllers. That is approximately 5,500 people. They were joined by supervisors, military personnel, and some retirees called back to duty. That new collection of manpower has very effectively and safely handled the airlanes.

The proposal in the bill which I introduced, which the Senate adopted, merely provides for all the workers who continued to work, the same pay package that Mr. Poli, on behalf of PATCO, signed on the 22d of July and then repudiated in their vote. I may have the date wrong, but the point is, they signed the agreement, then rejected it, then staged an illegal strike. And the figures contained in this Senate proposal are identical to the package that had been negotiated and signed.

At this point, these figures would apply to everyone now manning the FAA responsibility in the airlanes, which would mean traffic control specialists in terminals, flight inspection crews, technicians, and people doing the training in addition to their normal workload.

The figure, again I emphasize, is what would have been in force if the contract had been accepted.

Now, here is where we get to what I think is the guts of the issue.

First, public opinion is completely behind the President in continuing the services provided by our airlines. I think Members who come from the most union-oriented districts find little sympathy for the striking PATCO members.

Second, in my opinion, PATCO has set back the cause of public unionism at least 25 years. They have harmed every public employee union in the country by their arrogance and the attitude they took. There is no public sympathy for them.

Third, we are in an unusual situation. Here we are struggling through this awesome piece of legislation when most Members have one ear tuned to the Redskins-Cowboy game. So it is an unnatural atmosphere to begin with, plus this nail-biting as to whether the Government will go on tomorrow morning with any sort of official budget.

Then we, of course, also live in an artificial world of our committees, where we sit in solitary splendor thinking every judgment we make is the most awesome in the world. I understand that, since I think my two committees are the two greatest that a legislative body ever had.

But the reality is this: We have a safely functioning air control system. We have people who have labored under great pressure to keep it so. They are being offered a pay package consistent with previous decisions. They are entitled to it. And then, because we are caught in an unnatural budget problem of our own, we are turning our backs on the realities of the air traffic issue.

The issue is simply this: Do we want the continued, effective service of the present air traffic system? If we do, we must support the Senate position. If we do not, and we want further responsibility for possible chaos in that area, or if we want to take the position that we are going to force the Government to take these strikers back even when they flagrantly violated the law, support the Ford position.

I would like to close by making a necessary comment about the Secretary of Transportation.

Mr. PEYSER. Mr. Speaker, will the gentleman yield?

Mr. DERWINSKI. In just a moment. The last time I recognized the gentleman he was on this side of the aisle. Oh, no. That was years ago.

I would just like to make this point. One Member questioned the good faith of the Secretary. I happen to think he has good faith. I happen to think he is an amateur when it comes to judging legislative problems, and part of the problem we have is the Secretary's overeagerness to cooperate with the Senate. But if we were in his shoes, I would probably do the same thing.

There was a statement that he was afraid of a hearing. He is not. He makes an excellent witness. He has been before our committee, and nobody could lay a glove on him, and they will not when he comes again in few weeks.

Then the reality of my committee, frankly, the Committee on Post Office and Civil Service, is this. Those Members who were here when we passed Civil Service reform and, years ago, post office reform, recall the procedure. The committee is slightly unbalanced in its legitimate bias. As a result, it always produces, on a major gut issue like this, an imperfect instrument, which we then correct on the floor. So my expectation was that we would cooperate in the timetable, bring an imperfect instrument to the floor, correct it, and then we would have true reform of the benefits package for air traffic safety employees.

But that issue did not come quite that way. It is here today. And if we accept the Senate position, we are voting for the effectiveness of the safety conditions in the air. We are saying that we, as a Congress, understand that the law does not permit Federal employees to strike. We are saying we knew these people brazenly defied that law, thinking they could bring the Government and the country to a standstill. They badly miscalculated. And if we insist on the House position as opposed to the Senate position, we are the ones who are risking the safety of air travelers.

Mr. GLICKMAN. Mr. Speaker, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from Kansas.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. COUGHLIN. Mr. Speaker, I yield 2 additional minutes to the gentleman from Illinois (Mr. DERWINSKI).

Mr. GLICKMAN. Mr. Speaker, while I do not agree with the gentleman in his attitude about perhaps the brazen attitude of the strikers, I would have to tell the Members that there are a lot of very overworked human beings in these air traffic control towers right now. And starting tonight, these people face perhaps the most hectic period of their time.

I do believe that the Secretary of Transportation had promised some benefits, and from what the gentleman from Illinois was saying, those benefits are substantially included in the Senate package.

Mr. DERWINSKI. Completely.

Mr. GLICKMAN. So I would say that while I also respect the problems of people on the Post Office and Civil Service Committee who have some jurisditional problems, I think that these are benefits these traffic controllers need and deserve, apart from the strike issue. I think the administration may have mismanaged part of the strike issue, but we have these people now working in every airport in the country, they are overworked, and they will be way overworked when the snows hit O'Hare Airport between now and Christmas Day. I think the Senate provision should prevail.

Mr. DERWINSKI. Mr. Speaker, let me just take the inspiration given me by the gentleman from Kansas.

That is the point. The issue here is not the nobility of the Post Office and Civil Service Committee chairman. I would attest to that nobility. The issue here is not the wisdom and strength of the gentleman from Indiana (Mr. BENJAMIN). I will attest to his wisdom and strength. But we are not voting on that.

What we are voting on is a package to give the honorable, loyal, hard-working air traffic controllers a pay package that their striking brethren could have had if they obeyed the law. And that is the issue that is going to come across to the country in the next few days, if we wind up in an impasse on this issue.

The SPEAKER pro tempore. The time of the gentleman has again expired.

The gentleman from Pennsylvania (Mr. COUGHLIN) has 15 minutes remaining, and the gentleman from Mississippi (Mr. WHITTEN) has 6 minutes remaining.

Mr. COUGHLIN. Mr. Speaker, I yield 3 minutes to the gentleman from Kentucky (Mr. SNYDER).

Mr. SNYDER. I thank the gentleman for yielding.

□ 1710

Mr. SNYDER. Mr. Speaker, I think a couple of things need to be put in proper perspective, and perhaps they have been. The question was raised as to what this does to the budget. Let me say that this does not increase the Federal spending, but this cost is going to be absorbed by the FAA's operating budget for fiscal year 1982, and is already included in its total.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield at that point?

Mr. SNYDER. Surely.

Mr. ROUSSELOT. It does not increase the cost of Government, is that correct?

Mr. SNYDER. That is what I said.

Mr. ROUSSELOT. Then we have heard another false statement.

Mr. SNYDER. That is right. It is not a question of balancing the budget, it is not a question of cutting the spending. It is in there, in the operating part. But, it is a question of equity; it is a question of honor. It is simply a question that 5,400 air traffic controllers, 3,000 supervisory personnel, the people who work on the equipment, the flight service station personnel, they have maintained our system, working together under very difficult circumstances since last August when we had that unauthorized and illegal strike.

If there had been no strike there would have been many more thousands who would have gotten this under the package that the Secretary of Transportation offered. So, this is what the deal is. It is the deal negotiated with the Secretary of Transportation when the PATCO people also signed onto and, which they subsequently had them to reject.

If the House in its weary wisdom, and I know that we are all tired here at 5 o'clock on Sunday afternoon, chooses to reject this amendment, we are thumbing our noses literally at the very people who defied enormous peer pressure, patriotic Americans who obeyed the law, who abided by their contracts, stayed on the job, who kept our airways open and safe for the past 16 weeks; we are going to say to them, "It doesn't pay to stand by your word, to stand by your Government and to work your butts off to keep our airways safe for those people going back and forth."

Like the gentleman from Kansas alluded to, these people were required early on to work 60 hours a week, and that is tough. We can understand that the last couple of days around here. They are down now to 42 or 44 hours. With the holidays coming on, they are going to have to go back to 60 hours.

I do not like legislating on an appropriation bill. That is a legitimate complaint, but this problem is with us now and needs to be solved now. That legislative committee can have its hearings. If they determine that this action is wrong they can amend it, they can up it, they can lower it, whatever is proper within the next couple of months. Sixteen weeks ago the air traffic controllers who defied their union, stayed by their contract, and by their oath and by the United States Code, stayed on the job, they did not say, "Wait." They did not say, "We are going to have hearings to see whether we are going to keep your airlines running." They went ahead and worked and stayed at their positions and did what they were supposed to do.

The SPEAKER pro tempore. The time of the gentleman from Kentucky has expired.

Mr. COUGHLIN. Mr. Speaker, I yield 1 additional minute to the gentleman from Kentucky.

Mr. SNYDER. This is just an attempt to reward those people for dedication in an honorable way, to say, "Yes, you did what was right, and we are going to give you what we promised you."

That is all it is, and I want to say that they stayed on the job, and those who are becoming controllers deserve this inducement. They received the compensation that they were agreed to by the Department of Transportation subject to the approval of Congress and I hope that Members will support the gentleman's motion to recede and concur and agree in the Senate's proposition to keep our commitment to these people who kept their commitment to us.

Mr. VOLKMER. Mr. Speaker, will the gentleman yield?

Mr. SNYDER. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Speaker, I initially heard, did the gentleman say 3,000 supervisors and 5,400 controllers?

Mr. SNYDER. They are included in the group.

Mr. VOLKMER. That is what the gentleman said?

Mr. SNYDER. That is not the total number, because it also includes about 24,000 or 25,000. The other 17,000 belonged to other unions.

Mr. VOLKMER. But there are 3,000 supervisors for 5,400 controllers. That is almost 1 supervisor for 2 controllers.

Mr. COUGHLIN. Mr. Speaker, I yield 2 minutes to the gentleman from Louisiana (Mr. LIVINGSTON).

Mr. LIVINGSTON. Mr. Speaker, I doubt that I will even take the full 2 minutes. I just want to point out that this is a procedural vehicle. The gentleman on the other side who spoke and said that they should not bring this matter up now may be right, but this is a procedural vehicle to do what is right, to compensate those people who stood by this Nation in a moment of crisis, at a time when the entire air transportation network threatened to close down, when the doomsayers throughout the country said the entire country would collapse because we had no air traffic. A handful of controllers and operators worked overtime and did what was necessary to keep the country operating.

If we refuse to recognize those people, if we turn this motion down, if we attempt to deprive them of what is rightfully theirs, what they have earned over the last trying months and will continue to earn into the next few weeks, into the Thanksgiving and into the Christmas holidays, then we are not doing our job in living up to our responsibilities.

Mr. PEYSER. Mr. Speaker, will the gentleman yield for a question?

Mr. LIVINGSTON. I yield.

Mr. PEYSER. I would just like to know, because I am curious: What is the median pay scale of the people we

are talking about now? How much do they earn?

Mr. LIVINGSTON. The amendment before us, if I can reclaim my time——

Mr. PEYSER. What is the answer?

Mr. LIVINGSTON. I only have 2 minutes.

The SPEAKER pro tempore. The gentleman in the well has the time.

Mr. EDWARDS of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. LIVINGSTON. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Speaker, just because I have heard so many times now the argument about how we have not had hearings, something being brought to this floor without hearings, I have been a Member of this body for 5 years, and as Members on the other side of the aisle know, that has been a very frequent thing.

Mr. LIVINGSTON. I would just like to sum up by saying that these people deserve what we are talking about, that they have earned it. Let us give it to them.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia (Mr. JENKINS).

Mr. JENKINS. Mr. Speaker, Members of the House, I oppose the preferential motion and support the chairman of the Education and Labor Committee, but probably for different reasons than have been expressed. First of all, I want to answer the gentleman from Louisiana. What he is really asking us to do is to vote for a bonus for people who have obeyed the law. That is really what he is asking us to do, to give a bonus to people who have obeyed the law. I do not know that that is a good precedent for us to set.

Second, for all of the people who are now working or are good employees, I understand that there are thousands and thousands of applications of people who are trying to become employees of the FAA at existing economic salaries. I do not know that the demand is there.

Third, I would have to agree with the committee that in an issue like this, however emotional, that maybe on the House floor we ought to at least have the opportunity to consider this in a committee so that we can make a reasoned determination as to whether or not they deserve the increase.

Mr. CONYERS. Mr. Speaker, will the gentleman yield?

Mr. JENKINS. I yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Speaker, I think the gentleman makes a good point. Is it fair to assume that the more money they make, the more hours they are going to work?

Mr. JENKINS. I really do not know. I would like to make one other point, also. There are a lot of military people working out there who have been called in. Do they get the 6.5 percent? No; they do not. So, I just do not think this legislation has been reasoned out, and I urge the Members of the House to support the gentleman from Michigan, the chairman of the Education and Labor Committee.

Mr. COUGHLIN. Mr. Speaker, I yield 3 minutes to the gentleman from Georgia (Mr. GINGRICH).

Mr. GINGRICH. Mr. Speaker, I thank the gentleman for yielding. Some Members may be confused about the issue at stake here. For example, there are some politicians who seem shocked that we might want to provide a bonus for people who obey the law. This is a change for some politicians who have believed in bonuses for breaking the law rather than obeying the law, and they may be shocked that we would reinforce and applaud people who stayed on the job and tried to help America.

What is really at stake, and I think it is important to focus on this because there has been misinformation in this debate, there are two unions who belong to the AFL-CIO, whose members are involved, watching. There are over 6,000 men and women who were controllers, who are controllers, who chose to obey the law, and they are watching. The people who kept the airlines safe are watching.

Now, it is true that some pro-PATCO Congressmen have no interest in passing a pay raise unless they can set up standards that guarantee rehiring striking controllers.

□ 1720

It is true there are some Members who favor Mr. Poli and the right of certain employees to strike and who want to block any effort to help the people who stayed on the job. We have heard Members complain about the Secretary of Transportation, Drew Lewis, but this Congress has had 4 months to pass a pay bill to reward the people who helped America. Congress did not act.

Now we can act. The burden is on us, not on Drew Lewis. An "aye" vote on this proposal will be seen by the American people as a vote for the controllers who obeyed the law and worked to keep the traffic moving and operating safely. A "no" vote on this proposal will be seen by the American people as a vote for breaking the law, for illegal strike by Federal employees, and against the men and women who served America in a crisis.

I say to the Members who will be flying home for Thanksgiving, is it not time to help those people who helped us in a time of crisis?

Mr. REGULA. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from Ohio.

Mr. REGULA. Mr. Speaker, the gentleman used the word, "bonus." As I understand it, this is not retroactive, and a bonus normally implies something paid for past services.

I just want to be sure that I understand this. This would simply implement a contractual relationship made many, many months ago and would be entirely prospective, in other words, for the services; is that correct?

Mr. GINGRICH. Mr. Speaker, the gentleman, who is a member of the Appropriations Committee, is exactly correct. I was only pointing out that psychologically I feel it is time that we helped the people who helped us in this crisis.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I thank my colleague for yielding.

Let me ask, who is covered in this in addition to the air controllers and the supervisors mentioned? Are any of the other people covered?

The SPEAKER pro tempore (Mr. KAZEN). The time of the gentleman from Georgia (Mr. GINGRICH) has expired.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, I would like to call the attention of my colleagues here to the fact that this provision would not have been permissible, under the rules in the House. It was written in the other body. It changes a number of laws without hearings as far as we are concerned, without any information. We are advised that they are changing law in a half dozen other directions.

This procedure would have been out of order had it been offered in the House, but it was written in the Senate. Had we done these things, according to the statement before us, it would have complicated a matter that should be taken care of by other means; it would be before a legislative committee whose business it is, and they would have looked at all angles of it.

This is in complete violation of the rules of the House. It would not be before us except that the Senate put it in.

Mr. Speaker, I urge the Members to vote down the pending amendment and call on the gentleman from Michigan (Mr. FORD) to take care of the matter properly, as he will do. I hope the Members will vote this down and let us proceed to other matters.

Mr. COUGHLIN. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, I urge my colleagues to vote to recede to the Senate amendment. In the other body this was not a partisan question; it had very broad bipartisan support.

The object was to give those men and women who stayed on the job the

pay that was agreed to and had been agreed to previously by the Secretary of Transportation and by the Air Traffic Controllers Union, to give them that break and to keep faith with those people who stayed on the job and did the job.

Mr. DERWINSKI. Mr. Speaker, will the gentleman yield for one question?

Mr. COUGHLIN. I am happy to yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Speaker, these figures contained in the Senate amendment would in fact have been the pay scale for the PATCO employees had they not gone on that illegal strike; is that not correct?

Mr. COUGHLIN. The gentleman is absolutely correct.

Mr. Speaker, let me make it clear in addition that this does not involve additional money. There is already money earmarked in the bill for this pay package. All this does is permit the Department to go ahead and apply the pay package that they had previously agreed to with the PATCO people. It provides a 6.6-percent raise across the board, the same raise that was agreed to in the negotiations between PATCO and the Department of Transportation initially.

The package that we are talking about—and that is a part of the continuing resolution through the Senate amendment—was in fact submitted to the authorizing committees back in the first part of November. It was reviewed with the chairman of the authorizing committee. It is not something that has just come down.

I say to my colleagues that if the authorizing committees and the Congress in their wisdom seek to change the package, it can be changed at any time, and that action would supersede the action of the Appropriations Committee. This is a stopgap proposition we are talking about. It is a stopgap proposition to permit the Department to pay the people who stayed on the job what they deserve and what they are entitled to.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I thank my colleague for yielding. One of my colleagues on the other side mentioned a moment ago that this was not fair to those from the military who had agreed to participate as air controllers. The military just received a 14-percent increase, so I really do not feel they were put in an unfair position by this amendment. I merely wanted to add that to this discussion because I do not believe that is an adequate reason for opposition to the raise.

Additionally, I am surprised that my good colleague, the gentleman from Mississippi (Mr. WHITTEN), raised the issue of nongermaneness. There are all kinds of major issues here and they are in this bill that would not be germane in this bill before us if House Members were able to make those points of order.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I think I have found the answer to the question I was trying to pose earlier.

We were told on the floor of this House that only 6,000 people were involved, and if we divide 50 some million by 6, that means $9,000 for each of them.

I would like to know if my information is correct. Is it or is it not correct that there are 17,000 other people belonging to AFL-CIO unions who would be covered by this legislation?

Mr. COUGHLIN. Mr. Speaker, the gentlewoman is absolutely correct.

When the agreement was originally negotiated, it was just with the air traffic controllers, but it was always the intention of the Department that when that agreement was finalized, it would have to apply to the other employees in the Department, the air traffic control specialists, as well as the people who operate the flight service stations, the flight crew inspectors, and others.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield so I may give a response to the gentlewoman from New Jersey?

Mr. COUGHLIN. I think the gentlewoman has received her response. Let me finish my statement, and I will then gladly yield to the gentleman.

Mr. FORD of Michigan. The gentleman has made his remarks. I might start calling for a quorum.

Mr. COUGHLIN. Mr. Speaker, it is my time.

Mr. FORD of Michigan. Now, Mr. Speaker, I yielded to all the gentlemen on the other side.

The SPEAKER pro tempore. The House will please be in order.

Mr. FORD of Michigan. Mr. Chairman, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. The gentleman in the well does not yield to the gentleman from Michigan.

Mr. COUGHLIN. I do not yield, Mr. Speaker.

The SPEAKER pro tempore. The gentleman in the well has the time.

Mr. COUGHLIN. Mr. Speaker, the controllers who stayed on the job, as well as those who have come aboard since the strike, did that in reliance on the fact they would get the pay package that had been agreed upon between the Department and PATCO originally.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania (Mr. COUGHLIN) has expired.

Mr. COUGHLIN. Mr. Speaker, I yield myself 1 minute.

The SPEAKER pro tempore. The gentleman from Pennsylvania (Mr. COUGHLIN) has 1 minute remaining, and he is recognized for that 1 minute.

Mr. COUGHLIN. Mr. Speaker, I urge my colleagues to support the controllers, the men and women who stayed on the job.

Let me say that this package also includes provisions for overtime and the temporary hiring of retirees, which is absolutely vital as we come to the holidays. If we do not want to have a major crisis with our airlines during the holiday season, we have got to pass this package and permit that to be done.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania (Mr. COUGHLIN) has expired.

The Chair will state that the gentleman from Mississippi (Mr. WHITTEN) has 1 minute remaining.

Mr. WHITTEN. Mr. Speaker, I yield my remaining 1 minute to myself.

Mr. Speaker, may I say to my colleagues that involved here is not the merits of rewarding these people who have done such a good job; involved is not the question of whether we should do it on this bill which would be a violation of the rules if offered in the House.

□ 1730

Involved is the fact that you have a continuing resolution that, unless we get it adopted, or something like it adopted, we will have a closed Government tomorrow. You are involved in a very complex question, a legal question with entitlements that are created here, and if you should adopt this amendment you are seriously jeopardizing the one way we have of keeping the Government in business tomorrow.

I ask my colleagues to vote down this amendment and do not complicate a continuing resolution. Let us go ahead and count on the gentleman from Michigan (Mr. FORD) and the others doing this in a proper way. I may agree with the gentleman as to what should be done, but let us not do it here in a continuing resolution and jeopardize the very operations of the Government tomorrow.

Let us turn this down and put it in the proper place and write it into the law like it ought to be.

The SPEAKER pro tempore. All time has expired.

The question is, Will the House recede from its disagreement to the amendment of the Senate numbered 70?

The question was taken; and on a division (demanded by Mr. COUGHLIN) there were—yeas 121, nays 87.

RECORDED VOTE

Mr. FRENZEL. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device and there were—ayes 213, noes 183, answered "present" 1, not voting 36, as follows:

□ 1740

Mr. ANDREWS changed his vote from "no" to "aye."

So the House receded from its disagreement to the amendment of the Senate numbered 70.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is, Will the House concur in the amendment of the Senate numbered 70?

The House concurred in the amendment of the Senate numbered 70.

□ 1740

PARLIAMENTARY INQUIRIES

Mr. NEAL. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. NEAL. Mr. Speaker, I am told by a member of the Budget Committee staff that under Gramm-Latta I, section 305, any conference report which exceeds allocations in the budget resolution cannot be enrolled, therefore cannot be sent to the President for signature until Congress adopts a second budget resolution. I am further told what we just adopted exceeds those budget resolutions. It essentially kills the conference report.

The effect of what I am saying is that we have just killed the conference report.

The SPEAKER pro tempore. The Chair will advise the gentleman that that result is not inevitable. There are ways to waive that provision.

Mr. GLICKMAN. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. GLICKMAN. Mr. Speaker, has a motion to reconsider been laid on the table with respect to that amendment?

The SPEAKER pro tempore. The Chair will advise the gentleman that it has not.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 73: Page 9, after line 5, insert:

SEC. 142. (a) Subsection (f) of section 280A of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following paragraph:

"(4) COORDINATION WITH SECTION 162(A)(2), ETC.—Nothing in this section shall be construed to disallow any deduction allowable under section 162(a)(2) (or any deduction which meets the tests of section 162(a)(2) but is allowable under another provision of this title) by reason of the taxpayer's being away from home in the pursuit of a trade or business (other than the trade or business of renting dwelling units).".

(b) The amendment made by this section shall apply to taxable years beginning after December 31, 1981.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

Mr. CONTE. Mr. Speaker, reserving the right to object, I yield to the gentlewoman from Rhode Island (Mrs. SCHNEIDER).

Mrs. SCHNEIDER. Mr. Speaker, while I believe Federal spending must be reduced, the conference report on the continuing resolution is an inadequate, irresponsible approach. Therefore, I intend to vote for a motion to recommit and against the conference report.

My reasons are straightforward. I cannot in good conscience vote for a stop-gap funding measure that axes

domestic programs, applying an across-the-board 2-percent cut, with reckless disregard for human needs and priorities. At the same time, the measure as proposed fails to attack waste, abuse, and generous subsidies of other programs.

I happen to believe that some Government functions such as education and energy assistance, are more important than others, such as pork barrel water projects, tobacco subsidies, and Government perks. Yet the spending proposal before us sets no priorities and exercises no discretion. Many of the human service programs that fall under the 2-percent cut have already been cut to the bone.

How can Congress in good conscience cut spending on the Nation's education programs by $1 billion, while granting itself a 4.8-percent pay raise? I cannot support a measure that includes a pay raise when there is no assurance of a subsequent vote to strike the pay raise.

How can Congress see fit to keep alive and kicking farm support and loan programs that we simply cannot afford: $79 million for tobacco, $75 million for sugar, and $500 million for dairy supports, just for starters. Taxpayers foot the bill not once but twice—with the higher prices we pay at the grocery store as a result.

Meanwhile, pork barrel survives in its glory. Congress has seen fit to slate $195 billion for the Clinch River breeder reactor in Tennessee and $189 million for the Tennessee-Tombigbee Waterway. Both projects are prime examples of blank checks written on the American taxpayer's account.

Government frills stay in place, as well. We spend $25 million a year for garage attendants for the House of Representatives, a generous budget at best. We spend $5 million a year on the use of enlisted personnel as personal servants for high-ranking military personnel.

And, while I believe we must improve our military, I have long maintained that a lean and mean, deterrent-oriented force requires paring of fat and waste and a more thoughful, coordinated overall defense spending strategy. Defense has in fact been exempted from the close scrutiny applied to Government spending in other areas. The 2-percent cut proposed in defense spending is temporary and cosmetic. It applies only to unobligated funds until December 9, or until Congress completes action on the Defense appropriations bill for fiscal year 1982.

The budget approach presented to us today is clearly shortsighted and unbalanced. There is no doubt in my mind that Government spending must be reduced, with the end goal of achieving a balanced budget and revitalizing our economy. But better judgment in terms of fairness and human need must be applied. There are too many fat cats, while, for example, children are asked to eat smaller school lunches and Americans in the frostbelt get little relief from higher and higher fuel bills. Equity must be the bottom line to any economic policy.

Mr. CONTE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi (Mr. WHITTEN)?

There was no objection.

MOTION OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FAZIO moves that the House insist on its disagreement to the amendment of the Senate numbered 73.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 74: Page 9, after line 5, insert:

SEC. 143. Notwithstanding any other provision of law or of this joint resolution, of the fiscal year 1982 Highway Trust Funds available for emergency relief, $17,000,000 shall be made available for damaged highways or for the prevention of damage to highways in the area affected by eruptions of the Mount St. Helens volcano.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 74 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 143 (a) Notwithstanding any other provision of law or of this joint resolution, of the fiscal year 1982 Highway Trust Funds available for emergency relief, $17,000,000 shall be made available for damaged highways or for the prevention of damage to highways in the area affected by eruptions of the Mount St. Helens volcano.

SEC. 143 (b) Notwithstanding any other provision of title 23, U.S.C., or of this joint resolution, the Secretary shall approve, upon the request of the State of Indiana, the construction of an interchange to appropriate standards at I-94 and County Line Road at the Porter-La Porte County Line near Michigan City, Indiana, with the Federal share of such construction to be financed out of funds apportioned to the State of Indiana under section 104 (b)(5)(A) of title 23, U.S.C.

SEC. 143 (c) Notwithstanding any other provision of law, or of this joint resolution any proposal for deferral of budget authority under section 1013 of the Impoundment Control Act of 1974 (31 U.S.C. 1403) with respect to budget authority for expenses related to the Northeast Corridor Improvement Project authorized under title VII of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210) shall, upon transmittal to the Congress, be referred to the House and Senate Committees on Appropriations and any amount of budget authority proposed to be deferred therein shall be made available for obligation unless, within a forty-five-day period which begins on the date of transmittal and which is equivalent to that described in section 1011 (3) and (5) of the Impoundment Control Act of 1974 (31 U.S.C. 1401 (3) and (5)), the Congress has completed action on a bill approving all or part of the proposed deferral.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The clerk read as follows:

Senate amendment No. 75: Page 9, after line 5, insert:

SEC. 144, Notwithstanding any other provision of law or of this joint resolution, none of the funds appropriated by this joint resolution or by any other Act shall be obligated or expended to increase, after the date of enactment of this joint resolution, any salary of any Federal judge or Justice of the Supreme Court, except as may be specifically authorized by Act of Congress hereafter enacted: *Provided further,* That nothing in this limitation shall be construed to reduce any salary which may be in effect at the time of enactment of this joint resolution nor shall this limitation be construed in any manner to reduce the salary of any Federal judge or of any Justice of the Supreme Court.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 75, and concur therein.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the

consideration of the conference report and amendments reported in disagreement on House Joint Resolution 357, and that I may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

PARLIAMENTARY INQUIRY

Mr. GLICKMAN. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. GLICKMAN. Mr. Speaker, if I voted on the prevailing side on the last amendment, would a motion to reconsider that vote lie?

The SPEAKER. The Chair would advise the gentleman that had he sought recognition at the right time, the gentleman could have moved for reconsideration, all motions to reconsider have been laid on the table by unanimous consent.

AUTHORIZING SPEAKER TO SIGN ENROLLMENT OF HOUSE JOINT RESOLUTION 357, NOTWITHSTANDING PROVISIONS OF HOUSE CONCURRENT RESOLUTION 115

Mr. CONTE. Mr. Speaker, I ask unanimous consent that notwithstanding the provisions of House Concurrent Resolution 115, the Speaker be authorized to sign the enrollment of House Joint Resolution 357.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts that the Clerk be permitted to enroll House Joint Resolution 357 if finally passed by both Houses?

Mr. PANETTA. Mr. Speaker, reserving the right to object, does the gentleman refer to section 315 or 305?

Mr. CONTE. Really all the provisions of the House concurrent resolution.

Mr. PANETTA. The gentleman is moving notwithstanding all the provisions of House Concurrent Resolution 115?

Mr. CONTE. Yes, in particular House Joint Resolution 357.

Mr. PANETTA. Mr. Speaker, further reserving the right to object, as I understand it, this provision would then allow for the continuing resolution to be enrolled.

Mr. CONTE. That is right, and go to the President.

Mr. PANETTA. Mr. Speaker, I withdraw my reservation of objection.

Mr. SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PARLIAMENTARY INQUIRIES

Mr. CONTE. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CONTE. Mr. Speaker, is there any idea how we proceed from here?

The SPEAKER. The conference report and motions that were just passed will be sent to the other body. When it is completed by the other body, if there are any amendments added in disagreement, it would have to come back to this body. If they were to accept the legislation as sent to them, then it would have to come back here for enrollment.

If they were to complete the bill and send it for enrollment, it could take up to 4 hours for enrollment. It would be enrolled and signed by the Speaker, in the Senate signed by the Vice President and then would go to the White House for the signature of the President.

The Chair has been informed by the President that he would veto it. If such a procedure takes place, then the House would probably be in recess until 10 o'clock tomorrow morning, for any formal work.

When the House recesses, we will recess subject to the call of the Chair, because the Chair is not aware of what the Senate may do, whether they will disagree to or amend some of our amendments. If they do, the minute the papers come, we will call the House in session and give a 15-minute notification.

If they accept everything, it will come back for enrollment and as the gentleman knows, that would be pro forma.

The Speaker would be here, but he cannot predict until such time as we have further information from the Senate how long the Members should stay, so we would be only speculating.

It appears to the Chair that Members ought to make plans to be back here at 10 o'clock tomorrow morning.

Mr. CONTE. Mr. Speaker, one further question, if I may. Assuming that the Senate defeats the House concurrent resolution, the continuing resolution, what would happen?

The SPEAKER. Then the House could bring up a further joint resolution, a continuing resolution to a time certain.

Mr. CONTE. One further question. I have had Members on my side request that instead of a 15-minute notice, if they could have a half an hour notice so they can get in here from their homes.

The SPEAKER. The Chair sees no objection to that.

Mr. CONTE. I thank the Chair. The Speaker is most fair, as usual.

Mr. WATKINS. Mr. Speaker, if it is in order, did the President indicate why he was going to veto the bill? It was below the Senate figure which he said it was going to be. He said he would pass anything with the Senate figure.

The SPEAKER. In order for the Chair to discuss that, he would have to take the floor.

RECESS

The SPEAKER. The House will stand in recess subject to the call of the Chair.

Accordingly (at 6 o'clock and 5 minutes p.m.), the House stood in recess subject to the call of the Chair.

□ 2300

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 11 p.m.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.J. Res. 357) entitled "An act making further continuing appropriations for the fiscal year 1982, and for other purposes."

The message also announced that the Senate agree to the amendments of the House to the amendments of the Senate numbered 11, 15, 29, 32, 39, 40, 43, 48, 53, 57, and 74 to the above-entitled bill.

The message also announced that the Senate recede from its amendments numbered 37 and 73 to the above-entitled bill.

ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly an enrolled bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 4144. An act making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. AuCoin (at the request of Mr. Wright) for November 21 and 22 (legislative day of November 20), on account of illness.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. Daub, immediately before the vote on the conference report on Housing Joint Resolution 357, today.

RECESS

The SPEAKER. The Chair declares the House in recess until 10 a.m. tomorrow.

Accordingly (at 11 o'clock and 1 minute p.m.), the House stood in recess until 10 a.m., Monday, November 23, 1981.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[*Omitted from the Record of November 21 (legislative day, November 20), 1981*]

Mr. WHITTEN. Committee of conference. Conference report on House Joint Resolution 357 (Rept. No. 97-352). And ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. GILMAN:

H.R. 5098. A bill to amend title VII of the Civil Rights Act of 1964 to prohibit employment discrimination on the basis of political preference; to the Committee on Education and Labor.

By Mr. KOGOVSEK:

H.R. 5099. A bill to provide for the enforcement of State laws upon the acquisition of lands by the Federal Government; to the Committee on Interior and Insular Affairs.

By Mr. MOORE:

H.R. 5100. A bill to amend section 62 of the Internal Revenue Code of 1954 to make the treatment of business expenses of ministers under such section consistent with the treatment of such expenses for purposes of social security taxes; to the Committee on Ways and Means.

By Mr. SMITH of Oregon:

H.R. 5101. A bill to authorize the Secretary of the Treasury to issue bonds that may be redeemed for gold; to the Committee on Ways and Means.

By Mr. MICHEL:

H.J. Res. 366. Joint resolution making further continuing appropriations for the fiscal year 1982; to the Committee on Appropriations.

By Mr. WHITTEN:

H.J. Res. 367. Joint resolution making further continuing appropriations for the fiscal year 1982; to the Committee on Appropriations.

SENATE—*Sunday, November 22, 1981*

(Legislative day of Monday, November 2, 1981)

The Senate met at 1:30 p.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us praise the Lord in the words of the Psalms.

Praise the Lord! Praise the Lord from the heavens, praise Him in the heights! Praise Him, all His angels, praise Him all His host! Praise Him, Sun and Moon, praise Him, all you shining stars! Praise Him, you highest heavens, and you waters above the heavens! Let them praise the name of the Lord! For He commanded and they were created. And He established them for ever and ever; He fixed their bounds which cannot be passed.

Praise the Lord from the Earth, you sea monsters and all deeps, fire and hail, snow and frost, stormy wind fulfilling his command. . . . Kings of the Earth and all peoples, princes and all rulers of the Earth! Young men and maidens together, old men and children! Let them praise the name of the Lord, for His name alone is exalted; His glory is above Earth and heaven.—Psalm 148.

O give thanks to the Lord, for He is good, for His steadfast love endures forever.—Psalm 136:1.

I give Thee thanks O Lord with my whole heart.—Psalm 138:1.

Blessed be the name of the Lord from this time forth and for evermore! From the rising Sun to its setting the name of the Lord is to be praised! The Lord is high above all nations, and His glory above the heavens.—Psalm 113:2–4.

Receive our praise and thanksgiving, Lord. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

A NECESSARY SUNDAY SESSION

Mr. BAKER. Mr. President, I apologize to Members of the Senate, and staff, officers, and employees of the Senate for the necessity for this Sunday session. They are rare and infrequent, but when they are held, they are necessary, as indeed it is necessary to ask the Senate to convene today.

The House of Representatives convened at 1 o'clock. They are now about the business of taking up the conference report which was agreed to late last evening, shortly after midnight. It is my understanding that a rule has been given that permits 1 hour's debate on the conference report and 1 hour on each of the three items in disagreement. If the full time for debate is utilized on the House floor, it would be at least 5 o'clock before the House completes action on the conference report and is in a position to send it to the Senate for further action.

Mr. President, I intend, shortly, to ask the Senate to create a time for the transaction of routine morning business and then to make provisions for the Senate to recess subject to the call of the Chair. I will make that request at this time.

ORDER FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS AND RECESS SUBJECT TO CALL OF THE CHAIR

Mr. BAKER. Mr. President, I ask unanimous consent that, after the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business to extend not longer than 2 hours in length in which Senators may speak.

Mr. President, I further ask unanimous consent that, at the expiration of the time for morning business or at the end of morning business, the Senate automatically stand in recess subject to the call of the Chair.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have no further need for my time under the standing order. I am prepared to yield it to another Senator or to the control of the minority leader, if he wishes the time.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. Under the standing order, the minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I yield to the Senator from Alabama.

THE CONFERENCE REPORT ON THE CONTINUING RESOLUTION

Mr. HEFLIN. Mr. President, I wonder if there is anything available, Mr. President, in writing where we can start studying the results of the conference report. Is there a prepared document which is now available?

Obviously, there must be for the House. I wonder, if we do not have them, if we can get copies of whatever is available.

Mr. BAKER. Mr. President, conference documents have been transmitted to the House. I will make every effort to obtain a copy of the conference report and make it available to the Members. I will try to have copies duplicated and made available to the cloakrooms.

Mr. MOYNIHAN. Mr. President, may I say, I took on myself to visit the House floor. I have returned with two documents which purport to be the agreement reached during the night. I will be happy to provide them to my friend from Alabama, if the pages will make copies.

Mr. HEFLIN. The Senator from Alabama appreciates the hospitality of the Senator from New York.

Mr. MOYNIHAN. Wait until the Senator from Alabama sees the numbers.

Mr. BAKER. Mr. President, there are a number of other documents involved. The two tables supplied by the Senator from New York are two documents that have been involved in the conference, but the documents are far more numerous than just those two. I will try to have the full package duplicated.

Mr. President, I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, does any Senator wish to have me yield at this time under the standing order?

Mr. President, I yield to the distinguished Senator from New York.

The PRESIDENT pro tempore. The Senator from New York.

SENATE RESOLUTION 246—RELATING TO THE HUNGER STRIKE OF ANDREI SAKHAROV AND YELENA BONNER

Mr. MOYNIHAN. Mr. President, I thank the distinguished minority leader for giving me this opportunity which I would use only to draw attention to the fact reported in this morning's press that a group of American citizens, Nobel Prize winners, and scientists, generally speaking, have appealed to the Soviet Union, the authorities in Moscow, on behalf of Andrei Sakharov and Yelena Bonner, who began today the hunger strike that they announced last week as a consequence of the refusal of the Soviet authorities to allow their daughter-in-law to emigrate.

Mr. President, yesterday I introduced in the Senate a sense-of-the Senate resolution that would call upon the Soviet authorities to grant this right guaranteed under the Helsinki accords. Clearly, the Soviet Union has driven Andrei Sakharov, one of the great men

of our age, to this final extremity of putting in danger his own life in protest against the conduct of his government. We can only admire him and can only hope that the government listens to the American scientists who are appealing. If they do not, I shall ask the majority leader, the minority leader, the chairmen, and the ranking minority members of the respective committees if they can take up the resolution I introduced in behalf of Andrei Sakharov.

I thank the Senator for yielding.

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I am now prepared to put the Senate in morning business.

The PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business.

AUTHORITY FOR COMMITTEE TO MEET

JUDICIARY COMMITTEE

Mr. BAKER. Mr. President, I ask unanimous consent that the Judiciary Committee be authorized to meet during the session of the Senate at 2 p.m. on Monday, November 23, to discuss these nominations:

Jesse E. Eschbach, of Indiana, to be circuit judge for the seventh circuit court of appeals.

Richard A. Posner, of Illinois, to be circuit judge for the seventh circuit court of appeals.

Clyde H. Hamilton, of South Carolina, to be U.S. district judge for the district of South Carolina.

David O'Brien, of the Virgin Islands, to be U.S. district judge for the district of the Virgin Islands.

John Moore II, of Florida, to be U.S. district judge for the middle district of Florida.

James Cacheris, of Virginia, to be U.S. district judge for the eastern district of Virginia.

Robert Miller, of Colorado, to be U.S. attorney for the district of Colorado.

Ronald Daniels, Jr., to be U.S. Marshal for the district of New Hampshire.

Jim Marquez, of Kansas, to be U.S. attorney for the district of Kansas.

James Rosenbaum, of Minnesota, to be U.S. attorney for the district of Minnesota.

The PRESIDENT pro tempore. Without objection, it is so ordered.

HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 225. Concurrent resolution with respect to the scheduled Presidential elections in Honduras; to the Committee on Foreign Relations.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

Special report entitled "Report of the Committee on Labor and Human Resources pursuant to Section 302(b) of the Congressional Budget Act of 1974" (Rept. No. 97-278).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PACKWOOD (for himself, Mr. MOYNIHAN, Mr. ROTH, Mr. DANFORTH, Mr. SYMMS, Mr. CHAFEE, Mr. DURENBERGER, Mr. LONG, Mr. BENTSEN, Mr. BAUCUS, Mr. MATSUNAGA, Mr. MITCHELL, Mr. GARN, and Mr. LUGAR):

S. 1883. A bill to amend the Internal Revenue Code of 1954 to conform the net operating loss carryback and carryforward treatment of the Federal National Mortgage Association to that of other financial institutions; to the Committee on Finance.

By Mr. MATSUNAGA:

S. 1884. A bill to amend the Internal Revenue Code of 1954 with respect to refunds relating to the repeal of the excise tax on buses; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PACKWOOD (for himself, Mr. MOYNIHAN, Mr. ROTH, Mr. DANFORTH, Mr. SYMMS, Mr. CHAFEE, Mr. DURENBERGER, Mr. LONG, Mr. BENTSEN, Mr. BAUCUS, Mr. MATSUNAGA, Mr. MITCHELL, Mr. GARN, and Mr. LUGAR):

S. 1883. A bill to amend the Internal Revenue Code of 1954 to conform the net operating loss carryback and carryforward treatment of the Federal National Mortgage Association to that of other financial institutions; to the Committee on Finance.

FEDERAL NATIONAL MORTGAGE ASSOCIATION LEGISLATION

● Mr. PACKWOOD. Mr. President, today, with Senator MOYNIHAN and several other Senators, I am introducing a bill to help insure the continuation of the availability of mortgage money to homebuyers.

This bill can have an important impact on the ability of the Federal National Mortgage Association—the Nation's largest single holder of residential mortgages—to continue to buy mortgages on the secondary market, thereby enabling primary lending institutions, such as savings and loans and commercial banks, to place new mortgage loans.

This bill changes the net operating loss carryback and carryforward rules for the Federal National Mortgage Association to that available for other financial institutions.

Under current law, financial institutions other than the Federal National Mortgage Association have a 10-year carryback and 5-year carryforward.

Also, under current law, most other businesses, currently including the Federal National Mortgage Association, have a 3-year carryback and 15-year carryforward.

This bill properly changes the classification of the Federal National Mortgage Association to that of a financial institution.

The FNMA is a vital part of mortgage finance in the United States. It now holds $60 billion in residential mortgages, or about 5 percent of all home mortgages in the United States.

The impact on my home State of Oregon is dramatic. The FNMA reports that, as of September 1981, it holds $274 million in mortgages on homes in Oregon, covering about 9,800 homes. This figure includes $141 million of mortgages on Oregon homes which the FNMA purchased since 1979, covering about 3,000 Oregon homes.

Recent high interest rates have caused the FNMA sizable losses, which can cripple their ability to serve the Oregon home buyer and home buyers around the country.

The FNMA, like other financial institutions dealing in residential mortgages, has faced mounting losses because of the increase in the cost of borrowing to raise funds to buy mortgages.

The bill enables the FNMA to take into account tax payments during the 1970's, beginning with 1972, in figuring its net operating loss deductions. The bill produces tax savings for the FNMA for their 1982 tax returns, with the revenue effect felt by the U.S. Treasury in fiscal year 1983.

Assuming future profitability of the FNMA, the revenue loss caused by this bill represents merely a shift in the year in which the tax benefit associated with the net operating loss occurs. Without this bill, the FNMA could deduct operating losses incurred in the early 1980's throughout the 15-year carryforward period.

However, with this legislation, the opportunity to deduct these losses occurs in fiscal year 1983. In any event, the revenue loss of the bill represents a shift in the timing of tax savings, not a permanent additional revenue loss to the Treasury.

Mr. President, I am delighted to report that the distinguished chairman of the House Ways and Means Committee, DAN ROSTENKOWSKI, and the distinguished ranking minority member of the Ways and Means Committee, BARBER CONABLE, have introduced identical companion legislation, H.R. 5013.

H.R. 5013 is scheduled for a hearing in the Ways and Means Committee on December 9, 1981. I expect that we can also schedule this Senate bill promptly for hearings.

Mr. President, I request unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1883

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That

(a) 10-YEAR CARRYBACK AND 5-YEAR CARRYFORWARD.—Paragraph (1) of section 172(b) of the Internal Revenue Code of 1954 (relating to net operating loss carrybacks and carryovers) is amended by redesignating subparagraphs (H) and (I) as subparagraphs (I) and (J), respectively, and by inserting after subparagraph (G) the following new subparagraph:

"(H) In the case of the Federal National Mortgage Association, a net operating loss for any taxable year beginning after December 31, 1981, shall be a net operating loss carryback to each of the 10 taxable years preceding the taxable year of such loss and shall be a net operating loss carryover to each of the 5 taxable years following the taxable year of such loss."

(b) CONFORMING AMENDMENTS.—

(1) Subparagraph (A) of section 172(b)(1) of such Code is amended by striking out "(H), and (I)" and inserting in lieu thereof "(H), (I), and (J)".

(2) Subparagraph (B) of section 172(b)(1) of such Code is amended by striking out "and (I)" in the second sentence and inserting in lieu thereof ", (H), and (J)".

(3) Paragraph (3) of section 172(i) of such Code is amended by striking out "subsection (b)(1)(H)" each place it appears and inserting in lieu thereof "subsection (b)(1)(I)".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to net operating losses for taxable years beginning after December 31, 1981.●

● Mr. MOYNIHAN. Mr. President, I am delighted to join Senator PACKWOOD. Our bill would let the Federal National Mortgage Association—Fannie Mae, for short—carry back its net operating losses for 10 years, and carry them forward for 5 years.

The general rule today is that a net operating loss may be carried back 3 years and forward 15 years. Thus, we would lengthen the carryback for Fannie Mae, but shorten the carryforward period.

Three observations about the bill: First, there are many exceptions to the general rule. This would not be the first. For example, in 1962, Congress extended whose losses were due to the general liberalization of trade. In 1964, a special rule was adopted for companies whose property was expropriated by foreign governments. They were given an extra carryforward period, but no carryback. And even this was amended later to provide more favorable treatment for companies whose property was expropriated by the Cuban Government, rather than the government of some other country. In 1967, the American Motors Corp. was given a special 5-year carryback. Three years was the rule for other companies at the time.

If there is a common theme in the debates about special rules, it is that special rules are justified when dealing with abnormally large, nonrecurring losses. A company needs extra time to average these in. Also, Congress has sometimes felt it desirable in the past to lengthen the carryback period when the United States is in a recession, because this "provides for a refund shortly after the loss is incurred, instead of requiring the business to wait and obtain the benefit of paying lower taxes in subsequent years." As the House Ways and Means Committee explained, during the recession in 1958:

Your committee believes that this current refund, rather than subsequently reduced taxes, is particularly appropriate at the present time as a means of placing funds in the hands of business(es) in a year when many of them are incurring losses.

Second observation. One of the existing exceptions is for financial institutions. Commercial banks, trust companies, mutual savings banks, and building and loan associations may carry their net operating losses back 10 years and forward 5 years. The same rule applies to banks for cooperatives—13 special banks set up by the Federal Government as part of the farm credit system. All we are asking is that Fannie Mae, which is itself a kind of financial institution, be treated the same.

Third observation. I am interested in doing something more than the administration is doing now to help thrift institutions. The New York Times reported on November 10, that nine savings banks in New York City are in danger of exhausting their surpluses within the next year. Three will run out of surplus within a few months. One of these, the Greenwich, has already been merged. A story in the Wall Street Journal this morning discloses that before the Federal Home Loan Bank Board stopped keeping a tally in July, the Bank Board had a list of 404 savings and loan associations that it considers in serious trouble.

The bill we are introducing may be a crude device, because it is indirect. But the Treasury does not oppose it.

Fannie Mae is a private corporation. It was not always private, but it has been since 1968. It borrows money from commercial lenders, institutional investors, and the public—usually at short- and medium-term rates—and uses it to purchase long-term mortgages in the secondary markets. Today, Fannie Mae owns $60 billion in mortgages, one-twentieth of all residential mortgages in the country. About 70 percent of the mortgages it purchases are originated by mortgage bankers. Seventeen percent are originated by savings banks and savings and loan associations.

Fannie Mae serves two functions, both related. It offers mortgage lenders a way to hedge against changes in interest rates. It does this by making commitments to buy mortgages, at a fixed price 4 months in the future. From the standpoint of a banker, a "commitment" is more like a "put" and he pays Fannie Mae a small fee for it, just as if he were buying a put in the stock market. A put is an option to sell. Four months in the future, if interest rates are down and mortgages are worth more, the banker simply keeps his mortgages. But if rates rise, he can sell the mortgages to Fannie Mae and, in effect, transfer his losses.

Fannie Mae's other function is to help housing. The idea was that by keeping the secondary market for mortgages liquid, banks and thrifts would be more likely to lend. Also, where mortgage banks are concerned, Fannie Mae serves almost as a source of primary financing, since mortgage banks are not depository institutions and make loans only if they have commitments from Fannie Mae to buy them.

In the last 2 years, Fannie Mae has had all of the problems of a thrift institution. Like a thrift, it borrows short and lends long. With interest rates up, the value of the mortgages it holds is down. On October 16, the Wall Street Journal reported than Fannie Mae suffered a record loss in the third quarter this year of $79.5 million. The chairman of Fannie Mae, David Maxwell, told the Journal that he expects to see red ink "for several quarters to come."

I repeat, the Treasury does not oppose this bill. A companion measure has already been introduced in the House by Congressmen ROSTENKOWSKI and CONABLE. It is H.R. 5013.

Mr. President, I ask unanimous consent for a New York Times article about Fannie Mae to be prnited in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STEPS TAKEN TO COPE WITH HIGH INTEREST

(By Karen W. Arenson)

The Federal National Mortgage Association, the Government's answer to the mortgage financing scarcity of the Depression years, is facing its greatest challenge yet in dealing with the housing problems of the 1980's.

For the first time since Fannie Mae was founded in 1938, its ability to continue to support the housing market has been called into question. The soaring interest rates that have strapped savings institutions and other mortgage lenders have left Fannie Mae vulnerable too. This year it reported its first quarterly loss in 12 years. And the Fannie Mae board raised some hackles in Washington recently when it appointed David O. Maxwell to succeed Allan Oakley Hunter as chairman next year without consulting Congress or the Department of Housing and Urban Development.

"Fannie Mae just has to have a complete change in the way it does business," said James Murray, its executive vice president and general counsel. "It's obvious we can't go on refinancing 8 percent mortgages at 11 or 12 percent. We are at a crossroads."

Fannie Mae's original mandate was to buy mortgages from lenders to provide them with more funds with which to make additional mortgages. For 42 years the organization has done just that, accumulating $56 billion for mortgages in the process, or about 5 percent of the total residential mortgages held in this country.

Along the way, it changed from a governmental agency to a quasi-governmental corporation. Its shares are traded on the New York Stock Exchange, but it is monitored by H.U.D.

Fannie Mae is beginning to take steps to realign its financial structure. Last Thursday, for instance, it declared that conventional mortgages it commits itself to buy after Nov. 10 may not be "assumed" by new homebuyers. Until now, mortgages held by Fannie Mae at perhaps a 7 or 8 percent interest rate could be assumed, or taken over, at that rate by a new buyer—a substantial attraction in an inflationary economy. If the mortgage is not assumable, a new buyer must

go to a bank or savings and loan association for a mortgage, which will carry a higher interest rate—now 13 to 16 percent in most areas.

In the 11 states that require lenders to permit the assumption of mortgages, Fannie Mae will retain the right to call in its mortgages after seven years, whether or not the homeowner is selling the house at that time.

"That will cause some consternation," conceded a Fannie Mae spokesman. "But it is the only way we have to insure that we are not carrying mortgages with very low yields relative to the market."

Fannie Mae also has other innovations in mind, including variable-rate mortgages and new methods of selling off mortgages.

The need for such changes is shown by figures. In the three months ended June 30, for example, the organization had a loss of $16.5 million. In the following quarter, in inched into the black with a $5.9 million profit, nearly 90 percent below the level of a year before.

A DIVERSITY OF GOALS

But Fannie Mae has more to worry about than its profitability. Under its charter, it is expected to run against the wind by supplying funds to the mortgage market when funds are hardest to come by. At the same time, HUD expects it to pay attention to special housing problems, such as those of inner-city residents. After fierce battles between the two organizations and their leaders—Mr. Hunter and Patricia Roberts Harris, who was then Secretary of HUD—Fannie Mae apparently met the department's guidelines specifying that 30 percent of its mortgage purchases be for low- and middle-income housing. An uneasy truce has existed ever since.

Bert Mason, an executive assistant at HUD, said of Fannnie Mae: "They have not refused to do anything we wanted, but they have not been aggressive enough in exploring what they might do."

Politics once loomed as Fannie Mae's largest concern, but finances clearly have taken center stage now. Mr. Hunter, who is retiring as Fannie Mae's chairman next June after 10 years at the organization, said: "I feel comfortable leaving now because we are not under attack. We do have financial problems, but no one is after my scalp."

There was some consternation, particularly in the Government, at Fannie Mae's apparent independence in choosing Mr. Maxwell to succeed Mr. Hunter. And many eyebrows were raised at the $225,000 annual salary he will receive, including perquisites. (Some critics noted that the President is paid only $200,000.) Mr. Hunter made $184,000 last year.

But most housing experts concede that Mr. Maxwell, now chairman and chief executive officer of the Ticor Mortgage Insurance Company, appears to be a solid choice.

"Dave is the right guy at the right time," said Anthony M. Frank, chairman and chief executive officer of the Citizens Savings and Loan Association in California. "His innovativeness will be useful in a volatile period."

Mr. Maxwell sees the financial challenge at Fannie Mae as bringing its assets and liabilities into better balance.

Fannie Mae now resembles an overgrown savings and loan association. It simply buys mortgages and holds them until they mature. With shareholder equity of only $1.5 billion, it must borrow heavily to finance its $55 billion mortgage portfolio.

The problem for Fannie Mae, as for thrift institutions, begins when its costs of financing mortgages outstrip the interest on them.

Because of its quasi-governmental status, Fannie Mae pays less for its funds than most private corporations. (Many assume that the Government would not let Fannie Mae fail, even though its bonds are not guaranteed by the Government.)

Fannie Mae also tries to undertake its long-term financing when interest rates fall.●

By Mr. MATSUNAGA:

S. 1884. A bill to amend the Internal Revenue Code of 1954 with respect to refunds relating to the repeal of the excise taxes on buses; to the Committee on Finance.

REPEAL OF EXCISE TAXES ON BUSES

Mr. MATSUNAGA. Mr. President, before enactment of the Energy Tax Act of 1978, a 10-percent manufacturers excise tax was imposed on buses sold by a manufacturer, a producer, or an importer. In the Energy Tax Act of 1978, the Congress sought to encourage the use of energy-efficient transportation through repeal of the manufacturers excise tax on buses. In effect, this repeal was to apply to all sales of buses made to ultimate purchasers on or after April 20, 1977, the date on which the repeal was proposed.

The Energy Tax Act contained provisions which effectively allowed, under certain conditions, exemption from the excise tax for buses sold to ultimate purchasers after April 19, 1977, and before November 10, 1978, the act's effective date. Under these provisions, a manufacturer, a producer, or an importer was allowed a credit or refund, without interest, for the tax paid on a bus if:

First, the manufacturer, and so forth, possessed evidence of sale to the ultimate purchaser and of reimbursement of tax to that purchaser;

Second, the manufacturer, and so forth, filed a claim for credit or refund with the Secretary of the Treasury before September 5, 1979; and

Third, the manufacturer, and so forth, reimbursed the ultimate purchaser for the tax paid on qualified sales of buses before September 5, 1979.

A number of bus purchasers, through no fault of their own, were not able to utilize this provision for buses purchased between April 20, 1977, and November 10, 1978. Their supplier was not in a financial position to refund the excise tax to the purchasers in advance of receipt of the tax refund from the Treasury. Other bus suppliers similarly hard-pressed financially, met the reimbursement requirement by borrowing funds; the funds were borrowed on the strength of a refund claim which had been audited by the Internal Revenue Service.

While other IRS district offices cooperated with financially strapped bus suppliers, one office did not. Consequently, the required audit was not performed to secure the loan of funds for reimbursement prior to the statutory deadline. As a result, the bus purchasers from this particular supplier were deprived of their funds of the excise tax. This bill intends to correct this unfortunate inequity.

The bill would amend section 231(c) of the Energy Tax Act of 1978 to broaden the conditions under which a manufacturer, a producer, or an importer would be eligible for a credit or refund of the manufacturer's excise tax paid on buses that were sold to ultimate purchasers after April 19, 1977, and before November 10, 1978. Under my bill, the date before which the ultimate purchasers must have been reimbursed is extended from September 5, 1979, to January 1, 1983. The bill would not, however, amend the requirement of present law that the party should have filed a claim for credit or refund with the Secretary of the Treasury before September 5, 1979.

In addition, the bill would relax the present stringent requirement that the manufacturer, producer, or importer possess evidence of reimbursement of the tax to the ultimate purchaser. Under the bill, the party would be allowed to make reimbursement at the same time it receives the refund. Such simultaneous reimbursement must occur under an arrangement, such as an escrow, satisfactory to the Secretary of the Treasury.

Assistant Secretary John Chapoton, speaking for the Treasury Department in testimony before the House Ways and Means Subcommittee on Select Revenue Measures stated that the Treasury did not oppose this measure. The House Select Revenue Measures Subcommittee has subsequently reported the measure favorably to the full Ways and Means Committee.

My bill is intended to expedite action on the Senate side to correct an inequitous situation, and I urge speedy Senate action on this proposal.

ADDITIONAL STATEMENT

JACK RANSOM BELL

● Mr. HELMS. Mr. President, perhaps it is because of the fleeting years, but the older I get the more persuaded I become that the fame so many seek is often irrelevant when laid alongside the quality of life exemplified by men and women whose names are never in the headlines.

For example, Mr. President, the sad news reached me over the weekend that Jack Ransom Bell had died. Who, you may ask, was Jack Ransom Bell? The answer would best come from the hundreds of people who have known him as a true friend.

Jack Ransom Bell operated a general store in North Carolina patronized by the people in the Occoneechee Neck community. But he did not merely operate a store; it has been a sort of a fellowship center for the community where people could buy groceries, receive a helping hand, converse with a delightful man—Jack Ransom Bell—who never knew a stranger. Mr. Bell was genuinely cordial to everyone, whether it was a prominent fellow from upstate in the area to do some hunting, or a customer who needed a bit of credit to tide him over until the next payday.

Mr. President, I stopped by to visit for a few minutes with Mr. Bell this past January. As I departed his store, I was mindful that I had visited with a sincerely friendly gentleman, and I emphasize the word. He was a gentleman.

He knew the difference between things that are urgent and things that are important. It was important to him, and it should be important to all of us, that true friendships are built on patience and sincerity and compassion. That is why so

many mourn the passing of this fine and decent man.

To the family, and to all the other friends of Jack Ransom Bell, I extend my deepest sympathy in the loss of a good man who kept his priorities straight. He will be missed.●

CONCLUSION OF MORNING BUSINESS

The PRESIDENT pro tempore. Is there further morning business? There appears to be none. Morning business is closed.

RECESS SUBJECT TO THE CALL OF OF THE CHAIR

The PRESIDENT pro tempore. Under the previous order, the Senate now stands in recess subject to the call of the Chair.

Thereupon, the Senate, at 1:40 p.m., took a recess, subject to the call of the Chair.

The Senate reassembled at 7:53 p.m., when called to order by the President pro tempore (Mr. THURMOND).

MESSAGE FROM THE HOUSE

At 7:54 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 357) making further continuing appropriations for the fiscal year 1982, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 44, 49, 70, and 75 to the bill, and has agreed thereto; it recedes from its disagreement to the amendments of the Senate numbered 11, 15, 29, 32, 39, 40, 43, 48, 53, 57, and 74 to the bill, and has agreed thereto, each with an amendment, in which it requests the concurrence of the Senate; and that it insists upon its disagreement to the amendments of the Senate numbered 37 and 73 to the bill.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 225. Concurrent resolution with respect to the scheduled Presidential elections in Honduras.

ENROLLED BILL SIGNED

The message further announced that the Speaker has signed the following enrolled bill:

H.R. 4144. An act making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes.

SECOND CONTINUING APPROPRIATIONS 1982—CONFERENCE REPORT

Mr. BAKER. Mr. President, it is probably no surprise to anyone in this Chamber to know that the President of the United States has indicated that he will withhold his signature from this measure, that he will veto it. I think, however, in view of the circumstances of the moment—that is to say, the previous continuing resolution expired, by its terms, at midnight this past Friday, and this is now Sunday, at almost 8 p.m.—the only course open to the Senate is to take up this matter and deal with it.

I hope we can get a time limitation on the debate on this conference report, and I hope my friend the minority leader and the managers of the bill will inquire as to that possibility.

I say to my colleagues that I will vote for the conference report, but I think it should be clearly understood that I am doing so only because it is necessary to get this measure to the President, and I can assure Senators that he will veto it.

Mr. President, that means that if the situation develops as I have just described it, another step will have to be taken in order to continue the functions of Government or many of the functions of the Government, beginning at the opening of business tomorrow. I hope and I expect that the House of Representatives, when the President vetoes this measure, would send us a resolution—they must originate it—and I would expect to deal with it when we receive it.

Once again, I wish to announce that the President has informed me that he will veto this measure if it reaches him. Notwithstanding that, I will support the conference report, so that we can terminate this impasse and get on with the business of the country.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. I yield.

Mr. ROBERT C. BYRD. I have not been privy to what the President has said. The distinguished majority leader has very kindly told me from time to time that the President was going to veto this measure, but I have not been told what his reason will be. I have heard that he has spoken on the radio and television. I have not seen this.

Can the distinguished majority leader state on what the President bases his prospective veto?

Mr. BAKER. Mr. President, I cannot state that officially, of course, because we have not yet received the veto message, nor do I have a copy of any message he might give us. But in conversations with the President and his principal staff, it is my clear impression that he will veto this measure because, first, the amounts involved exceed those which he indicated he thought were appropriate for this continuing resolution; and, second, because the allocation of resources of money within this measure is not in accordance with the President's wishes and requests.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

Mr. HATFIELD. Mr. President, I submit a report of the committee of conference on House Joint Resolution 357 and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. HATCH). The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 357) making further continuing appropriations for the fiscal year 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, November 22, 1981.)

Mr. HATFIELD. Mr. President, as our extraordinarily able majority leader has indicated, the President has signaled that he finds House Joint Resolution 357 unacceptable and that he will veto the joint resolution if it is sent down to the White House. I regret this.

The Senate Committee on Appropriations labored long and hard all week long to produce a continuing resolution to provide a stop-gap funding program for the necessary functions of the Government. We spent all night here on the floor Thursday and two long nights in conference with our colleagues from the House of Representatives.

The President indicated that he would sign the resolution as it passed the Senate, and the resolution as it is before this body represents an agreement which the Senate conferees felt would meet the target figures of the resolution as amended by the Baker across-the-board reduction, while preserving the integrity of Congress in the performance of its constitutional responsibilities and the integrity of the Appropriations Committee, in which those responsibilities mainly reside.

Apparently, the continuing resolution in the form now before this body does not meet the test of the Senate-passed resolution. I want the Members of this body to know that the conferees engaged in no chicanery or an exercise in phony numbers. We honestly believed that the resolution the conferees agreed upon was within the overall target, with variances on particular accounts, perhaps, as is within our constitutional rights—but, nonetheless, within the overall target.

Apparently, according to information supplied by OMB, your conferees were right: We are within the target. This document shows that the continuing resolution, as reported from the conference is $400 million below the Senate-passed resolution, including the Baker amendment.

The problem, it would appear, is that the conferees have made reductions in areas where OMB would prefer additions, and increases where OMB would prefer to see reductions, and there is an honest difference of viewpoint of the data base from which we began and as to the application and as to the results of the application of that data base.

Mr. President, I do not believe that OMB is any less honest and forthright with its computations than we are. This has really, unfortunately, been reduced to a confrontation not between the executive branch and the congressional

branch, but a confrontation between computers. It is computer versus computer. Unfortunately, in many instances the people have slipped out.

Mr. President, if the recommendation to veto this resolution is based on this document, I find it totally unacceptable and offensive to the Congress, this body and the Appropriations Committee. Mr. President, Congress makes spending decisions. We decide where dollars from the Treasury are to be spent. The President certainly has a responsibility to maintain vigilance over the total, and establish his own priorities. But we should not tolerate a veto of a bill funding virtually the entire Government, 2 days after existing authority has expired, simply because the line items do not precisely conform to OMB's wishes.

Mr. President, we are being subjected to a tyranny of numbers. The constitutional responsibilities of the Congress are imperiled by ephemeral estimates, scorekeeping issues, and definitional differences. Those are the targets of the bureaucrats who are programmers and basically technicians.

Computers have overtaken the people and the everlasting bottom line has supplanted good judgment, in my belief.

I do not wish to delay the Senate. We have had a long, exhausting week. So I will refrain from my usual discussions of outrageous defense funding levels, of runaway entitlements, and the futility of trying to balance the entire Federal budget on the very narrow base of the controllable spending levels.

But, Mr. President, I am very proud of the Senate Appropriations Committee. I want to say this, even though it is oftentimes only the tradition, perhaps, to mention it: The members of the committee, Democrats, Republicans, and those able and outstanding staff people, have been operating around the clock, and even where the members have been able to go home and get 3 or 4 hours of sleep, the staff people have continued on throughout the night, throughout the day, getting the paperwork done and the computations and the refinement of the figures and the data.

No committee staff, I think, in this Senate, perhaps in the last 20 years, have labored more diligently around the clock for so many hours than the staff, the majority and the minority staff, of the Appropriations Committee of the Senate. I am very proud of their work. A lot of hard work has been accomplished in a very short time.

Let me remind the Senate that since October 1, we have brought every single one of the appropriations bills to the floor, after long hours of markups.

I might say there has always been a very gracious, cooperative, bipartisan spirit that has prevailed in this committee. It is a high honor and privilege to serve as chairman. I want to thank all the members.

I support the conference report and urge its adoption.

Mr. ROBERT C. BYRD. Mr. President, if the majority leader will yield, I congratulate the chairman of the committee and the conferees who worked long and hard to resolve the differences between the two Houses. After all this time they brought back a conference report whose overall total is below the amount in the Senate-passed bill. Is that correct?

Mr. HATFIELD. Yes.

Mr. ROBERT C. BYRD. The distinguished chairman put it into the context of a war between computers, a confrontation between computers.

A computer only puts out what is put into it. If incorrect information is put into the computer, then the computer results are not going to be accurate.

I would not say a confrontation between the computers. It would be perhaps the persons who are feeding the data into the computers are feeding the kind of data that will give them the results that they want to see.

We understand that to have been the case, those of us who read the Atlantic Monthly article containing Mr. Stockman's astonishing revelations.

May I ask, if it is a foregone conclusion that the President is going to veto this measure, then why do we call it up and seek to adopt it? I would assume that if the conference report is voted down, the Speaker of the House would be in a position, then, I would think within a half hour, to call his people together and send over another resolution extending the time for the continuing resolution that expired as of midnight on the day before yesterday. That should not take very long.

The conference report could be in this body within an hour at least and we could vote on that and go about our business. But if this measure is voted up and goes to the President and the President vetoes it, with the President's veto message that would be sent up, it would appear to me that that would require hours. And I would strongly suspect that it would be 10 o'clock tomorrow morning or after before we would then vote on what we would otherwise have to vote on in any event, and expect over this evening. We could adopt that and go about our business.

If we vote this out and if we adopt it and the President vetoes it. then hours are going to transpire. And I have no way of knowing that the Speaker will keep the House in tonight. I would assume he would simply recess the House over until 10 o'clock tomorrow morning and we will be tomorrow afternoon voting on what we would otherwise vote on tonight.

Will the distinguished chairman respond to that?

Mr. HATFIELD. I am happy to respond.

No. 1, as chairman of the committee, we had engaged in an effort to try a compromise in the two House renditions of this resolution and we have labored, as I indicated in my opening remarks, for that product. Once we get a product, it would seem to me we ought to permit the Senate to work its will.

I have indicated a personal viewpoint relating to the product. Others may have debate, differences and inquiry and questions to find a different conclusion, but that is part of the process that we feel, part of the appropriation process, we want to get back on track, and that is to get this resolution behind us, get back into the appropriation process and get on with the normal constitutional way of doing things.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. HATFIELD. That is No. 1.

The second one is that the Speaker of the House has indicated, to my understanding, at least, that he will have an action by 10 o'clock in the morning. If we could dispose of this tonight, the Speaker will have that action in the House, which must be initiated in the House, and have it over to the Senate side for us to take our action on that tomorrow.

So I do not think in any way we are impeding the process. I really feel, I say to the distinguished Senator from West Virginia, that a good night's sleep would give us all a better perspective in handling this matter tomorrow morning than it would be to try to linger on into the evening.

Mr. CRANSTON. Will the Senator yield?

Mr. HATFIELD. Yes.

Mr. CRANSTON. The distinguished chairman, in his statement, seemed to place responsibility for the recommendation that there be a veto on the Office of Management and Budget.

Mr. HATFIELD. No. I merely said that there was a difference of views in the way in which we computed these figures between the Congressional Budget Office, the House computer system, and the computer system downtown in OMB. I indicated very carefully that those were honest differences and they were honest differences of baselines and data baselines and so forth in an application of the Baker amendment, where it would be applied and where it would not be. This is all part of the complexity of what the computer age has brought.

Mr. CRANSTON. OMB is the body headed by David Stockman, is that correct?

Mr. HATFIELD. The last I knew, it was. [Laughter.]

Mr. CRANSTON. So the decision for a veto was based upon more figures coming from David Stockman? The decision to recommend a veto is once again based upon figures fed into a computer by David Stockman or his office?

Mr. HATFIELD. As in each administration, each President has had to have the counsel and advice of the office of the Director of Management and Budget. Mr. Stockman occupies that position in this administration, as previous administrators have occupied that position in counseling previous Presidents on how to handle budget questions and actions; yes.

Mr. CRANSTON. The chairman of the Appropriations Committee questions those figures, I gather?

Mr. HATFIELD. I do.

Mr. CRANSTON. I thank the Senator very much.

Mr. McCLURE. Will the Senator yield?

Mr. HATFIELD. Yes, I yield to the Senator from Idaho.

Mr. McCLURE. Mr. President, I do not think we ought to leave that last statement hanging there, as was intended with the inferences that were so obvious.

I was somewhat involved personally in the explanation on the floor of the Senate when we went through what was meant by the savings clause in the Baker amendment. If the Senator will recall, I say to my friend from California, we talked about a savings clause that said, when we made the 4-percent across-the-board reduction, that would not be applied to any bill, title, or account which was already at or below the September budget request.

It was the belief that if, as a matter of fact, we had already reduced those matters to the point that the President had requested, they ought not to be reduced further by the across-the-board cut.

And Senator BAKER and I had a colloquy on the floor to explain that language in the Baker amendment also excluded entitlements.

When we were last night and yesterday handed computer printout sheets that emanated from the House Appropriations Committee, being the most complete set of computer programing that we could get and therefore the most detailed information that we could get in the appropriations process, they compared some figures based upon the House approach or the conference approach to cutting the budget and a bottom line figure and they also had on that computer printout sheet the amounts that would be computed based upon the Senate figures and the Baker amendment.

In doing that, they made an assumption—an honest assumption—that the entitlements would come out of those bills before they were judged against the separate budget figures. So they left in only those amounts which were the discretionary items within that bill to determine whether or not they were above or below the latest budget request figures. That is not, however, what the colloquy says.

And I would refer the Senator from California, or anyone else who is interested, back to the discussion that Senator BAKER and I had. The last paragraph in that discussion said:

> Finally, all of the above comparisons are based only on those elements of the continuing resolution that are not explicitly exempted from the 4 percent cut.

I do not believe any of the members of the conference were aware of that basic assumption on the part of those who were programing the computers in the House Appropriations Committee.

So if there was an error made, let us not say it was done at OMB. Let us recognize that it was on a basic assumption fed into the computers used by the Appropriations Committees in the conference.

It was that distinction, that difference, that led us into the belief that the formula adopted in the conference would yield virtually the same dollar savings that would be the case under the Baker amendment here in the Senate continuing resolution. That turns out not to be the case. And that difference is enough to have led the President to make the decision that since we had not come close to the Michel amendment in the House, the Baker amendment, as applied, would have done so except for the fact we judged the Baker amendment, in essence, to adopt the House formula and it simply did not do what we had been led to believe that it would do.

Mr. DOMENICI. Will the Senator yield?

Mr. McCLURE. I am happy to yield to the Senator.

Mr. DOMENICI. Mr. President, I have the greatest respect for the chairman of the Appropriations Committee and he knows that. And his interpretation of what occurred and why we are here is certainly a valid interpretation. But I want to tell the Senate that it is improper and wrong to assume that there is not another proper interpretation of the effect of the Baker amendment. And that is what this whole discussion is about: How much money did the Baker amendment save?

Now, when they finally got into the waning hours of the conference, the conclusion was that the Baker amendment would only save about $2.7 billion. Consequently, the House offered a proposal that saves at least that much, therefore, saying, "Accept it, we have done as well as the Baker amendment did."

Now that is a valid interpretation, if one wants to put information into the computer that makes certain assumptions about the Baker amendment. The problem is if you make another assumption about the Baker amendment, you had to save at least $4 billion. I submit that is a proper assumption and I will tell you why in a minute.

The White House has made the assumption that the Baker amendment would save at least $4 billion, and I repeat—I repeat—I make the same assumption. I did not tell them that they ought to veto the bill or not, but I assumed that the McClure amendment on our resolution which addressed itself to a floor beyond which we would not cut, I assumed that that amendment, which was interpreted on the floor with a dialog between Senator McCLURE and Senator BAKER, clearly meant that you would measure bills, title and then account, that you would clearly measure them taking entitlements out first and leaving them out, because that was what the amendment said—"We are not going to count entitlements: take them out."

What happened is the House validly ran a set of computer runs and put the entitlements back in in determining floors. And the House has very low entitlement numbers. Now if you put them back in at a low number, you pulled out whole sections of the appropriation bill and said it was not subject to our leader's 4-percent cut. Therefore, you can assume you are complying with the Baker amendment with a much lower figure.

Now the Senate can work its will. And I repeat the appropriators in the House and the House computers made a valid assumption. I am not arguing with it. I am not a conferee. I only stand here to tell you that it is not some kind of a chicanery dreamt up down there at the White House by the OMB Director or anyone else.

I would assume that you could put 50 Senators in a room and give them the McClure amendment, which was intended to be a floor, and you could say: "Read this dialog and the entire resolution. How do you interpret it?" And I guess you could get two interpretations. No question about it.

I will tell you again, I never thought you would count entitlements in this bill once you took them out, because it said for purposes of determining the 4-percent savings we are taking entitlements out. I would assume you would have left them out for any other interpretation. And in particular when the McClure dialog closed with a statement:

> Finally, all of the above comparisons are based only on those elements of the continuing resolution that are not explicitly exempted from the 4 percent.

So I stand here to tell you that under a very valid interpretation, this continuing resolution does not save, in budget authority, what the President had told Senator BAKER, our leader, he would accept. Under another interpretation, perhaps it saves as much. And the issue is one of, why do we go through all of this exercise? But it is somewhere between $1.3 and $2.5 billion in difference between what the President assumed the Baker amendment does and what this continuing resolution brings to the Senate.

So it is not insignificant, it is rather significant.

Mr. CRANSTON. Will the Senator yield?

Mr. DOMENICI. I am pleased to yield to the Senator.

Mr. CRANSTON. I would like to point out that the bill that we are considering, the conference report, deals with budget authority only; only budget authority.

The Senator from Oregon was speaking of outlays. That is a different matter. The Senator from New Mexico was speaking of budget authority, outlays, and entitlements. Of course, entitlements are a part of the measure that we are considering now.

The document that I have in my hand, which the Senator from Oregon referred to, is an OMB document, which shows that the Senate-passed bill called for the expenditure of $428,465,000,000. The conference report calls for $428,065,000,000—$400 million less than the bill that passed the Senate. That is an OMB document. It does cover entitlements, but it does relate only to budget authority, not to outlays.

We were told, it was strongly indicated to the Senate by the majority leader that the President would sign a bill based upon that figure. Now we have a bill before us with a lower figure and we are told, through OMB—headed by David Stockman—that the President now will not sign this.

No one is suggesting chicanery. I have not used that word. I have heard it twice from the Republican side of the aisle. We are suggesting that a position taken at one point by the administration has now been reversed by the administration, although better figures are now available for the administration's purposes and for the country's purposes, seeking to make a cut in what we are spending.

The sadness of all of this is that we are talking about a very small part of the great problem that we face. We face a deficit, quite conceivably, of over a hundred billion dollars for this year and quite conceivably, $300 billion over the next 2 or 3 years and we are here arguing about $2 or $3 billion.

Two or three billion are not insignificant, but they are not the heart of the problem. The heart of the problem is an economic game plan, based in part upon figures that came from David Stockman's OMB, and they are not working. We the part of the problem we are now wrestling with.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, first, I want to pay tribute to my friend from Oregon. I am going to be brief, but I do want to take a minute to say that this was the most frustrating——

Mr. STENNIS. Mr. President, we need to have quiet here. This is awfully important.

The PRESIDING OFFICER. The Senate will be in order.

Mr. PROXMIRE. This was an extraordinarily frustrating and disorderly kind of operation—not because the Members did not do their best, but because we were faced with an almost impossible task. We had all the appropriations, 12 at least of the 13 appropriations bills, that we had to handle in a couple of days. We had to work very late at night. At times, it was almost like a Marx brothers comedy. It was very disorganized.

The one steady note of dignity and force that we had in that conference constantly was the chairman of the Senate Appropriations Committee, the leader we had on our side. I thought that MARK HATFIELD did a superb job under very difficult circumstances. Again and again, he brought us back on the point and moved the conference ahead in a way in which—I think we would still be in conference if it had not been for the remarkable Senator from Oregon and the fine job he did under difficult circumstances.

Now, Mr. President, let me say that I do think we should spend at least a minute or two recognizing that this is a process we must not permit ourselves to get into in the future. We must not have continuing resolutions that carry virtually the entire appropriations process over for month after month. We agreed on a date that was 9 months into the fiscal year, the best we could do. That was very difficult to achieve. But that made it extremely difficult.

Of course, it aborts the opportunity of Members of the Senate who are not on the Appropriations Committee to have a chance to discuss, for example, Health and Human Services, because we may not get, probably will not get, an appropriation bill on the subject before us until July—if then—because of this procedure.

Let me say, Mr. President, that I agree with the distinguished Senator from Oregon and with the minority leader and with Senator CRANSTON in pointing out that we are, as a matter of fact, in budget authority, overall, under the Senate and we are told by the document that I have here from the Office of Management and Budget that the President indicated a willingness to meet Congress halfway and accept a $4 billion outlay saving as achieved by the Senate continuing resolution with the Baker 4-percent amendment. I have that letter here and it is a fact. We were told that.

I do not say that the administration is wrong to change its mind, but it is sad, it is unfortunate that they were not able to work out an agreement with their own excellent leadership so we could have acted on this.

Mr. BAKER. Will the Senator yield?

Mr. PROXMIRE. Before I yield, Mr. President, let me say that I do hope that the Senate will give consideration to following the implications, at least, of the minority leader's question: Does it make any sense for us to go ahead and pass this, knowing that the President is going to veto it, knowing there is no shadow of a possibility of passing it over his veto, no way? The House will not pass it over his veto, will not begin to; this body certainly will not. We are simply creating a situation in which we will, at the very least, have on Monday morning, when the Government goes back to work, a situation where they can do nothing but start to close down under the opinions that have been set down in the past.

So I hope that, under these circumstances, the Senators will give consideration to defeating this resolution and permitting the House to send us a continuing resolution which we are going to act on anyway, we know that, 3 or 4 days from now or sooner, and be able to terminate this much more quickly and in a much better way.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, may I say that I do not believe the President changed his mind. On the contrary, I think he has been constant throughout. I believe I should refer once again to a statement that was referred to by the distinguished chairman of the Budget Committee. This is from the OMB paper.

On September 24, the President asked for a 12-percent reduction in discretionary appropriations—

Discretionary appropriations—

for domestic agencies. This would have saved $8.5 billion in fiscal year 1982 outlays and additional amounts in future years.

In a letter to Senator Baker earlier this week, the President indicated a willingness to meet Congress half-way and accept a $4.0 billion outlay savings as achieved by the Senate Continuing Resolution with the Baker 4 percent amendment.

The Continuing Resolution Conference Report now pending will save only $2 billion in discretionary outlays, or less than one-fourth of the original request.

Mr. President, it is clear to me that no one ever intended that the 4 percent in the Baker amendment would be applied to the overall sums including entitlements. It is clear from the colloquy I conducted with the distinguished Senator from Idaho (Mr. MCCLURE) that the 4 percent was to be applied only after we had taken out the exempted items, which were principally entitlements. If that is so, these numbers are precisely on it.

As the Senator from New Mexico pointed out, maybe somebody else has a different opinion, but that is the fair and reasonable interpretation of the amendment itself, in my judgment, and of the colloquy which was made in connection with this adoption.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ARMSTRONG. Mr. President, in Lewis Carroll's "Alice in Wonderland", the White Queen says to Alice at one point, "What is one and one, and one, and one, and one, and one, and one?" Does anyone recall what Alice responds? She says, "I don't know. I have lost count."

I say to my colleagues, we are about to lose count of where we are in this process. I would like to take a moment to just recap the events of these last hectic few days, to attempt, at least from the perspective of the Senator from Colorado, to express concern about not only where we are and where we are going, but indeed where we have been this last week or so and to suggest some thoughts about where we might go in the next 2 weeks.

Before I do so, Mr. President, I should like to express my utmost appreciation to the members and staff of the conference committee. I have been around here long hours these last 3 and 4 days, though I have not been a conferee, but I have watched with mounting admiration the skill and patience and stamina which they have displayed in representing the interests of the Senate in this most difficult conference.

In fact, I must say, Mr. President, it appears to me that some of the members of that conference must have some sort of superhuman stamina to be able to have gone through what they did and still be in as good physical and mental condition as they appear to be. I think we all owe them a debt of gratitude.

Mr. President, let me recap recent events. On September 24, the President submitted to the Congress revised budget proposals which had the effect of lowering his March budget estimates. It was the President's recommendation at that time, on September 24, that we effect a savings in the projected 1982 deficit of approximately $16 billion, composed of the following items: President Reagan, on September 24, suggested for 1982 a $3 billion increase in revenues through tax code changes, which have been variously described as revenue enhancements.

Second, the President proposed $2.6 billion in entitlement reforms to be effected in 1982. The President suggested $2 billion in defense slowdowns—that is, simply changes in the rate at which defense programs were funded.

Finally, and most germane to the continuing resolution before us, the President suggested outlay reductions in nondefense appropriation accounts of $8.4 billion.

To achieve the $8.4 billion in outlay savings that the President recommended, it is believed that budget authority sav-

ings of from $17 to $19 billion would be required. There is some confusion about the magnitude of BA savings which would be necessary to achieve an $8.4 billion outlay reduction in 1982, but clearly, it is in the range of $17, $18, $19 billion.

The President at that time in his message suggested that the effect of the changes which he proposed would be to provide revenues in fiscal 1982 of $606.62 billion, outlays of $709.3 billion, and a deficit of $43.1 billion for the fiscal year.

On October 1, with the President's recommendations before us, Congress passed a stopgap continuing resolution running from the beginning of the fiscal year to November 20. In many ways it was a completely unsatisfactory budget resolution. It was not intended, nor was it interpreted by anyone as a permanent continuing resolution or the shape of proper funding for the new fiscal year.

It would provide, if permitted to run for a full year, spending rates and priorities widely at variance with the President's program, with the recommendations of the Reagan administration, indeed, with the new mood of the country and the majority of this body. It was in effect because it was a continuation of the prior year, a reaffirmation of the prior administration's program, and just to cite two examples of the inversion of priorities contained in that continuing resolution, it would have funded Labor and Health and Human Services, the LHHS, budget at a rate $5 billion above the September 24 recommendations of the President. And it would have funded defense at a rate $7 billion below that requested by the President.

This week the Senate adopted a continuing resolution which we sent to the House of Representatives and subsequently to conference, the effect of which would have been as follows: If the Senate's version had prevailed in conference, the continuing resolution thereby adopted at annualized rates would have been $6.5 billion in budget authority and $4.4 billion in outlays above not below but above the President's request of September 24.

Or to look at it from another perspective it is true that this resolution would have achieved savings of $4.1 billion as compared to the President's March request, but only about half, I stress, of the savings which were proposed by the President in his message of September 24.

These figures are, of course, based on the notion of an annualized basis: whereas, of course, the resolution which we sent to the House of Representatives for consideration called for termination on March 30.

The conference report which has been returned to us adds back to the Senate version as best as the Senator from Colorado is able to understand $3.5 billion in budget authority and $2 billion in outlays, again on an annualized basis.

Now these comparisons are very tricky. Because the resolution fortunately does not provide for a full year of continuation, but only an annualized basis, I believe it is fair to say that the effect of the conference report would be to achieve only $2 billion of the $8.4 billion of nondefense savings which were recommended to the Senate on September 24 by the President.

Mr. President, I have said nothing about the other aspects of the $16 billion which the President expressed the hope of savings in his message which he sent to the Senate on September 24.

I am not going to take the time of Senators to do so at this time, but I would submit for the RECORD and shall ask unanimous consent that we print at this point in the RECORD a brief summary of the President's proposal and I just note in passing especially given all the difficulty we are having in achieving $2 or $3 or $4 billion out of the $8 billion in nondefense saving, it is difficult for me to see how we are going to achieve a large fraction of the other $8 billion which the resident has asked for, but just so the RECORD is complete I ask unanimous consent that this be printed in the RECORD at this point.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

REVISED BUDGET OUTLOOK

[Dollar amounts in billions]

	Fiscal year		
	1982	1983	1984
1. September revised outlay estimates	$722.3	$769.0	$818.8
2. New savings proposals:			
12-percent across-the-board fiscal year 1982 cut	8.4	5.3	3.8
Defense slow-down	2.0	5.0	6.0
Entitlements reform	2.6	10.0	15.0
Subtotal	13.0	20.3	24.8
3. Revised outlay estimates, net of new savings	709.3	748.7	794.0
4. September revised receipt estimates	663.2	706.1	760.0
5. Proposed revenue enhancement through tax code changes	3.0	8.0	11.0
6. Revised receipt estimates, with new proposals	666.2	714.1	771.0
7. Future savings to be identified for fiscal year 1983–84	0	11.7	23.0
8. Deficit targets	43.1	22.9	0

Mr. ARMSTRONG. Mr. President, I come to the following conclusion: First of all, this conference report is completely unacceptable because we are really not achieving even the modest rate of savings which was suggested in the Senate-passed version under the terms of the amendment offered by the majority leader and accepted by the Senate. I must say, very frankly, that even the President's recommendations on September 24 were very, very modest and restrained in view of the staggering deficits which are in prospect for the next 3 fiscal years.

He was talking about saving $16 billion with the possibility that we may face deficits ranging from $280 billion to $394 billion between now and the close of fiscal 1984. That is a very, very modest response, clearly only the downpayment on the kind of savings that we are going to have to have. The Senate then cut it down to $4 billion. Now the conference report has cut it down to $2 billion. This is not progress. This does not make sense to me.

The report is also unacceptable to me because the defense appropriation has been reduced unrealistically so that when the regular appropriations are finally passed hopefully in the near future we will probably increase spending over the conference report by an additional $4 billion or so. In addition from the brief study which I have had the opportunity to give to this conference report, it appears to me that entitlement appropriations, that is appropriations for items which are in essence uncontrollable, have been reduced to unrealistic levels to necessitate supplemental appropriations approximately $1.7 billion.

At the same time, the conference report increases discretionary budgets by $1.5 billion. Increases in discretionary appropriations have been concealed to some extent by what appears to me to be unrealistic defense and entitlement figures so that to the best reconciliation I can achieve at this moment, this continuing appropriations actually contemplates spending in 1982 approximately $435 billion for these accounts instead of the approximately $427.8 billion shown in the agreement. That is a gap of some $7 billion which is certainly a source of additional concern.

I expect that this conference report contains a number of unknown provisions—at least I have to confide to Senators that they are unknown to the Senator from Colorado, and I just note in passing my traditional complaint that we must not adopt conference reports which contain complicated and unknown provisions. Now we do this over and over again and we should get out of this habit. That is really a very poor policy.

I also note in passing that it contains at least one provision which is known and which to me is odious and that is the suggestion that we would raise the pay of some Members of Congress by I believe 4.8 percent. In my judgment that is not wise, not because those Members of Congress who would be so affected are unworthy of the pay increase but simply because in the judgment of the Senator from Colorado it is not a timely matter.

Nor in my opinion is it wise to raise the pay of Members of one House while not raising the pay of both.

Mr. President, this bill is nothing but veto bait.

Mr. McCLURE. Mr. President, will the Senator yield on one point?

Mr. ARMSTRONG. Yes, I am happy to yield.

Mr. McCLURE. Maybe I did not hear quite correctly what the Senator said, but the pay provision was knocked out in the other body.

Mr. ARMSTRONG. I thank the Senator for that explanation.

Mr. McCLURE. That is not before us.

Mr. ARMSTRONG. Which relieves my mind as to that point although it emphasizes the difficulty of understanding the contents of this conference report. That is a matter which escaped my attention after several hours of study, but I thank the Senator for his explanation.

I will say that in reviewing this with different people not on that particular point I have been given conflicting advice about some provisions.

Mr. President, to sum up, it seems to

me that this bill is little more than veto bait. The majority leader has assured us that it is going to be vetoed by the President and with good reason perhaps for some of the same reasons that I have suggested. Personally I think it would probably be better not to give him the opportunity to veto it and just go ahead and turn it down. I will tell the Senate, very frankly, I am very reluctant to follow the majority leader's recommendation and vote for this conference report. I do not think it is good legislation. I do not think it is a good appropriation.

I do not wish to have it on my voting record that I voted for this monstrosity nor, may I say, that I think it is a good policy to vote for legislation on the assurance that it is about to be vetoed. That seems to me to be an extraordinary form of recommendation. Nonetheless, Mr. President, I am going to vote for it. I am going to vote for it—I shall explain why—with clear understanding that it is in my view a defective piece of work; nonetheless, I am going to concede that the issue of how we get out of this horrible mess really is a tactical decision.

The majority leader has managed this situation with infinite patience, infinite cheerfulness, infinite good humor, and infinite courtesy and at least on this occasion it seems to me that I can swallow my pride and vote for this thing simply out of affection and regard for him and to give him a chance to maneuver us into a position which I believe we should be in.

So I am going to do so, but before I take my seat I shall explain to the Members where I think we should be going and where with the forbearance and leadership of the Senator from Tennessee, the President, and Speaker of the House of Representatives, and everyone else I hope we will end up.

First, I hope that before the evening is over or sometime early tomorrow we will adopt a very brief extension of the prior continuing resolution, something like 15 days. I am told that is contemplated by the other body, and it is acceptable to the President and that will buy us a little breathing time to straighten this mess out.

Mr. President, I hope we will use that 2 weeks or so wisely. I hope that we will first resolve to never again permit ourselves to be put in a position of acting upon such an important issue in haste late at night without proper documents and without sufficient opportunity to study the measure that is before us. We have done that over and over again, and at some point it seems to me we must simply say we are not going to do this anymore. I think we have reached that point.

There is a tradition around here that holds these marathons all night, all day conferences are a test of dedication or commitment to the process. It is a test all right. But I think it is an intelligence test, not a test of dedication, and I think when the Senate as a body and its conferees and staff participate in that process they are failing the test of intelligence. I think it is the dumbest thing we can do. I think it is the sorriest atmosphere in which to try to make important decisions which should be properly manageable. When we send a bunch of conferees and staffers in the committee to negotiate and bring things back at odd hours of the day or night, and we come in here looking and sometimes acting like zombies, unable to comprehend what is going on and in many, many cases my colleagues that is exactly the situation, we do not know in many instances what we are voting on, I think that is a poor policy and I think we should break that habit.

Third, I think we should use the next 15 days to rationalize the misunderstanding among the CBO, OMB, and the Appropriations Committee.

I think the administration should send us new figures. In the numbers which I have sent to the desk and which will appear in the RECORD at an earlier point, there is a 3-year projection of revenues, outlays, and deficits submitted by the President of the United States on September 24; and I have to tell my colleagues that those numbers are from fantasy land. They are so far at variance with the real circumstances which are acknowledged by everybody that for them to be on the public record, I think, is an embarrassment. We should get our numbers up to date within the next 2 weeks.

Second, I wish to elaborate on the point raised by Senator CRANSTON and discussed by others, and that is the question of outlay projection. Somehow, we have to reach agreement on fundamental questions about how a given rate of budget authority will spend out—that is, what rate of outlays will result from a certain rate of budget authority. Our policymaking is absolutely knocked into a cocked hat when we cannot agree on that, and it arises from three or four reasons.

First, different assumptions about the spendout rate on current year spending. When we appropriate for VA, as the Senator from California pointed out, it is the outlays that ultimately determine whether we are in surplus, balance, or deficit. Somehow, we have to reach agreement on our estimates of how outlays will be achieved.

Second, we need to have at least a common basis on the understanding of adequacy of provision for the uncontrollables—food stamps, for example. When we say that food stamps are going to spend out at a certain rate during the year, if we estimate too low, we are building into the system an uncontrollable item.

Finally, we have to do something that gives us a better handle on the budget authority in the pipeline. I wonder how many Senators know the amount of unspent budget authority in the pipeline that will result over the next several weeks in outlays. Does anybody have a guess as to how much it is? It is over $800 billion. Over $800 billion has been appropriated and remains unspent and will trickle or gush into the system at various rates over the next several years and even decades.

This, I suggest, is an intolerable situation and makes it impossible for us to know where we are going, because that kind of sloshing around can affect outlays of $10 billion or $20 billion in a particular year.

Finally—and I appreciate the patience of my colleagues in giving me an opportunity to discuss these matters with them—I suggest that in the next 2 weeks and the period beyond, while we work on a new continuing resolution, we also devote ourselves to the question of institutional reform. We should learn something from the mess we are in. We should learn that the budget process must be simplified. The budget, authorization, and appropriation process is so complicated that there is scarcely a Member in this Chamber who really understands it in detail. I do not say that to criticize any Member, but simply to say that we have created something so complicated that it is virtually impossible for the human mind to comprehend. It is unnecessarily complicated. It is complicated to the point that it truly obscures the policy alternatives before us. We must simplify it.

Second, we must discipline ourselves to act in a timely manner.

Third, we must grant to the President the authority to control the rate of spending necessary to meet congressionally mandated outlay targets. In other words, we should give the President rescission authority limited in some way, perhaps limited to the exercise of such rescission authority as needed to achieve congressionally mandated budget resolution targets.

Finally, I think Congress should begin to appropriate outlays. All we really appropriate is budget authority. No company in the world would do that. I see in the Chamber the Senator from Illinois, who was the leader of a great company before he came to the Senate. I am sure that he and other businessmen and women in the Chamber will agree that no organization in the world, other than the U.S. Government, would let its board of directors say to the executive officer, "We are going to appropriate this much budget, and you can spend it any time you want—5 minutes from now, 2 days from now, next week, next year, 20 years from now." Of course not. They would appropriate it and say it is to be spent at the following outlay rate.

Only Congress would do this, and it has run up $800 billion in unspent budget authority. We need to get control of that.

Mr. President, I hope that in the next couple of weeks, as we extend the old continuing resolution and go through this process, we will devote ourselves to institutional reform in solving some of these basic problems and that we will not find ourselves 10 days or 2 weeks from now back here in the same deadline pressure and making the same mistakes.

Mr. PERCY. Mr. President, I commend my distinguished colleague.

If the saying goes, "Never on Sunday," maybe we can change that to "Only on Sunday" do we speak against a resolution so strongly as has the distinguished Senator from Colorado and then turn around and say he is going to vote for it.

I am in the same position, but for somewhat different reasons. I intend to vote for the continuing resolution but will do so only as a procedural matter

in order to send the resolution to the White House and because we have the assurance of the President that he will veto it. I think that to enact this measure into law would be an utter disaster for the national security interests of the United States of America.

This resolution achieves less than 25 percent of the goal that was established by the President to reduce this fiscal year 1982 budget level by $8.5 billion. That is hardly even going half way, as did the Senate bill, when we are working toward a balanced budget sometime in the future. If we do not do this now symbolically and try to meet at least the Senate level of a $4-billion reduction, there is going to be no hope for an ultimate objective, and the signal we are sending out is that we really are not serious about balancing the budget.

However, even more important, I am concerned about the impact on our security and economic assistance program that is in this resolution.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. PERCY. I yield for a question.

Mr. ROBERT C. BYRD. Mr. President, I have been inclined to vote for this conference report, but I am utterly confounded by the astonishing statement that the distinguished Senator just made—namely, that he will vote for this conference report, but only because the President has said he will veto it.

I cannot understand the Senator's rationale, and I am truly shaken in my own judgment, which I thought I had arrived at pretty firmly, that I would probably vote for this conference report. Now I am confounded 10 times over.

Will the Senator explain to me his rationale as to why he will vote for this conference report, after he so solemnly condemned it, and only on the basis that the President is going to veto it?

Mr. PERCY. I will do so simply because it is desirable that we get the measure to the President. He will then send a loud and clear message back quickly to the country as to the significance of what we have done.

This measure reduces the Senate foreign assistance and military and economic assistance by over $1.3 billion. That is a crucial decision of the conference and a position that undercuts the original Senate position. That action will seriously jeopardize the entire program started by a preceding President, President Carter, for rapid deployment of our forces and to better secure the oil interests of this country and the free world in the Persian Gulf.

According to the State Department figures, this will seriously undercut our security assistance programs in Kenya, in Oman, in Sudan, in Somalia, and in Egypt. Those are the heart of the security programs started by a previous President and strengthened by President Reagan.

That $1.3 billion cuts the Senate bill. In the Foreign Relations Committee, Senator PELL and I offered an amendment, unanimously supported by the committee, that reduced the Reagan budget by $900 million for foreign assistance programs. That position was subsequently sustained in the Senate.

I point out to my colleagues that the Senator from Wisconsin (Mr. KASTEN), the chairman of the Foreign Operations Appropriations Subcommittee, and Senator INOUYE, the ranking minority member, did an absolutely masterful job throughout the conference in attempting to sustain the Senate position. That position was lost, and we are down $1.3 billion by this conference resolution. I leave it to my distinguished colleague, the chairman of the subcommittee, to explain the entire detail of what that does to our own national security interests. I will only point out what we utterly decimate our ability to protect our oil interests in the Persian Gulf by this action, and that position that I take was certified to by the President, the Secretary of State, and the Secretary of Defense.

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. PERCY. I yield the floor.

Mr. JOHNSTON. Will the Senator yield for a question?

Mr. PERCY. I yield for a question.

Mr. JOHNSTON. I thank the Senator.

A number of us on this side of the aisle have tried to be a friend and supporter of the President. What I should like to know is this: Do you vote for or against this conference report if you are trying to be a friend and supporter of the President? [Laughter.]

Mr. PERCY. Every Senator can make up his own mind as to how he does it. I intend to vote for the conference report in order to have it sent to the President so it will be vetoed. [Laughter.] With a strong veto message alerting the country as to the economic and foreign security consequences of our action.

Mr. KASTEN. Mr. President, I commend Senator Hatfield for the heroic job he has done on this continuing resolution. We have worked long and hard all weekend and have made substantial progress. But two very serious problems remain.

First, there is the technical "numbers" problem, which several Senators have talked about, particularly where the entitlement programs are concerned. According to the Office of Management and Budget, the continuing resolution contains $1.7 billion in essentially fake savings due to an underfunding in the entitlement programs. The point is we are going to have to pay for these entitlement programs whether we appropriate the money now or later. We should all realize that this conference report saves $2 billion less than it purports to, in that one particular area of Labor-HHS.

The other area, which the Senator from Illinois referred to, is the funding level for foreign assistance. The House insisted on underfunding by $1.6 billion the foreign assistance program, and adding this money to the other sections of the bill which are already substantially over the President's budget.

Once more, it is clear that this administration is going to meet its commitments overseas and it is clear to me that this Senate is going to vote for the Sinai peacekeeping money, that this Senate is going to vote for aid to Israel, that this Senate is going to vote for aid to Egypt, that this Senate is going to vote for these programs. The conference committee knocked these numbers down knowing full well that we are going to have to vote to pick them up. But we are never going to find those dollars that have been redistributed out into all these different accounts.

The demagoguery surrounding the question of the U.S. foreign assistance program is just incredible. Both in conference, especially late last night for those of you who were there, and on the House floor it has been simply astonishing. With blatant political motives, the rhetoric has been nearly nonstop about efforts to increase foreign aid at the expense of domestic programs. But what are the facts?

The Senate position in the conference for foreign assistance and related programs totaled $11.2 billion in budget authority. The House position in conference was $9.6 billion, an unrealistic figure based on a previous stopgap funding measure. These figures compare with a level of funding, enacted, of $11.4 billion in fiscal year 1981, of $11.5 billion in fiscal year 1980, of $11.2 billion in fiscal year 1979, and of $10.6 billion in fiscal year 1978.

Where is the increase?

In fact there is not any. In fact, the Senate bill is below the 1981 level. It is below the 1980 level. It is only in comparison to 1978 that we show an increase, and then only an increase of $600 million. There is simply no way that one can dispute these comparisons. Those who have been shouting about great increases in foreign aid know this and they also know that we are going to vote to put that money back in at some point in the future.

Mr. President, what would the effect on U.S. foreign policy be if the House numbers were to prevail?

I just want to show you why we are so certain to put the money back in.

Broadly stated, the House position would jeopardize nearly every single bilateral relationship the United States has, particularly, and most distressingly, in every current critical area of U.S. foreign policy interests.

For example, the House position would eliminate all direct military credits except for Israel. In other words, there would be no military credit program for Egypt, none for Turkey, none for Portugal, no military credit program for the Sudan, for Somalia, for Kenya, and Liberia.

How many of you believe that we are going to end up with no military programs for any of these countries? The fact is we are going to add that money back in.

Economic assistance to Egypt and Israel would be cut by $42 million. How many of you believe that we want to have a $42 million cut from those programs? Not one of you. We are going to have to add that money back in.

Funding for the Export-Import Bank, so important to U.S. exports and American jobs, would be cut below the fiscal

year 1981 levels by $2,589,000,000. And we have voted to increase Ex-Im right here on the floor.

Mr. President, what kind of a message does this send to our friends and allies? What does this say about the commitments of the United States? What does this say about the U.S. commitment to the peace efforts in the Middle East?

The correct course for us to take now would be to back the foreign assistance security programs. I recognize, however, that we have a slightly different agenda and I am going to support it.

I am going to vote for the conference committee report but not because I agree in any way that those numbers are the numbers that we are going to end up with over the long haul. We have simply through fake accounting, especially in the area of foreign aid, made savings that will not be realized, and in the process I believe we have hurt our credibility. I will vote for this conference report only because I know the President will veto it. I will support that veto.

We have endeavored to take a responsible course in the Senate on foreign assistance. We will not be waylaid from that course by the irresponsible actions of the other body.

I yield now to the chairman of my committee, the Senator from Oregon.

Mr. HATFIELD. Mr. President, I move adoption of the conference report on House Joint Resolution 357 and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I find myself terribly confused with the debate. I think this is an important vote. I would like to ask questions of those who are supposedly in the know.

I join my colleagues in saluting our friends who served into the wee hours of the morning to try to work out the conference report when some of us were home getting a little sleep.

Mr. RIEGLE. Mr. President, the Senate is not in order. Could we have order so we can hear the Senator from Nebraska?

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Nebraska.

Mr. EXON. Mr. President, I was trying to get the floor when the majority leader was present.

Is the majority leader on the floor at the present time?

Yes, he is on the floor.

Would the majority leader answer a question for me to try to straighten out something in my mind? I am confused as I listen to the debate. Sometime about 3 or 4 o'clock Saturday morning I asked the question if we basically adopted the Baker amendment, would the President of the United States, if those figures were accepted, not veto the bill, and the reply was, "I am in a position to advise the Senate that if this bill passes with the Baker-Byrd amendment attached and survives the conference, the President will sign the bill."

Would the majority leader advise me whether the President changed his mind after this or before or were the figures simply inaccurate?

Mr. BAKER. Mr. President, the President did not change his mind at all. It is my judgment that the President has been absolutely constant and totally consistent in the statement he has made in respect to his budget request. He started with the request for a savings in his September message of $8.5 billion. I make no secret of the fact that I was among those who told him, "I do not think you are going to get $8.5 billion, but we will do the best we can."

He then sent me a letter saying that he was willing to accept something in the range of $4 billion and that he believed that that figure had been achieved by the Senate continuing resolution with the Baker-Byrd amendment attached.

Mr. President, the reason I do not think the President ever changed his mind was notwithstanding the claims by our good friends in the House of Representatives that the 2 percent of the House cut is the same as the 4 percent in the Senate cut is this: You are simply working with different figures. If, indeed, you take out the entitlements, which never were intended to be cut—some day, I say to my colleagues, we are going to have to get to this business of what we are going to do about entitlements, we will have to grasp that, but we did not in the continuing resolution or the Byrd amendment—if you take out entitlements, if you take out the exemptions we drafted onto that amendment and then apply the 4 percent you come up with the figures I am speaking of, the Senate figures, the $4 billion savings.

If, on the contrary, you leave those entitlements in there and apply 2 percent to it, you have twice as big a base and you get essentially the same figure. There is nothing secret about it. Nobody is feeding bad information to the computer. Nobody is alleging that the House of Representatives or the Appropriations Committee in that body were in error in their computations. It is simply a difference of opinion. Did the Baker-Byrd amendment for a 4-percent across-the-board cut mean that you take that 4 percent on the net or on the gross?

It was my purpose, my intention, and I believe the Senate's intention, and I am sure the President's understanding, that the 4 percent applied against the net. That is to say, you take out the exemptions, you take out the entitlements, and then you apply the 4 percent. Then you get the number of net savings, the $4 billion.

The House of Representatives, on the other hand, simply took a bigger base. They left the entitlements in there, they left the exemptions or most of the exemptions in that we took out and then applied 2 percent and came up with essentially the same number.

Mr. President, that is how you got the Alice in Wonderland situation that my friend from Colorado spoke of that 2 percent equals 4 percent. Obviously 2 percent does not equal 4 percent unless you take 4 percent of one figure and 2 percent of a different figure.

Mr. President, the President of the United States has never changed his position. He has been loyal to this commitment he made to me and to the Senate that he would sign a bill that represented the savings that were advanced and we thought accomplished by the Baker-Byrd amendment if they survived the conference. The key phrase is they did not survive the conference.

Mr. EXON. May I inquire further of the distinguished majority leader, is it fair to say that the President did not like the mix of the cuts although the total in budget authority indeed met the figures in the Baker amendment?

Mr. BAKER. May I respectfully say to my friend from Nebraska, who is a dedicated Senator and extremely capable—I wish he were on my side of the aisle—I respectfully disagree with the statement that he just made.

I believe that one of the major defects in the House proposal and in the conference report as adopted was that when they failed to take out the exemptions and the entitlements that I spoke of earlier and applied their 2 percent to it, then later when they did take them out there was more money to distribute against other titles.

Bear in mind, the defense item is not there. But the net result was to reduce foreign assistance, to increase Labor-HHS, and to have a further impact on other programs. The difference in computation produced the different mix. I do not believe the different mix was produced as a change in priorities in the House of Representatives. Perhaps it was. If it was, it was not a direct and frontal assault on those priorities but a change in the way the computation was made. It is true that by changing the method of computation as I described, it had the inevitable effect of changing the amount of money that went to the several accounts that are involved in the eight domestic programs affected by the Baker-Byrd amendment.

Mr. EXON. I would like to inquire further, if I might, because I respect his judgment, as he knows. Is the majority leader voting for the conference report on the basis that he believes that while it is not his amendment that basically he thinks it is close enough to it, or is he voting for the conference report because of the fact that the President has agreed to veto it?

Mr. BAKER. Mr. President, before I answer the Senator's question, let me say that there is a great range of opinions on this side of the aisle about whether we should vote for or against the conference report. Within that range are some who think that the conference report is indeed a good work product; and others who think it is perhaps the best that can be done under the circumstances. Some think it is perhaps midway where we should be. Some think it is not too good and some think it is awful.

Mr. President, there is no effort on the part of the leadership on this side

to tell people that they should abandon their appraisal of this conference report. They are free to make their judgments as they please and indeed to vote as they please.

To answer the Senator's question, I will tell him that I am in that third category. I think maybe it is not such a bad conference report, but at 9:10 on Sunday night, and it is now almost 48 hours since the Government theoretically went broke—at 9:10 on Sunday night it is time to liquidate this issue. It is time to crystallize this and get it to the place where we can deal with it.

So, Mr. President, my answer is, I will vote for it with the full expectation that the President will veto it and the great hope and expectation that the House of Representatives then will send us some temporary measure making continuing appropriations for a limited period of time that we can adopt yet tonight.

Now, let me tell you what the alternative would be. I must tell you that I received a good bit of advice from this side of the aisle and a fair amount from downtown, meaning at the White House, on the idea that we ought to reject the conference report because it is not terribly good in the view of many.

But let me say, as a procedural matter, what happens if we do that. As the distinguished majority leader pointed out, if we reject this conference report, this bill, this conference report, this resolution does not go away. It does not evaporate and disappear. Presumably the two bodies would go to conference once more on that same measure.

Now, I do not know how long that will go on. I do not know what the end result will be. What I know is, I do not want the Government of the United States to face in the morning, at the beginning of business, the uncertainty of whether or not we could pay our bills.

Mr. President, there are half-a-dozen ways we could approach this issue. But the one I choose and the one I recommend is that we go ahead and adopt this, with the full foreknowledge that the President of the United States will withhold his approval and with the hope and expectation that we can get on with the temporary measure.

Mr. EXON addressed the Chair.

Mr. ROBERT C. BYRD. Will the Senator allow me to ask a question?

Mr. EXON. Certainly.

Mr. ROBERT C. BYRD. May I say to the distinguished majority leader, most respectfully, he misrepresented what I had said, but he misrepresented it because he misunderstood it. Let me clarify what I said earlier.

If the Senate rejects this conference report, it does not mean that we do go back and forth with the conference again and again and just extend the work on it. That is not the case. If we reject this conference report, that is the end of the conference report, period. It is dead.

Now, if that happens, the Speaker will send over another resolution, the House will send over another continuing resolution extending the date 15 days or a month or 6 weeks or whatever, and then the Senate will have an opportunity to vote that up or down. And I assume that the Speaker could call the House together and get another resolution over here.

Mr. BUMPERS. Will the minority leader yield?

Mr. EXON. I believe I have the floor.

Mr. ROBERT C. BYRD. So I say to the distinguished majority leader, most respectfully, that he misunderstood my position.

Mr. BAKER. If the Senator would permit me to say a word?

Mr. EXON. I am happy to yield to the majority leader.

Mr. BAKER. Indeed, the minority leader is correct. If we decide that is the end of it, it is.

But I cannot visualize, on a matter of this sort, if we reject this conference report, that we would not ask for another conference or proceed in that way. Something has to be done.

Mr. ROBERT C. BYRD. In rejecting the conference report, that is the end. The House conferees have already been disbanded. When this conference report is voted down, it is as dead as last year's Christmas turkey. [Laughter.]

But I am sure that the Speaker would immediately initiate the action on a new resolution making an extension.

Mr. BUMPERS. Will the Senator yield?

Mr. EXON. Yes.

Mr. BUMPERS. Will the minority leader yield for a question?

Mr. ROBERT C. BYRD. The majority leader has the floor.

The PRESIDING OFFICER. The Senator from Nebraska has the floor.

Mr. EXON. Do not forget.

[Laughter.]

Mr. BUMPERS. My question to the majority leader is this: If we want to expedite this matter, as the leader has indicated, would it not be infinitely better for us to vote this conference report down now in the certain knowledge that the President is going to veto it and no override is possible and possibly within the next hour pass a continuing resolution, which the majority leader over there, Mr. WRIGHT, has told me they can get to us within 30 minutes after we vote this conference report down? If everybody really wants the Government to continue to function, I think we could probably arrange that in the next 60 minutes, if we vote this conference report down.

If we do not vote it down, then it is going to the White House, the President is going to have to issue a veto message, and it is going to have to come back over here, and I assume we are going to have to try to override it or go through the procedure again.

Would the majority leader not agree that the quickest way to resolve this matter is simply to defeat this conference report and let the House send us another continuing resolution?

Mr. BAKER. If I may answer, will the Senator from Nebraska yield?

Mr. EXON. Glad to yield. [Laughter].

Mr. BAKER. To tell you the truth, Mr. President, I do not care which way it goes. [Laughter].

I want to tell you something. All I want to do is get this thing out of here. Now, some of my friends apparently are under the misapprehension that the President is just busting his suspenders to veto something. That is not right. And maybe I am trespassing on Presidential confidentiality when I say what I am about to say next, but it is true.

I talked to the President on the telephone just a little while ago. He asked me to make a recommendation on which way we proceed and I made this recommendation. His remark to me was: HOWARD, I am perfectly willing to do it that way or I am perfectly willing for the Senate to reject that if they prefer. If you think that is a bad bill, reject it. I am not teething at the bit—those were not his words, those are mine—to veto something.

Now, I am going to tell you right now, I say to my friend from Nebraska and my friend from Arkansas, that it does not make a particle of difference to me which way we go with this. All I want to do is make sure we get rid of this thing once and for all. As far as I am concerned, we could have a vote and you can vote it up or you can vote it down, but just vote it and get it over with.

SEVERAL SENATORS. Vote!

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska has the floor.

Mr. EXON. I appreciate the great consideration my colleagues have given this freshman U.S. Senator, but I am going to ask one more question. Is the majority leader still on the floor?

Mr. BAKER. Yes, sir.

Mr. EXON. One more question I have of the majority leader. Since I try and follow the recommendations of committees when I think they are right and generally I try and follow the majority when I can on conference reports, there were 15 Members that signed the conference report at 1:30 this morning on that side of the aisle. Can the majority leader advise me as to whether there will be any defections of those 15 when we vote in just a moment?

Mr. BAKER. I do not have the foggiest idea.

Mr. EXON. I thank the majority leader for his patience.

SEVERAL SENATORS. Vote!

Mr. HATCH. Mr. President, it is with a great deal of reluctance that I will vote for this resolution, since the spending levels that it contains are clearly in excess of the levels requested by the President.

Even though the President has shown a willingness to compromise at some savings level below the 12 percent he originally requested, the savings in this resolution is approximately $2 billion. The President was willing to accept a $4 billion savings.

I have concluded that the President's warning on runaway spending has generally been ignored by the Congress, and that the only way that the issue can be clearly addressed is by sending House Joint Resolution 357 to the White House and giving the President a chance to veto it.

At this time, the focus of discussion is revolving around the outlay estimates generated by OMB and those calculated by the House Appropriations Committee staff. I will support this resolution as a

means of permitting the light of a new day to fall on both sets of estimates and as a means of allowing the President to clear the air on the issue of the runaway spending in the numerous entitlements program, at least two of which are at issue in spending estimates included in this resolution.

Also, to set the record straight, I will then vote to sustain the President's veto as a long overdue rebuke of the Congress.

Mr. KENNEDY. Mr. President, I commend all the Senate and House Members of the Conference Committee for their good faith effort to reach an acceptable resolution of this controversy on the continuing appropriations bill. They have worked hard days and long hours throughout this weekend to achieve reductions in spending that will satisfy the President without crippling vital programs that are a lifeline to countless Americans in every section of this country.

I had thought that an understanding had been reached with the administration in the early hours of this morning. But now we are told that there is no understanding, that more spending cuts are needed, and that this bill once more stands in the shadow of a veto—unless, says the administration, we go back to the well again for more cuts and deeper cuts.

But I say to you, the well is already dry. The budget cuts we have made already are too deep. They are written, not in the numbers of David Stockman's balance sheet, but in the tears and pain of millions of our citizens who must bear the brunt of these harsh and unfair budget cuts.

As the first snowstorms of winter arrive, how shall we tell families, trying to heat their home, that low-income fuel assistance has been cut by $90 million from a year ago?

What shall we tell a mother seeking health care for herself and her newborn child, when she learns that maternal and child health funds have been slashed by $100 million.

Worst of all, what shall we tell the young persons in our cities, when their rate of unemployment touches 50 percent or higher, when they realize that job training funds for youth have been cut by $500 million—or an incredible 70 percent—just as the economy is sinking into a severe recession.

There are no adequate answers to questions like this. The cuts adopted in this measure are already unacceptable. We must not compound this crisis of human misery by asking even harsher slashes in these programs. We have done too much damage already.

David Stockman himself has exposed the Reagan economic program for what it is—a classical example of trickle down economics, a program that blesses the rich with massive tax benefits and condemns the poor and the middle class to insufficient tax relief and endless spending cuts.

Nor is there any justification in economic theory for the administration's demand. Their policies have already pushed the economy over the brink of recession. The administration has wisely agreed to drop the tax increases they proposed as recently as September—as everyone knows, you do not raise taxes in a recession, because it will only make the recession worse.

That was Herbert Hoover's policy in the early 1930's, and it brought us the Great Depression. But if you listen closely today, you can hear the echoes of Herbert Hoover.

The same rules of fiscal policy that tell us not to raise taxes in a recession also tell us not to cut spending. It has the same devastating economic impact. It will only make the recession worse. This is elementary economics, and if Congress violates this basic fiscal principle, we will only deepen our current distress, and make the current budget deficit even greater.

As a rule of thumb, each increase of 1 percent in the unemployment rate causes an increase of $25 billion in the Federal deficit. Unemployment in this country is now at 8 percent and rising. It has gone up 1 full percentage point since July. So the recession their policies have caused has already increased the deficit by $25 billion. Yet all we hear from the President is to keep on cutting spending and keep on making the recession worse.

It is difficult to imagine a more untenable position for a President than to shut down the Federal Government over this issue. That action would be contrary to the most fundamental principles of fairness and of sound economic policy. I urge the President not to do further damage to the economy by insisting on deeper spending cuts at this highly inappropriate time.

● Mrs. HAWKINS. Mr. President, the economic recovery program of the President deserves the continued, full support of the Senate.

Because I support the President in his effort to reduce Federal spending, restore the economic health of America, and strengthening our Armed Forces, I will vote for passage of House Joint Resolution 357, the continuing appropriations resolution.

At this time the most expeditious means of resolving the current budget impasse is to refer to the President this continuing appropriation bill although it falls short of his spending targets while making unacceptable cuts in the defense budget. This parliamentary procedure allows the President to veto House Joint Resolution 357, sending it back to the House which has a constitutional duty to initiate a revised continuing appropriations bill. I trust this new bill will gain the support of the President and the American people by making the additional cuts necessary to restore our economic health.●

● Mr. GRASSLEY. Mr. President, under President Reagan's leadership, we have enacted two major components of his economic recovery plan this year—the tax and spending cuts—which will enable us to return this country to the course of economic growth and strength. This is obviously the mandate given to us just over a year ago in the 1980 elections.

This bill, which makes continuing appropriations for this entire fiscal year, completely contradicts all the effort that both the President and Congress have expended over the past 11 months. We have made history by passing the omnibus reconciliation bill of 1981, which saved the American people $36 billion this year. As we all know, the reconciliation bill forced us to make some, difficult decisions, but we made them in an effort to bring Government spending and our economy under control. This bill that we are now deliberating completely negates those decisions that we made this year, however. By passing this bill in its current form, we would in effect be continuing the spending priorities of the previous administration.

The President has agreed that the Senate version of the continuing resolution, though still $1.1 billion over his latest budget request, would be acceptable to him. I would wish that he would not even compromise this far. The version we are now discussing, however, is $3.5 billion more than he had requested, and $2.4 billion over the compromise position. Of the $3.5 billion in excess spending, $1.7 billion are the result of blatant underfunding of entitlements by the conferees. This action should not fool anyone, for we all know that what we underfund today will return to haunt us in a supplemental. The President is certainly not fooled by this gambit, and I agree with his judgment that the entire bill as it now stands is unacceptable.

What we have here is a test of strength for the President. Against what seem to be overwhelming odds, he is battling the business-as-usual approach to Government that has gotten us into so much trouble. The President has made a significant effort to accommodate those that have different ideas with regard to fiscal policy, while maintaining the integrity of his economic program. I applaude his efforts so far, and encourage him to take whatever actions are necessary to stand his ground. He is prepared to veto this resolution, and I am prepared to support him in this action. I, therefore, vote against this conference report in an effort to insure a better resolution that adequately reflects our responsibility to the Nation.●

SERVICE FUNDING FOR VICTIMS OF RAPE

● Mr. MATHIAS. Mr. President, I am pleased that the Labor, Health and Human Services appropriations measure contains a small level of support for rape crisis centers in their important work of aiding rape victims.

The preventive health care block grant earmarks $3 millon for funding services to victims of rape.

I thank my colleagues on the Appropriations Committee for recommending this funding, which has been needed for such a long time.

The 95th and 96th Congress funded existing rape crisis centers, of which there are more than 300 nationwide. I was joined in sponsoring that legislation by Senators HEINZ, JACKSON, STAFFORD, BAYH, RIEGLE, RANDOLPH, LEAHY, INOUYE, TSONGAS, WILLIAMS, WALLOP, MOYNIHAN, and the chairman of the Senate Appropriations Committee, Sen-

ator HATFIELD. On the House side, a companion bill was shepherded through that body by Representatives WALGREN and WAXMAN.

In the course of 4 years of fine tuning that legislation, several features of a service program for rape victims became clear. One was that rape crisis centers, which, by and large, are volunteer-run peer counseling and victim accompaniment centers, are perceived by a majority of rape victims as a safe place to turn to in their most traumatic time of need. Crisis centers are viewed by raped victims as places of shelter where the victim's privacy will be protected and where she will be treated sensitively by her community-based peers.

The legislative history of my bill (S. 621) makes clear that the intended recipients of those funds were to be existing rape crisis centers. Eligible services were to include victim counseling and followup counseling with the victim and her family; the operation of telephone hot lines; victim accompaniment to the hospital or doctor, to the police, and to court; continuing professional development of crisis counselors, and community education by crisis centers into methods of preventing rape.

Community-based rape crisis centers have been forced to devote as much as 50 percent of their time to fundraising to pay for space, lights, telephone, heat, and carfare. This service funding provision is intended to lessen the time those crisis centers devote to fundraising, so that their talents and energies may be focused more properly on the victim and her needs.

Early indications are that several State plans for the preventive health block grant are proposing to divert funds from existing rape crisis centers to other institutions such as police departments, hospitals, and departments of social services. This is a clear thwarting of congressional intent. I, therefore, would ask my colleagues on the Appropriations Subcommittee on Labor, Health and Human Services to review carefully the use of these block grant funds with the Center for Disease Control, which is charged with administering the block grant.●

● Mr. LEAHY. Mr. President, almost a year has passed since President Reagan put his supply-side economic theories to work on the American economy. As we debate this spending resolution, 4 months have passed since the stunning and complete Reagan administration tax and budget victories of August. We are just 2 months into the first Reagan fiscal year, fiscal year 1982, and yet the major economic goals of the administration have been adjusted, readjusted, and in many instances, abandoned.

Dashed are the hopes of the countless small business people, homeowners, and families who believed that the single-digit interest rates forecast by the Reagan economists would relieve their life threatening financial pressures. Today's double-digit prime rate and mortgage rates remain well above last year's levels.

Lost are the ambitions of the jobless who have witnessed 9-percent unemployment instead of the millions of new jobs promised by the craftsmen of Reaganomics. More Americans are jobless today than at any time since the Great Depression of the 1930's.

Revised and now abandoned is the administration's forecast for rapid economic growth in 1982—growth without which the shrinking deficits and balanced budget promised by the President cannot possibly be achieved. The administration's GNP growth forecasts for 1982 have proceeded like a countdown—first 5.2 percent in March, then 4.1 percent in July, then 2 percent, now 1 percent—and there is no telling when the recession-mired economy will begin a sustained recovery.

The President has reacted to all this troubling economic news by officially withdrawing his promise to balance the budget in 1984. The official administration deficit projections have swelled with each public appearance. Congressional budget experts and leading private and Government economists now predict deficits of $300 billion plus over the next 3 years—deficits of $100 billion or more annually.

Mr. President, it is within this economic context—recession, rising unemployment, high interest rates and inflation, and growing Federal budget deficits—that we are debating the stopgap spending resolution before us today.

The whole Nation is standing by, practically breathless, awaiting final action by Congress on the spending measure now before us. The possibility that the Federal Government will come to a screeching halt if we fail to act has raised public interest, if not alarm. The threat of a Presidential veto has heightened the drama.

And what are the great issues that have piqued the interest of the often apathetic American public? What are the great policy questions which have stirred so many impassioned speeches here on the Senate floor? What are the high stakes which have prompted the Senate to ignore and violate the careful timetables and procedures set forth in the Congressional Budget Act—and which have led us to pass on to the administration many of the spending authorities and responsibilities vested in Congress by the Constitution?

Mr. President, I challenge every Member of this body to come up with honest and satisfactory answers to these questions. I submit that there are no such answers. I submit that we have swept the real economic problems facing this Nation aside for another time. And we have masked our unwillingness to confront the real problems with a big show over nothing.

Mr. President, budget deficits of $300 billion or more will result from the Reagan administration's tax cuts and defense buildup unless the administration and Congress change the direction of current economic policy. More high interest rates and inflation, unemployment, and stagnant economic growth will be the unfortunate result of continued inaction.

The bill before us today would make a $6 billion, or 2-percent dent in a $300 billion deficit problem. What is worse, the small advance toward lower deficits would be achieved largely at the expense of the domestic spending programs—education, health, energy, and transportation programs—which have already been slashed by as much as 30 to 50 percent earlier this year.

We cannot correct the budget problems caused by the carelessly crafted tax and defense bills by zeroing in, time and again, on the same 10 or 15 percent of the Federal budget. We and the Reagan administration must acknowledge that more revenues will be needed to contain the growing budget deficits. We and the Reagan administration must agree that no waste can or will be tolerated in Federal programs—not in domestic programs and not in defense programs.

We and the Reagan administration must recall two words used by the administration from the outset—"balance and fairness"—and we must apply these words as we redirect the course of the Nation's economic policies.

Mr. President, one serious and negative consequence of this year's budget stampede has been the damage done to the congressional budget process.

After enacting the first concurrent budget resolution at the appropriate time, the process has been undermined and delayed to the point where the very future of the Congressional Budget and Impoundment Act now stands in question.

The second concurrent budget resolution establishing a spending ceiling, revenue floor, and target budget deficit or surplus for fiscal year 1982 was to have been enacted by September 15. After numerous starts and stops, the Budget Committee finally gave up. Earlier this week they reported a resolution identical to the first budget resolution, though admittedly unrealistic given today's budget outlook, and they reported it without recommendation to the full Senate.

Given the severity of present economic conditions, and given the many unanswered concerns and questions the American public has with current tax and spending policies, I believe it is unforgivable that we should conclude this session of Congress without debating and passing a budget resolution.

The appropriations bills have suffered no better fate. When the continuing resolution now before us was called up on Wednesday, only 8 of 13 appropriations bills had passed the Senate. Only one had become law, and as my colleague from Wisconsin noted, that one is the bill which pays congressional expenses.

Why have these bills been delayed? They are late because the Appropriations Committee honored the request of the President that no action be taken on them until his newest budget cutting proposals could be considered. Unfortunately, those proposals were forwarded to the committee on September 30, just 1 day before the beginning of the new fiscal year.

Although it was not possible to have each of the 13 appropriations bills in place by October 1, or by November 20, the expiration date of the first stopgap continuing appropriations resolution, I believe Congress must make every effort to finish each separate bill before we ad-

journ for the December holidays. Careless spending decisions, waste and skewed spending priorities will clearly result if these bills are not considered separately and near the beginning of the fiscal year.

I favored an amendment which would have forced us to do just that by changing the expiration date of this second continuing resolution to December 18. I regret that that amendment was not accepted, although I am pleased that the September 30, 1982 expiration date originally contained in this resolution was changed to July 15.

Mr. President, I regret that my injury and hospitalization has prevented me from participating in the Senate debate and the conference committee on House Joint Resolution 357, and that it will also prevent me from voting on this measure. I do wish to summarize here several of the concerns I have with the resolution in its present form.

First, I believe it represents an unfair and inadequate response to our growing economic problems and to the worsening deficit situation. The Reagan administration and Congress should act swiftly to identify the specific tax and spending changes that will be necessary to restore fiscal order and a healthy economy.

Second, I believe that July 15 expiration date of this resolution further erodes the congressional budget process by encouraging delay and inaction on the regular appropriations bills. We must learn from this year's missed deadlines, and from the confusion and harm we have caused the public, businesses, and State and local governments, and we must return next year to the regular budget and appropriations timetables which in the past have served us well.

Finally, I have sharp disagreements with a number of the specific spending levels established by this resolution.

During previous debate on this measure, I outlined many of my concerns—my concern that the cuts in the Environmental Protection Agency (EPA) budget of 30 percent in 1982, and 50 percent in 1983, would effectively repeal the public health and environmental legislation enacted over the last decade. My outrage that the proposed $40 billion expenditure for the soon-to-be obsolete B–1 bomber may prevent us from meeting other essential defense and domestic needs. My disbelief that a nation as wealthy as ours would reverse its commitment to the special education and vocational rehabilitation programs which offer hope and opportunity to so many handicapped American children and adults.

My alarm that Congress would court disaster and personal tragedy with insufficient funding allowances for the emergency low-income energy assistance and community services block grant programs. Finally, my disapproval of the deep reductions in funds for the urban development action grant (UDAG) and community development block grant (CDBG) programs which have helped so many Vermont cities and communities to help themselves.

Modest gains were made in support of the emergency energy assistance and community services block grant programs in the House-Senate conference committee.

When the Senate considers the remaining appropriations bills for 1982, and begins work in January on the budget for fiscal year 1983, I will continue to press my concerns in these and other areas.●

● Mr. CHILES. Mr. President, this continuing resolution provides $428 billion of funding for thousands of items. I have already expressed myself on some of these items, and about the continuing resolution's harm to the legislative process. Many of the items in the resolution are funded at lower levels than I would like; some are higher.

I do want to go on record at this point in opposition to one amendment added by the House conferees at a time I was out of the room, at about midnight Friday night. In that amendment the House Members gaves themselves a 4.8-percent pay raise.

Fortunately they did not try to give Senators a pay raise as well. I do not think it is wise at this time to raise the pay of any Member of Congress, when we are trying to fight inflation by cutting back on spending. We are cutting back on programs for the poor, programs for education and job training. We have taken a 2-percent cut across all programs to save $4 billion. There could not be a more inappropriate time to raise congressional pay.●

Mr. ARMSTRONG addressed the Chair.

Mr. CRANSTON. Will the Senator yield for 1 minute?

Mr. ARMSTRONG. Mr. President, I will take only a moment. While the majority leader was off the floor a few moments ago, I expressed my doubts and reservations about this bill, I would say to the majority leader, and then explained, somewhat to the amusement of Senators and the gallery, that despite the fact that I think it is a poor bill, a poor policy, a poor practice and a poor precedent, that I was going to vote for it because the majority leader had asked us to do it and had recommended that it was the best way to get us out of the bind we are in.

Let me repeat a portion of what I said earlier, because I feel this. The majority leader had managed this issue, I say to the majority leader, with such courtesy and patience and cheerfulness in a difficult situation that it seemed to me Senators ought to at least accommodate him in a tactical matter and follow his leadership in that respect. In light of what you have said I take it that we are all free to do as we think best.

Mr. BAKER. You are exactly right; you are off the book.

Mr. ARMSTRONG. Thanks; I appreciate that.

Mr. BAKER. If the Senator would yield to me, I am prepared to say that we can all vote against it or all vote for it and it will produce the same equivalent.

Several Senators addressed the Chair.

Mr. ARMSTRONG. Mr. President, I believe I still retain the floor.

Mr. BUMPERS. Will the Senator yield?

Mr. ARMSTRONG. I am going to take less than 10 seconds more. I simply again wish to thank the majority leader for his courtesy and for the clarification on this. I, of course, will vote against the resolution. [Laughter.]

The PRESIDING OFFICER. The Senate will be in order, and so will the gallery.

Mr. CRANSTON. Mr. President, now that the majority leader has stated that he does not care which way Senators vote, I just want to strongly urge Senators to vote against passage of the continuing resolution. We have heard it called a monstrosity, an absurdity, ridiculous, a poor bill, poor policy, poor practice for a President. Why vote for it?

Let me give one reason beyond those that have been mentioned for voting against this measure: We have assurances from the other body that if this measure is defeated, they will pass a short-term continuing resolution swiftly, tonight, that will enable us to follow suit and the Government to stay in business tomorrow morning. We have no assurances that that will happen tonight and I do not believe it will happen tonight if we pass the bill and it goes down to the President for a veto. I think that there will be a delay and there will not be action until tomorrow.

Do you know what that will cost? We have been arguing about $2 or $3 billion. The cost of this Government on an annual basis is $600 billion. Take 1 day. Suppose for 1 day, people go to work and are not able to work. They are told to sit there, but do not do anything. Great productivity. That will cost $1.75 billion to pay people not to work for 1 day.

If you go in to get it done in half a day, it will cost seven-eighths of a billion dollars. Why waste that money? Vote down the resolution and they will be working tomorrow.

Mr. BAKER. Mr. President, will the Senator let me make an inquiry of him?

Mr. CRANSTON. Yes.

Mr. BAKER. I am greatly reassured by the statement of the Senator from California that there is going to be something tonight. But the distinguished minority leader of the House is here. I have not understood that that was going to occur until morning. I am in no position to make a direct inquiry at this moment of the Speaker, but it is clear to me, at least, that we ought to get something from the House yet tonight, get it passed if it is possible to do. If we are not going to do that, we need to know that so we can decide and arrange our schedule of the Senate.

Mr. HARRY F. BYRD, JR. Mr. President, I shall take only a moment. During the 10 months that Ronald Reagan has been President of the United States. he has made a determined effort to get Federal spending under control. I applaud his endeavors. I admire him for the determination that he has shown in an effort to control spending. The President has asserted that the conference report now before the Senate provides for too much spending and he will veto the conference report. I shall support the President in this position by voting against the conference report.

Mr. MOYNIHAN. Mr. President.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, I wonder if I could ask the distinguished majority leader whether it is the view of the President of the United States that the appropriation for the foreign assistance portion of the measure before us is too small?

Mr. BAKER. Mr. President, I cannot speak for the President directly. I can speak for responsible officials of the administration who do, indeed, think that the levels in the conference report for foreign assistance are too low.

Mr. MOYNIHAN. So, there is some point in this matter where the President would wish us to increase the expenditures?

Mr. BAKER. Not above the Senate level, I say to my friend from New York. The Senate level on foreign assistance was acceptable to him and is fairly—$11,600,000,000. It was reduced in the House bill to $9,500,000,000, and in the conference, $500 million was added back.

May I point out, Mr. President, this is not foreign aid as such, but foreign assistance. The conference report, in removing these sums of money from foreign assistance, will indeed seriously impair the ability of the United States to perform on the commitments it has made in Egypt, in Israel, most recently in the Sudan and elsewhere.

Mr. MOYNIHAN. So, one would not be wrong in thinking that part of the administration difficulty with this measure is that there is some portion of it which poses too low a level of expenditure?

Mr. BAKER. Mr. President, I am afraid I must say to the Senator, that is torture. There is no way I can say that, nor do I believe my friend from New York can say that.

Mr. MOYNIHAN. This whole matter is torture.

Mr. BAKER. There is no way my friend from New York can say that. Indeed, the $12 billion level in the Senate was approved by the Senate. He agreed that was the appropriate level, not by item but by titles in the Senate-passed resolution with the Baker-Byrd amendment applied. The President has not assigned the reduction of that level as a reason for his veto. He has not. I am simply saying that responsible officials of the administration feel that the Senate level was more appropriate than the House level and I may say, parenthetically, I agree with them. But he has never said that a threat to veto this measure is based on a level of spending for foreign assistance.

Mr. MOYNIHAN. May I say that I agree with the majority leader, but I also point out that there is a difference of direction in this body on this matter and a great coalition was formed a generation ago for defense, for foreign assistance, for domestic social programs which is being wrecked.

Mr. BAKER. Not by this Senator and I believe not by this President.

Mr. MOYNIHAN. Certainly not by this Senator.

Mr. DODD. Will the Senator from New York yield?

Mr. MOYNIHAN. I am happy to yield to my distinguished colleague from Connecticut.

Mr. DODD. I thank the Senator for yielding. Possibly I can shed a little light on this discussion. I have in my hand the talking points which the Director of the Office of Management and Budget used in the discussions on exactly where cuts should occur and where they should not occur. I think it is intriguing to note that when talking about foreign assistance and foreign aid, it was the position of the Director of the Office of Management and Budget that the figure was $1.3 billion too low.

In the area of total budget authority for eight domestic agency bills, he said the figure was too high. What we are talking about here tonight is not the level of spending but the priorities of spending. The $400 million that was saved in the conference report below the Senate figures are the savings here. These differences between domestic spending and foreign assistance is really where the contest is and in fact, the Director of the Office of Management and Budget thinks we are spending too little in foreign assistance and foreign aid and too much on the American people. That is the heart of the matter.

Mr. MOYNIHAN. I thank the distinguished Senator because the day will come when we wish we had not destroyed the unity of those who believe in defense, in foreign assistance, and in social programs as well. When we begin to think one is a tradeoff from the other, we shall have lost the unity of this body that may not come again in a generation.

Mr. BAKER. Mr. President, may I point out that the figures that the distinguished Senator from Connecticut was dealing with read as follows: The Senate level for foreign assistance was $11,400,000,000. The conference report was $10,075,000,000. The difference between the two was $1,325,000,000. The Senate adopted the $11,400,000,000 level, which, by the way, is lower than it was last year. I believe it is the appropriate level and I think that it should have been sustained in conference and I regret that it was not.

Mr. STEVENS. Mr. President, I might say to my good friend, the majority leader, that if he wishes us to vote for this report and send it to the President, I shall join that. If we are not going to do that for the purpose of terminating procedure in that matter, I would prefer to vote against it.

I would prefer to vote against it because the House has taken out of this again the executive pay raise. Every time I say that, the majority leader wishes I would shut up, but I find it to be a very incongruous thing that we cannot get this subject settled. There are literally thousands of jobs now that are vacant. We are going to give the Department of Defense more money than it has ever had in peacetime and it is going to be run from the 14th stool.

You know, grade 14 is where the decisions are made, because no one above that level gets any additional compensation.

Mr. President, I tell you that the Government is going to come to a halt not because we fail to give it money but because we cannot get people of competence or keep people of competence in Government once they get the experience level that makes them more valuable to the private sector. They are leaving the Government in ever-increasing numbers and we cannot find a way to break this nexus between congressional pay and executive pay.

Mr. President, I think I understand the majority leader's weariness of my mentioning this, time and time again, but someone has to talk about it.

If I am really free to vote against this in spite of the fact that my name, I say to the Senator from Nebraska, is on this report, I would vote against it because of what was done in the House with executive pay. If we are going to send this down to the President so he can veto it, I would be glad to do that. But one way or the other, I do not want to support this action of the House in once again refusing to recognize what I consider to be the most pressing problem of Government. That is the problem of how to keep the career service into the senior executive level when, after grade 14, they get no additional compensation.

Mr. BAKER. Mr. President, I shall take only a moment.

Every cause has a champion. I must say that the Federal employees of the United States of America should elect TED STEVENS their champion because he is absolutely right. I cannot remember a single meeting when he has not pointed out recently the difficulty that the Federal employees have as a result of the pay cap on executive positions.

Indeed he is correct, but he also knows that I have not encouraged him to do that, which is a mild way to put it, I suppose.

But I recognize the concern of the distinguished assistant majority leader in his zeal and it should be recognized as a voice to be spoken and properly so and in a cause that must be served at some point. I have no criticism of it.

Mr. President, may I simply say somewhat facetiously, I guess, that the conference report that has no more friends than this one does should have some body.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, if I may address a question to the majority leader, I am a little late and I am confused.

Mr. BAKER. The Senator from Kansas is at his very best when he is confused.

[Laughter.]

Mr. DOLE. I heard the distinguished Senator comment earlier in my office. He sounded great. He was voting for it, and then I come over here and I find he is voting against it.

I wonder what happened on the subway when I came over.

[Laughter.]

Mr. DOLE. Is there a signal of any kind?

[Laughter.]

Mr. DOLE. I will vote either way.

[Laughter.]

Mr. BAKER. Mr. President, the Senator from Kansas reminds me of the applicant for a teaching job in Tennessee who was asked how he felt about evolu-

tion. He said, "How do you feel about it? I can teach it either way."

Mr. DOLE. That clears it up for me. [Laughter.]

The PRESIDING OFFICER. The question is on agreeing to the conference report.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Delaware (Mr. ROTH), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Delaware (Mr. BIDEN), the Senator from Florida (Mr. CHILES), the Senator from Arizona (Mr. DECONCINI), the Senator from Missouri (Mr. EAGLETON), the Senator from Colorado (Mr. HART), the Senator from Montana (Mr. MELCHER), the Senator from Ohio (Mr. METZENBAUM), the Senator from Arkansas (Mr. PRYOR), the Senator from Nebraska (Mr. ZORINSKY), and the Senator from Oklahoma (Mr. BOREN) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 46, nays 39, as follows:

[Rollcall Vote No. 424 Leg.]

YEAS—46

Abdnor	Hatch	Packwood
Andrews	Hatfield	Percy
Baker	Hawkins	Quayle
Boschwitz	Hayakawa	Rudman
Chafee	Heinz	Schmitt
Cochran	Jackson	Simpson
Cohen	Kassebaum	Specter
D'Amato	Kasten	Stafford
Danforth	Laxalt	Stevens
Denton	Lugar	Symms
Dole	Mathias	Thurmond
Domenici	Mattingly	Wallop
Durenberger	McClure	Warner
East	Moynihan	Weicker
Garn	Murkowski	
Gorton	Nickles	

NAYS—39

Armstrong	Glenn	Mitchell
Baucus	Grassley	Nunn
Bradley	Heflin	Pell
Bumpers	Helms	Pressler
Burdick	Hollings	Proxmire
Byrd, Harry F., Jr.	Huddleston	Randolph
Byrd, Robert C.	Humphrey	Riegle
Cannon	Inouye	Sarbanes
Cranston	Jepsen	Sasser
Dixon	Johnston	Stennis
Dodd	Kennedy	Tsongas
Exon	Levin	Williams
Ford	Long	
	Matsunaga	

NOT VOTING—15

Bentsen	Eagleton	Metzenbaum
Biden	Goldwater	Pryor
Boren	Hart	Roth
Chiles	Leahy	Tower
DeConcini	Melcher	Zorinsky

So the conference report was agreed to.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

Mr. MOYNIHAN. I ask for the yeas and nays.

Mr. DOLE. I move to table.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. I move to table the motion to reconsider.

Mr. BAKER. Mr. President, I ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. There is not yet a motion to reconsider.

Mr. BAKER. There was a motion by the Senator from New York.

Mr. HATFIELD. I move to reconsider the vote by which the conference report was agreed to.

Mr. MOYNIHAN. I moved to reconsider the vote. [Laughter.]

Mr. BAKER. Mr. President, I seek recognition.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, I move to lay that motion on the table, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. RANDOLPH. Mr. President, I suggest that Senators clear the well as we vote.

The PRESIDING OFFICER. The Senate will be in order. Senators will take their seats. The well will be cleared. The galleries will remain quiet. The Senate will be in order, including House Members. Senators will please take their seats and clear the aisles.

The question is on agreeing to the motion. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. MOYNIHAN. Mr. President, a point of order. We do not have order in the Chamber.

The PRESIDING OFFICER. The Senator is correct. The Senate is not in order. The Senate will be in order.

The assistant legislative clerk resumed the call of the roll.

Mr. MOYNIHAN. Mr. President, a point of order. The Senate is not in order.

The PRESIDING OFFICER. The Senate will be in order.

The assistant legislative clerk resumed and concluded the call of the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Delaware (Mr. ROTH), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Delaware (Mr. BIDEN), the Senator from Oklahoma (Mr. BOREN), the Senator from Florida (Mr. CHILES), the Senator from Arizona (Mr. DECONCINI), the Senator from Missouri (Mr. EAGLETON), the Senator from Colorado (Mr. HART), the Senator from Montana (Mr. MELCHER), the Senator from Ohio (Mr. METZENBAUM), the Senator from Arkansas (Mr. PRYOR), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

I also announce that the Senator from Utah (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 50, nays 34, as follows:

[Rollcall Vote No. 425, Leg.]

YEAS—50

Abdnor	Grassley	Nickles
Andrews	Hatch	Packwood
Armstrong	Hatfield	Percy
Baker	Hawkins	Pressler
Boschwitz	Hayakawa	Quayle
Chafee	Heinz	Rudman
Cochran	Helms	Schmitt
Cohen	Humphrey	Simpson
D'Amato	Jepsen	Specter
Danforth	Kassebaum	Stafford
Denton	Kasten	Stevens
Dole	Laxalt	Symms
Domenici	Lugar	Thurmond
Durenberger	Mathias	Wallop
East	Mattingly	Warner

NOT VOTING—16

Bentsen	Goldwater	Roth
Biden	Hart	Tower
Boren	Leahy	Williams
Chiles	Melcher	Zorinsky
DeConcini	Metzenbaum	
Eagleton	Pryor	

So the motion to table was agreed to.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. If the Senator would withhold, the clerk will report the amendments in disagreement.

The legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 11 to the aforesaid resolution, and concur therein with an amendment as follows:

Strike out the matter stricken by said amendment, and insert:

Provided further, That, in addition to the sums otherwise made available by this paragraph the following additional sums are hereby appropriated: for low income home energy assistance program, $140,000,000;

for the foster care program authorized by Title IV of the Social Security Act, $75,000,000: *Provided*, That the provisions contained in the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriation Act for Fiscal Year 1982 (H.R. 4560), as reported by the Senate Committee on Appropriations on November 9, 1981, related to a limitation on entitlement to payments under parts A and E of title IV of the Social Security Act and transfer of funds under parts B and E of such title (contained in H.R. 4560 as so reported beginning with "provided" on page 39, line 17, and ending on page 40, line 8) shall not be applicable with respect to any sums appropriated pursuant to this joint resolution;

for the family medicine residency training programs authorized by Section 786 of the Public Health Service Act, $10,000,000;

for the Community Services Block Grant, $62,552,000;

for the State Block Grant authorized by Chapter 2 of the Education Consolidation and Improvement Act of 1981, $140,000,000:

Provided further, That the College Housing Loan Program shall operate under the terms and conditions as contained in H.R. 4560 as passed the House October 6, 1981 except that the gross commitments for the principal amount of direct loans shall not exceed $75,000,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 15 to the aforesaid resolution, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

(b) Such amounts as may be necessary for continuing programs and activities, not otherwise provided for, which were conducted in the fiscal year 1981, for which provision was made in section 101(b) of Public Law 96–536 regarding foreign assistance and related programs, notwithstanding section 10 of Public Law 91–672, and section 15(a) of the State Department Basic Authorities Act of 1956, at a rate for operations not in excess of the current rate or the rate provided for in the budget estimate, whichever is lower, and under the more restrictive authority: *Provided*, That the following additional sums are hereby appropriated: $300,000,000 for Foreign Military Credit Sales, $100,000,000 for the Economic Support Fund, and $100,000,000 for the Export-Import Bank of the United States.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 29 to the aforesaid resolution, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

(40) Notwithstanding any other provision of this Act, including any other provision of this title, any agency may before December 31, 1981, transfer to salaries and expenses from other sources made available to it by this Act, such amounts as may be required if the aggregate amount available for salaries and expenses, after such transfer, does not exceed the amount contained for such purposes in this Act before the application of the changes contained in title V: *Provided*, That such transfers shall be subject to the approval of the Committees on Appropriations: *Provided further*, That in the Department of Housing and Urban Development not to exceed (1) $34,000,000 shall be available for data processing services, (2) 12 full-time permanent positions and 16 staff years shall be available for the Immediate Office of the Assistant Secretary for Administration, and (3) 26 full-time permanent positions and 27 staff years shall be available for the Office of the Assistant Secretary for Legislation and Congressional Relations: *Provided further*, That in the National Aeronautics and Space Administration not to exceed (1) 150 full-time permanent positions shall be available for the Office of the Comptroller and (2) 120 full-time permanent positions shall be available for the Office of External Relations: *Provided further*, That in the Veterans Administration not to exceed (1) $1,500,000 shall be available for the Office of Planning and Program Evaluation and (2) 649 staff years shall be available for the Supply Service.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 32 to the aforesaid resolution, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amending section designation to: (11)

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 39 to the aforesaid resolution, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

"Notwithstanding any other provision of this joint resolution, except section 140, $869,240,000 is appropriated under this joint resolution for payment to the Postal Service Fund, of which $230,000,000 shall be available for public service costs and $639,240,000 shall be available for revenue forgone on free and reduced rate mail.

Notwithstanding any other provision of law, the Postal Service shall promptly adjust preferred rates so as to recover the difference between the amount which would have been authorized to be appropriated under section 2401(c) of title 39, United States Code had this provision not been enacted, and the $639,240,000 hereby appropriated. Such adjustments shall be made in accordance with the following subsections.

(a) As provided in Section 1723 of the Omnibus Budget Reconciliation Act of August 13, 1981, the first $104,000,000 of the difference in appropriations is to be recovered by adjustment of the rates for the class of mail under former sections 4452(b) and 4452(c) of title 39, United States Code.

(b) $56,760,000 is to be recovered through proportional adjustment based on the remaining phasing appropriation for any class of mail sent at a free or reduced rate under section 3217 or section 3626 of title 39, under the Federal Voting Assistance Act of 1955 or under the Overseas Citizens Voting Rights Act of 1975.

(c) The adjustments made under subsections (a) and (b) shall be further adjusted so that $20,000,000 is applied to lessen the adjustment under subsection (b) for any class of mail or kind of mailer under former sections 4358, 4554(b), and 4554(c) of title 39, United States Code.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 40 to the aforesaid resolution, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

"SEC. 109. No funds made available pursuant to this continuing resolution may be used to accomplish or implement a proposed reorganization of the Bureau of Alcohol, Tobacco and Firearms before March 30, 1982. Such reorganization plan may be implemented after March 30, 1982, unless disapproved by the House and Senate Committees on Appropriations: *Provided further*, That of the funds made available by this Continuing Resolution for the Bureau of Alcohol, Tobacco and Firearms, $15,000,000 shall be available solely for the enforcement of the Federal Alcohol Administration Act during fiscal year 1982."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 43 to the aforesaid resolution, and concur therein with an amendment as follows:

In lieu of the language proposed in (b)(1)(A), insert:

(A) all of the obligations of which are directly or indirectly guaranteed or secured in whole or in part by—

After (b)(2)(B)(ii)(II), insert:

(III) one or more financial institutions which are not related persons (within the meaning of section 103(b)(6)(C) of such code to the user of the proceeds of the issue.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 48 to the aforesaid resolution, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SEC. 117. Notwithstanding any other provision of this joint resolution, the funds made available by this joint resolution which would be available under H.R. 4560, entitled "Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982", for school assistance in federally affected areas under title III of such Act shall be available under the authority and conditions set forth in H.R. 4560 as passed the House on October 6, 1981: *Provided*, That the total amount available for entitlements under section 3(a) of the Act of September 30, 1950, as amended, is amended so as to permit payment to any local educational agency under such section 3(a) not to exceed 90 per centum of the amount of such payment for fiscal year 1981, unless the entitlement for such agency is determined under Section 3(d)(2)(B) of such Act: *Provided further*, That the provisions of section 3(d)(2)(B) shall be fully funded and not subject to rateable reduction: *Provided further*, That the provisions of section 5(c) shall not apply.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 53 to the aforesaid resolution, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SEC. 122. Notwithstanding any other provision of this joint resolution, appropriations for salaries and expenses in this joint resolution for the Department of Health and Human Services are hereby reduced by $21,800,000: *Provided*, That none of this reduction shall be taken from activities supported under the budget account entitled "Social Security Administration, Limitation on Administrative Expenses" or from funds available for the administration of the medicare program.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 57 to the aforesaid resolution, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: 125–128.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 74 to the aforesaid resolution, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SEC. 143(A). Notwithstanding any other provision of law or of this joint resolution, of the fiscal year 1982 Highway Trust Funds available for emergency relief, $17,000,000 shall be made available for damaged highways or for the prevention of damage to highways in the area affected by eruptions of the Mount St. Helens volcano.

SEC. 143(B). Notwithstanding any other provision of title 23, U.S.C., or of this joint resolution, the Secretary shall approve, upon the request of the State of Indiana, the construction of an interchange to appropriate standards at I–94 and County Line Road at the Porter-La Porte County Line near Michigan City, Indiana, with the Federal share of such construction to be financed out of funds apportioned to the State of Indiana under section 104(b)(5)(A) of title 23, U.S.C.

SEC. 143(C). Notwithstanding any other provision of law, or of this joint resolution any proposal for deferral of budget authority under section 1013 of the Impoundment Control Act of 1974 (31 U.S.C. 1403) with respect to budget authority for expenses related to the Northeast Corridor Improvement Project authorized under title VII of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94–210) shall, upon transmittal to the Congress, be referred to the House and Senate Committees on Appropriations and any amount of budget authority proposed to be deferred therein shall be made available for obligation unless, within a 45-day period which begins on the date of transmittal and which is equivalent to that described in section 1011(3) and (5) of the Impoundment Control Act of 1974 (31 U.S.C. 1401(3) and (5)),

the Congress has completed action on a bill approving all or part of the proposed deferral.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I have cleared this on the minority side. Therefore, I now move that the Senate concur in the amendments of the House of Representatives to the amendments of the Senate.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. HATFIELD. I move to reconsider the vote by which the motion was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. MOYNIHAN. Has the Senate just agreed to the House disagreements?

The PRESIDING OFFICER. The Senate has agreed to the House amendments to the Senate amendments.

Mr. MOYNIHAN. The amendments in disagreement.

The PRESIDING OFFICER. Yes.

There are two amendments in disagreement remaining, which the clerk will now report.

The legislative clerk read as follows:

Resolved, That the House insist upon its disagreement to the amendments numbered 37 and 73 to the aforesaid resolution.

Mr. HATFIELD. Mr. President, this has been cleared with the minority side. I now move that the Senate recede from its amendments.

Mr. ROBERT C. BYRD. Reserving the right to object.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. May I say that this has not been cleared on this side of the aisle. This request has not been cleared on this side of the aisle.

Mr. PROXMIRE. The Senator talked to me.

Mr. HATFIELD. I spoke to the Senator from Wisconsin.

Mr. PROXMIRE. I did not have a chance to speak to the other Members. I apologize.

Mr. ROBERT C. BYRD. I personally have no objection. If other Senators wish to reserve the right to object, they now have the opportunity to do so.

Mr. MOYNIHAN. Mr. President, I reserve the right to object. I would like to address, if I may, a question to the distinguished manager of the joint resolution, if the Senator from Oregon would respond to a question.

Mr. HATFIELD. Yes. I am happy to.

Mr. MOYNIHAN. Amendment No. 11 reported in the technical disagreements reduces the $75 million in the funds provided for title 4 of the Social Security Act, which is the Child Welfare and Adoption Act, as such. Am I wrong in thinking that this is to be a number well below the House proposal and yet further below the Senate proposal?

Mr. HATFIELD. Mr. President, I am happy to respond. We have already disposed of that particular amendment, but I would be happy to respond.

Mr. MOYNIHAN. I am aware that we did, but it went quickly and there are orphans and foster children at stake.

Mr. HATFIELD. I am fully aware of that. The Senate had an amendment in our bill. In the conference, the House made some report language, some language to the bill that we are now concurring with the language that was offered by the House.

Mr. MOYNIHAN. Would I be correct in thinking that the amount of money involved, $75 million, is half of what the House originally proposed

Mr. HATFIELD. It was an add-on, I say to the Senator from New York. The Senate had made an add-on.

Mr. MOYNIHAN. The Senate?

Mr. HATFIELD. Out of the conference, we had an additional amount.

Mr. MOYNIHAN. I thank the Senator.

Mr. HATFIELD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HATFIELD. Did I make the motion that the Senate recede from its amendments 37 and 73?

The PRESIDING OFFICER. The Senator has.

Mr. SARBANES. Will the manager of the bill give us an explanation of what those amendments involve and what it is he is asking the Senate to do?

Mr. HATFIELD. I would be very happy to. We are now moving that the Senate recede from its amendments, the two amendments that we added to our continuing resolution. One had a pay cap that is referred to as the Stevens amendment. I think the Senator from Maryland is very familiar with that one because so many of the constituents that he represents are affected by the Stevens pay cap removal.

The second one is in the No. 73, which was referred to again as the Stevens amendment on tax deduction. This was in reference to the away-from-home tax status that we are to be included in, that we passed before as a Senate amendment. We had to make a technical amendment to that action that had been taken previously.

The House has defeated both of those amendments and now we are, in a sense, merely acting on a technical matter of receding from those Senate amendments that have been defeated in the House today.

Mr. President, I move that the Senate recede——

Mr. TSONGAS. Mr. President.

The PRESIDING OFFICER. The Senator from Oregon has the floor.

Mr. TSONGAS. Will the Senator yield?

Mr. HATFIELD. I am very happy to yield.

Mr. TSONGAS. I would like to make two points: One, we assume that the President is going to veto this message. In the normal course of events, one would assume those who voted for the resolution would vote to override the veto. It is the normal practice.

Assume, for the sake of argument, that those who voted for the resolution vote tomorrow to sustain the veto; is there any way we could get advance notice as to the logic so we can mull it over in the interim?

Mr. HATFIELD. Yes, Mr. President. I say to the Senator from Massachusetts that his question really is irrelevant, for the simple reason that the House will sustain the veto and tomorrow, we shall never get to it.

Mr. TSONGAS. That is the reason we have here that those who voted for the resolution will vote to override the veto?

Mr. HATFIELD. If by some scenario, the Senate should have to cast a vote on this question tomorrow, I would imagine that the only way we will know is when that motion is put and the rollcall is held.

Probably some Senators will have tonight to think about it and some Senators will have their minds made up now. I just want to make one thing very clear:

Even though this bill was identified by some as sort of an illegitimate child in search of a parent here on the floor tonight, I say to the Senator from Massachusetts that I take great pride in this workmanship. I think this is a very good bill; consequently, that is my view. That is all I can give to the Senator.

Mr. TSONGAS. Mr. President, let me say if this is an example of the majority leader not caring which way it goes, I would hate to see what would happen on a bill on which he really cared which way it went.

The final point I make is that I regret the Senate's receding from the pay increase for Federal employees. I just want that to be on the record.

Mr. HATFIELD. Mr. President, I move that the Senate recede from its amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oregon. Is there any objection?

The motion was agreed to.

Mr. HATFIELD. I move to reconsider the vote by which the motion was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I am very happy to yield the floor at this point.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. HATFIELD. All right, I had indicated before that I would be happy to yield to the Senator from Kansas to make a statement relating to one of the amendments we have acted on.

Mr. DOLE. Mr. President, I would like to make a brief statement about the House amendment to Senate amendment No. 43 dealing with multiple lot industrial development bonds.

As I said on the floor when the Senate version of this amendment was adopted, the Senate amendment was the result of a negotiated compromise among several Senators.

This Senator stands behind that agreement. Unfortunately, the conference has changed the carefully drafted language

of our amendment and attempts to broaden it.

In spite of this, I will not repudiate the agreement and will not oppose this House amendment, though I strenuously oppose the changes.

I do, however, want to repeat what I said when this provision passed the Senate. I do not believe that this appropriation rider changes the underlying tax code. It affects only the enforcement of the code. Unless we amend the code, we have not said that this type of bond is tax exempt.

I have been asked by the chairman of the Ways and Means Committee, Mr. ROSTENKOWSKI, to express his views on the amendment. I ask unanimous consent to have his remarks printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

REMARKS OF REPRESENTATIVE DAN ROSTENKOWSKI

Mr. ROSTENKOWSKI. Mr. Speaker, I rise to express my strong reservation with respect to the matter contained in Senate amendment numbered 43 on which the conferees are recommending that the House recede and concur with an amendment. My objections are both procedural and substantive in nature.

The amendment attempts to prohibit in certain circumstances the enforcement of Revenue Ruling 81-216, and regulations reaching the same result.

The amendment would prohibit the enforcement of the ruling in the case of bonds which are backed by a State or locality where the proceeds of the bonds are not to be used by very large corporations—with more than $25 million in capital expenditures, worldwide, in a 3-year period.

First of all, on procedural grounds, we have a Senate floor amendment which attempts to negate a proper interpretation by the Internal Revenue Service of a substantive provision of the tax laws by limiting the discretion of the Service in its internal use of its administrative moneys.

Not only is the amendment not properly within the purview of the appropriations process, but the conferees have even gone to the point of expanding its scope to broaden its impact. Those of us on the tax-writing committees find this to be improper and, in a sense, irresponsible inasmuch as the matter addressed by the amendment is a complex one with policy implications which should be carefully reviewed by the tax-writing committees prior to the taking of congressional action.

In a more important sense, I would like to inform my colleagues that it is my view that the action recommended by the conferees in accepting this amendment will have no substantive effect. It will not result in the issuance of bonds which would be prohibited absent the existence of this appropriations rider.

It should be pointed out that, inasmuch as this language in no way amends the Internal Revenue Code, it cannot affect the legal basis under which bonds can be issued under existing law.

Since it is customary for bond counsel to issue opinions on the legal basis for the tax exemption of the bonds in question, I wanted to make this statement at this time so that no bond counsel or potential purchasers would improperly construe that this simple funds limitation has the effect of legalizing the bonds in question.

Once the continuing resolution expires, the IRS will be able to enforce the Revenue Ruling in question, Revenue Ruling 81-216, even as to the interest earned on bonds issued during the period of this appropriations freeze.

I would want to inform my colleagues that I have discussed this issue at great length with the Chairman of the Senate Committee on Finance who shares my view that this language is ineffectual in achieving the purpose which it seeks to accomplish. The sole effect of this language is to delay IRS action in this area. It cannot and does not, the sense of the Senate language relating to future periods not withstanding, change the underlying law which in the end controls the legal basis for the granting of the tax exemption.

It is unfortunate for the entire legislative process that one or two law firms specializing in the processing of these transactions have attempted to modify the tax laws without going through the appropriate committees which Congress established to deal with the tax laws. In so doing, they have added nothing—except confusion to the whole area of tax-exempt bonds.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, has the distinguished manager completed?

Mr. HATFIELD. I have completed.

Mr. BAKER. Mr. President, I urge Senators to remain, if they will. The Senator from Alabama has a statement he wishes to make on the occasion of the 18th anniversary of the assassination of President John F. Kennedy. So he may do that at this time, I ask unanimous consent that there be a brief period for the transaction of routine morning business not to extend past the hour of 10:40 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL TOMORROW

Mr. BAKER. Mr. President, I have had no reading from the other body on what their intentions are. It is not likely they will act tonight. I cannot tell Senators there will be no more votes tonight. I shall try to do that as soon as possible.

I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 12 noon tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE ANNIVERSARY OF THE ASSASSINATION OF PRESIDENT KENNEDY

Mr. DENTON. Mr. President, though fully aware of the pressing importance of the business that brought us into session today, I rise on another matter of great, and not unrelated, significance. I am moved to ask that this Chamber take appropriate notice that on this date, 18 years ago, the 35th President of the United States, John Fitzgerald Kennedy, was assassinated in cold blood.

President Kennedy's imagery has come to connote integrity in Government and self-subjugated devotion to the common good. This image should inspire us as we confront the difficult decisions before us. It should temper the temptation for us, and for our colleagues in the other House, to be swept up too much in the passions of expediency or partisanship as we deal with parts of the multifaceted crisis confronting this Republic, indeed a crisis which, in all its aspects, confronts the march of civilization itself.

Since President Kennedy's death, the pressures of events at home and abroad, the divisions they have introduced into our attitudes and our institutions, have caused many of our compatriots to lose sight of the perspective from which he acted in his devotion and service to his country.

As we recall his death, we also recall how, in his inaugural address, President Kennedy called upon us all, saying: "Ask not what your country can do for you; ask what you can do for your country."

Mr. President, at this time of difficult decisions for our domestic welfare and economy, as we face deadly danger from inimical forces abroad, that sentiment is particularly required again. It calls us whether we are Republican or Democrat, conservative or liberal, but Americans all, whatever our views on the issues of the moment. We must meet these crises with the nonpartisan unity we shared during the fateful Cuban missile crisis of October 1962.

President Kennedy would, I am confident, share the determination of President Reagan, and of my colleagues in the Senate and in the House, to restore America's strength, confidence, and concern for the liberty and welfare of all men everywhere.

President Kennedy's mother, Rose Kennedy, and her family should today be in our thoughts and our prayers. Few families have sacrificed so much in the service of their country. The eldest son died fighting in World War II to preserve our freedom and values against aggressive tyranny. The second was assassinated 18 years ago. The third fell tragic victim to the gunman's bullet only 5 years later. The last, despite the danger his position brings to himself and to those close to him. serves with devotion as a Member of this Chamber.

Mr. President, as a tribute to President Kennedy and to the hope that we can recapture the spirit of his times. I ask unanimous consent that all of the Members of this august Chamber observe a moment of silence.

The PRESIDING OFFICER. Without objection, it is so ordered.

(There was a moment of silence in the Chamber.)

Mr. KENNEDY. Mr. President, I would like to express my very deep sense of appreciation for the thoughtfulness of the generous comments of the Senator from Alabama. I am sure that members of my family will value this expression, as my mother and all of our family will.

I thank the Senator from Alabama.

Mr. BAKER. Mr. President. I too wish to congratulate the Senator from Alabama for his thoughtfulness and sensitivity in bringing this matter to the attention of the Senate at this hour on this sad occasion.

I express to him my admiration for his undertaking in this respect, and my

apology for not having thought of such a gesture on my part.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I do not know yet what action the House of Representatives will take in respect to further votes tonight. Therefore, I once again am not in position to advise Members certainly that there will be no further rollcall votes tonight. But I am prepared to say that I will arrange for an hour's notice before any rollcall vote would be ordered in the course of this evening, which will allow Senators to leave the Hill and go home if they wish to and leave their telephone numbers with their respective cloakrooms.

Mr. SARBANES. Mr. President, on what would the majority leader anticipate possibly a vote later on?

Mr. BAKER. Mr. President, the only matter that would come up tonight would be on the remote possibility that the House would yet send us something tonight requiring our attention in respect to the continuing resolution.

Mr. BUMPERS. Mr. President, will the majority leader yield for yet another question?

Mr. BAKER. I yield.

Mr. BUMPERS. Has the majority leader not been in contact with the Speaker in the last hour?

Mr. BAKER. The distinguished assistant majority leader has done that, and the last information I have from him and from others is that a decision has not yet been made on the course of action with the House. I will check again in the next few moments.

Mr. SARBANES. Is the matter upon which we just completed action now on its way to the President for a veto?

Mr. BAKER. Mr. President, it is on its way back to the House where it has to be enrolled, and as soon as it is enrolled, it will be transmitted to the White House for the President's consideration.

Mr. SARBANES. If it were vetoed, would there be some other resolution?

Mr. BAKER. Well, there is no intent or purpose here. It is that I am just reluctant to tell Senators there will be no more votes until I know what the House has in mind.

Mr. President, the minority leader advises me that he has now talked to the Speaker of the House and the Speaker indicates that he will not be sending a resolution to the Senate until tomorrow.

In light of that, Mr. President, there will be no more record votes this evening.

A CONTRADICTION IN AMERICAN TREATY HISTORY

Mr. PROXMIRE. Mr. President, as indicated by the President's speech earlier this week, talks will soon resume concerning strategic arms limitation, or more optimistically, arms reduction. Great controversy and bitter debate have always surrounded the issue of arms limitation. And yet the United States has signed and ratified a significant number of treaties which provide for bans on nuclear testing in the atmosphere, the presence of nuclear weapons on the seabed, in outer space, and in Latin America. Of greatest significance, the United States has signed and ratified the SALT I accords which have the distinction of essentially preventing the widespread deployment of a potentially catastrophic weapons system, the ABM.

Acrimonious negotiations which stretched over years were required to produce these agreements. Further, even more bitter debate often preceded the ratification of these treaties. But, Mr. President, look at the record. Arms control agreements were concluded, signed, and ratified by the Senate—even with the admission by supporters and opponents alike that loopholes remain, that the job of arms limitation is not yet completed. However, this process continues, gaining strength and growing, one treaty building upon the foundations set up by its predecessors. Now, we await with hope and optimism the resumption of the SALT or START talks, looking to once again widen the scope of agreement.

At first glance, this same type of building process exists concerning human rights treaties. The United States has signed and ratified a number of treaties and declarations which have strengthened and broadened the body of international law dealing with human rights issues. These include the Slavery Convention and its supplementary agreements, the Convention on the Political Rights of Women, the Universal Declaration of Human Rights, and many others.

But, Mr. President, a contradiction exists in this vital area. The Genocide Treaty has languished in the Senate for over 30 years, and still awaits ratification. Admittedly, the negotiation process in the area of human rights is also one of controversy and disagreement. Yet, the charges against the Genocide Treaty have clearly been answered; there no longer remain doubts concerning the treaty's legality or constitutionality.

The Genocide Treaty is not a panacea to the problems of protection of human rights around the world. It was not designed to be, nor could it have ever been such a cure-all. However, it is a worthy and vital attempt to affirm the value of human life. More importantly, the treaty stands as a vital building block in the human rights area. When the treaty is ratified, the United States can continue to take its position of leadership in the fight for human rights. As long as the Genocide Convention remains unratified, the process of international human rights protection is impeded. Mr. President, we have somehow found the basis for agreement on a topic as volatile as arms limitation; now we must solidify this same consensus and ratify the Genocide Convention.

AUTHORITY FOR THE SECRETARY OF THE SENATE, THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, AND THE ACTING PRESIDENT PRO TEMPORE TO TAKE CERTAIN ACTION

Mr. BAKER. Mr. President, I have now cleared this with the minority leader, and I make the following request:

Mr. President, I ask unanimous consent that during the recess of the Senate over until Monday, November 23, 1981, messages from the President of the United States and the House of Representatives may be received by the Secretary of the Senate and appropriately referred, and that the Vice President, the President pro tempore, and the Acting President pro tempore be permitted to sign duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, is there further morning business?

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

RECESS UNTIL TOMORROW

Mr. BAKER. Mr. President, I move, in accordance with the order previously entered, that the Senate now stand in recess until the hour of 12 noon on tomorrow.

The motion was agreed to; and the Senate, at 10:34 p.m., recessed until Monday, November 23, 1981, at 12 meridian.

79-059 O-85-10 (Pt. 22)

EXTENSIONS OF REMARKS

SECOND INTERIM REPORT ON THE 36TH SESSION OF THE UNITED NATIONS GENERAL ASSEMBLY BY THE CONGRESSIONAL MEMBERS OF THE U.S. DELEGATION

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. GILMAN. Mr. Speaker, on behalf of the gentleman from Florida (Mr. IRELAND) and myself, I submit herewith our second interim report of the work of our U.S. delegation at the U.N. General Assembly.

The 36th U.N. General Assembly (UNGA) has now steered itself through two-thirds of its fall course. Some call what is going on here a "world political happening." Just last week the General Assembly welcomed the new Caribbean state of Antigua and Barbuda as the 157th member of the world Organization. And at a recent meeting, the Gambian Ambassador confirmed a New York Times report that his country and Senegal may amalgamate, stating that the respective authorities are preparing necessary papers to create a co-federal arrangement to be called Senegambia, and this will determine whether they will maintain separate U.N. Ambassadors or will consolidate.

This month, the African-Asian Legal Consultative Committee celebrated its 25th anniversary, and the High Commissioner, whose Office of Refugees won the 1981 Nobel Peace Prize, came to the General Assembly to mobilize financial support for his Office's efforts to provide humanitarian assistance to millions of refugees across the world.

The UNGA has been debating a number of highly charged political issues, including armed Israeli aggression against Iraq's nuclear facility and the situation in Afghanistan. Despite insistence by our United States delegation that the proper forum for discussing "armed Israeli aggression" was the Security Council; that the Council had previously acted fully on this issue, and despite the U.S. strong objection to such words as "aggresion," ours was a voice in the wilderness, with a substantial majority approving the resolution, 108-2-34. Only the United States and Israel voted against the resolution and the Western European and other group (WEOG) abstained.

With relation to Afghanistan, an even larger majority, including the United States, supported a Pakistan-sponsored resolution calling for immediate withdrawal of all foreign troops and the restoration of sovereignty, territorial integrity, and nonalinement of Afghanistan and of the right of the Afghan people to choose their own form of government free from outside intervention. Speaking for the United States, Ambassador Kirkpatrick called the invasion a "grave violation of the U.N. charter that shook the very foundation of world order." Besides its shattering effect on the prospects for continued stability of South Asia and the Persian Gulf, she said, "the invasion marked a watershed in the postwar era * * * and ended the optimism regarding the evolution of Soviet policy and intentions." The final vote was 116 for, 23 against, and 12 abstentions.

The UNGA is also debating another question related to self-determination, Namibia. While the Western powers—the United States, United Kingdom, France, Federal Republic of Germany, and Canada—have been meeting to try to work out an acceptable political settlement that would provide for a peaceful transition of authority in Namibia, the majority of U.N. members clearly want to have a say in this matter, and their preferred forum is the U.N. General Assembly, the political umbrella of the U.N. system where they have clear majority on certain matters.

Underlying this series of seemingly unplanned and diverse events is an agreed procedure for managing consideration by the 157 members of the 140-plus agenda items. The "Rules of Procedure of the General Assembly" regulate the plenary debate as well as the work of the seven standing committees. Items considered too important to refer to one of the committees are often left to plenary; the remainder are allocated by agreement of the members to one of the seven standing committees. In turn, the officers of each committee propose a schedule of work with due time for representatives to speak on a particular item, to propose—table—a resolution, to offer amendments, or exercise the right of reply, and make decisions on the future course of action by adopting resolutions.

In plenary, once all representatives have been given the opportunity to deliver their statements, they act on the pending resolution before going on to the next item. Thus the UNGA plenary, after numerous speeches on armed Israeli aggression, adopted a resolution on that topic before moving on to consider the situation in Afghanistan. But the process is not always so well organized in the committees. Often representatives, having finished statements on one topic will go on to another before acting on the resolution of the earlier item. The lagtime is often unavoidable, particularly when conflict over the terms of the resolution is acute. A case in point is the Special Political Committee. After concluding statements on the item of the question on information, during which the Group of 77 introduced a draft resolution, the committee moved on to discuss and review U.N. peacekeeping operations, then on to the report of the U.N. Relief and Works Agency and subsequently to Israeli practices in the occupied territories. Meanwhile, interested parties have continued to negotiate their differences in the draft resolution on information and on the UNWRA report. In the latter, the sticking point is the effort by the Islamic nations to shift the funding of UNWRA to the U.N. regular budget. The Western donors hotly contest this proposal, stating that their parliaments are likely to cut the funds altogether should this result from a vote on the matter.

As the formal debate of this session continues, considerable staff work goes on behind the scenes—in the trenches—where staff takes soundings from a network of contacts in other delegations, consults like-minded delegations to gain support for emerging compromises, and meets with opposing representatives to negotiate preferred language to achieve an acceptable outcome. The process is complicated by the fact that there may be two, three, or more resolutions or parts of resolutions floated on one item, each reflecting the position of different interests, be they the West, the Eastern bloc, the Africans, Asians, Latins, or Arabs, or some combination of these regional groupings. Needless to say, to be successful, such diplomatic efforts require a high degree of interpersonal skill as well as substantive knowledge of the issue and patterns of world political relations.

As a result of these committee efforts, the United States does not always find itself alone in committee or plenary. On the votes on Israeli aggression and on the situation in Afghanistan, previously noted, the United States stood alone on the first; and was joined by a majority on the second. In committee, three—social and humanitarian matters—of 22 draft resolutions adopted thus far, 14 have been adopted by consensus, without a vote, and 8 by a recorded vote. Of the

eight resolutions on which a recorded vote was taken, the United States stood alone on four of the votes, on the report of the Committee on the Elimination of Racial Discrimination, the status of the Convention on the Elimination of Apartheid, and on two resolutions on national experience in social and economic progress. Our delegation objected to some of the language in these resolutions; for example, criticism of South Africa, referring to apartheid as a crime against humanity and in the latter cases, the distasteful tone of the resolutions. We abstained on another because of reference to "the New International Economic Order." The United States does not support the use of the word "the," preferring to use "a"; we did not participate in an Algerian-sponsored resolution on the implementation of the program for the U.N. Decade to Eliminate Racial Discrimination because of the program's reference to "Zionism as a form of racism."

While much is said of the United States standing alone—and the above are representative examples—it should be noted that there are many resolutions that are adopted by a consensus, without any vote. Among those resolutions are the questions of the elderly and the aging, the world assembly on the aging, international youth year, physical education and sports exchange of youth and channels of communication among youth, a directive to the U.N. Human Rights Commission to complete drafting a convention outlawing torture and an admonition to government to outlaw arbitrary executions. The most significant resolution adopted so far in the Third Committee was the one concerning the Declaration on the Elimination of Religious Intolerance, which was adopted without a vote on November 9, and now awaits final approval, expected to be pro forma, by the General Assembly. This action is a major achievement and marks the culmination of almost 30 years of discussion and negotiations among U.N. members on this important subject. In fact, as early as 1955, the matter of religious rights and practices as first raised in Subcommission on the prevention of Discrimination and Protection of Minorities, and by 1959, and Special Rapporteur concluded a special study on this topic. The UNGA then agreed that a declaration and convention should be prepared on eliminating religious tolerance as called for in article 18 of the Universal Declaration on Human Rights. However, in the 1960's the General Assembly preferred to emphasize the preparation of the Declaration and Convention on the Elimination of Racial Discrimination, and in the U.N. Commission on Human Rights members debated whether they should first draft a convention or a declaration on religious intolerance and then ran into difficulty defining the freedoms to be protected.

Finally, the Commission on Human Rights during its 1978, 1979, 1980, and 1981 sessions persevered in its drafting and adopted the draft declaration last spring.

The religious freedom declaration consists of 10 preambular paragraphs and 8 articles setting forth national obligations respecting the individual's freedom of religion. Article I proclaims that everyone shall have the right to freedom of thought, conscience, and religion. Articles II and III define religious discrimination as any distinction, exclusion, restriction, or preference based on religion or belief that impairs the recognition, enjoyment, or excercise of human rights and an affront to human dignity. Article IV calls on states to take measures to prevent and eliminate discrimination on grounds of religion or belief and to enact or rescind legislation if necessary to prohibit discrimination.

In other articles, religious freedom is defined as including inter alia the right to write, publish, and disseminate relevant publications related to rites or customs of a religion or belief, to teach a religion or belief in suitable places, to worship or assemble in regard to a religion or belief.

Unlike a convention, the Religious Intolerance Declaration does not require ratification by national parliaments. It represents an excellent example of the General Assembly's fulfillment of its responsibility to promote the progressive development of international law as well as fundamental human rights and freedoms. Beyond this, the UNGA's adoption of this declaration will henceforth enable the matter of religious freedom to be discussed as a legitimate concern in the U.N.'s human rights agenda.

In the Second Committee—on economic and financial matters—most draft resolutions are still in various stages of being negotiated. However, 15 resolutions have been adopted so far, 3 by recorded vote and 12 by consensus.

In recorded votes, the United States joined a large majority, 120-0-7, in supporting special action related to problems of land-locked countries; we abstained on "the remnants of war," 97-0-28, which calls on governments to clear minefields and stood alone with Israel on "the living conditions of the Palestinian people," 98-2-26. We opposed this because it condemned Israel for the deteriorating living conditions of Palestinians in the occupied territories and for refusing to permit the group of experts on the social and economic impact of the Israeli occupation to visit the occupied territories and called on the Secretary General to prepare a report in consultation with the PLO on the deteriorating living conditions for the 37th UNGA.

Notably, the large majority of resolutions adopted by consensus related to relatively noncontentious matters: an international year of shelter for the homeless; implementation in the Sudan-Sahel region of a plan of action to combat decertification; the world tourism organization; world communications year; health for all by the year 2000; U.N. University; and mobilization for personal savings.

The latter, sponsored by Barbados, Jamaica, Malaysia, and Sweden, affirms the need to encourage development of appropriate indigenous financial institutions and to foster government and institutional exchanges of information on mobilizing personal saving; it also requests the Secretary General to report on the Second International Symposium on the Mobilization of Personal Savings in Developing Countries, to take place in Kuala Lumpur, March 1982, The first symposium took place in 1980. This resolution reflects the conviction by U.N. members of the need and importance of personal savings in maximizing financial resources available for development.

Finally, the question of who will occupy the 38th floor of the U.N. Secretariat as Secretary General for the next 5 years is still undecided. At this time only two official candidates—Kurt Waldheim and Salim Salim—are in the running, and the balloting continues because neither have been able to muster the required support in the Security Council. The U.S. official position has been to express admiration for the qualifications of both Waldheim and Salim. However, due to this deadlock, a number of compromise candidates from Latin America are being informally considered.

Mr. Speaker, we will try to keep our colleagues informed of developments in committee and in plenary in future reports.●

THE UNITED STATES GOLD BOND ACT

HON. DENNY SMITH

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. SMITH of Oregon. Mr. Speaker, it is with increasing concern for the survival of our Nation's long-term capital markets that I rise to introduce the United States Gold Bond Act.

If our free market system is to survive the ravages of inflation and high interest rates, investors must be assured that the money they invest today will be as good as gold tomorrow. In recent months investors have been reluctant to invest in long-term instruments, because they have seen their return dwindle due to inflated dollars. My bill will alleviate this criti-

cal problem by authorizing the Secretary of the Treasury to issue bonds that may be redeemed for gold.

My bill would allow the Secretary to issue gold bonds in denominations of 1, 5, and 10 kilograms of gold, bearing interest at the rate of 2 percent per year. The bonds would mature 50 years after the date of issuance, and could be redeemed before maturity under such conditions as the Secretary may prescribe. The Secretary, with the approval of the President, may provide by regulation that holders of U.S. gold bonds may, at the option of such holders, retain the bonds after maturity and continue to earn interest upon them at the same rate of 2 percent per year. Any payment of interest, or any redemption of any such bond shall be made in bold or its dollar equivalent, whichever the holder of the bond prefers.

Savers and investors must be given the opportunity to minimize the risk associated with their investment. Under the present unstable monetary conditions, institutions and individuals can no longer be certain that their long-term investments will remain secure. The advantage to pension funds, university endowments, and financial institutions provided by gold bonds is self-evident. I urge my colleagues in the House to cosponsor my bill to provide a secure alternative to investors and savers.●

NATO IS THE PEACE MOVEMENT

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. WHITEHURST. Mr. Speaker, I am pleased to include in the RECORD for the benefit of my colleagues an article which appeared in the London Daily Telegraph on October 26. The author of this article, Julian Critchley, is a colleague of mine in the North Atlantic Assembly. He has been a stalwart defender of the NATO pact, and he has written what I regard as a thoughtful and persuasive column, one that refutes the misguided individuals now promoting the so-called peace movement in Europe and the United Kingdom.

I commend it to the careful attention of all of my colleagues.

Thank you, Mr. Speaker.

NATO IS THE PEACE MOVEMENT

While the Conserative party was attracting attention to itself at Blackpool, a small party of its MPs travelled to Munich to take part in the 27th Annual Assembly of the Nato Parliamentarians. This was not because we lacked stomach for the fight—we, too, can dance upon the head of the monetarist pin—but because we wanted to assist the Western Alliance, however modestly, to meet and overcome the most serious challenge presented to it: the alternative politics of the Peace Movements, which would have Europe neutral in the East-West conflict.

The Peace Movements are particularly strong in Germany, Britain and Holland. Only the French, protected by their robust nationalism, seem relatively immune. We met in Munich the day after a quarter-of-a-million young people had demonstrated for peace and against Nato—in Bonn. Why had they done so, and how can they be reassured and then recaptured?

In Europe the climate is one of fear and of wishful-thinking. Fear of nuclear war is greater today than fear of Soviet power and ambition. Electorates are obliged to consider Nato's nuclear policy after a lapse of 20 years. Those who doubt have latched on to Nato's ambiguities, for example the first-use of nuclear weapons in the event of a Soviet conventional attack, and the American strategic nuclear guarantee. The arguments deployed by the Peace Movements are both subtle and sophisticated, and it will not be enough to mutter publicly about Communist influence and exploitation—which do exist. The arguments have to be refuted.

NATO has to defend collective security before an increasingly agnostic Europe. There is fear of the Soviet Union as an aggressive imperialist power bent on impossing its will upon Europe. There is fear of an erratic, unpredictable United States which might, through accident, weakness, overconfidence, or unnecessary confrontation, precipitate a nuclear war. And finally fear that both powers would share an interest in limiting war to Europe, this further reducing the inhibition of confrontation. And there is wishful thinking that somehow, through demonstrations of good-will towards the Soviet Union, even at the price of distancing oneself from the United States, Europe can make itself more secure. A neutral Europe—so say the siren voices—can avoid the consequences of a nuclear war which many believe to be inevitable.

To make its case the Peace Movements press upon the points of Nato's ambiguity. For as long as the Soviets enjoy superiority in conventional forces. Nato is forced to threaten the first-use of its battlefield nuclear weapons in order to avoid defeat. But, such an act would devastate West German territory and invite Soviet retaliation in kind. Who can believe that the German Government would ever be likely to give Gen. Rodgers permission to fire first? And would the Russians believe it?

The achievement of parity between the strategic nuclear arsenals of Russia and the United States has made the first-use of American missiles in response to a Soviet conventional invasion of Europe seem unlikely? Can we be certain that Chicago would be swapped for Hamburg or would the Soviet leaders calculate that America was bluffing? Has not Soviet superiority succeeded in separating Europe from America?

The fact is that Nato has no choice but to live with both these ambiguities. First-use of battlefield nuclear weapons in Europe could be made less crucial were allied nations willing to meet the cost of an improved conventional defence, but they are not. In the case of the strategic nuclear guarantee, it is precisely because of European anxieties as to its validity that Eu:opean leaders have asked the United States to station American Cruise and Pershing missiles in bases on Britain and on the Continent.

Europe must build a bridge to America's strategic nuclear forces. To do so we must implement the decision taken by Nato in December 1979 to modernise its theatre nuclear forces. The stationing of the Tomahawk (Cruise) and the Pershing missiles in Europe is the way to counter the Soviet Union's acquisition of the means to devastate or intimidate Europe with its SS20s, while holding the United States at bay with its strategic forces. Theatre nuclear force modernisation in Europe will put an end to Soviet hopes of limiting a nuclear conflict in Western Europe based upon an ability to strike the European allies from a Russian sanctuary.

Nations that value their independence must sustain the means to defend it. The fact that the socalled Peace Movements are in favour of peace means nothing. So, too, is Nato. In fact, Nato is the most successful peace movement in Europe. The disarmers talk of peace, brandishing the word as a weapon, but they are in the business of politics. They are setting out to change the foreign and defence policies of the countries of Nato Europe by abandoning collective security and substituting for it a policy of neutralism. Most disarmers feel neutral as between East and West. Some would wish to change sides. All feel that nuclear war is inevitable.

It is precisely upon these points that Nato should go over to the attack. We have stayed for too long upon the dialectical defensive. Is nuclear war really inevitable? It is not. It is not even probable. What we have to fear is not the holocaust, but the Gulag Archipelago.

Would a neutral Europe retain its political independence: It would not. The Soviet Union has long harboured the hope that the United States would be effectively removed from the European scene, leaving Soviet military supremacy as the backdrop of European politics. A neutral Europe would be the eunuch in the harem of the great powers. Even were the Soviets not to invade, every political dispute that surfaced in Europe between Europe and an all-powerful Soviet Union would be settled to the latter's advantage.

It is true that Europe would be permitted to become neutral, but would Europe be allowed to stay neutral in a continuing Russian-American conflict? It would not. For as long as Nato—and Nato governments—fight the Peace Movements on the ground of their choosing "peace," we shall get the worst of the argument. We should shift the ground to where the debate properly belongs, namely to politics, and the case for collective security would become overwhelming. But we have little time to lose.●

REVISING THE CPI

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. McEWEN. Mr. Speaker, during the past year, there has been considerable discussion about the figures the Bureau of Labor Statistics uses in compiling the monthly Consumer Price Index and whether the index accurately reflects the true cost of living.

In this connection, I would like to share with my colleagues a most interesting and enlightening editorial that

recently appeared in the Columbus, Ohio, Citizens-Journal on this subject.

The editorial follows:

REVISING THE CPI

For years, mainstream economists have agreed that the Consumer Price Index, issued monthly by the Labor Department, is a faulty measure of the cost of living and is itself an engine of inflation.

Social Security benefits, federal pensions and many union wage-hike agreements are tied to the CPI. Since it overstates price increases, it causes more money to be pumped into the economy than an accurate index would.

Bureaucrats at the Bureau of Labor Statistics, who compile the CPI, are aware of its faults and, with a sense of urgency worthy of the U.S. Postal Service, have been planning to revise it—by 1985 or 1986.

Something happened to speed them up—we suspect a quiet order from the White House. In any case, Janet Norwood, commissioner of the bureau, said a new index will be ready in January 1982. Of course, 1982 would be preferable, but federal agencies do not move like wide receivers.

The main thing wrong with the CPI is its housing component. For reasons that are unclear to non-bureaucrats, the index assumes that all families buy a new house every month. In times of high home prices and mortgage rates that seriously exaggerates inflation.

The change in the CPI will come none too soon. Under current law, income tax rates are to be indexed to the cost of living starting in 1985. The CPI now in use would cause the tax rates to overcompensate for inflation and cost the treasury many billions a year.

Whether the new index indeed will measure price levels more accurately than the present one is an open question. Nevertheless, Commissioner Norwood's efforts, however belated, should be appreciated.

We welcome her, the bureau and their statistical offspring to the real world and hope they will remain there.●

TRIBUTE TO DR. JOHN PRESTON MILLER

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. LEWIS. Mr. Speaker, on December 2, the Board of Education of the San Bernardino City Unified School District will honor a very close personal friend and former colleague of mine, Dr. John Preston Miller. Dr. Miller was first elected to the school board in 1965 and has served admirably for 16 years. During 5 of those years, he led the board as its president.

The last decade and a half have not been easy years for those in public service. Together, Dr. John and I shared experience with the Community League of Mothers and the difficult days of developing a system of effective voluntary integration of our schools. The advent of teacher militancy during the 1960's and increased separation of 'school district managers' and 'professional educational associations' has been a challenge to all who care about public education.

Dr. John Miller served so well because he never took his eye off the mark—quality basic education for each and every child. Standing tough in budget session after budget session, Dr. John always fought for quality results for every dollar spent.

One example of his success is illustrated by the fact that Dr. Miller was a key person in putting together the City-County School District Cooperative Center for individuals with disabilities where he has since served on the board of directors. Dr. Miller's leadership has been recognized far beyond the district, as his fellow California School Board have chosen him time and again to serve on the important delegate assembly of the California School Boards Association.

Dr. Miller received his medical degree in 1947 from Marquette University. After graduation and internship, he spent 2 years as resident in general surgery at the Evangelical Deaconess Hospital and 3 years as resident in obstetrics and gynecology at Milwaukee Hospital. While at Milwaukee Hospital, Dr. Miller was chief resident from 1952 to 1953.

Serving in the military from 1943 to 1956, Dr. Miller was chief of obstetrics and gynecology at Wright Patterson Air Force Base and Norton Air Force Base.

From 1956 to the present, Dr. Miller worked as an assistant clinical professor at Loma Linda University School of Medicine, while providing service to virtually thousands of families in his private practice.

All who are privileged to work with Dr. Miller recognize and admire his dedication and contribution to our community. His humor and humanity are appreciated by those of us who consider Dr. John our friend.

Mr. Speaker, volunteer local public service is the life blood of our national system that depends so upon effective local government. Dr. John P. Miller's service is a shining example that each of us should hope to emulate. He will continue to serve as an inspiration. It is my pleasure to commend him to the House of Representatives for his well recognized contribution as an outstanding physician and for his contributions to the San Bernardino City Unified School District, the county of San Bernardino, and the entire State of California.●

THE SOUTH CAROLINA HALL OF FAME

HON. JOHN L. NAPIER

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. NAPIER. Mr. Speaker, in January 1982, United States Senator STROM THURMOND and the late Governor of South Carolina, James F. Byrnes, will be inducted into the South Carolina Hall of Fame in a special ceremony at Myrtle Beach, S.C.

Senator THURMOND will be the first living South Carolinian holding a current elective office to be inducted into the Hall of Fame. This, in itself, says something of the nature of a man who is a living legend in South Carolina and throughout the Nation.

Governor Byrnes was one of our most outstanding public figures. He has many friends who will recall the powerful influence he exerted in national political life.

Knowing of the many friends of the late Governor and our distinguished Senator, I just wanted to call this matter to the attention of the House and insert the press release prepared by the South Carolina Department of Parks, Recreation and Tourism, and the account which appeared in the November 3, Myrtle Beach, S.C. Sun News in the CONGRESSIONAL RECORD.

The press release follows:

U.S. Sen. J. Strom Thurmond and James Francis Byrnes, noted statesmen, have been selected as the 23rd and 24th inductees into the South Carolina Hall of Fame.

The Hall of Fame, located in a special alcove in the Myrtle Beach Convention Center, was established in 1973 to recognize and honor those living and deceased South Carolinians who have made outstanding contributions to the state's heritage and progress.

Each year the Board of Trustees of the Hall of Fame selects one living and one deceased South Carolinian for induction from a group of 10 living and 10 deceased nominees selected by the Confederation of South Carolina Local Historical Societies. Both Thurmond and Byrnes will be officially enshrined during ceremonies at Myrtle Beach on Jan. 11, 1982.

Thurmond, the contemporary nominee, was born in Edgefield in 1902. He graduated from Clemson University and was admitted to the South Carolina Bar in 1930. Thurmond served in the South Carolina Senate from 1933-1938, as a circuit judge from 1938-1946, and as governor of South Carolina from 1947-1951. In 1954 he was elected to the U.S. Senate as a write-in candidate, the only successful candidate in the nation to be so elected, and has served continuously since then.

During World War II, Thurmond served in both the European and Pacific theaters and participated in the Normandy invasion with the 82nd Airborne Division. He was awarded five battle stars and 18 decorations including the Legion of Merit with Oak Leaf Cluster, Bronze Star Medal with "V", Purple Heart, French Croix de Guerre and Belgian Order of the Crown.

He was a recipient of the Congressional Medal of Honor Society National Patriot's Award in 1974; the American Legion National Distinguished Public Service Award in 1975 and the VFW Dwight D. Eisenhower National Distinguished Service Award in 1977.

In 1948, Thurmond was the States' Rights Democratic candidate for president. Currently, he is President Pro Tempore of the U.S. Senate and chairman of the Judiciary Committee.

Thurmond was chosen for induction into the South Carolina Hall of Fame from among the following distinguished nominees: Mary C. Simms Oliphant, Mark Wayne Clark, Anne Worsham Richardson, Donald Stuart Russell, John Birks "Dizzy" Gillespie, William C. Westmoreland, Bobby Richardson, John Mauldin Lesesne and Arthur Magill.

Byrnes, the deceased inductee, was born in Charleston in 1879. He studied law and was admitted to the Bar in 1903. In 1908 he was elected solicitor of the Second Judicial Circuit and two years later was elected to Congress. Byrnes served in the U.S. House of Representatives until 1925. In 1930 he was elected to the U.S. Senate and re-elected in 1936. He served there until 1941, when he was appointed associate justice of the U.S. Supreme Court.

With the outbreak of World War II, Byrnes was selected by President Roosevelt to serve as director of economic stabilization, a title that was later changed to director of war mobilization. In this office he exercised authority second only to that of the president, who referred to him as "Assistant President."

In 1945 President Truman appointed him secretary of state and he served in this position until 1947, when he resigned and returned to South Carolina. In recognition of his contribution to the winning of World War II as Economic Stabilization and Mobilization Director, President Truman awarded him the Distinguished Service Medal. Byrnes was elected governor of South Carolina in 1950 and served from 1951-1955.

He established the Byrnes Foundation for the education of orphans in 1949 with royalties from his first book, "Speaking Frankly." Byrnes died in 1972 and willed his entire estate to the foundation that bears his name.

Besides Byrnes, other deceased South Carolinians nominated for induction were: Ann Pamela Cunningham, Mary McLeod Bethune, Joel Poinsett, Elliott White Springs, Thomas Green Clemson, William Moultrie, William Gilmore Simms, David DuBose Gaillard and Bernard M. Baruch.

[From the Myrtle Beach (S.C.) Sun News, Nov. 3, 1981]

HALL OF FAME ADDS THURMOND, BYRNES

(By Coyte White)

U.S. Sen. J. Strom Thurmond, R-S.C., and the late James F. Byrnes, a former governor, statesman and a powerful influence in the presidential administration of Franklin D. Roosevelt, have been nominated for the South Carolina Hall of Fame for 1982.

Thurmond and Byrnes were selected at an annual luncheon meeting Monday by the trustees of the Hall of Fame at Myrtle Beach Convention Center.

Robert J. Pryor, president and founder of the Hall of Fame, said the nominees would be inducted in ceremonies Jan. 11.

The selection of Thurmond and the late Mr. Byrnes were taken from a list compiled by the Executive Council of the Federation of South Carolina Local Historical Societies.

Contemporary citizens nominated for induction were Mary C. Simms Oliphant, historian and author; Mark Wayne Clark, soldier and educator; Anne Worsham Richardson, artist and ornithologist; Donald S. Russell, governor, lawyer and judge; John Birks "Dizzy" Gillespie, jazz musician and composer; William C. Westmoreland, soldier; Bobby Richardson, former baseball player and coach; John Maudlin Lesesne, educator; Arthur Magill, businessman and philanthropist; and Thurmond.

Deceased nominees include Anne Pamela Cunningham, preservationist; Mary McLeod Bethune, educator; Joel Poinsett, diplomat; Elliott White Springs, author and manufacturer; Thomas Green Clemson, diplomat and philanthropist; William Moultrie, Revolutionary soldier and statesman, William Gilmore Simms, novelist and essayist; David DuBose Gaillard, engineer; James F. Byrnes, statesman; and Bernard M. Baruch, financier and statesman.

The South Carolina Hall of Fame in the convention center was founded to recognize and honor those living and deceased citizens who have made outstanding contributions to the state.

Twenty-two distinguished South Carolinians are presently honored there and admission is free to the public from 9 a.m.-5 p.m. Monday through Friday.

Persons born in the Palmetto State who obtained recognition and esteem elsewhere and persons born elsewhere but who made their home in South Carolina and obtained recognition in this state, as well as persons born here and who earned fame here, are eligible for induction.

Nominees should be sent to the member historical society in the district of which the nominee is a native. Nominations of persons not native to South Carolina should be sent to the historical society where he or she lived while in the state.●

FEDERAL FUNDS TO REPAIR WOODROW WILSON MEMORIAL BRIDGE REJECTED

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. PARRIS. Mr. Speaker, I am extremely disappointed that the conferees on the continuing resolution have rejected a Senate proposal that would have provided Federal funds for the repair of the Woodrow Wilson Memorial Bridge. This bridge is a Federal bridge—a Federal responsibility—and it serves as a vital transportation link over the Potomac River. It was hoped that once the Federal Government repaired the bridge the State of Maryland would assume future responsibility for its operation. The State of Maryland has, unfortunately, refused that offer and the conferees have therefore not provided the necessary funds. Over 100,000 vehicles cross over the bridge daily and all of those who use the bridge know that it is in desperate need of repair and is approaching the point where it will have to be closed for safety reasons. I have been working with other Members of Congress in an effort to get the bridge repaired and I will continue to work toward that goal. This is the only U.S. Government-owned bridge in the country and Congress has an obligation to provide the funds for its repair. I am greatly disappointed that the conferees have decided not to provide the necessary funding at this time but the fight is not over. There will be other opportunities for Congress to provide these badly needed funds for the repair of the Woodrow Wilson Bridge.

I commend the conferees for supporting language which will give a salary increase to top Government workers. Although the increase is not as much as I would have liked, I believe it is a step in the right direction. The cap on salaries has had a devastating impact on the Federal Government. Nine out of ten top Government officials are retiring as soon as they become eligible and employee morale is at an alltime low. Our Government is no longer able to retain its top officials or attract qualified people from the private sector to fill a vacancy in the top ranks of Government. This situation has occurred because executives in the top seven civil service categories are now getting the same maximum pay. By the action the conferees have just taken, they are letting us know that they now recognize the seriousness of this problem and are acting to correct it. We still have a long way to go to correct the inequity that faces senior executives but I feel that Congress has begun to recognize the problem and is moving in the right direction.

Mr. Speaker, there is one item that I have found contained in the conference report which I believe to be absolutely reprehensible. Hidden in the conference report, at this late hour and with the fate of the continued operation of the Federal Government in question, is a pay raise for Members of Congress.

This hidden pay raise for the Members of this House is a classic example of legislative greed. I have always opposed this kind of pay increase for Members of Congress during my service in this House. I am adamantly opposed to granting Members of Congress a raise during the session which they are serving. I believe a congressional increase, if approved at all, should take effect at the beginning of the next Congress, so as to afford the voters an opportunity to determine whether or not they feel their Representative is entitled to an increase in his salary.

I will reluctantly vote for the passage of this conference report. I have no choice. The continued operation of the Federal Government and the lifting of the pay cap for Federal employees mandate this action. But I am not

pleased at having to take this action. In fact, I am angry, very angry, that some of my colleagues in this body persist in trying to increase their salary through backdoor maneuvering. This is not, gentlemen, the way we should handle a matter of this importance.●

SOCIAL SECURITY

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. GOODLING. Mr. Speaker, 45 years ago our predecessors in Washington began an insurance program that has given the workers of our Nation a sound financial basis for supplementing a pension plan. Until the last decade, this social security program has provided us with a strong foundation on which we could build our future. It has represented a secure investment opportunity into which many have placed their trust.

In the last few years, however, this foundation, which the workers have supported with financial contributions, as well as confidence and trust, has shown signs of crumbling. Millions of retired Americans now receiving their benefits are understandably afraid of losing their pensions. Working Americans are becoming more aware of the crushing financial burdens that threaten the program's solvency and credibility. The ominous menace of social security's insolvency has a shocking effect on young and old alike. It threatens the confidence our constituents have in both the program and in their elected representatives.

We realize the many factors which have had an adverse affect on social security. Demographic changes, skyrocketing inflation, the expansion of social security benefits and programs, and the recent economic trends have all contributed in draining the trust funds. These are only a few of many possible factors which collectively have taken a toll on the financial soundness of the program. I am sure there are those among us who could also place the blame on just about every administration or Congress that has graced Washington in the last 50 years.

I believe however, that it is time to assume a more responsible position on this issue. Now is the time to try to correct the faults and insure the program's solvency. Pointing fingers and engaging in shouting matches will not help, but perhaps a genuinely combined effort by everyone will save this program that means so much to so many of us.

Earlier this year President Reagan had introduced a proposal which provided one alternative in dealing with this situation. There have also been many proposals introduced by our colleagues in both the Senate and here in the House. This matter is now threatening to become a heated political issue, causing a larger schism between our parties. Using the problems of social security to win votes will not impede the impending financial catastrophe.

Social security affects everyone, the young and the aged, the worker and the retired. Its end will, therefore, hurt everyone. The only way to correct this catastrophic situation is through a united effort. Congress and the administration must work together to insure the programs' short- and long-term success.

I support the administration's proposal that Congress unite in a bipartisan effort to formulate a solution to the social security systems financial problems. Turning social security into a political issue will do neither party any good. In fact, such myopic action will surely seal the program's doom. The collapse of social security will affect millions, and will stigmatize any future social program this Congress would try to implement. The millions of our constituents who confide in us and trust us to maintain the program are a large factor to ignore. There is no compromise in such a situation.

A bipartisan effort to insure social security's future existence will, however, benefit all of us. Consider the actual alternatives we, as responsible and reasonable leaders, really have. Let us unite and save this institution that millions depend on, and to which millions of Americans contribute.●

COMMENT ON CANCÚN

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. McDONALD. Mr. Speaker, on October 9, 36 Members of Congress issued a "Statement of Concern" dealing with the apparent increase in Mexican Government leanings toward Castro and his Communist government in Cuba. And only days ago, President José López Portillo reiterated his view that American policies in the Caribbean ought to include an end to the isolation of Cuba; in fact, that American economic aid should flow as generously to Fidel Castro as to anyone else.

Another reason for issuance of the statement last October was the imminence of the Cancún Conference, which we knew to have as its objective the extraction of ever more money from the American taxpayers for the support of Marxist mismanagement around the world.

In any event, Cancún did not work out as planned. The following commentary on what happened is of interest.

Particularly recommended is the revelation, published in Barron's of October 26, that the nine largest American banks have loaned twice their assets to Third World countries; many, if not most of these governments have a slim to zero chance of repaying said loans.

Therefore, much of the pressure for "foreign aid" comes from banks who expect that foreign aid to be, in effect, endorsed over to them as interest payments.

The following article appeared in the The Review of the News of November 14, 1981.

THE MENDICANT CON GAME FAILS AT CANCÚN

(By Susan L. M. Huck)

The summit conference at Cancún, Mexico, in October must be considered a disappointment to its architects and a plus of some as yet unmeasured degree for America. It would be nice to imagine that it represents a turning point in U.S. foreign-aid policy. It is, at any rate a bend in the road.

No need to examine the basic hypocrisies of wealthy socialist intellectuals and politicians who berate the productive middle class for presuming to possess more than the masses and almost as much as they. We will merely point out that there is nothing these people like better than to gather at some plush waterhole like Cancún and wallow in creature comforts while loudly deploring poverty and hunger. It is not the first time Cancún has been used this way. A few years ago there was a United Nations conclave there at which the overpaid drones also feasted and imbibed while deploring hunger.

And so they would gather again at this resort complex which is said to have cost $1,100,000,000, and sit around a table costing a quarter-million dollars. We mention this because all of us have endured the piteous wailings of U.N.I.C.E.F., the United Nations Children's Emergency Fund, according to which the price of Cancún could have drowned the population of the world in milk.

Altogether, a conference inspired by former Socialist International president Willy Brandt, godfathered by U.N. Secretary General Kurt Waldheim, and hosted by Fiedel Castro's big admirer, Mexican president José López Portillo, did not look like a winner. Not only was its ancestry entirely socialist, but the pre-conference propaganda to which we were subjected by the mass media was designed to sandbag the Reagan Administration into yielding to the socialist agenda.

Ah, but changes have taken place. Jimmy Carter would have crawled to Cancún in sackcloth and grinned through the flagellations, but Ronald Reagan wasn't having any of that. He laid certain things on the line. Number one was that host López Portillo had a clear choice between Ronald Reagan and Fidel Castro—essentially between bucks and bombast. It turned out to be no choice at all. Poor López Portillo had to disinvite Fidel without telling him directly that the leaders of 22 nations wouldn't gather at the gates of Heaven to hear one of his famous day-long speeches.

And, well in advance of the meeting, the Administration sent signals loud and clear to the effect that the days of easy handouts

were over, that we had plenty of problems here at home, so don't kid yourselves.

Furthermore, said Reagan, this was going to be an agreeable meeting at which people were going to be polite. It was not going to be a Hate America Festival. The turning of the worm, which took the whole United Nations gang so unawares, occurred in September when our United Nations Ambassador stunned the place by objecting to the latest bucket of abusive verbiage cooked up by the Soviets and served up by no less than 93 delegations. Ambassador Kirkpatrick pointed out that the statement was full of lies and they knew it.

Of course the delegates were stunned. Since when had that mattered? And since when did they have to worry about losing American favor by manifesting hostility? No fair, they seemed to think, changing the rules in the middle of the game.

Nevertheless, the tough line worked. Notably waspish nasties like Indian Prime Minister Indira Gandhi and Tanzanian President Julius Nyerere practically faded into the palm thatch at Cancún. President Reagan, in effect, was enabled to hold court at the Mexican President's expense, and things did not work out at all the way that the Socialist International had planned.

It is generally counted as a plus that President Reagan was afforded the opportunity to conduct one-on-one meetings with so many Heads of State and Foreign Ministers in so short a time. It has been suggested, since the expected vituperative row did not occur, that this represents more points for our team. Lovers of the World Bank were pleased that President Reagan supported existing international finance institutions as against the creation of new ones. Those of us less pleased with the World Bank's previous enthusiastic support of socialism around the world are not inclined to award points for that one. But, in the view of Julius Nyerere, for example, the World Bank is an imperialist skinflint outfit, and one of the fantasies entertained by representatives of the least productive countries was that they might be given their own fully funded development bank to play with. These people already have their own nationalized banks, but it is difficult to induce anyone to give dollars for kwachas or ougiyas or their four dozen other kinds of wooden nickels.

Instead, President Reagan offered nothing but the opportunity for individual governments to discuss specific problems with us "in a cooperative spirit." And he firmly recommended that the delegates presiding over the most threadbare economies on earth give Free Enterprise a try. To the socialists, that is making a rude sound.

What was so satisfying about all of this is that the "Liberal" press nearly choked on it. At enormous expense, some 2,000 journalists and communications technicians had gathered to beam to a yawning world what they thought would be the usual "Liberal" message. Lengthy but remarkably insubstantial reports were all that came of it. The problem lay in the fact that President Reagan refused to walk into a well-publicized ambush. The Leftist propaganda line was not well served by a U.S. President who told the world's mendicants to shape up and try freedom.

Intellectuals who sniff "oversimplification" whenever an obvious explanation threatens to override their sophistries, or whenever the basic economic facts of life are set forth, were left to amplify the most birdbrained "Liberal" catch-phrases ever given space in the public prints. It was not the first time, they chirped, that "rich" nations were arrayed against "poor" nations. This was made ludicrous by the fact that in the much-touted lineup at Cancún the "poor" 14 included the four rolling-in-oil-money O.P.E.C. states of Algeria, Venezuela, Nigeria, and Saudi Arabia. Along with the Persian Gulf states, "poor" Saudi Arabia is a heavy donor of foreign aid—to Moslems, including some not-so-nice Moslem governments and the Palestine Liberation Organization.

The other three O.P.E.C. states present at Cancún feature plenty of poor people, but they are run by a political elite which disports itself on oil money the way our celebrities snort coke—that is, with little restraint. They rarely "aid" others.

One non-oil-producing country which should have served as a good example—and perhaps did, with the media choosing not to notice—was the Ivory Coast. This is a tropical African country which has rejected Marxism and is in consequence going great guns economically, to the chagrin of neighboring pestholes.

* * * * *

That we will continue to disgorge foreign aid, that we still feed the World Bank, that we still support and host the United Nations—all these remain unsatisfying aspects of Reagan policy, just as they have been under so many previous Presidents of both parties. Yet Reagan is the first to slap down the acid-throwers at the United Nations; the first who has smiled while Congress cut their allowance; and, the first who has, most importantly, seen to it that the mendicant nations know it has entered our mind that we just might "get the U.S. out of the United Nations and the U.N. out of the United States."

Let that horde of freeloaders contemplate the possibility that they could smart-mouth themselves clear out of the Good Life.

Newsweek let at least one cat out of the bag in October. Speaking of Bangladesh, it noted that the government there is pained by the fact that the country has had several good harvests in a row. How is this bad, you ask? Well, when pictures of stick-limbed kiddies can be flashed around the world, the free grain pours into government warehouses, and the government then sells this grain to the people, and finds itself with a comforting flow of revenue. In good years, government revenue must come from the tedious process of taxation, of shaking down tens of millions of farmers, one by one.

Isn't it time to say, now that we understand this game, we aren't going to play it any more?

And what was Mexican President José López Portillo selling at Cancún? The Mexican ruling party wants Americans to regard Castro's enslavement of the Cuban people as "an alternative development model." Mexican officials trot out the old line about how we forced Fidel to adopt Communism, just as we are now forcing the poor abused Sandinistas to embrace Moscow. They will even tell you that Mexico's offer to supply Castro with his oil needs has led Fidel to gush gratitude for the prospect of liberation from Moscow. You can believe all that if you really want to.

What else were the Mexicans selling? Well, their own "development model," which is a mixed economy indeed. Mexican politicans are absolutely torn between prosperity and socialist monopoly. Mexican politicos who fairly glow with the personal benefits of a single-party system coo about the virtues of "joint enterprises." Private investors must cut in a hand-sorted batch of ruling-party regulars and render them sleek. The Mexicans have learned how much can be bled off without the host enterprise becoming fatally anemic; they may be able to give lessons in this technique to the huddled mass of "Third World" governing parties who wonder why every productive enterprise they drain eventually develops rigor mortis.

The Mexican government, nonetheless, doesn't really appreciate Private Enterprise. For example, Sri Lanka (formerly known as Ceylon) is said to be ready to give Free Enterprise a whirl, after socialism has run the country into the ground. But, Mexican officials believe, the Sri Lankans don't have the "infrastructure" of Private Enterprise to do the job. Apparently this means that entrepreneurs of the proper scale and variety have not popped from the ruins overnight, after 20 years of flattering themselves into the ground under the grazing fire of a determinedly socialist government.

America suggested that, if people were allowed to make and keep some profits, the word would get around. Ceylonese, like Indians, like Chinese, do not lack the spirit and knack for Private Enterprise. But, like most citizens of the "Third World," they have learned the sad and destructive lesson that to produce a surplus of anything is to invite its confiscation by a voraciously parasitic political structure. In fact, having once produced a surplus, you become an object of special attention.

The problem is as old as human society, but socialism simply butters this type of parasitism with layers of bureaucracy and ideological blather heretofore missing. What is really new and progressive is the deliberate maintenance of Free Enterprise in the teeth of the known tendency of government to use force to grab the products of producers.

You are beginning to see why there was a terrible temptation to entitle this piece, "Can't We Can The Cancún Cant?" The "pitch" to be used against us hasn't changed in decades. There is always the "widening gap between rich and poor," the ill-disguised accusation that we are guilty of prosperity, while the absolutely timeless poverty of the world is one of our vicious plots. If "racism" can be worked into the formula, all the better.

The only way for us to atone for having built our own roads and railroads, learned to grow food in abundance, allowed people to prosper by providing for the needs of others in a free market, and so on, is to provide the fruits of this effort, without the effort, to the governments of "the poor." To attach any conditions, or to ask for anything in return, is an affront to the national sovereignty of the recipient. Surely you can see that.

In fact, that master of mendicancy, Julius Nyerere, routinely takes the matter one step further. Nyerere is a Marxist beggar of the aggressive school, the type who shoves his face into yours and demands the price of his keep. When Nyerere speaks, every second word is "socialism" and every third word is, of all things, "self-reliance"! His pitch includes the notion that failure to supply him with a continuous and generous flow of funds is a nefarious scheme to deprive him of self-reliance.

In astronomical terms, a "black hole" is something so dense that light itself is drawn into it and disappears without a trace. Well,

Nyerere's Tanzania is the Black Hole of Foreign Aid, certainly for Africa, probably for the world as a whole.

In fact, so many of the "poor" countries at Cancún were Marxist-dominated that one might even come away with the idea that "poor" equals "Marxist." There were Yugoslavia and India and Algeria and Tanzania and Guyana and Bangladesh. Without surveying the economies of each, one test might be whether any sane person would attempt to go into business in any of these countries without official patronage in high places.

Conspicuously absent was the Soviet Union. Moscow refused to come. When Treasury Secretary Donald Regan was asked by a television interviewer why the Soviets were not at the Cancún conference, he responded: "That's easy. They have nothing to offer." Soviet "aid" goes overwhelmingly to its two neediest client states, Cuba and Vietnam, so that their puppet armies are in turn available for duty in Africa, Asia, and Latin America on behalf of Moscow. To the Soviets, idealistic humanitarian aid is inconceivable; every kopek has its political objective. There is nobody home in Moscow when it comes to feeding refugees.

But there was one more aspect of the propaganda surrounding this show which merits very serious consideration by Americans. I refer to Presidential support of the U.S.-backed lending agencies. True, credit moves in mysterious ways, but the notion that we should be grateful for the opportunity to "sell" our products to those we have loaned the money to, in the knowledge that the "loan" will never be repaid, just defies logic. Where would a farmer be if he paid people to carry off his crop? Where would you be if you paid your boss to make use of your labor?

We are supposed to be grateful to the Soviet war machine for allowing us to feed and equip its troops on credit; indeed, we must express delight that our bankers have cleared the way for us to build up Red China just the way they built up the Soviet war machine; we must thank the Communist foreign legions in Africa for providing all those millions of refugees for us to feed. Where do you see any sense to it?

No, the only people who find virtue in this argument are the people who skim off a percentage every time money changes hands—regardless of purpose, and regardless of who wins and who loses.

A blockbuster of sorts on this subject appeared in Barron's for October 26, 1981. Try the end of the column by James Grant on Page 55: "Lending by the nine largest American banks to the world's pith-helmet countries was on the rise through 1980. The ratio of such loans to the banks' capital last year exceeded two to one. That is, Third World loans on the books of nine banks were more than twice the sum of the banks' equity, subordinated debt, and reserves for loan losses." There is nothing "prudent" about a loan policy which results in absurd debt levels. There comes a point when it is clear that there is no way even the interest can be paid.

An array of tricks may then find employment. "Rescheduling" interest payments is one method, and floating loans for the purpose of paying interest on previous loans is another; but, a moment's thought indicates that this is no long-term solution, and the lender can see disaster looming at the bottom of his bag of tricks.

In the case of international bankers and foreign governments, does it not then make sense for them to join forces in clamoring for a bailout? What better solution is there than to have the government of a "rich" country plunder its taxpayers for "aid" to be sent to "poor" countries—so that they can pay interest to the bankers?

Could this not be the origin of Establishment media clamor for the transfer of money from your pocket and mine to the coffers of America's nine largest banks? When we placed that question before an honest and perceptive government economist, he could only say: "Well, you're about three steps ahead of the American public."

Washington knows that "foreign aid" is as popular as the plague with the taxpayers. That is why, under "Liberal" dominance, it was never permitted to become a clearcut political issue. Americans have been incredibly generous, and too often have taken a thumb in the eye in exchange. Now, seriously pinched at home, Americans are less than ever disposed to make sacrifices on behalf of ingrates with permanently deployed begging bowls.

Those governments, those countries which have frittered away decades of American-financed opportunity, will have to absorb the message that the party is coming to an end. That is the message Ronald Reagan delivered last month at Cancún. Let us hope that the cowboy President dares stick by his guns.●

IN PRAISE OF FEDERAL EMPLOYEES

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Ms. OAKAR. Mr. Speaker, I would like to make a few comments in praise of the dependable and dedicated work performed by Federal employees. In a year when the Federal work force has been made the target of disproportionate and discriminatory budget cuts by the administration, I wish to commend Federal workers for their invaluable contribution to the Government and to our country. I, for one, deplore the unjustified harassment of Federal employees and retirees and demand that this administration refrain from further criticism of Federal employees and from further cuts in their pay and benefits.

If we compare the Federal Government to a large building, then we would logically expect the building to be only as strong and durable as its foundation. The Federal work force is the foundation of our Government. It makes absolutely no sense, therefore, for the temporary occupant-owners of the building—the administration—to chip away needlessly at the foundation.

The Federal workforce is responsible for the day-to-day operation of our Government, something all of us tend to take for granted. There is a direct correlation between the morale and productivity of this workforce and the efficient and effective operation of the Government. I am angry and apprehensive that this administration risks alienating a very large proportion of the Federal workforce, with the result of poorer employee morale, lower employee productivity, and the loss of talented civil servants to the private sector. Does Mr. Stockman's "Trojan Horse" economic assumptions take these considerations into account? I doubt it.

When we speak of Federal employees, we are not referring to a vast gray mass of overpaid and underworked faceless bureaucrats. We are speaking of those employees whose scienfitic skills made possible the launch, orbiting, and landing of the *Columbia* Space Shuttle that the world marveled at. We are speaking of those employees who put their lives on the front line every day in the protection of our President. We are speaking of countless doctors, nurses, technicians, secretaries, clerks, accountants, scientists, and many others who work for our Government and who deserve and ask for nothing more than fair pay and benefits.

And, yet, what have they received in return for their quiet and daily dedication and dependable performance of their duties?

Just this past year, at the hands of an administration misguided in its zeal and obsessed with false budgetary savings, Federal employees have had their cost-of-living adjustment capped at 4.8 percent—even though the President's own pay agent recommended a 15.1 percent increase to keep pace with the rise in inflation and the CPI. Federal retirees—who have given the most productive years of their adult working lives to our Government and who ask for no more than what was assured them in retirement income—have had one of their COLA's taken away, with the implied threat from the administration to delay the new once-a-year COLA guaranteed them in March 1982.

Federal employees and retirees—some 10 million, including their dependents—have seen the Office of Personnel Management recklessly and callously attempt to dismantle their health benefits program, causing potentially serious damage to their ability to receive adequate health care coverage at an affordable price.

As chair of the House Subcommittee on Compensation and Employee Benefits, I renew my solemn pledge to all Federal employees and retirees that I will continue undeterred in my opposition to administration efforts to further reduce personnel and benefit levels. Let this administration know—as well as other administrations to come—that Federal employees and retirees are human beings with needs like everyone else and should not be made the scapegoat for attempts to solve our country's economic ills. Fed-

eral employees and retirees shall not be sacrificed on the altar of false budgetary savings.

Finally Mr. Speaker, we live in the greatest country in the world. We owe a debt of gratitude to those who operate our Government—the Federal employees of this great country.●

EDWARD J. DeBARTOLO, JR., A SPECIAL MAN

HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. JOHN L. BURTON. Mr. Speaker, as one of San Francisco's Members of the House of Representatives, I am pleased to join with my colleague, LYLE WILLIAMS of Youngstown, Ohio, in offering this tribute to our friend, Edward DeBartolo, Jr., who among other things is owner and chief executive officer of the San Francisco 49'ers.

At the invitation of my old buddy, Ken Flower, I was going to spend the evening with a person described by the San Francisco media as "a rich young kid from Youngstown, Ohio." I was stunned to find instead of the rich out-of-towner with a silver spoon, a warm outgoing person who could have hung out with me, Geoge Moscone and the rest of the gang at Polk Gulch and North Beach.

When I met Eddy he was in town for the 49'ers-Redskin game with his close friend, Carmen Policy. They were watching "Boom Boom" Mancini fight Alex Arguello on television. Afterward we talked and I was amazed that he could keep up with the chatter of an old North Beach "Lean and Tender"—bartender—with the same ease that allows him to deal in the world of corporate board rooms.

I knew we were kindred souls when Eddy's only criteria for a restaurant was that they serve good baccala and require no neckties. By the end of the evening I felt as if I had known him all my life.

When Eddy first took over the 49'ers he was the victim of bum raps in the media, "a rich kid with a new toy," "he ain't even from the Bay Area," and "an outsider."

Although his family home is in Youngstown, Ohio, I know Eddy DeBartolo loves our city and the people.

When he became owner of the 49'ers, he made only one promise that within 5 years they would be competitive in the league. This promise has been more than kept and, along with coach Bill Walsh, he has given us exciting, gutsy team play every week.

He has provided 49'ers fans with the finest team in the history of the franchise.

To see Eddy in the locker room hugging, slapping hands, joking with the players, stopping to say a kind word to each team member shows he recognizes his players as people rather than beef of the hoof. To have seen the tears of joy after the Pittsburgh game as he hugged his dad and family then thanked each player was proof of his emotional and personal feelings about our 49'ers. The team is not a toy but part of his very being; far from being a spoiled kid with a new toy, Eddy DeBartolo is a beautiful human being who possess the unique combination of his father's business acumen and inner strength, the emotional warmth and commonsense of his mother, Marie, as well as the street smarts of the common person. These traits are what makes Edward DeBartolo, Jr., a cut above most of his NFL peers.

Nineteen eighty-one marks a significant year, significant because this is Edward Jr.'s fifth season as the team's owner and chief executive officer. Five years have passed since the National Football League's San Francisco franchise became a vital acquisition of the nationwide DeBartolo Corp., and for the team's president, stability now has fully arrived on his football club. DeBartolo points with pride to the settling effect that has permeated the organization since 1979 when he hired Bill Walsh, a leading football tactician and a great human being with the ability to bring individuals together as a team on and off the field, as head coach and general manager.

The 49'ers were a team in transition during 1977 and 1978, but that transition began to diminish with the arrival of Walsh and and his staff. DeBartolo says the turnaround came because "all of us have a singleness of purpose" where the 49'ers are concerned. He adds,

> The people presently guiding the team under Bill's direction are the people who will be operating the team for a long time. I have pledged my total support to their efforts.

The 49'ers 35-year-old president serves the DeBartolo Corp. as president and chief administrative officer, a role that demands nearly all of his attention and time. The corporation's home offices are located in Youngstown, Ohio, the DeBartolo family hometown.

Founded in 1948 by Edward J. DeBartolo, who is the father of the 49'ers president, the DeBartolo Corp. has become one of America's great business success stories. It is the leading planner, builder, owner, and operator of enclosed regional shopping malls in the world, malls that total more than 74 million square feet of retail space.

In addition, the corporation owns thoroughbred racetracks, including luxurious Louisiana Downs, hotels, industrial and executive office parks, the Pittsburgh Penguins hockey franchise, the Pittsburgh Civic Arena, and holds many commercial bank interests, including its role as majority stockholder in three banks.

Ed Junior not only is one of America's fastest rising young executives for a major corporation, but he also is the youngest owner in the 28-team National Football League. His rise began upon graduation from Notre Dame in 1968 when he joined the company full time, moving from department to department learning the many facets of the company which, by then, had grown into a national corporation and had become recognized as the largest shopping center firm in the United States. In 1971 he was appointed a vice president.

Five years later he was named executive vice president while taking over the in-house DeBartolo staff of some 300 engineers, architects, designers, financiers, leasing agents, lawyers, management and operations teams, along with advertising, public relations, and marketing personnel. He was appointed president and chief administrative officer in July of 1979.

Working a demanding 7-day-a-week schedule that he has continued to today, Ed Junior found little time for those pursuits he still lists as hobbies—golf and football—or returning my phone calls. Football, the dominant interest in his life, would become more than just a hobby when he became the 49'ers president and general partner. In that capacity he controls 90 percent of the club, with limited partners Jane Morabito and Franklin Mieuli, who each own 5 percent.

Edward Junior gives generously of his time and influence when it comes to charitable endeavors. He is highly active in the St. Jude Children's Research Hospital, having directed the Youngstown effort for national chairman Danny Thomas, an effort that netted the greatest sum of any city its size in the Nation.

He also has for several years directed the Youngstown Cancer and Heart Fund Drives, served as director of a local youth center, and served as a member of the board of trustees at Youngstown State University.

His wife, Candy, was his childhood sweetheart, and they are the parents of three daughters, Lisa Marie 11, Tiffanie Lynn 10, and Nicole Ann 6.●

I.R.A. MURDER CAMPAIGN CONTINUES

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. McDONALD. Mr. Speaker, the amazing amount of media sympathy accorded to the I.R.A. hunger strikers earlier this year, a sympathy never before or since matched by any concern for their victims, demonstrates

once more the cynical manipulation of public emotion.

That the hunger strike failed because British Prime Minister Margaret Thatcher would not yield to demands—Mrs. Thatcher was perhaps remembering the I.R.A. murder of Lord Mountbatten and of her own friend and adviser, Airey Neave—left the managers of this macabre affair in a less advantageous situation than had been planned. There was indeed a propaganda windfall, yet other objectives were not achieved.

A subsequent campaign led to violence in London, including a particularly atrocious nail-bomb attack against a busload of Irish Guardsmen, as a result of which two passersby were killed and a large number of young men were hideously maimed by 6-inch nails hammered home by high explosives. This sort of nauseatingly brutal and cowardly attack has become a hallmark of the I.R.A.

The latest tactic has been escalating attacks against leaders of the majority population in Ulster—the majority which does not wish to become part of a "united Ireland," most particularly not an Ireland dominated by the likes of the I.R.A. leadership.

The murder of a clergyman Member of Parliament, the Reverend Robert Bradford, was carried out in a typically cowardly and cold-blooded manner. The Reverend Bradford was making himself available to his constituents when he was approached by two men and simply shot down.

According to the New Yorks Times of November 17:

> In Belfast, the I.R.A.'s publicity bureau issued a statement on the killing . . . saying that people who whipped up anti-I.R.A. sentiment "cannot expect to be immune forever."

The statement was hardly out of character for an organization which arrogates to itself the power of life and death over the people of all Ireland. This is, after all, an organization so fond of maiming that its own members are disciplined by blowing away their kneecaps to cripple them for life. The notion that any people, of any persuasion, would voluntarily subject themselves to the governance of terrorists is simply absurd.

But examine the above account once more. A publicity bureau in Belfast? Imagine, if you will, the American people being required to tolerate the existence of a publicity bureau for an organization which assassinates Members of Congress.

This sort of thing explains the growing cold fury of Ulster against the British rule which requires toleration of this and much more. It requires toleration of a sieve-like border where farmers must go about their chores protected by shotgun-carrying womenfolk—and the womenfolk must protect themselves from journalistic identification by some sort of mask, since gun control means that non-I.R.A. civilians have difficulty in acquiring the means to protect themselves.

There is developing an Ulster nationalism which sees no way out of the more than 10 years of I.R.A. terror than through independence. These people will not accept absorption into the Republic of Ireland, which is foreign to them, and they are ever more suspicious of eventual British sellout.

In these pages we have frequently set forth the Communist connections of the present-day Irish Republican Army. It requires a great deal of credulity to imagine that Moscow has the best interests of Ireland at heart, when unleashing deliberate campaigns of violent destabilization—or, for that matter to believe that Mu'ammar Qadhafi is concerned about the welfare of the Catholics and Protestants of Ireland.

There are specialists in the creation of misery and chaos who find all too many willing employers. Their work is not merely aimed at physical destruction of life and property, but at the destruction of the very fiber of the targeted society, by destroying trust and friendship and replacing them with suspicion and hatred.

Any people who have been subjected to more than 10 years of indiscriminate assassination and bombing by a foreign-directed terrorist organization must be expected to become short-tempered, to say the least. The outburst against British Administrator James Prior, when he recommended that all remain calm following the Bradford murder, was an entirely human reaction. There is wide general dissatisfaction with the manner in which successive British Governments have failed to end the terrorism. No people can be expected to remain calm and idle under the circumstances.

It is time, I believe, that emotion give way to sense. The majority population of Ulster has rights too. They have taken huge casualties, including the murder of thousands of people in no way engaged in political games. The population of the Republic does not hunger to incorporate a hostile minority into its own political body. And above all, the present Communist-directed Irish Republican Army does not really care what anyone in Ireland wants. It is a terrorist organization which would like to govern a typical "people's republic" of the Soviet model.●

WEEKEND OF WINS BY DeBARTOLO FAMILY A FIRST IN PROFESSIONAL SPORTS

HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. JOHN L. BURTON. Mr. Speaker, three professional sports teams owned by the Edward J. DeBartolo family of Youngstown, Ohio were victorious in one weekend, in one city. All three teams have emerged from difficult pasts; thus, the pride that surfaced in Pittsburgh the weekend of October 31 and November 1 represented several years of sweat, investment, diligence, and grit.

The Spirit, of the Major Indoor Soccer League, beat the St. Louis Steamers 3-2 in an exhibition game October 31. The soccer team sat out the 1980 season when its former owner suspended play due to financial difficulties and the realization that more intense management was needed. Edward J. DeBartolo, Sr., purchased the Spirit in June of this year after his firm assumed management of Pittsburgh's Civic Arena, home of the Spirit and Penguins.

Mr. DeBartolo, Sr. also owns the Penguins, Pittsburgh's National Hockey League team. That same evening, October 31, the Penguins beat the Buffalo Sabres in the Civic Arena 3-1. The team in its first 9 years suffered mismanagement and hopeless records. DeBartolo took control of the Penguins in 1977, and experts are now looking for a comeback.

The proving victory came the next day as the San Francisco 49ers swept past the Steelers 17-14. It was the first time since 1971 that an NFC team won a game in Pittsburgh. The 49ers left the stadium with a 7-2 record, six straight wins and a two-game lead in the National Conference West.

This was a very satisfying win for the DeBartolo family and their friends because it came in their own backyard against the area's prized and feared Steelers.

As one of the few San Franciscans in the stand that day, I could feel the local and familial pride that for a brief moment allowed a franchise switch where the San Francisco 49ers became the Youngstown 49ers. As one of San Francisco's Congressmen and one of the handful of people who saw the 49ers first game in 1946, I even felt like a Youngstowner.

The 49ers team is owned by Edward J. DeBartolo, Jr., a person I am proud to call my friend. He has diligently maneuvered management since 1977 when he took control of the team's operation as owner, president, and chief executive officer. In 1979 he hired Bill Walsh, one of the finest football

minds as well as a great human being, as head coach. The combination represents a turnabout, and today the 49ers are considered "the hottest team in pro football."

I am pleased to be joined in these comments by our colleague LYLE WILLIAMS.●

TRIBUTE TO JACK RAFTER

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. SMITH of New Jersey. Mr. Speaker, I rise this afternoon to honor my good friend Jack Rafter for his remarkable work and contribution to high school girls' athletics over the last two decades.

An outstanding track coach who can boast of nearly 300 victories at Red Bank Catholic High School in Red Bank, Coach Rafter was New Jersey's pioneer—literally the man who made it all happen—in girls' track and cross country.

Mr. Speaker, like all great men, Coach Rafter saw things that were not and said "why not." He saw high school girls, blessed with abundant energy, strength, ability, agility, endurance, and pride, relegated to the sidelines to just watch the boys play. Twenty years ago, you might recall, girls were excluded from participation in most sports. Many assumed that girls were just not competitors. Or that they were too fragile. Or that they lack interest. Or that they would get hurt. Or that the rigors of athletic competition were unladylike. Almost alone in the crowd stood Coach Rafter, who dared to disagree. "I believe girls can do it," he would often say. "And I am going to devote a great deal of my time and effort to prove that they can—to give them their shot."

So against all the odds, Coach Rafter set out to convince a skeptical world.

Coach Rafter began by organizing a girls' track team at Red Bank Catholic. To everyone's surprise, except the coach, the response was overwhelming. The girls came out to run, to have a good time and to win. It was not long before the cynics acknowledged the success of Coach Rafter's program.

Anxious to pit his harriers against some competition, Coach Rafter soon discovered that none was to be found—anywhere. So he organized the first invitation girls track meet in the State of New Jersey appropriately called "A Sadie Hawkins Day Race."

He contacted every high school in the State. He encouraged them to organize a girls' track team. He pleaded his cause with passion and conviction. Seven schools sent squads to the meet and statewide girls' track competition was born.

A few years later, Coach Rafter decided it was time to topple another barrier in women's sports—cross country. Everyone who has run cross country knows that cross-country competition is no picnic and requires a runner to complete a long distance race over a hilly, rugged course. I know the challenge of cross-country competition personally, Mr. Speaker, having lettered 4 years straight at St. Mary's High School in Perth Amboy, N.J. Indeed it is tough. It is physically demanding. It teaches one the rewards of training and discipline. It strengthens the body and sharpens the will. So there were many back in 1966 who thought Coach Rafter's idea of a girls' cross-country team was preposterous. But again, he stuck to his guns and proved them wrong. He stuck by his girls and they proved him right. The female dalers showed themselves to be every bit as determined, able, fit, and competitive as the boys. Girls' cross country in New Jersey then took off like a rocket.

Mr. Speaker, the rest is history. One man's dream, one man's vision, one man's determination, has blossomed into one of the most respected statewide girls' track programs in the country. Right now, over 290 New Jersey high schools have girls' track teams. Thousands of New Jersey girls have, are, or will participate in track or cross country. And they have one coach to thank, Jack Rafter, a guy who is my candidate for Coach of Two Decades.

I am pleased to inform my colleagues that Coach Rafter's tremendous contribution to the world of sports has not gone unnoticed by his peers. On December 7, he will be honored at the New Jersey State Interscholastic Athletic Association dinner, to be held at the Pines Manor in Edison.●

PROTECTING THE POLITICAL RIGHTS OF WORKERS

HON. BENJAMIN A. GILMAN,

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. GILMAN. Mr. Speaker, it may surprise some of my colleagues to know that there are serious legal impediments to an individual's freedom to contact his Congressman or to contribute to his—or his opponent's—campaign or to decline to take such actions. In my view, these are decisions that should be solely matters of individual choice, and we should take steps to make certain that the political process, is not subverted by inappropriate pressures on workers to participate, or to refrain from participating, in politics.

Common law provides, in general, that an employee may be terminated at the will of his employer. Congress has, however, restricted the right of an employer to discriminate on the grounds of race, religion, sex and so forth.

We have not adequately protected the right of an individual to petition the Government for the redress of grievances—a right enshrined in the first amendment. The fact that we have not protected this right has led to instances where firms have, in the words of Business Week, engaged in "browbeating employees into lobbyists," and, as the Wall Street Journal put it, opened themselves to charges of coercion with respect to solicitations for Political Action Committee contributions.

I don't believe that my colleagues welcome any political contributions that have been coerced by an employer of by a PAC, nor receive a letter that has been written against the will of the correspondent. We need to take action to protect the political process and the freedom of conscience of our constituents.

The bill I am introducing today amends title VII of the Civil Rights Act of 1964 by including "political preference" as an additional factor defining what employment discrimination would be illegal. The current procedures and protections for employer and employee, now part of title VII, would be continued, and the "bona fide occupational qualification" escape hatch would still exist for individuals whose job includes the duty to communicate with legislators.

The time has come for Congress to assert itself, making it clear that there should be no discrimination against any person because of writing, or declining to write to an elected official, nor for making or failing to make a political contribution.

Mr. Speaker, I am inserting at this point in the RECORD a copy of my bill, H.R. 5098, a Business Week article dated March 10, 1980, and an analysis of the political rights of workers by the Congressional Research Service. I invite my colleagues to join me in cosponsoring this legislation.

H.R. 5098

A BILL to amend title VII of the Civil Rights Act of 1964 to prohibit employment discrimination on the basis of political preference.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 701 of the Civil Rights Act of 1964 (42 U.S.C. 2000e) is amended by adding at the end thereof the following:

"(l)(1) The term 'political preference', as used with respect to an individual, means a political preference of such individual, as expressed—

"(A) by making, or declining to make, a contribution of anything of value (including

services) for the benefit of any candidate, political party, or political committee, or

"(B) by attempting, or declining to attempt, to influence—

"(i) the passage or defeat of any legislation, or

"(ii) the outcome of any referendum, initiative, or recall proceeding of a State or of a political subdivision of a State,

other than through an act prohibited by law.

"(2) For the purposes of paragraph (1)—

"(A) the term 'candidate' shall have the meaning given such term by section 601(b) of title 18, United States Code;

"(B) the term 'political committee' shall have the meaning given such term by section 301(4) of the Federal Election Campaign Act of 1971; and

"(C) the term 'legislation' means any bill, resolution, amendment, nomination, or other matter pending or proposed in, or which may otherwise be the subject of action by, either House of Congress, or a legislative body of a State or of a political subdivision of a State.".

SEC. 2. (a) Title VII of the Civil Rights Act of 1964 (42 U.S.C. 2000e and following) is amended—

(1) by inserting "political preference," after "sex," each place it appears in sections 703(a), 703(b), 703(c), 703(d), 703(e), 703(h), 704(b), and 706(g);

(2) by inserting ", political preference," after "religion, sex" in section 703(h); and

(3) by inserting in section 703(j)—

(A) "political preference," after "sex," the first place it appears;

(B) "(or the total number or percentage of persons having any particular political preference)" after "national origin" the second place it appears; and

(C) "(or the total number or percentage of persons having such a political preference)" after "national origin" the third place it appears.

(b) The section heading for section 703 of the Civil Rights Act of 1964 (42 U.S.C. 2000e-2) is amended by inserting "Political Preference," after "Sex,".

SEC. 3. The amendments made by this Act shall apply with respect to employment practices occurring after the 180th day following the date of the enactment of this Act.

BROWBEATING EMPLOYEES INTO LOBBYISTS

A truism of political life is that mail moves politicians. But how does a legislator respond to 500 preprinted postcards from the employees of XYZ Corp. or to 200 letters written on company stationery?

The question is far from academic to the growing number of corporations that use their employees as political lobbyists. In industries ranging from oil to aerospace, workers have been urged—and sometimes marshaled into boardrooms, offices, and cafeterias—to write to their elected representatives, recommending action that the company wants. One senator, Carl Levin (D-Mich.), estimates that up to 10 percent of his mail is identifiably from employees writing in their companies' interest.

INTRUSION

Predictably, the practice has inspired employee grumbling that "managed" letter-writing is not part of their jobs, complaints from civil libertarians that it invades the writers' privacy, and attempts by political theorists, in and out of Congress, to curb the trend. Professor David W. Ewing, of the Harvard Business School, who dubs the workplace "the black hole in American rights," calls for a movement to give employees the constitutional guarantees they have as citizens. Noting that some 50 major companies (including IBM, Citibank, and Bank of America) have issued guidelines protecting employees from coercion or intrusion upon their privacy, Professor Alan F. Westin, a political scientist at Columbia University, says: "Management must see that the choice lies between making the effort themselves and government regulation."

In Congress, Representative Frank Thompson Jr. (D-N.J.) has introduced a bill to give the National Labor Relations Board jurisdiction over supervisory employees—admittedly only a first step toward their protection against political arm-twisting. Supervisory employees would still have to form unions and file grievances under NLRB-protected union contracts providing for arbitration, or possibly win an NLRB hearing by approaching the board as a unit to protest such action as a mass firing for refusing to write letters. Moreover, a similar bill introduced by Thompson in the 1974-75 session died in committee.

But the Thompson bill—and other bills on employees rights currently being considered by potential sponsors—may have better luck this time, in part because Congress has become aware of the quantum increase in its company-inspired mail. There is no question, says a congressional aide, that more companies "have realized that their employees represent electoral power."

Operating on that realization, Fluor Corp., of Irvine, Calif., urged its 20,000 employees to write to their congressmen in support of arms sales to Saudi Arabia in 1978. Fluor holds multimillion-dollar contracts to design and construct oil refineries and other projects in Saudi Arabia. Rockwell International Corp., of Pittsburgh, provided preprinted postcards to its headquarters employees so that they could petition Congress in support of the B-1 bomber in 1977. Rockwell was the primary bidder for production of the B-1, a program whose lowest estimate was $10 billion. For most of the last year, the major oil companies have used company newsletters, pep talks over plant intercoms, and fliers posted on department bulletin boards to persuade employees to send lawmakers the message that proposed taxes on "windfall profits" would unjustly hurt the companies.

LABOR'S EFFORTS

Unions, too, have pitched in on occasion. Last year the Federation of Grain Millers urged its 3,000 members in Battle Creek, Mich., to write letters objecting to an antimonopoly suit brought against the cereal industry by the Federal Trade Commission. More recently, the United Auto Workers organized a campaign to support a bid by Chrysler Corp. for federal loan guarantees. Senator Levin reports that he received some 7,000 letters clearly stemming from that campaign.

While corporations that sponsor letter-writing campaigns stress that participation is voluntary, even voluntary action must be motivated. When 22 specialty steel companies, backed by the United Steelworkers, joined in a push for continuation of the specialty steel import quotas last year, an industry brochure hammered home the warning, "Your job is at stake!" Says Hubert W. Delano, assistant vice-president of Cyclops Corp., a Pittsburgh-based diversified steelmaker: "Our people realized what the import-restraint program meant to them. The plant here in Pittsburgh had a 40 percent unemployment rate a couple of years ago."

THE JOB THREAT

Sometimes, however, the threat to a worker's job becomes more personal. A worker in Cyclops' Specialty Steel Div. felt that his job was at stake when he balked at joining in the second of the division's two letter-writing sessions. A technician in a nonunion job, the employee had dutifully appeared in the company board room as requested in 1978 and had written a letter supporting quotas. When asked to make a return appearance last summer, he refused. "I lost my cool," he says. "I didn't agree with the company's position, which I thought was very self-serving." Instead, he offered to write a letter at home and mail it privately.

The result, he says, was a visit from his supervisor, who told him that everyone had to write a letter on the premises. "He said, 'Go up and write something. Nobody's ever refused to do it,' " the employee says.

At that point the technician turned to his local chapter of the American Civil Liberties Union, only to be told that the company was within its rights in using him as a lobbyist. The Constitution protects an American from political pressures by the government but is silent on the subject of employer pressures, the ACLU said.

Specific laws restrain companies from acting freely in specific areas—for instance, the Equal Employment Opportunity Act and the Occupational Safety & Health Act—but in areas that are left uncovered by law, "the power of a large corporation over the worker is fairly unlimited," confirms Ira Glasser, the ACLU's executive director. This is particularly true if he does not belong to a union, Glasser says.

PROTECTION

Almost all union contracts specify that firings must be for just cause and provide grievance procedures culminating in arbitration; an arbitrator is unlikely to find that refusing to write to a congressman is just cause for dismissal. And if the union, sympathetic to the company, drags its feet on processing the grievance, the member can sue it under the Landrum-Griffin Act for failing to represent him. But in the absence of union or legislative protection, Glasser says, employees must weigh the economic consequences of refusing to act on the company's behalf. These economic considerations are "more effective political inhibitors than even the fear of arrest," he says.

In the Cyclops case, the technician finally wrote the letter. The experience left him shaken. "I felt my constitutional right to privacy had been violated," he says. "I wanted to refuse, but I didn't because I am the main support of my family."

Cyclops' Delano denies that the specialty steel campaign was coercive. "We were certainly very anxious that our employees write, so a strong effort was made," he says. But Delano stresses that nobody was forced.

EFFICACY

Company-inspired mail campaigns have met with varying degrees of success. The specialty steel campaign apparently persuaded Congress but not the President, who vetoed the bill. In general, says Representative William S. Moorhead (D-Pa.), a 22-year congressional veteran, he is most persuaded by "the one letter that analyzes and presents a problem logically," and he discounts postcards and petitions. Moorhead quotes the late Senator Sam Rayburn to the effect

that "a letter written with a stub pencil on a scrap of paper counts for more than a fancy letterhead because it probably comes from someone who has never written to his congressman before."

In any case, says Moorhead, "I am not elected to tote up letters and find out how many people in my district are for or against an issue. People back home rely on me to study the question and vote accordingly."

Other congressmen, often with less secure political bases, feel that even coordinated letter-writing has some value. When weekend vehicle gas restrictions were proposed last year, first-term Representative Howard E. Wolpe (D-Mich.) received two dozen identical letters on company stationery from employees of a small supplier of brass fittings for recreational vehicles. The letters noted that restricted gas sales would hurt the makers of snowmobiles and other recreational vehicles, ultimately producing layoffs in the supplier company.

THE PERSONAL TOUCH

James D. Margolis, Wolpe's executive assistant, believes that even this obviously orchestrated effort was effective because "it clued us into the ramifications of those restrictions." Even so, Margolis says that Wolpe prefers the personal touch. "I'd say he gives two points for sending anything, but 10 for a personal letter," he says.

Company-inspired employee lobbying can also generate undesirable side effects. When Fluor Chairman J. Robert Fluor wrote to employees and shareholders in 1978 to ask them to petition legislators in support of the sale of military jets to both Saudi Arabia and Israel, he drew widespread criticism, especially from the Jewish community.

"We took a lot of heat on that," says Thomas C. Ellick, vice-president of corporate relations, who supervises such activities. Fluor seldom uses grass-roots lobbying, Ellick says, but "we felt strongly about the bill and saw that it was in trouble," so Fluor made a conscious decision to try to use the political clout of its 20,000 employees. The effort, however, involved "no coercion and no attempt to follow up on who wrote letters and who didn't" Ellick says.

THE SOFT SELL

That kind of company attempt to inspire employee lobbying violates no one's privacy "if it is truly voluntary, with no threat of sanctions," says Columbia's Westin. Moreover, says William R. Maloni. a former aide to Representative Moorhead, "better efforts at internal corporate communications would produce better results than blackjack letter-writing sessions" because they would generate more spontaneous letters.

In fact, Illinois State Senator Dawn Clark Netsch insists that she can identify the effects of a company newsletter in the letters she receives. She finds such obviously voluntary expressions of concern more persuasive than "200 organized letters," she says.

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington, D.C., June 24, 1980.

To Hon. BENJAMIN A. GILMAN.
From American Law Division.
Subject: Protecting Employees' Right of Political Expression.
Attention: Hillel Weinberg.

At common law, an employee could be dismissed for any reason, with or without cause, at the whim of his or her employer. Now, however, the Federal Equal Employment Opportunities Act prohibits employment discrimination on account of an individual's "race, color, religion, sex, or national origin" (42 U.S.C. § 2000e-2). Age discrimination in employment is prohibited by 29 U.S.C. § 623(a). The majority of States have adopted legislation along these same lines.[1] The Labor Management Relations Act (29 U.S.C. §§ 141 et seq.) provides certain protections to those engaged in union activities, and many union contracts provide additional protection (union related and/or general) to covered employees.

However, there are still some gaps in coverage. For example, there appears to be nothing in Federal or State law[2] to prohibit an employer from forcing an employee to write, or refrain from writing, a letter to a Member of Congress expressing his or her views on a pending issue or piece of legislation. An employee refusing to take such an action could thus be dismissed or otherwise disciplined as a result. Such employees have First Amendment rights of free speech and political association, but asserting them can be expensive and time consuming.

All States prohibit election coercion or intimidation, and 34 (all except Alaska, Georgia, Hawaii, Illinois, Iowa, Louisiana, Maine, New Hampshire, New Mexico, North Dakota, Oklahoma, South Carolina, Texas, Vermont, Virginia, and Washington) specifically prohibit election coercion by an employer.[3] However, contacting a Member of Congress, or refusing to do so, does not strictly speaking come within the realm of an election. (Although it may tangentially, no cases were found where such an interpretation of any of the above statutes was offered.)

Although arguments can be offered in support of employees' rights in these areas, these rights would be greatly strengthened through a statutory enactment specifically providing for such protection. Adverse actions and lawsuits might still be required in some instances (for example, to determine if exercising the protected right has in fact led to disciplinary action), but the basic right of employees to be free from harassment because of such action would be settled.

We hope this information will be helpful.

RITA ANN REIMER,
Legislative Attorney.●

[1] The Government Division of the Congressional Research Service is presently conducting a telephone survey of 250 less-than-statewide entities to determine what, if any, affirmative action rights are covered by their enactments (municipal codes and ordinances, etc.). Other than through that procedure, these are not readily available for research purposes.

[2] Standard reference works, the Scorpio computer citation file, the Chamber of Commerce of the United States, and the National Council of State Governments were consulted on this point, without finding any such enactments.

HERBERT WEHNER PART II: LEADING GERMANY TO OBLIVION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, November 22, 1981

● Mr. McDONALD. Mr. Speaker, Americans, whose educational system fails to give them a sense of history, are always in need of useful reminders of the deep roots of living actors upon the political stage.

In view of the current renewed Communist drive for the neutralization of Europe, and particularly West Germany, it is well to set forth the background of a man who might easily be mistaken for a German elder statesman by now, having been assured of a seat in the Bundestag from 1949 onward.

Herbert Wehner, now 75 years old, has been described as the "grey eminence" of the Social Democratic Party (SPD) of West Germany. He has, as we noted in these pages on July 29, authored a plan for the neutralization of Germany which was actually an improvement, from the Soviet point of view, upon the original Rapacki plan of Polish Communist origin. Wehner appears to owe his position in German politics to the favor he receives from outside of Germany.

Wehner is nowadays at pains to conceal his long and fervid years as a Communist and turncoat, and reference to this background in the mass media of Germany today is about as likely as reference in our own mass media of the close and helpful relationship between Mr. Harriman and the Soviet Government, dating back to 1924.

An example of the sanitizing of official biographies is presented in the case of Herbert Wehner. Note the thoroughly "respectable" sound of the following official biography, every other word oozing propriety.

Wehner, Herbert, editor, born July 11, 1906 in Dresden; Protestant-Lutheran; married. Seminary preparatory school, high school, graduation 1924. Training as industrial merchant. Political-economic and industrial-economic studies. Commercial activity. Since 1925, first part-time and then full-time journalist. Before 1933, author and publisher of publications in the field of law concerning work councils and trade union practice. Politically active since 1923, trade union membership since 1924. 1930-31, member of the Diet of Saxony. 1933, active in the resistance movement. 1935, emigration. Owing to continued connection with the resistance movement, repeatedly arrested and interned abroad during the war.

Let us pause for a moment and see what has been concealed and disguised thus far. The least deceptive statement above is "politically active since 1923." That is the year in which Herbert Wehner joined the Socialist Workers' Youth.

His "training as an industrial merchant" must have taken place while he was a factory apprentice until 1926. His "political-economic and industrial-economic studies" were pursued by absorbing revolutionary propaganda; in 1925 he joined the Syndicalist Workers' Federation and embarked upon his career as "journalist" by working on syndicalist and anarchist publications. By 1927, Herbert Wehner had

"graduated" to the Communist Party proper (KPD).

It was then, as a Communist Party apparatchik, that he became "author and publisher of publications in the field of law concerning work councils and trade union practice."

In 1930-31, as Wehner neglects to inform readers of his official biography, he was a Communist member of the legislature of Saxony. Nowhere in his biography could one ever imagine that the subject was an enthusiastic Communist.

Wehner's journalistic career involved such effusions as the following, published in Revolutionary Action in May of 1926:

> The first necessity is the destruction of the state . . . The armed rebellion is inevitably necessary in order to put an end to what exists . . . All forces must be concentrated in the fight against the Republic and the government as such, against Parliament and all other institutions.

Later, as a Communist member of the Saxony legislature, he said:

> Soviet Russia is the only country in which we have no crises because the workers and farmers dominate . . . where the red flag with the hammer and sickle is flying.
>
> We (German Communists) will see to it that a clean sweep will be made here with the bourgeoise, as in the case of Soviet Russia, and the shouting of the middle class . . . will be proof of the trembling fear of this bankrupt bourgeoise society.

It may be argued that these were the effusions of youth. However, in view of the fact that the Swedes caught Wehner meeting with a KGB general in 1970, one must conclude that Wehner has merely disguised his views, not changed them. The serious intentions of Adolf Hitler were also overlooked, in his early writings.

Indeed, during 1929-31, when Wehner was rising fast in the KPD, his task was to foster the penetration of the trade unions by Communists, and in 1931 he was brought to the Central Committee of the German Communist Party. There, he became editor of the official KPD magazine, the Party Worker, and served as personal secretary to Party Chairman Ernst Thälmann.

When the KPD was outlawed in 1933, Wehner's "resistance" activities amounted to the party-directed task of completing networks of agents all over Western Europe. In 1934, on party orders, he tried to engineer the permanent detachment of the Saar from Germany. Wehner was arrested in 1935, not in Germany but in Czechoslovakia, and "released to the Soviet Union," where he could hardly complain of persecution. He became assistant to the noted head of the Comintern, Dimitrov. After years of further training, he was dispatched to Sweden as a Soviet spy. He was convicted of espionage on behalf of the Soviet Union in 1942.

This episode casts further discredit upon Wehner's character. The Communist Party asked its Social Democratic allies for legal defense of Wehner, and the Social Democrats obligingly provided the son of the Swedish Foreign Minister, Dr. Georg Brantig, as his lawyer. When Brantig discovered that Wehner, who was scarcely in the hands of the Gestapo, had blown his entire network under interrogation, Brantig stated:

> This man is neither a Communist nor an anti-Fascist. Wehner is a provocateur and a traitor. I must reject his defense.

More accurately, he was a coward and an opportunist. German Communists who were victimized by Wehner assert that he began working as a double agent for the British as early as his arrival in Sweden in 1941, that it was at British instigation that he wormed his way back into KPD circles after his release, and that his British intelligence connections saw to his return to Germany in 1946.

Since Germany was an occupied country, Wehner was far from the only turncoat German to be boosted into high political position under the occupation. Wehner served who knows how many of the occupying powers, and in 1949, when the Bundesrepublik was formed, he was already deputy chairman of the Social Democratic Party.

The chairman of the party was, of course, Willy Brandt. Wehner and Brandt had long experience in joint Communist-Social Democratic popular front politics dating back to France in 1936. At that time, Wehner was serving the Comintern and provided a strictly party line popular front declaration which Brandt signed on behalf of the Social Democrats, committing them without hesitation to the Communist cause.

Wehner, by the way, fulfilled his other task in prewar France, also in accordance with Comintern instructions, by directing local Communist activities aimed at the subversion of the French Armed Forces.

In postwar Germany, this known Soviet spy and double agent became, according to Wehner's official biography, "German advisor in prisoner-of-war questions at the General Assembly of the United Nations" in the early 1950's. It is difficult to imagine an individual who would have less sympathy than Wehner for loyal and courageous men who had fought against his employers.

For the next decade, Wehner and his nominal superior, Willy Brandt, became exponents of German reunification largely on Soviet terms. The Wehner proposals always involved German withdrawal from NATO, the removal of NATO forces—and the disarmament of Germany itself, the disbanding of the German Armed Forces. The cynical deal has always been intended to leave Germany open and helpless to the type of subversive warfare which Wehner well knows to be a Communist specialty. He brings to the matter a lifetime of experience.

When a shift of strategy was indicated, Wehner proved himself as supple as ever. Patriotic speeches came to flow lightly from his lips; more than that, Wehner learned to give hard-line speeches to the millions of Germans who had been driven from their homes by policies which he and Brandt had enthusiastically embraced at the time.

Even as the speeches were being made, the Social Democrats were meeting in Italy with Italian Communist Party representatives detailed to present to them the new Communist position on the fate of Germany. It is apparently necessary, in the Western media, to preserve Willy Brandt's tattered reputation by implying that he has been unaware of the fact that his closest associates have been longstanding trusted agents of the Soviet Union. Yet Brandt himself has a turncoat background lacking little but Wehner's actual conviction for espionage.

Nonetheless, Brandt's close associate, Egon Bahr, had been the subject of surveillance for years, and had spent the entire period of the midsixties in working out a common position with the Soviets as to Germany's future as a divided and neutralized land.

When Herbert Wehner chose Sweden, in 1970, as a place to meet a certain Soviet KGB general, the Swedes, who had not forgotten his unsavory nature, were not amused. They tipped off German intelligence and advised Wehner to conduct his business elsewhere in the future.

This is essential background to the understanding of the policies of Social Democrat Willy Brandt, including his "opening to the East" policies when he became Chancellor of West Germany. Brandt is a power in the Socialist International and thus still very much in a position to push Soviet policies in the Western world. And Herbert Wehner can hardly be imagined as changing his spots at this late date. We must expect that he and his party will collaborate with Moscow as openly as is politically feasible.●

SENATE—*Monday, November 23, 1981*

(Legislative day of Monday, November 2, 1981)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

The PRESIDENT pro tempore. Our opening prayer will be given by the Reverend Richard Christian Halverson, Jr., associate pastor, North Avenue Presbyterian Church, Atlanta, Ga. He is the son of the Senate Chaplain.

PRAYER

The Reverend Richard Christian Halverson, Jr., associate pastor, North Avenue Presbyterian Church, Atlanta, Ga., offered the following prayer:

Let us pray.

Father in Heaven, these days on the Hill have been long, arduous, and perhaps even somewhat frustrating to those who labor here. Yet we know in Thy sovereignty it is no accident that we wrestle with these difficult circumstances peculiar to our day, nor is it by chance that each man and woman who occupies a position of influence in this body has been called to serve our country at this time.

Inasmuch as those who labor here have been ordained by You, a truth made known by the very Bible on which their oath of office is taken, grant with this divine calling the godly wisdom and fortitude to continue the hard work of plowing up fallow ground and planting seeds of peace that by faith what is said and done here, if under Thy guidance, may yield a rich harvest of righteousness across the land.

This we pray in the name of Him from whom we receive wisdom, Jesus Christ our Lord. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

WHEN I GET TIME

Mr. BAKER. Mr. President, Thomas Masson wrote a poem entitled "When I Get Time," and I could not imagine a better Monday morning than today to include it in the RECORD.

WHEN I GET TIME

(By Thomas L. Masson)

When I get time—
  I know what I shall do:
I'll cut the leaves of all my books
  And read them through and through.

When I get time—
  I'll write some letters then
That I have owed for weeks and weeks
  To many, many men.

When I get time—
  I'll pay those calls I owe,
And with those bills, those countless bills,
  I will not be so slow.

When I get time—
  I'll regulate my life
In such a way that I may get
  Acquainted with my wife.

When I get time—
  Oh glorious dream of bliss!
A month, a year, ten years from now—
  But I can't finish this—
I've no more time.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, is there an order for morning business today?

The PRESIDENT pro tempore. There is no order.

Mr. BAKER. Mr. President, I ask unanimous consent that, after the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business to extend no longer than 30 minutes in which Senators may speak for no more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SCHEDULE

Mr. BAKER. Mr. President, the House of Representatives is in session considering matters in relation to the continuing resolution. I hope to be able to inform the Senate in greater detail of what action may be taken by the House and what further action may be available to the Senate in the course of the day. I cannot do that at this moment.

I had hoped today to take up the small business bill, S. 881. Before I do that, Mr. President, I should like to explore the possibility of a unanimous-consent agreement that we might lay aside that measure temporarily to take up whatever comes over from the House in connection with the continuing resolution, since that is our first obligation. I shall not now make that request, but I inquire of the minority leader if he would be willing to see if we could get such an agreement later this afternoon.

Mr. ROBERT C. BYRD. Will the Senator repeat the statement? I am sorry; I beg his pardon. I was distracted.

Mr. BAKER. Yes. Mr. President, I said I had hoped today and previously announced that the Senate would be asked to proceed to the consideration of S. 881, the small business bill, but that I do not feel that I can or should do that unless I can get an agreement that if and when we receive something from the House in connection with the continuing resolution that we can temporarily lay aside that measure and proceed to the other matter as it comes to us from the House. I then indicated I will not now make that request but I inquire of the minority leader if he would be willing to consider such a request later in the afternoon.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. I thank the minority leader.

Mr. President, there is one other matter we can proceed with today, I believe, and I hope it has been cleared on both sides, and that is the Foreign Corrupt Practices Act. If that is cleared on the minority side, I would propose that, at the close of morning business and no earlier than 1 o'clock, we proceed to the consideration of that measure.

Mr. ROBERT C. BYRD. There is no objection on this side to proceeding to that measure.

Mr. BAKER. I thank the distinguished minority leader.

Mr. President, I do not foresee any great difficulty with that. I understand there is no great controversy involved. But I have the same problem with that; that is, to lay aside that measure, if necessary. I will not make that request at this time.

I ask the minority leader to consider, as well, the possibility of such unanimous consent request later.

Mr. ROBERT C. BYRD. That will be done.

Mr. PROXMIRE. Will the majority leader yield?

Mr. BAKER. Yes.

Mr. PROXMIRE. On the Foreign Corrupt Practices Act, I was the author of the original bill last year and I was one of the opponents of the bill in the committee. But I think we have worked something out that accommodates both sides. I think we can dispose of that within a very short time and pass it by a voice vote.

Mr. BAKER. I thank the Senator. I am pleased for that evaluation.

Mr. President, let me put the unanimous consent request now and then I will yield to the distinguished Senator.

ORDER TO CONSIDER S. 708

Mr. President, I ask unanimous consent that, after the expiration of time allocated for the transaction of routine morning business but no earlier than 1 p.m., the Senated proceed to the consideration of the Foreign Corrupt Practices Act, Calendar Order No. 301, S. 708.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. I yield to the Senator from South Dakota.

S. 1692—IMPACT REPORT

Mr. ABDNOR. I thank the majority leader for yielding.

Mr. President, the Subcommittee on Water Resources, which I am proud to chair, has reported an amended version of S. 1692 to the full Committee on Environment and Public Works. This bill will help the Nation meet the President's goals for economic recovery, while accelerating the Nation's port development effort.

Unfortunately, a number of inaccuracies have been circulated regarding the impacts of this legislation. I would urge that my colleagues examine the bill with care, rather than to depend on outside characterizations of its impact.

To assist Members of the Senate and the public, the staff of the Committee on Environment and Public Works has prepared a report using data supplied by the U.S. Army Corps of Engineers and the Maritime Administration. This report analyzes the impact of S. 1692, along with other harbor cost-recovery options.

I would urge anyone interested in this issue to contact the Committee on Environment and Public Works in order to obtain a copy of this report. I will, of course, provide a copy of it to each of my colleagues for their personal review.

Mr. BAKER. Mr. President, I have no further need for my time under the standing order. I am prepared to yield to any Senator or to the minority leader.

RECOGNITION OF THE MINORITY LEADER

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader.

The PRESIDING OFFICER (Mr. ABDNOR). The minority leader is recognized.

THE CONTINUING RESOLUTION CONFLICT

Mr. ROBERT C. BYRD. Mr. President, the continuing resolution which the President vetoed this morning, passed the Senate last night because 44 Republicans voted for it and only 6 Republicans voted against it. Two Democrats voted for it.

Another salient fact: Senator BAKER's amendment which included a 4-percent across-the-board cut to certain programs was supported by the President. Senator BAKER told the Senate that the President would sign the continuing resolution if it included Senator BAKER's cuts. Senator BAKER's cuts amounted to $3.2 billion. By OMB's own estimates, the conference report cut $2 billion.

Therefore, this entire dispute hinges on $1.2 billion out of a bill providing funding for approximately $430 billion. In other words, this entire so-called crisis, with the tremendous inefficiencies in Government which it has created, is over a cut amounting to one-quarter of 1 percent of the bill.

This should suggest something about the nature of the dispute. It is clearly a tempest in a teapot. It is a manufactured shootout at the OK Corral. It is an attempt to divert attention from the real pressing issues of the day—a tremendous slowdown in economic activity, and a possible deficit in excess of $100 billion in fiscal year 1982.

The budget cut which the President says he wants from this bill will barely be a drop in the bucket. The source of the problem is not Government spending, but a Kemp-Roth tax cut which was both irresponsible and unfair.

Another salient fact: The conference report contained a funding level of $10.1 billion in foreign assistance. The administration has let it be known that it prefers the level of foreign assistance funding contained in the Senate bill, approximately $11.5 billion.

So, while on the one hand the President is talking about deeper domestic budget cuts, his administration is also advocating significant increases in foreign military assistance.

How can we explain to the American people that fewer kids will get school lunches, college loans become more and more difficult to obtain, our roads and bridges will continue to fall in disrepair, and, yet, we want to increase the amount of money we send to foreign countries, principally to buy arms?

NO VALID OBJECTIONS REMAIN TO GENOCIDE TREATY

Mr. PROXMIRE. Mr. President, the Genocide Treaty has awaited Senate ratification for over 30 years, and for over 30 years that ratification has been withheld. After reviewing the numerous objections which have been raised against the treaty, I am struck by the fact that no valid objections remain.

Over the past 30 years, the proponents of the treaty have refuted all objections raised against it time and time again. The Genocide Convention has been proven to be well within American legal and constitutional bounds.

What, then, is the Genocide Convention? Mr. President, the Genocide Treaty is nothing more than an affirmation of the value of human rights and human life. It constitutes a vital base from which international agreements to protect human life and political freedoms can proceed and expand. Over 80 nations have signed and ratified this worthy document, and yet, the United States remains conspicuously absent from that list.

We all know genocide is the planned, premeditated murder of an entire ethnic group.

The classic example was Hitler's virtual extermination of Jews in Europe during and before World War II. That is what we want to outlaw.

It is appalling, Mr. President, that there should be any resistance to that kind of agreement, especially since all our allied countries have ratified the treaty that we have pushed.

Why is there any objection? Is there any validity to these seemingly perpetual objections which have prevented ratification of the treaty for so many years? The obvious answer is no. Whatever technical objections have been raised against the treaty are far outweighed by its advantages, and should no longer stand in the way of ratification.

Louis Henkin, a noted constitutional and international law expert, has eloquently summed up the impetus for the United States to pursue human rights legislation. I present his statement here, as it echoes my own feelings on this subject:

> The United States, then, does not adhere to human rights covenants in order to distort or circumvent our constitutional system, to legislate greater human rights for its own citizens by treaty rather than by act of Congress or to take additional matters from the states into the federal domain; she adheres to such covenants in order to modify the behavior of other governments in ways that affect American interests.

What more can be said, Mr. President? The Genocide Convention has been shown to be in the interests of the United States. All charges against it have been refuted. I urge the Senate to ratify the Genocide Convention.

Mr. President, I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from West Virginia does have 8 minutes remaining.

Mr. ROBERT C. BYRD. Mr. President, does the distinguished Senator from New Mexico wish to have some of my time?

Mr. SCHMITT. That will not be necessary, Mr. President. I can speak in morning business. I thank the minority leader for his courtesy.

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business.

The Senator from New Mexico is recognized.

THE PRESIDENTIAL VETO OF THE CONTINUING RESOLUTION

Mr. SCHMITT. Mr. President, last night the Senate—correctly, I believe—passed the continuing resolution for fiscal year 1982 in order that the President could fully exercise his constitutional prerogatives in matters of this sort. I fully support the President's veto of that

continuing resolution as a means by which the vote of the American people entered the Halls of Congress. Members of the Committee on Appropriations, upon which I serve and upon which the distinguished Senator from Georgia (Mr. MATTINGLY), who is on the floor, serves, did the best they could in 56 hours of almost continuous negotiation with the House of Representatives on this continuing resolution. However, Mr. President, the spending levels in the bill which passed the Congress and now has been vetoed are at $3.5 billion outside the levels the President could agree to in the earlier Senate version and $6.5 billion higher than he had asked for in his September budget request.

Clearly, the American people would not expect the President to sign this legislation and set back the clock in efforts to bring Federal spending under control.

Mr. President, I worked, as others did, to mobilize support on the floor for passage of the continuing resolution even though we realized that the President had committed himself to veto that measure. I worked for passage of this legislation to give the President his constitutional veto opportunity to follow the mandate given to him by the American people, which, by every survey that I have seen, including some very recent ones in New Mexico, he still has.

This also gave the American people the opportunity to have their vote and their opinion felt in the Halls of Congress. The Presidential veto represents the actual interjection of the vote of these people directly into the congressional consideration of the continuing resolution. Now, with veto in hand, those of us in the Senate on this side of the aisle will have added leverage in the negotiations with the House on future spending measures that are outside the bounds necessary to bring the economy under control.

This will assist our efforts to control the unbridled growth of unnecessary Federal spending. Such unnecessary spending has been the principal cause of the persistently high inflation and interest rates.

Mr. President, recent surveys on issues among my constituents in New Mexico show the overwhelming majority of New Mexicans support the President in his budget reform efforts. There really was no other way to give President Reagan his constitutional opportunity except through last night's Senate passage of the continuing resolution. I not only support his veto action, I applaud the courage he has shown in taking that action in the face of the unbelievable pressures that come at a time when many of the functions of Government must grind to a halt. Now Congress must do its job in cutting unnecessary spending that it has tried to avoid for so long.

Mr. President, in that context, the Senator from Georgia and others and I have consistently said that no solution to this problem will be possible until we are willing to cap the growth of entitlement programs however genuinely necessary they may be which are, in fact, growing without control of any kind. One of the principal reasons that the continuing resolution was $3.5 billion above what the President had requested and agreed to finally was that the House version of the bill left out at least $1.7 billion worth of entitlement funding that was going to be necessary and is going to be necessary in this fiscal year. They just left it out, assuming that they could do that and have it considered in a supplemental request and it would not be counted against this continuing resolution.

Actually, Mr. President, I am afraid that that number is going to end up something like $2.5 billion unless we do something very quickly about entitlement programs.

In the consideration of the Senate bill on Labor, Health and Human Services, Education, and related agencies, the Appropriations Committee did consider at my request, although they did not act on it, a package of entitlement caps that generally would have returned to the States more of the responsibility to control spending on programs that they administer—unemployment compensation, medicaid, aid for dependent children, child support payments, and so forth.

In addition, as an illustration of another entitlement program that is growing totally out of control, it would have begun the process of capping the growth of guaranteed student loans. A portion of that total package my colleagues might be interested in would have provided in fiscal 1982 alone a saving of about $1.3 billion. That number should illustrate just how rapid the growth of these entitlements has been.

One final illustration would be that in the budget before that subcommittee that I chair in appropriations—Labor, Health and Human Services, and Education—we deal with a budget of about $85 billion. Mr. President, only $28.1 billion of that $85 billion was even in conference during this last weekend to which we could apply any savings requested by the President. We cannot continue that way. Next year, that number relative to the $85 billion will probably be down close to $21 billion. That is the amount of actual discretionary funds against which the Committee on Appropriations can apply its cuts.

So, as we go through the next 2 or 3 months, Mr. President, this Congress must deal with this problem because, unless we deal with the problem of the unbridled growth of these entitlement programs, we are going to continue to come back, just as we did last night, with continuing resolution after continuing resolution that will solve none of the problems that the American people have asked us to solve relative to reform of the spending practices of the Federal Government.

Mr. President, I yield on his own time to the Senator from Georgia (Mr. MATTINGLY) who has been a leader in this effort, and has offered proposals that are innovative and must be considered by the Congress much more seriously than they have in the past.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. MATTINGLY. Mr. President. I thank the Senator from New Mexico for those kind remarks. First, I want to begin by saying that I commend Senator BAKER, Senator HATFIELD, and Senator ROBERT C. BYRD for the job that has been done in the last few days. I think the Baker-Byrd amendment to the continuing resolution was a step forward in trying to control Federal spending. I think Senator HATFIELD should be commended for the job that he did during the 56 hours of negotiations on the continuing resolution.

Mr. President, as a member of the Appropriations Committee and a conferee who signed the report of the continuing resolution that the President vetoed this morning, I wanted my colleagues to know that I support the President's veto and voted for passage last night so the President could veto it and dramatize to the people of this country that the Congress has not done its job in reducing the budget.

But Mr. President, as much as I would like to tell about places in the budget that could be reduced or expose some of the pork barrel projects contained within that bill, I want to talk about what this Congress and this administration did not fully address in this resolution, or for that matter for this entire year.

What I want to talk about and demand action on is that 50 percent of our budget that we have refused to examine. What I want to see on this floor is a bill dealing with that part of the budget that went from $70 billion in 1970 to $295 billion in 1981. I want to see those both in the administration and the Congress who will do something about the "untouchables" the big "E"—entitlements.

I am pleased to be here today with Senator HARRISON SCHMITT. I say that because Senator SCHMITT has at every turn in the road reminded his colleagues on the Appropriations Committee—indeed the entire Senate—and this past weekend once again reminded Members of the conference about this significant problem. But more importantly, Mr. President, HARRISON SCHMITT has shown a willingness to act and lead the way on this problem. I praise him for his actions and for the discussion that we are about to have on this vital issue.

Mr. President, I suggest that this is a test of courage for the administration and for us here in Congress. I would point out that prior to 1972 the Congress had the responsibility for any increase in the entitlement programs. But in that year, when we raised retirement benefits 20 percent the Congress also tied all future increases beginning in 1975 for all entitlement programs to the CPI. In putting the system on automatic pilot, the Congress abrogated its responsibility and worse, nurtured the belief that these continued increases were somehow basic rights.

We, in this body, have no one to blame if this is allowed to continue but ourselves—not computers, not lack of studies—only lack of courage. I say to colleagues that we cannot defer this any longer. We cannot continue to go home and talk about the Federal Government getting its house in order when we refused to deal with 50 percent of its budget.

Mr. President, since I have been in the Senate, I have introduced legislation which if adopted would save approximately $50 billion over the next 5 fiscal years. In addition, I supported an attempt on the continuing resolution just vetoed that would have saved us approximately $2.6 billion this year.

These efforts have so far gone unrewarded in terms of providing more responsible programs. That is why, Mr. President, I welcome this discussion with my good friend, HARRISON SCHMITT, because I know that like me, he stands willing to act. It is my hope that by this discussion we can enlighten our colleagues and that over the holidays they will think about this and return ready to act.

Mr. SCHMITT. Mr. President, will the Senator yield?

Mr. MATTINGLY. I yield.

Mr. SCHMITT. If we do not do what the Senator has so strongly and eloquently suggested, then it is the education programs, the health programs, the student financial aid programs, the vocational educational programs, the health research programs—it is all these things that are going to suffer, because they are the so-called discretionary programs. They are the only ones that, right now, Congress can legally cut, when we need to reduce the rate of growth of Federal spending. We cannot do that any longer. Those programs are disappearing.

That is why there is so much difficulty in this process. We cannot get to where the main abuses of Federal budget authority occur, and that is in the uncapped, indefinite growth of what is commonly referred to as the entitlement programs.

The Senator is absolutely correct. We just have to do something. It is that simple.

Mr. MATTINGLY. I believe that now is the time to approach the big "E," and I am sure that my good friend from the Finance Committee will agree.

I ask the Senator from New Mexico if he will also agree with this; that 62 percent of all these payments, transfers, do not go to the poorest 20 percent of the families. Is that not correct?

Mr. SCHMITT. That is my understanding. The Senator is correct.

Mr. MATTINGLY. Then, obviously, what needs to be done is that we probably need to cut the safety net from under the politicians, so that we can make a secure safety net for the American public, the taxpayers, and those who do receive entitlements.

Mr. SCHMITT. There is no question that there are many Americans who, in a variety of economic conditions and a variety of fiscal conditions, are unable to provide for their own well-being. I think this country long ago decided that it was the responsibility of Government—local, State, and Federal—to insure that people who had no alternative but governmental assistance receive that assistance. Unfortunately, it has gone so far that there is no longer any incentive for others outside of that group to exercise the alternatives they have to provide for their own well-being.

That is what we are talking about. We are not talking about removing the safety net. In fact, we are talking about strengthening it underneath those people who have no alternatives but Federal assistance.

However, for those who do have alternatives, we must provide the incentives—in some cases, gradually—for them to seek other alternatives, while at the same time we rejuvenate the economy overall, so that those alternatives in the private sector are there and available for those who have not been exercising them up to the present time.

Mr. MATTINGLY. I agree with the Senator from New Mexico.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. HUMPHREY. Mr. President, it is well that the President has chosen to veto the continuing resolution sent to him by Congress yesterday.

What this Senator should like to point out is that perhaps too much is being made of this veto action and perhaps too much is being made of it by the White House.

Though large in absolute terms, the amounts of money involved are relatively small in comparison with the huge deficits which are looming in the outyears. I applaud the veto, and I hope the President will veto every spending proposal which exceeds his request, because Congress is falling into its old bad habits and showing, once again, that it does not have the discipline to bring spending into line with revenues.

So the President must be relied upon to provide that discipline, and I hope he uses it liberally. I, for one, will support him in sustaining this veto if that is necessary.

However, I point out once again that perhaps too much is being made of this particular veto of this particular resolution, involving in excess of several billion dollars of what the President wishes.

For the White House to be making such a big issue of this veto is about the same as someone visibly slapping a mosquito on his wrist and making a big scene out of that, when just a few feet away is a rattlesnake about to strike.

My colleagues from Georgia and New Mexico are absolutely right: There is no hope of avoiding fiscal and economic disaster until the White House gets its courage up and decides to address the entitlement programs. We cannot continue to focus our budget cutting attention on the 17 percent of the budget which remains after you exclude defense and entitlement programs and expect to have very much further success.

So I am one Senator who urges the White House to open up this question of entitlement programs, which it has shied away from since the situation with respect to the social security proposals of a few months ago. This is a time which calls for courage. We will not succeed in an economic or political sense unless the White House begins to show that courage. There are a growing number of Senators and Members of the House who are ready to address that question, realizing that there is no other choice.

IOWA GOES TO THE ROSE BOWL

Mr. JEPSEN. Mr. President, it gives me great pleasure to stand here today and say that I am from the great State of Iowa—a State today chilled by the early winter cold—yet a State warmed by thoughts of a New Year's Day celebration in Pasadena, Calif.

For 19 long years, the Iowa Hawkeyes have not had a winning season—until this year. For 23 long years, the Iowa Hawkeyes have quietly folded their jerseys and stored their cleats at the end of November—until this year.

Mr. President, it fills me with a great sense of pride to declare that the long drought is over—that not only have the Hawkeyes fought their way to a winning season—they have fought their way to the father of all bowl games—the Rose Bowl.

After being down for so long, being on top feels that much better for Hawkeye fans, and I think I am safe in saying that today every Iowan is a Hawkeye fan. We have a lot of reasons to love our football in Iowa; the Iowa State Cyclones ranked in the top 10 earlier this year, the Bulldogs of Drake University own at least a share of the Missouri Valley Conference title, and the Panthers of northern Iowa, just to name a few of the exciting teams we have in our State. But I am sure that they all join me in declaring that this is the year of the Hawks.

Mr. President, that Iowa enthusiasm goes all the way to the top. As you may know, back in 1932, as a new graduate of Eureka College in Illinois, Ronald Reagan had the pleasure of starting to broadcast Iowa football games for WHO radio in Des Moines. When I was at the White House last month to talk with President Reagan, I had the chance to bring him up to date on the Hawkeyes, and he was as excited as the rest of us.

I congratulate Coach Hayden Fry and all of the Hawkeyes for their courage and their fortitude on reaching this peak. And I congratulate the Hawkeye fans for their spirit and their patience through these past 19 years.

Mr. President, the people of Iowa have asked me to give a two-word message to my distinguished colleagues from the State of Washington, our opponents on New Year's Day. Those two words are: "Go Hawkeyes."

Thank you, Mr. President.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. JEPSEN. I yield.

Mr. THURMOND. Mr. President, I am not as familiar with the Hawkeyes as the able Senator from Iowa, but I congratulate the Hawkeyes for having such two able distinguished Senators here as Senator JEPSEN and Senator GRASSLEY.

Mr. JEPSEN. I thank the Senator. Coming from the President pro tempore that is, indeed, a very high compliment and helps make this rather bleak day more pleasant. I thank the distinguished Senator.

The PRESIDING OFFICER. Who seeks recognition?

Mr. JEPSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

BUSINESS ACCOUNTING AND FOREIGN TRADE SIMPLIFICATION ACT

Mr. STEVENS. Mr. President, I ask that the clerk lay before the Senate Calendar Order No. 301, S. 708, a bill to amend and clarify the Foreign Corrupt Practices Act of 1977.

The PRESIDING OFFICER. The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (S. 708) to amend and clarify the Foreign Corrupt Practices Act of 1977.

The Senate proceeded to consider the bill which had been reported from the Committee on Banking, Housing, and Urban Affairs, with an amendment to strike out all after the enacting clause and insert the following:

That this Act may be cited as the "Business Accounting and Foreign Trade Simplification Act".

FINDINGS AND CONCLUSION

SEC. 2. (a) The Congress finds that—

(1) the enactment of the Foreign Corrupt Practices Act of 1977 was a positive and significant step toward the important objective of prohibiting bribery of foreign government officials by United States companies in order to obtain, retain, or direct business;

(2) The Foreign Corrupt Practices Act of 1977 has caused unnecessary concern among existing and potential exporters as to the scope of legitimate overseas business activities;

(3) the accounting standards requirements of the Foreign Corrupt Practices Act of 1977, which apply to all issuers of securities irrespective of whether they have foreign operations, are unclear and excessive and have caused costly and unnecessary paperwork burdens;

(4) United States agencies responsible for enforcement of the Foreign Corrupt Practices Act of 1977 have not sufficiently coordinated interpretation and enforcement practices with other agencies responsible for international trade policy, export promotion, foreign policy, international monetary policy, and other related civil and criminal statutes; and

(5) it is in the best interests of all countries to maintain responsible standards of corrupt conduct in foreign markets to preserve free and equitable trading practices.

(b) The Congress concludes that—

(1) the principal objectives of the Foreign Corrupt Practices Act of 1977 are desirable, beneficial, and important to our Nation as well as to our relationships with our trading partners, and these objectives should remain the central intent of the Act;

(2) exporters should not be subject to unclear, conflicting, and potentially damaging demands by diverse United States agencies responsible for enforcement of the Foreign Corrupt Practices Act of 1977;

(3) general compliance and enforcement practices associated with the Foreign Corrupt Practices Act of 1977 should be developed in accordance with considerations underlying foreign policy relations, international trade, export promotion, international monetary policy, and other related civil and criminal statutes; and

(4) a solution to the problem of corrupt payments by firms to obtain or retain business demands an international approach; accordingly, appropriate international agreements should be initiated and sought by the United States agencies responsible for trade agreements and by the President.

AMENDMENT OF SHORT TITLE

SEC. 3. Section 101 of the Foreign Corrupt Practices Act of 1977 is amended to read as follows:

"SHORT TITLE

"SEC. 101. This title may be cited as the 'Business Practices and Records Act'.".

ACCOUNTING STANDARDS

SEC. 4. (a) Section 13(b)(2) of the Securities Exchange Act of 1934 is amended to read as follows:

"(2) Every issuer which has a class of securities registered pursuant to section 12 of this title and every issuer which is required to file reports pursuant to section 15(d) of this title shall devise and maintain a system of internal accounting controls sufficient to provide reasonable assurances that—

"(A) transactions are executed in accordance with management's general or specific authorization;

"(B) transactions are recorded as necessary (i) to permit preparation of financial statements in conformity with generally accepted accounting principles or any other criteria applicable to such statements, and (ii) to maintain accountability for assets;

"(C) access to assets is permitted only in accordance with management's general or specific authorization;

"(D) the recorded accountability for assets is compared with the existing assets at reasonable intervals and appropriate action is taken with respect to any differences; and

"(E) for the purposes of subparagraphs (A) through (D) of this paragraph, the issuer makes and keeps books, accounting records, and accounts which, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the issuer.".

(b) Section 13(b) of the Securities Exchange Act of 1934 is amended by adding at the end thereof the following:

"(4) A person shall be liable in any action or proceeding arising under paragraph (2) only—

"(A) for knowingly falsifying, or causing to be falsified, any book, accounting record, or account described in paragraph (2);

"(B) for knowingly failing to make or keep a book, record, or account described therein;

"(C) for knowingly failing to maintain a system of internal accounting controls which is consistent with the purposes of paragraph (2); or

"(D) for knowingly attempting to circumvent the internal accounting controls established pursuant to paragraph (2).

"(5) Where an issuer which has a class of securities registered pursuant to section 12 of this title or an issuer which is required to file reports pursuant to section 15(d) of this title holds 50 per centum or less of the voting power with respect to a domestic or foreign firm, the provisions of paragraph (2) require only that the issuer proceed in good faith to use its influence, to the extent reasonable under the issuer's circumstances, including the relative degree of its ownership over the domestic or foreign firm and under the laws and practices governing the business operations of the country in which such firm is located, to cause such domestic or foreign firm to devise and maintain a system of internal accounting controls consistent with paragraph (2). Such an issuer shall be conclusively presumed to have complied with the provisions of paragraph (2) by demonstrating good faith efforts to use such influence.".

REPEALER; NEW BRIBERY PROVISION

SEC. 5. (a)(1) Section 30A of the Securities Exchange Act of 1934 is repealed.

(2) Section 32 of such Act is amended—

(A) by striking out "(other than section 30A)" in subsection (a); and

(B) by striking out subsection (c).

(b) Section 104 of the Business Practices and Records Act is amended to read as follows:

"FOREIGN PAYMENTS

"SEC. 104. (a) It shall be unlawful for any domestic concern, or any officer, director, employee, or shareholder thereof acting on behalf of such domestic concern, to make use of the mails or any means or instrumentality of interstate commerce corruptly in furtherance of a payment, gift, offer, or promise, directly or indirectly, of anything of value to any foreign official for the purpose of—

"(1) influencing any act or decision of such foreign official in his official capacity, or inducing such foreign official to do or omit to do any act in violation of his legal duties as a foreign official; or

"(2) inducing such foreign official to use his influence with a foreign government or instrumentality thereof to affect or influence any act or decision of such government or instrumentality;

in order to assist such domestic concern in obtaining or retaining business for or with, or directing business to, any person.

"(b) It shall be unlawful for any domestic concern, or any officer, director or employee, or shareholder thereof acting on behalf of such domestic concern to make use of the mails or any means or instrumentality of interstate commerce corruptly to direct or authorize, expressly or by a course of conduct, a third party in furtherance of a payment, gift, offer, or promise of anything of value to a foreign official for any of the purposes set forth in subsection (a).

"(c) Subsections (a) and (b) shall not apply to—

"(1) any facilitating or expediting payment to a foreign official the purpose of which is to expedite or to secure the performance of a routine governmental action by a foreign official, as distinguished from governmental action in which the exercise of judgment by the foreign official is a significant factor;

"(2) any payment, gift, offer, or promise of anything of value to a foreign official

which is lawful under the law and regulations of the foreign official's country;

"(3) any payment, gift, offer, or promise of anything of value which constitutes a courtesy, a token of regard or esteem, or in return for hospitality;

"(4) any expenditures, including travel and lodging expenses, associated with the selling or purchasing of goods or services or with the demonstration or explanation of products; or

"(5) any ordinary expenditures, including travel and lodging expenses, associated with the performance of a contract with a foreign government or agency thereof.

"(d)(1)(A) Except as provided in subparagraph (B), any domestic concern which violates subsection (a) or (b) shall, upon conviction, be fined not more than $1,000,000.

"(B) Any individual who is a domestic concern and who willfully violates subsection (a) or (b) shall, upon conviction, be fined not more than $10,000, or imprisoned not more than five years, or both.

"(2) Any officer or director of a domestic concern, or stockholder acting on behalf of such domestic concern, who willfully violates subsection (a) or (b) shall, upon conviction, be fined not more than $10,000, or imprisoned not more than five years, or both.

"(3) Whenever a domestic concern is found to have violated subsection (a) or (b) of this section, any employee of such domestic concern who is a United States citizen, national, or resident or is otherwise subject to the jurisdiction of the United States (other than an officer, director, or stockholder acting on behalf of such domestic concern), and who willfully carried out the act or practice constituting such violation shall, upon conviction, be fined not more than $10,000, or imprisoned not more than five years, or both.

"(4) Whenever a fine is imposed under paragraph (2) or (3) of this subsection upon any officer, director, employee, or stockholder of a domestic concern, such fine shall not be paid, directly or indirectly, by such domestic concern.

"(e)(1) When it appears to the Attorney General that any domestic concern, or officer, director, employee, or stockholder thereof, is engaged, or is about to engage, in any act or practice constituting a violation of subsection (a) or (b) of this section, the Attorney General may, in his discretion, bring a civil action in an appropriate district court of the United States to enjoin such act or practice, and upon a proper showing, a permanent or temporary injunction or a temporary restraining order shall be granted without bond.

"(2) For the purpose of all civil investigations which, in the opinion of the Attorney General, are necessary and proper for the enforcement of this Act, the Attorney General or any attorney or attorneys of the Department of Justice designated by him are empowered to administer oaths and affirmations, subpena witnesses, take evidence, and require the production of any books, papers, or other documents which the Attorney General deems relevant or material to the inquiry. Such attendance of witnesses and the production of such documentary evidence may be required from any place in the United States, or any territory, possession, or commonwealth of the United States, at any designated place of hearing.

"(3) In case of contumacy by, or refusal to obey a subpena issued to, any person, the Attorney General may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, or other documents. Any such court may issue an order requiring such person to appear before the Attorney General or attorney designated by the Attorney General, there to produce records, if so ordered, or to give testimony touching the matter under investigation or in question; and any failure to obey such order of the court may be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or wherever he may be found. The Attorney General shall have the power to make such rules relating to civil investigations as may be necessary or appropriate to implement the provisions of this subsection.

"(f) As used in this section—

"(1) The term 'domestic concern' means (A) any individual who is a citizen, national, or resident of the United States; or (B) any corporation, partnership, association, joint-stock company, business trust, unincorporated organization, or sole proprietorship which has its principal place of business in the United States, which is organized under the laws of a State of the United States or a territory, possession, or commonwealth of the United States, which has a class of securities registered pursuant to section 12 of the Securities Exchange Act of 1934, or which is required to file reports under section 15(d) of the Securities Exchange Act of 1934.

"(2) The term 'foreign official' means (A) any officer or employee of a foreign government or any department, agency, or instrumentality thereof, or any person acting in an official capacity for or on behalf of any such government or department, agency, or instrumentality; or (B) any foreign political party or official thereof or any candidate for foreign political office.".

DEFINITIONS

SEC. 6. Section 13(b) of the Securities Exchange Act of 1934 is amended by adding at the end thereof the following:

"(6) For the purpose of this section, the terms 'reasonable assurances' and 'reasonable detail' mean such level of detail and degree of assurance as would satisfy prudent individuals in the conduct of their own affairs, having in mind a comparison between benefits to be obtained and costs to be incurred in obtaining such benefits.".

EXCLUSIVITY PROVISION FOR OVERSEAS BRIBERY

SEC. 7. No criminal action pursuant to section 1341 or 1343 of title 18, United States Code, may be brought against a domestic concern, its officers, directors, employees, or shareholders based upon the theory that, by receiving a corrupt payment, the foreign official violated his fiduciary duty to his government or to the citizens of his country. Nothing in this section limits the applicability of the provisions of section 1341 and 1343 of title 18, United States Code, to any other kind of scheme to defraud.

AUTHORITY TO ISSUE GUIDELINES

SEC. 8. Title I of the Business Practices and Records Act is amended by adding at the end thereof the following:

"GUIDELINES AND GENERAL PROCEDURES FOR COMPLIANCE

"SEC. 105. (a) Not later than six months after the date of enactment of this section, the Attorney General, after consultation with the United States Trade Representative, the Secretary of State, the Secretary of Commerce, and the Secretary of the Treasury, and after consultation with representatives of the business community and the interested public through public notice and comment and in public hearings, shall determine to what extent the business community would be assisted by further clarification of section 104 of this Act and shall, based on such determination and to the extent necessary and appropriate, have the authority to issue—

"(1) guidelines describing specific types of conduct associated with common types of export sales arrangements and business contracts which the Attorney General determines constitute compliance with the provisions of section 104 of this Act; and

"(2) general precautionary procedures which issuers or domestic concerns may use on a voluntary basis to ensure compliance with this Act, and to create a rebuttable presumption of compliance with this Act.

The guidelines and procedures referred to in the preceding sentence shall be issued in accordance with sections 551 through 557 of title 5, United States Code.

"(b) The Attorney General, after consultation with other Federal agencies and representatives from the business community, shall establish a Business Practices and Records Act Review Procedure for the purpose of providing responses to specific inquiries concerning enforcement intentions under this Act. The Attorney General shall issue opinions, within thirty days, in response to requests from domestic concerns, regarding compliance with the requirements of the provisions of section 104 of this Act. An opinion that certain prospective conduct does not involve a violation shall be final and binding on all parties, subject to the discovery of new evidence. When appropriate, and at reasonable intervals, the responses derived from the review procedure will be reviewed by the Attorney General to determine whether such compilation of responses should be included in a new guideline pursuant to subsection (a).

"(c) Any document or other material provided to, received by, or prepared in the Department of Justice, or any other department or agency of the United States Government, in connection with a request by a domestic concern for a statement of present enforcement intentions under the Business Practices and Records Act Review Procedure pursuant to subsection (b) of this section, or in connection with any investigations conducted to enforce this Act, shall be exempt from disclosure under section 552 of title 5, United States Code, regardless of whether the Department responds to such a request or the applicant withdraws such request prior to receiving a response. The Attorney General shall protect the privacy of each applicant, and shall adopt rules assuring that materials, documents, and information submitted in connection with a review procedure request will be kept confidential and will not be used for any purpose that would unnecessarily discourage use of the review procedure. The review procedure shall be developed and instituted in accordance with sections 551 and 557 and 701 through 706 of the title 5, United States Code.

"(d) The Attorney General shall make a special effort to provide timely compliance guidance to potential exporters, and smaller businesses, who as a practical matter are unable to obtain specialized counsel on issues pertaining to this Act. Such assistance shall be limited to requests for enforcement intention disclosures provided for under this Act, and general explanations of compliance responsibilities and of potential liabilities under the Act.

"(e)(1) On September 1 of each year the Attorney General shall transmit to the Congress and make public a detailed report on all actions which the Department of Justice has taken pursuant to this Act, along with its views on problems associated with implementation, its plan for the next fiscal year to further implement the Act, and recommendations for amendments.

"(2) On September 1 of each year the Chairman of the Securities and Exchange Commission shall file with the Congress a detailed report on all actions which the Commission has taken pursuant to section 13(b) of the Securities Exchange Act, its

views on problems associated with implementation, its plans for the next fiscal year to further implement such section, and its recommendations for amendment.".

CONFORMING CHANGES IN INTERNAL REVENUE CODE

SEC. 9. Paragraph (1) of section 162(c) of the Internal Revenue Code of 1954 (relating to illegal payments to government officials or employees) is amended—

(1) by striking out "the laws of the United States if such laws were applicable to such payment and to such official or employee" and inserting in lieu thereof "the Business Practices and Records Act"; and

(2) by striking out "(or would be unlawful under the laws of the United States)" and inserting in lieu thereof "(or would be unlawful under the Business Practices and Records Act)".

INTERNATIONAL AGREEMENTS

SEC. 10. (a) It is the sense of the Congress that the President should pursue the negotiation of bilateral and multilateral agreements among the largest possible number of nations which would establish standards of conduct for international business practices and which would create a process by which problems and conflicts associated with such practices could be resolved, and to explore through negotiations an international agreement for rates of commissions.

(b) It is the sense of the Congress that, within one year after the date of enactment of this Act, the President shall report to Congress on the progress of these negotiations, and those steps which the administration and Congress should consider taking in the event that the negotiations referred to in subsection (a) do not successfully eliminate the competitive disadvantage of United States business.

(c) Not later than one year after the date of the enactment of this Act, the President shall submit to the appropriate committees of the Congress a report identifying and assessing the legal and practical consequences of specific action that the United States could take under existing law—

(1) to promote cooperation by other nations in international efforts to prevent bribery of foreign officials, candidates, or parties in third countries; and

(2) to encourage persons or business enterprises organized and operating in other nations to refrain from engaging in bribery of foreign officials, candidates, or parties in third countries to the commercial and competitive disadvantage of the overesas operations of United States industry.

This report shall also include recommendations for any new legislation required to give the President authority to take appropriate action to achieve such objectives. The report shall contain an analysis of the potential effect on the interests of the United States including United States national security of the corruption of foreign officials and political leaders in connection with international business transactions involving persons and business enterprises of other nations. In addition, the report shall assess the current and future role in curtailing such corruption of private initiatives such as the Recommendations to Governments and Rules of Conduct to Combat Extortion and Bribery developed by the International Chamber of Commerce.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is S. 708.

Mr. HEINZ. I thank the Chair.

Mr. President, I ask unanimous consent that, for the consideration of the Foreign Corrupt Practices Act and for votes thereon, the following members of the Senate Banking Committee staff be accorded the privileges of the floor.

Dan Wall, Howard Menell, John Daniels, Paul Freedenberg, Wayne Abernathy, Lyle Rushton, and Lindy Marinaccio.

The PRESIDING OFFICER (Mr. WARNER). Without objection, it is so ordered.

Mr. HEINZ. Further, Mr. President, I ask unanimous consent that Mr. Bill Reinsch, of my staff; Christine Bliss of Senator CHAFEE's staff; Bill Mattea, of Senator DIXON's staff; and Diane Sanger, of Senator D'AMATO's staff be accorded the same privileges.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, today we take up S. 708, the amendments to the Foreign Corrupt Practices Act, which is the third major piece of legislation to help American exports that the Senate has taken up this year. In April, we passed the Export Trading Company Act of 1981. That legislation is now pending over in the House.

I am optimistic about the possibility of action therein this Congress. In July we passed major tax legislation which included a provision reforming the tax treatment of Americans working abroad, sections 911 and 913. That measure is now law. Today we take up the third item on our export agenda, S. 708, amendments to the Foreign Corrupt Practices Act.

There is no question, Mr. President, that these export bills are necessary. Emphasis on exports is necessary because the 1980 trade deficit was $36.4 billion, and the 1981 deficit threatens to be in the same range. Imports of consumer goods are growing, and oil price increases have added to the deficit even while we are reducing the quantity of imported oil.

Equally significant, the current account, which includes services and investment income as well as trade, is sure to slip into deficit this year after 2 years of modest surpluses. In the past some have suggested that because exports were growing and the current account was in surplus, the export crisis is overblown. In short, we are already doing enough.

Well, Mr. President, I would suggest, first, that one can never do enough to encourage exports, and second that the latest data make clear that recent progress was due in large part in a falling dollar and not to generic improvement in our exporting position. Now a rising dollar is putting us back into the same disadvantaged position we were in several years ago. We continue to lose ground and market share to our trading competitors. My subcommittee's export agenda—Export Trading Companies, Foreign Corrupt Practices Act amendments, expanded Export-Import Bank authority—will provide some permanent improvements irrespective of the status of the dollar.

I particularly want to note at the beginning of my statement the bipartisan nature of the effort that has developed this bill. Originally introduced by the Senator from Rhode Island (Mr. CHAFEE), who has for two Congresses been on the cutting edge of this issue, it underwent a number of modifications in committee through the efforts of Senator CHAFEE, Senator D'AMATO, Senator DIXON, Senator DODD, Senator RIEGLE, Senator PROXMIRE, and myself. Ultimately the bill was reported by a bipartisan majority vote of 11 to 4.

I emphasize this bipartisan spirit, Mr. President, because of the potential for controversy lurking in this bill. The Foreign Corrupt Practices Act was originally signed into law in 1977 in response to revelations of corporate bribes and payoffs in the mid-1970's. I expect my colleague, Senator PROXMIRE, will have more to say about the history and origins of the current law in his statement. Let me summarize its rationale by saying it was intended to force corporations to "clean up their acts" and to set a higher standard of behavior for American business, a standard we hoped would subsequently be adopted by others after multilateral negotiations.

These are laudable goals. Yet today we are proposing significant changes in the law designed to achieve them. While it will be tempting for people to describe these changes as weaken'ng our commitment to corporate honesty or as "gutting" the law, if you look at the record of the committee's work on this bill you will see that neither the way we proceeded nor the results we produced verify that charge.

Mr. President, at this time I would like to take special note of the tremendous understanding, patience, and diligence of the Senator from Wisconsin, Senator PROXMIRE, who, at every turn, has given the benefit of his experience and his insight, into making sure that the legislation before us really was a workmanlike product, a product which we could bring to the floor with a good deal of pride.

With respect to procedures that Senator PROXMIRE and I agreed to. Mr. President, the committee held 5 days of hearings spanning 3 months and including 29 witnesses. Most significant, every witness requested by the m'nority was invited to appear. Some declined, but I don't think anyone can argue the hearings did not fully represent all sides of this issue or that the requests of opponents of the bill were not honored.

Additionally, at the request of the minority. we postponed markup on the bill for 6 weeks—over the August recess—to permit all Members to better study the complex issues raised by the bill. During that t'me. the staff, in consultation with Senator D'AMATO and myself, developed a committee print which made a number of changes in S. 708 to accommodate concerns raised by the m'nority and to correct drafting errors. Ultimately the committee print was adopted—also by a bipartisan vote—and the bill reported with an additional clarifying amendment.

In particular, Mr. President, I want to

pay my respects to Senator PROXMIRE for his partnership, his very critical insights into the work of the subcommittee and the committee on this bill, and, of course, to its principal sponsors, Senator CHAFEE, Senator D'AMATO, Senator DIXON, and others. In short, Mr. President, we have proceeded slowly and carefully, as befits a bill this complex and important.

With respect to our product, Mr. President, obviously thoughtful people of good will will differ on its merits, and I have no expectation that this bill will be approved unanimously. I do, however, want to make clear our intent, a subject which I am sure the Senator from Rhode Island (Mr. CHAFEE), the bill's original author, will discuss as well. Very simply, what we are trying to do is not weaken this law but clarify it. We are not reopening the door to corrupt payments. We are eliminating doubt as to what constitutes a corrupt payment and when a corporation is liable.

In that regard, the present law has some serious deficiencies. In the accounting section, present law potentially makes a corporation liable for the smallest accounting error—whether material or not, whether intentional or not, whether related to a corrupt payment or not. In fact, as the legislative history of this section makes clear, it is not an anticorruption section at all, but rather broad authority for the SEC to prosecute books and record errors.

In the words of former SEC Chairman Harold Williams in a policy statement discussing the accounting provisions:

> The anxieties created by the Foreign Corrupt Practices Act—among men and women of utmost good faith—have been, in my experience, without equal.

The committee clearly felt that the scope of this section of the law is too broad. Any accountant will tell you that some corporate books and records are inevitably inaccurate, that no internal control system can be devised that will prevent all errors or make falsifications impossible, and that it serves no purpose to hold the company liable for every error.

Furthermore, the threat of lengthy and costly investigations to discover minor or inadvertent mistakes has inevitably led to overly cautious behavior by corporations which have no desire to violate the law. It does not help businesses faced with such laws to say simply that the SEC and the Justice Department would not act against minor, unintentional violations.

This kind of argument, in my view, makes clear what is wrong with present law and what is right about S. 708. The latter provides the necessary certainty. What is a minor violation? What is immaterial? How do businesses know what the SEC or Justice Department might or might not do, when the law has such a broad reach? The purpose of S. 708 is to write a law which, on its face, will answer those questions.

The original version of S. 708 dealt with this problem through the inclusion of a "materiality" standard—liability would obtain only for material violations. Not surprisingly, this concept ran into the same criticism that has been applied to present law. "Materiality" is a fuzzy term that also provides no certainty, and there was no widespread agreement as to how it should be defined. It could only be adequately defined through litigation, and it is our specific purpose to write a law that will reduce litigation, not increase it.

Accordingly, the reported version of the bill drops the concept but at the same time attempts to deal with the deficiencies of the too inclusive present law by incorporating the statutory reference to accurate books and records into the parallel requirement to maintain an internal accounting system.

This removes the free standing books and records provision but at the same time does not fully deal with the question of intent or of minor violations. In its deliberations on this point the committee resolved the issue tentatively but agreed to pursue a more widely acceptable resolution. I am pleased to report that Senators PROXMIRE, D'AMATO, CHAFEE, and myself have reached agreement on an amendment that further clarifies this section. I will comment a bit more on this question when that amendment is offered.

I will discuss this amendment in greater detail later, but it does seem to me to resolve fairly the controversies in this part of the bill.

The other major part of the bill is its amendment to section 104 of the Foreign Corrupt Practices Act, which is the section defining and making illegal foreign corrupt payments.

The major difficulty of present law relates to its language concerning the relationship between a corporation and a third party, usually an agent, when it is the latter that actually makes the prohibited payment. This is a central issue because in many countries foreign companies are either required by law or encouraged by custom and other means to deal with the government through a national of that country.

In other countries where the bureaucracy is complex or corrupt, or where the language or social customs are difficult for Westerners, it is clearly in U.S. company's interest to employ an agent. Smaller businesses tend to be particularly dependent upon agents in their export activities.

Present law defines the company-agent relationship by making the company liable if it knows or has reason to know that the agent has made a corrupt payment. The reason-to-know language has been the source of the greatest uncertainty, complicated by the absence of useful guidance from the SEC or the Justice Department as to what the term might mean. This has led to assertions of breadth of coverage which themselves are breathtaking and which would totally cripple U.S. corporate activities in certain countries, were the law aggressively enforced in that way.

John Fedders, formerly a lawyer advising clients in this field and now the Director of the SEC's Division of Enforcement, in an excellent analysis of this part of the law in Middle East Executive Reports, has summarized the various contentions about what "reason to know" has been at various times construed to mean. It is worth reading because it so clearly illustrates the point I am trying to make.

First. Country in question. Some persons suggest that in countries where bribery of government officials is commonplace, "reason to know" will be presumed in all cases. Others suggest that rumors about questionable practices in certain countries make all transactions there suspect.

Second. Reputation of agent. Because of the bribery disclosures of the 1970's, some agents are notorious for their alleged misconduct. If a U.S. entity employs one of these agents, it is suggested that the businessman must assume that some of the fee will be paid to a foreign official.

Third. Amount of commission. Some persons suggest that if an agent requests or is paid a commission greater than the "going rate" there is "reason to know" that part of the fee will be improperly paid to a foreign official.

Fourth. Agent's refusal to make representations. If an agent refuses to provide representations or covenants—about his business activities—it is suggested that the U.S. entity has "reason to know" that the agent's conduct will not be lawful.

Fifth. Family or business relationship. Finally, some suggest that an agent's family or business relationship with foreign officials, particularly in certain countries, creates a substantial probability that part of the agent's fee will be paid to a foreign official.

Now I think the authors of the original law would be hard put to argue that that is what they meant when they wrote this section, but that is precisely the impression business has been given. And it is not enough to respond by saying these more extreme cases have not been prosecuted, because the relevant issue is still uncertainty and the impact it has on business operations.

It is of small comfort to an executive when his lawyer tells him he may be liable under the law—personally and corporately—but not to worry because the Government may not prosecute, or if it does, he might not be convicted. The executive's obligation to himself and his company is to avoid uncertainty, avoid publicity, and avoid the time and expense of a lengthy investigation or court case.

Ironically, this problem bears great resemblance to a similar controversy we have had on the export trading company bill. Title II of that bill provides an antitrust preclearance procedure. Its intent is to draw a clearer line between what is legal and what is not in this area. It does not change existing antitrust law in the slightest. Opponents argue that existing law, vague though it is, and Justice Department guidance in this area are sufficient. But they ignore the fact that that guidance is usually filled with qualifying words like "unlikely," and "at the present time."

Such guidance, of course, is useless in the real world since "unlikely" has no definitive force, "present time" means today only, and in any event private

party suits are not precluded. As in the case of the Foreign Corrupt Practices Act, the issue is uncertainty. The businessman does not want to be told he might be OK, or that he will probably win his case. He wants to be told when there would not be any case—and when there will. I think it is our responsibility to do the best we can to meet that standard.

To my mind, the most important thing S. 708 as reported does is to remove the reason to know standard, basically replacing it with a "directs or authorizes" standard. By itself this makes clear that a company is liable for an agent's corrupt payment if it has directed or authorized it. In other words, there would have to be some overt act or statement on the part of the company.

It was my judgment, however, which the committee shared, that we also need to go a step farther than that and cover those situations where the company literally puts its head in the sand and intends to avoid knowing what its agent is doing, or where a company authorizes a corrupt payment through words or actions that are not explicit. This is clearly not a "reason to know" standard or "should have known" standard, but rather a standard based on the company's words or actions that takes into account, however, that such words or conduct do not need to be only an explicit on-the-record direction to establish the company's intent.

After much discussion, I offered in committee an amendment to add the words, "expressly or by a course of conduct," after "directs or authorizes," and to further explain the new phrase with specific report language intended to provide definitive guidance to business and to those who enforce this statute. The amendment was agreed to, and I think it would be helpful in this debate to read the brief excerpt of report language that the committee specifically adopted along with the amendment.

The Committee intends the term "course of conduct" used with the term "authorize" in Section 104(b) to refer to those situations where a company, through its words or course of conduct, has intended that a corrupt payment be made. For example, a company's refusal or failure to respond to an agent's suggestion or request that a corrupt payment be made would violate this section, as would a company's continuing employment of an agent known to the company to have made corrupt payments in the preceding two years in violation of applicable U.S. laws or those of the country in question.

On other other hand, the mere fact of doing business in a country where corrupt payments are common, or the employment of an agent with personal relationships with government officials in the country where the company seeks to do business would not establish such a course of conduct.

Similarly, the payment of a commission that is higher than customary would not by itself violate this section without evidence that the increased amount of commission is intended to permit a corrupt payment to be made.

The Committee believes that this standard will result in liability being imposed in overseas bribery cases brought under this Act if liability would also be imposed if the case were subject to domestic bribery law.

This latter statement about the parallel liability under domestic bribery law refers to established complicity principles of criminal law.

This amendment has also raised some question with respect to the term "directly or indirectly" as it appears in section 104(a).

As stated in the committee report, section 104(a) therefore refers solely to situations in which a prohibited payment is made by one of the persons listed in section 104(a) through some circuitous, that is, indirect means; it is not intended to have any application where the payment is made by a third party.

Another section of controversy is the section exempting so-called "facilitating" payments from the scope of the act. This exemption is also in current law, but it is not clearly defined in a way that anyone has found useful. The idea is that in many countries payment of a small gratuity, usually to minor officials to get them to perform their legal duties, is pervasive and is in fact the only way to secure the services to which one is entitled. By the standards of such countries these are not corrupt payments. If anything, they are an integral—and inevitable—part of doing business.

An example would be payments to customs or dock officials to get one's merchandise unloaded, appropriately stamped and cleared and entered into the country. On the other hand, a payment to obtain the entry of illegal goods, or a payment to get them misclassified so as to pay a lower duty would not be the same kind of routine governmental activities that should fall within the facilitating payment definition.

In its consolidation and redefinition of this concept, the committee chose to focus on the purpose of the payment and the type of action involved rather than the rank of the person receiving the payment, as in present law. S. 708 makes clear that the concept of a facilitating payment covers payments for routine governmental actions not involving judgment, and ordinary expenditures in certain cases, including those associated with the performance of a contract with a foreign government or agency, token payments intended as a courtesy, and payments legal in the country where made.

These terms are still less precise than one would wish, but in my judgment they represent a significant improvement over present law.

Finally with respect to section 104, the committee's report contains an error in failing to reflect accurately a minor amendment which was made by the committee. On page 18 of the report, in a discussion of the exceptions to the bribery prohibitions in section 104, there is a reference to "Ordinary or customary expenditures associated with the performance of a contract."

The reference to "customary" expenditures is not contained in the bill as reported by the Banking Committee, but had been a part of earlier formulations of some of the exceptions. Consequently, this reference to "customary" expenditures in the report should be disregarded.

There are also other provisions of the bill worth noting:

Section 5(a) would place in the Justice Department all jurisdiction for enforcement of the antibribery provisions of the act. The SEC would remain responsible for civil enforcement of the internal accounting controls provision.

Subsection (d) of the section 104 rewrite would continue the civil and criminal penalties provided for in current law: $1,000,000 maximum fine for domestic concerns; for individuals a maximum fine of $10,000 and/or up to 5 years imprisonment.

Section 7 provides that this act would preclude the possibility of criminal prosecution against any person or firm alleging that the mail or wire fraud laws have been violated as a result of a foreign corrupt payment, where the prosecution is based upon the theory that the foreign official violated a fiduciary duty.

Section 8 would authorize the Attorney General, after consultation with the U.S. Trade Representative, the Secretary of State, the Secretary of Commerce, the Secretary of the Treasury, and representatives of the business community and the public, to issue guidelines to assist in compliance with the antibribery provisions. Procedures would be established for firms to request interpretative guidance from the Justice Department, with responses required to be made within 30 days.

Section 8 would also call upon the Attorney General and the Chairman of the SEC to submit detailed annual public reports of their respective agency's actions taken pursuant to the act, its views on associated problems, plan for the next fiscal year, and recommendations, if any, for amendment of the act.

Section 10 declares it is the sense of the Congress that the President pursue negotiations to establish international cooperation in the prohibition of bribery. It provides for reports to the Congress on the progress of such negotiation, including suggestions for appropriate congressional action, and the consequences of potential action that can be taken under existing law to effect international cooperation for the elimination of bribery.

With respect to section 10, which calls for reports on the progress of multilateral negotiations, after some discussion with the State Department, I have concluded the section is poorly drafted, redundant, and not fully reflective of our objectives. Accordingly, I will later offer an amendment to revise this section.

Finally, Mr. President, I should say a word about the budgetary impact of this bill. The Congressional Budget Office has estimated that the Department of Justice would require $0.4 million in fiscal year 1982, $0.7 million in each of fiscal years 1983 and 1984, and $0.8 million in each of fiscal years 1985 and 1986, to implement the revised guidelines and procedures for compliance required by S. 708.

I would like to bring Senators' attention to the fact that no provision in the bill authorizes the appropriation of new budget authority to cover these costs. The committee intends that the costs of implementing the legislation will be

absorbed by the Department within its normal budget. S. 708 is not intended to "drive up" the Department's budget requests.

In conclusion, Mr. President, I would only say that this is a fair bill and a carefully crafted bill.

Senator PROXMIRE, Senator CHAFEE, Senator D'AMATO and I have certain amendments we intend to offer to this bill that we have discussed at some length. I think that by the time this bill leaves the floor today, we will have reached a very, very difficult goal, indeed.

Let me say, Mr. President, it would have been far easier to resolve some of the problems in this bill with calculated ambiguities but, frankly, if there is one criticism of Congress that probably is valid, it is that too often, Congress, in trying to compose differences, has left areas of ambiguity that have been counterproductive for all sides. The legislation before us today, Mr. President, instead shows that the committee chose to confront the issues directly and to draft legislation intended to provide the greatest guidance possible to businesses which have to live with this statute on a day-to-day basis. I think the result will be a clearer law and, because of that, a better law. I believe that to be the case from the viewpoint of people on all sides of this issue. It is my hope that my colleagues will see it the same way after proper discussion, adopt this legislation and send it on to the House.

Mr. PROXMIRE. Mr. President, in 1977, 4 years ago, Congress passed the Foreign Corrupt Practices Act in response to one of the worst domestic and foreign bribery slush fund scandals in American corporate history. I think all of us can recall the terrible implications of that scandal. The SEC made an investigation and found that some 400 American corporations admitted that they paid $300 million in bribes. We had a situation in Japan, in Italy, in the Netherlands and elsewhere where bribes were very, very damaging to our foreign policy.

Mr. President, bribery is bad business. It distorts free markets. It tarnishes the image of our democracy. The bribery of foreign government officials is particularly pernicious. Governments fall that are friendly to the United States and the United States and the democratic process is subverted.

The law passed in 1977 is a good law. Complaints have been heard that the law has hurt our exports. These complaints are not documented and exports have increased since 1977.

As a matter of fact, from the time that was enacted, exports rose more dramatically than they have at any time during our history.

Nevertheless we have before us today S. 708, which amends the Foreign Corrupt Practices Act.

The Banking Committee with the help of the Securities and Exchange Commission has labored long and hard on S. 708. With an amendment on the enforcement section today which I intend to support, I believe the committee has done its job in a responsible manner. It is a tribute to the leadership of Senator CHAFEE who is the author of this bill and who has worked very hard on it and has done his very, very best to work out a bill that would be effective but would also accommodate the legitimate interests of our exporters—of Senator HEINZ and Senator D'AMATO, who have been most effective leaders in the committee on this bill. Because of them, S. 708 has been refined to the point that it has been.

I congratulate Senator CHAFEE, Senator HEINZ and Senator D'AMATO and commend them for their response in the public interest to the many defects in the original bill.

Mr. President, I believe the Senate has gone as far as it can on this legislation. The House will receive the legislation and I am sure will take a close look at the exceptions in this legislation for payments and compliance with local law and for expenditures in connection with sales. With House action, we should get final action in this Congress. I hope we do.

This legislation will preserve intact the accounting provisions which are designed to require companies to maintain accountability for corporate assets and in connection therewith to keep accurate and fair books and records in reasonable detail. The accounting sections are the heart and soul of this legislation.

We must have those sections or we have a toothless, meaningless, ineffective law.

In this legislation that is being proposed today, with the amendment attached, existing law is not cut back, it is strengthened. This legislation makes clear that a standard of reasonableness is to apply, not a standard of materiality. The accounting sections will be enforced by the SEC.

In spite of all this, Mr. President, I have grave reservations about the sections of the bill which remove SEC jurisdiction over criminal provisions of law prohibiting bribes through an agent. The SEC has the expertise in stopping bribery. That is their job, to understand corporate accounting. That is their job, to require disclosure. It takes years of experience and a vast knowledge of corporate accounting in order to be able to accomplish this. They are exactly the agency that should be involved here.

Yet, the Justice Department is given exclusive jurisdiction in this bill. They will have to be watched closely in their enforcement. Their recent action in the McDonnell Douglas case gives me pause, as does the deletion of the know or have reason to know standard of current law.

Let me once again thank Senators HEINZ, CHAFEE, and D'AMATO for their spirit of compromise and willingness to listen to criticism during the course of consideration of this bill.

It is never easy, when we all feel so strongly on our positions, to work out a negotiated compromise, but I think that these Senators have done an outstanding job in this case—as I say, of achieving a measure which is not all I would like and I am sure is not exactly what they would like, either, but does represent an advance.

Mr. DIXON. Mr. President, S. 708, the Business Accounting and Foreign Trade Simplification Act, is the product of a long period of hard work by the members of the Senate Committee on Banking, Housing, and Urban Affairs, on which I am proud to serve. The bill is a compromise measure; it reflects many hours of negotiations over a period of several months.

The objective and purpose of the bill is very clear and well set out in the first line of text: "A bill to amend and clarify the Foreign Corrupt Practices Act of 1977." Clarify is the key word. The bill is designed to continue effective enforcement of the policy objectives of the Foreign Corrupt Practices Act.

The FCPA deters U.S. firms from bribing foreign officials to obtain business. S. 708, if enacted, will work effectively to insure that policy is continued. No one who supported clarifying changes in the act—the administration, the Securities and Exchange Commission, the business community—wants to undercut existing law. Everyone supporting the bill wants to continue effective enforcement to insure that American firms do not engage in bribery overseas.

What the bill attempts to do—and, I believe, does reasonably well—is to continue the effective FCPA prohibition against overseas bribery while clarifying the law.

Clarification is needed for two reasons. First, to provide a greater degree of certainty as to what the law means for those who have to live under it. Second, to reduce the regulatory burden of the act to the minimum level needed to meet its objectives.

I think it is clear that the act needs to be clarified. The antibribery standard under existing law—the so-called reason to know standard—is vague and subject to wide variations of interpretation. In fact, as the committee report points out, many legal commentators believe that the reason to know standard can be interpreted to mean reason to suspect, a standard much broader than that intended by the authors of the 1977 legislation as I understand it.

Mr. President, me must remember that the FCPA is an extraterritorial application of U.S. law. Its principal focus is to prevent bribery that occurs beyond our borders. For this reason, it is particularly important that the statute be as precise as possible.

I am not going to take the time to recite the numerous examples of the real problems caused by the vague reason to know standard that were testified to in hearings before the Banking Committee. I believe the testimony before the committee makes clear, however, that the vagueness and uncertainty of the existing standard have cost American firms business opportunities overseas. It is impossible to put a reliable dollar estimate on the amount of business lost, but that does not make the problem anv less real. Concern about potential liability under the act has cost the U.S. exports—exports that we need to increase as rapidly as we can, if we are to restore our economy to its former healthy state.

The bill clarifies the antibribery standard in the FCPA by replacing it with a standard that would impose liability where a corrupt warrant payment is

made and the U.S. concern directs or authorizes, expressly or by a course of conduct, that the payment is made. This standard provides the degree of certainty needed by those who have to live under the act. As the committee report indicates, it results in a standard that imposes liability in overseas bribery cases brought under this act only if liability would also be imposed if the activity occurred in the United States and were subject to domestic bribery law.

The new standard is more precise, but will still effectively meet the objectives of the 1977 law. If a firm directs or authorizes an agent to pay a bribe, if a firm gives an agent a knowing wink, liability results. If a firm intentionally takes a head in the sand attitude about whether a bribe is paid, liability results. However, as the report states, the mere fact of doing business in a country where corrupt payments are common, or the employment of an agent with personal relationships with government officials in the country where the company seeks to do business, would not establish a course of conduct that would result in liability.

The bill also clarifies the accounting standards sections of the act, reducing the regulatory burden they impose on business to the level needed to meet the objectives of the act.

Concerns have been expressed that the existing standards have proven to be overly burdensome. It should be noted that no system of internal accounting controls, no matter how extensive, can prevent all errors or inaccuracies in a company's books. Therefore, any standard has to strike a balance between the need to meet the objectives of the act, and the burden the standard places on those who have to comply with it.

Mr. President, I believe that the accounting provisions in the committee bill strike the proper balance. The committee acted to combine the separate requirements of adequate books and records and of internal accounting controls from existing law into a single provision. The internal accounting controls have to be designed to provide reasonable assurances that the objectives of the act are met.

The bill reduces the burden of the accounting requirements on business, however, to the level needed to insure that the purposes of the law are effectively continued. The bill precludes the possibility of enforcement actions based solely on the fact that records are inaccurate. Under the scienter standard adopted in the bill, a company would be subject to an enforcement proceeding only where it knowingly fails to maintain, or knowingly circumvents or attempts to circumvent for an improper purpose, an internal control system in a manner so that the system fails to provide the required reasonable assurances as defined in the bill.

I understand that Senators D'AMATO and PROXMIRE will offer an amendment to further clarify the scienter standard in the bill. This issue was not clearly resolved during the committee's deliberations, and I am pleased to see a compromise proposal offered that I hope will be acceptable to all parties involved.

There are a number of other provisions of the bill that I could comment on at some length. However, I will not do so at this time. The committee report provides a good explanation of the numerous issues on which I have not touched.

Let me just say that I believe this bill is a true compromise—in the best sense of that word. The bill does not fully satisfy the administration or the business community. If I were totally responsible for drafting the bill, I would probably have handled some issues somewhat differently. However, that is not important.

What is important, and what there is widespread agreement on, is that the bill is a needed step forward. I believe it effectively continues the policy objectives of the FCPA; I could not support it if I thought that it did not. At the same time, it provides the clarification, I repeat, the clarification, that is needed by those who have to live with the law on a day-to-day basis. It provides a clear line. A line that makes it possible for businesses to know with a reasonable degree of certainty what kind of behavior will result in liability.

Mr. President, exports are becoming more and more important to the American economy. We are importing more; therefore, we must increase our exports to pay the bills. We have to act to increase incentives for exports and to reduce disincentives for exports. The FCPA in its present form acts as an export disincentive—I believe, a significant disincentive—a disincentive that must be minimized.

At the same time, it is important for foreign policy reasons to maintain a strong prohibition against bribery overseas. I believe this policy benefits American business as well. I would rather act to prohibit bribery internationally by agreement with our foreign competitors. This issue is best resolved by international agreement. However, the issue is so important that I believe Congress made the right decision in 1977 in choosing to act unilaterally.

Mr. President, before I conclude, I want to pay tribute to those Senators who made important contributions to the bill we are considering today. I first want to congratulate Senator CHAFEE, the author of the bill. It was his hard work and dedication, and his persistence, that are largely responsible for the fact that the bill is now before the Senate.

Senators HEINZ and D'AMATO, who chair the two subcommittees of the Banking Committee with jurisdiction over this issue are also to be commended. Together with Senator CHAFEE, they successfully concluded the long and complex negotiations that resulted in the provisions of S. 708 that are before the Senate today.

Finally, I want to commend Senator PROXMIRE, one of the authors of the original 1977 act. His insight provided an important contribution to the legislation.

Again, let me say that I believe the bill represents a sound compromise and that it maintains the goals of the FCPA. I urge my colleagues to support it.

UP AMENDMENT NO. 705

Mr. D'AMATO. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New York (Mr. D'AMATO) for himself, Mr. CHAFEE, Mr. PROXMIRE, and Mr. HEINZ proposes an unprinted amendment numbered 705.

Mr. D'AMATO. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, strike lines 13 through 25 and insert in lieu thereof the following:

"(4) No criminal liability shall be imposed for failing to comply with the requirements of paragraph (2) of this subsection.

(5) No civil injunctive relief shall be imposed with respect to—

(A) any issuer for failing to comply with the requirements of paragraph (2) of this subsection if such issuer shall show that it acted in good faith in attempting to comply with such requirements; or

(B) any person other than an issuer, in connection with an issuer's failure to comply with paragraph (2), unless such person knowingly caused the issuer to fail to devise or maintain a system of internal accounting controls that complies with paragraph (2).

(6) No person shall knowingly circumvent a system of internal accounting controls established pursuant to paragraph (2) for a purpose inconsistent with paragraph (2)."

Mr. D'AMATO. Mr. President, I offer this amendment on behalf of Senator CHAFEE, Senator HEINZ, Senator PROXMIRE and myself. I am offering this amendment which is intended to resolve the issue which has been the most difficult on which to develop a consensus.

Let me state for the record, Mr. President, and I believe Senator HEINZ has made reference to this, without the outstanding support and diligence of the staffs of all of the Senators involved, the majority and the minority, this bill would not have become a reality. I believe it will become a reality today.

Let me pay particular note to the fact that Senator PROXMIRE went above and beyond in attempting to develop a consensus to protect the vital interests that he feels are so important. Basically, that is that we in no way countenance or even appear to be countenancing the bribing of foreign officials.

I say to the Senator that I deeply impressed with the great lengths to which he and his staff have gone to see that the needed reforms take place. This involves the required state of mind for a defendant in order to establish a violation of the accounting requirements of the act.

As introduced, S. 708 would have established liability only where a person knowingly engaged in violative conduct. In marking up S. 708, the Banking Committee adopted the knowing standard tentatively, but there was not a clear consensus that this standard is the appropriate one. At the conclusion of the markup, we adopted this standard and agreed to explore alternative approaches for amendment when S. 708 reached the Senate floor. That is what the amendment I have submitted would do.

The amendment which I offer with Senator PROXMIRE is the product of extensive discussions in seeking a consensus. While it undoubtedly will not satisfy all of those interested in the act's accounting provisions, I am satisfied that

it strikes a reasonable and acceptable balance between the competing viewpoints heard by the committee.

The amendment speaks for itself, and I do not believe that it is necessary to explain it in great detail. Briefly, it would:

Eliminate any criminal liability under the revised section 13(b)(2) of the Securities Exchange Act of 1934;

Establish civil liability in SEC injunctive actions on the part of an issuer for a violation of section 13(b)(2) if the issuer fails to meet the standard set forth therein, unless the issuer can show that it acted in good faith in attempting to comply with the standard;

Limit liability on the part of any person other than the issuer to situations in which the person acted knowingly in causing the issuer to fail to comply; and

Prohibit the knowing circumvention, for a purpose inconsistent with section 13(b)(2), of an internal accounting control system established pursuant to section 13(b)(2).

The reference to a "purpose not consistent with" section 13(b)(2) is intended to recognize that there may be from time to time innocent departures from the literal requirements of an internal accounting control system, and that such departures would not constitute violations of the prohibition against circumvention.

I believe the amendment will give the business community the kind of latitude it necessarily should have. It speaks loudly and clearly and says that this Government does not and will not condone the bribery of officials. I urge adoption of the amendment.

Mr. President, I urge my colleagues to support S. 708, the Business Accounting and Foreign Trade Simplification Act. The bill has received the careful and thorough attention of the Subcommittee on Securities, which I chair, and the Subcommittee on International Finance and Monetary Policy chaired by Senator HEINZ, and I believe it represents a balanced approach in amending the Foreign Corrupt Practices Act.

Our subcommittees heard extensive evidence concerning often unforseen problems created by the act, primarily as a result of overbroad and ambiguous provisions. We have concluded that the act can be amended to minimize these problems, without undermining the central purpose of the act: To prohibit improper payments by American companies to foreign officials. With the addition of the amendment to the accounting provisions of the act which I am offering today, I am convinced that the bill will strike a good balance between the need for corporate accountability and the legitimate need of businessmen for clarification of the requirements of the law.

I commend Senator JOHN CHAFEE, the sponsor of S. 708, for his initiative and determination in introducing the bill and in continuing to be its strongest advocate. This has not been an easy task, for some of the critics of S. 708 have argued incorrectly that the amendments were designed to gut the Foreign Corrupt Practices Act. Having attended the hearings and observed Senator CHAFEE's approach to the issues presented, I know that he has rendered a great service by making the effort, and by withstanding the criticism of those who would leave the act intact, and thereby fail to address the problems which it has caused.

It is completely appropriate for Congress to reassess the merits of legislation passed in earlier years and to make adjustments based upon experience with the statute. I am pleased to have had the opportunity to work with Senator CHAFEE, Senator HEINZ, and many others who have contributed to this task. I believe that these joint efforts have led to the development of a bill which, when enacted, will be a vast improvement over the current act.

Mr. President, I strongly support S. 708 and urge my colleagues to do the same.

Mr. HEINZ. Mr. President, I have very carefully examined the amendment of the Senator from New York (Mr. D'AMATO). Indeed, after having done so, I have agreed to cosponsor his amendment, and I am prepared, on behalf of the majority, to accept the amendment. With its adoption, I believe that we will have resolved the most difficult issues raised by S. 708 in a satisfactory manner. While I realize that there may be additional amendments, I expect that with the adoption of this amendment the bill before us can be completed without undue delay.

The amendment offered by Senator D'AMATO draws an acceptable balance with respect to the state of mind requirement for liability under the accounting provisions of the Foreign Corrupt Practices Act. Conflicting views about this issue had created an impasse which threatened to delay Senate action on the bill, and I am very pleased that an accommodation has been reached. Both Senator D'AMATO and Senator PROXMIRE are to be commended for their diligence in working out a compromise which will permit prompt Senate action on the bill.

The principal problem with the existing accounting provisions of the act has been the lack of clarity concerning their potential effect on insubstantial corporate transactions and those which occur without any wrongful intent or purpose on the part of the company. It is widely recognized that no corporate accounting system is perfect or will preclude the possibility of all errors, inaccuracies, or falsifications, and it is therefore not appropriate to operate under a statute which can be stretched to cover these kinds of transactions. The result of doing so has been to cause companies to expand inordinate time and money in seeking to insure compliance with the law, without a corresponding benefit.

I hope and expect that, as a result of Senator CHAFEE's efforts, those of the Banking Committee and the adoption of the D'Amato amendment, the accounting provisions of the law will be clear, unambiguous, and straightforward.

Mr. PROXMIRE. Mr. President, I am pleased to cosponsor this amendment.

This amendment provides enforcement standards for the accounting sections administered by the SEC.

The amendment makes clear that the SEC may enforce in a civil injunctive suit the standard of statute which require companies to devise and maintain accountability for assets. Every company must provide an accounting system which meets the standard of reasonable assurances with a defense of good faith.

The amendment makes clear that the sanction shall be a civil sanction except for cases of wilfull circumvention of accounting controls where a criminal sanction may be applicable.

This amendment clears up what had become the most controversial aspects of this bill, the controversy over "scienter" or the threshold standard of knowledge of a violation of the accounting sections which must be met before the SEC could proceed in a civil case. Under this amendment there is no scienter requirement in a civil case by the SEC against an issuer company. The issuer company is given a defense of good faith.

So I am pleased to support the amendment. I agree wholeheartedly with the manager of the bill that this was the most crucial difference and difficulty. I am delighted that Senator D'AMATO has offered the amendment, and I congratulate him on it.

Mr. DODD. Mr. President. I support the amendment offered by the Senator from New York (Mr. D'AMATO).

I should like at this time to pay tribute not only to Senator CHAFEE, Senator HEINZ, and Senator D'AMATO for their work on this legislation but also to the real hero of the Foreign Corrupt Practices Act, the distinguished Senator from Wisconsin, who understands this issue better than anyone in this body or the other body. He has worked with it for years and understands the complexity of the issues involved. He deserves tremendous credit for having waged this battle over the years.

The fact that he supports this amendment, I think, is also an indication of the willingness of the Senator from Wisconsin to try to work out language that will at least give business a better opportunity to go overseas and develop their markets.

At the same time, he remains firm in his commitment and in the commitment of this institution to discourage, at the very least, and to prohibit the kind of actions in the past which not only have brought great embarrassment to the heads of firms in American industry but also have caused us serious foreign policy problems as a Nation. Had it not been for his leadership over the years, I am convinced that the situation would have been far more grave and would have contributed to more difficulties in our foreign policy.

These amendments will provide much-needed clarification to an act of Congress which, despite its good intentions, has posed significant and unwarranted difficulties for American firms engaged in foreign markets.

There is always room for improvement in our trade position, and I am not going to attribute our less-than-perfect trade performance solely to the ambiguities in the Foreign Corrupt Practices Act, or to any other particular statute for that matter.

The issues relating to our trade policy and position are much more complicated than that. The inflation rate, the

strength of the dollar overseas, the availability of financing, the quality and serviceability of our goods and their usefulness in foreign countries—all these factors are critical to our export performance and have little to do with the problems these amendments are intended to address.

Testimony presented before the Banking Committee this year clearly indicates that many American entrepreneurs have had serious reservations about operating in markets where standard business practices include activities which, under present law, could subject these entrepreneurs to costly litigation, fines and possible jail sentences.

The antibribery provisions in section 104 of the Foreign Corrupt Practices Act pose perhaps a particularly enlightening example of unnecessarily vague language which acts as a serious disincentive for exports by American business. Under that section, an American corporation is liable under the statute for payments, even insignificant payments when compared to the assets of the company, when that company's management has reason to know that illegal payments are being made by its overseas agents. What constitutes "reason to know?" That was the question with which the committee had to grapple. The fact that a company has employed an overseas agent with a detailed knowledge of markets where payments prohibited by U.S. law are routine for everyone else involved in those markets.

Our smaller exporters are put in a particularly difficult position. Unlike larger corporations, many smaller enterprises are unable to hire large batteries of lawyers and accountants to insulate management from the continual threat of prosecution for practices considered normal in their markets.

I believe that most of us recognize that smaller businesses are among the most dynamic elements of our economy in terms of producing exportable innovations. The willingness of individual entrepreneurs to experiment, to take risks, to explore new avenues and opportunities for commerce, is a prominent feature of our American entrepreneural history. Yet, as one witness, Mr. Shaw Mudge from my home State of Connecticut, pointed out, "small business people are risk takers, but not when jail is one of the risks."

These amendments would address this problem in a manner that would enhance the precision of the antibribery provisions.

The new section 104(B) would make it illegal for a domestic concern to direct or authorize, expressly or by a course of conduct a third party to make prohibited payments to a foreign official. While clearing up the ambiguities in the present statute, this provision would also make clear that a "head in the sand" approach to illegal payments, such as a company's failure to respond to suggestions that illegal payments be made, would not be permitted.

Other provisions in these amendments would address in a positive manner the problem of potential liability for inadvertent accounting standards violations, the definition of facilitating, or grease payments which were not intended to be covered under present law, and a number of other matters pertaining to investigation and enforcement.

This bill would also direct the President to pursue negotiation of international agreements relating to the establishment of international standards of business conduct. That may be the single most important thing we do. Because we have taken the lead as a nation in this particular area, it is to our credit and something of which all of us can be proud. But in the final analysis it is going to require international agreements to insure that other nations, particularly our industrial allies, support the concept if not the letter of the Foreign Corrupt Practices Act.

The United States in 1977, under the leadership of the Senator from Wisconsin, took the lead in restricting such practices at a cost to ourselves.

Now is the time for all major commercial nations to come to an agreement regarding such practices so that no one nation is left at a disadvantage.

Mr. President, I state again my support for these amendments. Again I pay particular tribute to the Senator from Rhode Island (Mr. CHAFEE), the manager of the bill, Senator HEINZ, and Senator D'AMATO of New York, and again, particular credit to the distinguished Senator from Wisconsin for his courageous work in this particular area.

Mr. President, I yield back the floor.

Mr. CHAFEE. Mr. President, I wish to extend my thanks to all who have been of such a tremendous help on this legislation. Specifically, I want to thank Senator HEINZ and Senator D'AMATO who chair the two banking subcommittees which combined for hearings on S. 708, and Senators DODD and DIXON who worked so fully and helpfully in the committee. Each of these Senators made a really profound contribution.

I especially extend my thanks and admiration to Senator PROXMIRE and to his staff who worked so carefully with us.

I want to point out that Senator PROXMIRE is the author of the original legislation, and as author Senator PROXMIRE understandably has indicated that he feels strongly that he still believes the original legislation is effective and should not be changed. Despite this, Senator PROXMIRE has displayed a spirit of cooperation and a genuine desire to achieve a reasonable compromise. As a result we were able to take the bill that I orginally submitted and working with the other committee members I have mentioned and with their staffs came out with a better bill than was originally submitted.

So it shows the effectiveness, not only of the committee process and the hearing process, but also the extreme goodwill in which everyone approached this and especially Senator PROXMIRE.

Mr. President, I began my efforts to reform the Foreign Corrupt Practices Act nearly 2 years ago. It was in January 1980. It was somewhat of a lonely experience and I had a good deal of the business community indicated that it was behind me, but I discovered that they were way behind me and not available on the scene. There was all sorts of goodwill, all sorts of willingness to testify except every date that we chose for testimony appeared to conflict in some way with an important engagement abroad or a board of directors meeting or something that kept the leaders of industry from coming forward because trying to change a foreign corrupt practices act is not exactly waving the American flag.

It is not apple pie and motherhood. But I felt, as did the cosponsors and all of those of us who worked on it and those who are cosponsoring the various amendments today, that this bill was needed to eliminate the chilling effect of the current law on legitimate business opportunities of Americans overseas. We also felt that we owed a duty to our exporters to do everything we can, as Senator HEINZ mentioned in his opening statement, to remove the most serious of the export disincentives contained in our laws.

So as Senator HEINZ mentioned, this year we have already taken two very significant steps, both the Export Trading Companies Act which is before the House and, of course, removing the provision for the taxation of Americans abroad which was part of the tax bill passed earlier this year. Now we move to eliminate the third most serious export disincentive. It is hard to believe how much exports mean to our country and to jobs. That is the heart part of my concern. We have a rule of thumb that says that for every $1 billion of exports it means 40,000 jobs in the United States. So everything we can do to increase our exports helps us in this area. The United States has had a decline in exports.

I am not talking about the overall balance of trade which includes defense-related expenditures and services, but I am talking about the current account. Our current account has declined especially in the last couple of months.

Mr. President, the bill that we are considering this afternoon, S. 708, my bill to amend the Foreign Corrupt Practices Act, is the result of an effort I began over 2 years ago to eliminate one of the most serious export disincentives contained in our laws. The bill makes several major changes which significantly eliminate the ambiguities in the current law.

S. 708, which was reported favorably by a bipartisan majority of the Senate Banking Committee, clarifies and modifies the law. This bill is intended to preserve the purposes of the original legislation—that is, putting an end to large-scale bribery of foreign officials by American corporations—while reducing some of the anxieties and confusion that the law has generated. The bill has received strong support from the business community, the agencies responsible for its enforcement, the administration, and other Members of Congress from both political parties.

We have learned a great deal about the Foreign Corrupt Practices Act in the last 3 years, since it was enacted.

We have learned that the best of intentions can go awry and create con-

fusion and great cost to our economy. With regard to the accounting provisions of the law, we have learned that widely understood and accepted principles do not always make for good law, especially criminal law.

Finally, we have learned that no other country seems to think we have hit upon the proper solution to the problems of bribery in the world marketplace. We remain the only nation in the world with such a law.

Despite the examples of lost business and problems due to the ambiguities in the act, critics of reform have argued there is no need to change the current law because, despite the problems, our exports have increased. While it is true that U.S. overall export performance has been relatively good for the last couple of years, the current trade account is in deficit again. The fact that the current account balanced in 1979 can be explained by a number of factors other than improved exports, such as the substantial depreciation of the dollar from 1972 to 1979.

In fact, there are a number of factors which indicate that the outlook for the current account is not good. First, the favorable balance in the current account in 1979 was due in part to an unusually large $18 billion current account surplus recorded in 1975. Second, since 1972, the rate of the U.S. export growth has trailed that of Germany and Japan. Third, since 1972, the U.S. share of world markets has declined from 15.6 to 14 percent, while the share of manufactured exports has fallen from 18.4 to 17.4 percent.

The importance of the decline in our world exports is a serious problem, since exports account for an increasingly important share of the U.S. gross national product. In concrete terms, the Department of Commerce has estimated that every billion dollars in exports generates 30,000 to 40,000 domestic jobs. The legislation which I have introduced makes use of the lessons we have learned in an effort to insure continued growth of U.S. exports. My bill makes a number of significant changes to the Foreign Corrupt Practices Act.

First, the name of the act is changed: The Foreign Corrupt Practices Act would become the Business Practices and Records Act. This reflects the fact that the accounting standards are not limited to international companies or transactions. It also would not make a presumption that corruption exists.

Second, enforcement: With regard to the bribery provisions, the Department of Justice, which has sole jurisdiction under the FCPA for criminal enforcement of both privately and publicly held companies and civil enforcement of privately held companies, would be given sole jurisdiction of civil enforcement for publicly held companies as well. Thus, any company with questions about the bribery provisions could get them answered in one place. The Securities and Exchange Commission would retain responsibility for civil enforcement of the accounting standards provisions. The Securities and Exchange Commission has no objection to this change.

Third, bribery provision: Congress made clear its intent to exclude so-called facilitating or grease payments from the reach of the Foreign Corrupt Practices Act. However, the statute is not clear as to what constitutes such payments. Grease payments are defined as payments to secure or expedite the performance of a routine governmental action as distinguished from action involving the exercise of discretion. I intend to offer an amendment to further clarify this language by deleting the reference to the exercise of judgment. Payments which are lawful in the country where they are made, and which are intended to secure prompt performance of a foreign official's duties, would not be actionable under this bill. There is also a clarifying exclusion for token courtesy gifts and incidental benefits received by foreign officials in the course of marketing activities or product presentations.

My bill also makes it clear that there is no violation in making payments if they are legal under the laws and regulations of the foreign country involved.

Under the Foreign Corrupt Practices Act, companies are liable if they have a reason to know that a bribe may be paid by a third party or intermediary. This provision was identified in the 1980 executive branch study of export disincentives as the area of greatest concern to business. My bill replaces this provision with language that makes U.S. companies liable if they corruptly pay a bribe directly or if they directed or authorized the bribe expressly or by a course of conduct.

Fourth, accounting standards: The books and records provision was deleted as a result of Senator D'AMATO's amendment offered during the Banking Committee markup. The bill also defines the terms "reasonable assurances" and "reasonable detail," which exist in the current law. Thus, it is made explicit that the use of cost/benefit evaluation is to be applied to internal accounting controls. This makes it clear that companies are not expected to design control systems whose costs exceed the benefit to the companies and to their stockholders. Currently, the Securities and Exchange Commission says the cost/benefit evaluation is to be applied. But the law does not say so. We would put it into the law.

Fifth, international agreement: This bill contains extensive provisions on the desirability of international agreements to establish standards for international business parctices. The President would be required to submit a report to Congress within 6 months of enactment of this legislation explaining steps that the United States could take to promote cooperation by other countries to prevent bribery.

I have not given up on the possibility of gaining an agreement to eliminate bribery from the world marketplace. I hope that my legislation will convince other nations that we are realistic in our approach to the problem and determined to resolve it on an international basis.

The need for reform of the Foreign Corrupt Practices Act is clear. There is a wealth of evidence that, in practice, the current law has gone beyond its original purpose of prohibiting foreign bribery by creating confusion which is hindering the growth of legitimate U.S. business overseas.

The problems caused by the current law also have serious foreign policy implications. Foreign governments in parts of the world find the act presumptuous and offensive. Critics of the current law have cited this as a reason for its repeal. I do not advocate repeal, for U.S. companies should operate according to an ethical code of conduct, both at home and abroad. However, that goal must be balanced with the need to maintain a healthy balance of trade and good diplomatic relations. Arriving at that balance will not be an easy journey, but enactment of my bill will be a significant step toward achieving that balance.

In conclusion, I want to express my thanks to Senators HEINZ and D'AMATO for chairing the Banking Subcommittee hearings on the bill and for all their support in reaching this point. I also want to thank Senators PROXMIRE, DIXON, DODD, and RIEGLE for their cooperation and efforts to achieve a compromise.

Mr. President. in conclusion. let me say that with the passage of S. 708 we will have taken a magnificent step forward. As I say, the amendments that are going to be proposed today improve the original bill that was introduced, and I tip my hat to all who had a part in this effort.

I commend the passage of the current amendment which is presented by Senator D'AMATO, on behalf of himself, Senator PROXMIRE, Senator HEINZ, and myself.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York.

The amendment (UP No. 705) was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 706

Mr. HEINZ. Mr. President, I have two technical amendments that I send to the desk and ask for their immediate consideration.

The PRESIDING OFFICER. Is it the Senator's request that they be considered en bloc?

Mr. HEINZ. The Senator from Pennsylvania would request that the two changes contained in the amendment be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The bill clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an unprinted amendment numbered 706.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 21, line 24, strike "corrupt" and insert in lieu thereof, "corporate".

On page 22, line 16, strike "policy".

Mr. HEINZ. Mr. President, this technical amendment which, I believe, the minority has seen as well, simply corrects two typographical errors in the bill. I move its adoption.

The amendment (UP No. 706) was agreed to.

UP AMENDMENT NO. 707

(Purpose: To delete section 9)

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an unprinted amendment numbered 707.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning with page 35, line 22, strike out all through page 36, line 8.

On page 36, line 10, strike out "Sec. 10." and insert in lieu thereof "Sec. 9.".

Mr. HEINZ. Mr. President, this section of the bill, section 9, makes a conforming change in the Internal Revenue Code to make clear that business expenses which are legal under the Foreign Corrupt Practices Act would also be deductible in accordance with normal IRS rules.

While the committee supported this provision as sound policy and as an effort to make sure that our tax laws conform to our other statutes, its presence in this bill does raise a jurisdictional question with the Finance Committee, among others. I understand that Senator CHAFEE has also introduced this provision as a separate bill and that the Finance Committee has already conducted a hearing on it.

I am optimistic that the Finance Committee will act on that bill in due course, which, in my judgment is the proper way to proceed from the standpoint of committee jurisdiction. Accordingly, I am offering an amendment to delete this section of the bill, with the clear understanding that the deletion is for jurisdictional reasons and without prejudice to the substance of the provision.

The amendment (UP No. 707) was agreed to.

UP AMENDMENT NO. 708

(Purpose: To provide for a report to Congress on the status of international negotiations to reach an agreement on foreign business practices)

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an unprinted amendment numbered 708.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 36, line 10, strike all through page 37, line 14, and insert in lieu the following:

SEC. 10. (a) It is the sense of the Congress that the President should pursue the negotiation of an international agreement among the largest possible number of nations on illicit payments, including, a process by which problems and conflicts associated with such practices could be resolved.

(b) Within one year after the date of enactment of this Act, the President shall report to Congress on—

(1) the progress of the negotiations referred to in subsection (a);

(2) those steps which the administration and Congress should consider taking in the event that these negotiations do not successfully eliminate the competitive disadvantage of United States business; and

(3) possible actions that could be taken to promote cooperation by other nations in international efforts to prevent bribery of foreign officials, candidates, or parties in third countries.

Mr. HEINZ. This amendment would revise section 10 of the bill, which concerns a Presidential report on the status of negotiations to reach an international agreement on corrupt practices, and on steps the administration and Congress might take in the event such negotiations are not successful.

As presently written in the bill, Mr. President, section 10 is cumbersome and disjointed, apparently referring to two overlapping reports due at different times. This amendment would combine the reports into one, make clear it is required rather than optional, and clarify the contents of the report to better concentrate on the basic issues surrounding such negotiations.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment (UP No. 708) was agreed to.

UP AMENDMENT NO. 709

(Purpose: To revise language relating to an exemption in section 104(c))

Mr. CHAFEE. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Rhode Island (Mr. CHAFEE) proposes an unprinted amendment numbered 709:

On page 27, beginning with the comma on line 7, strike out all through "factor" on line 9.

Mr. CHAFEE. Mr. President, I am offering this amendment to section 104 (c) of S. 708 which appears as stated in the amendment on page 27.

I am offering it in an effort to clarify more precisely what payments will be allowed under the bill.

Section 104(c)(1) as it is printed here excepts certain facilitating or so-called "grease" payments that are lawful under current law, but it does not apply to governmental actions involving the exercise of judgment. That is the last clause where it states:

as distinguished from governmental action in which the exercise of judgment by the foreign official is a significant factor.

The purpose of the language on page 27 was intended to allow companies to make payments to secure the performance of low-level routine kinds of governmental action, such as securing the processing of a customs document.

However, even this kind of low-level, routine activity could be argued as involving some kind of an exercise of judgment. Thus uncertainty remains in the minds of U.S. business people doing business abroad, when they try to determine what kind of routine government action might later be determined to involve the exercise of judgment. The lingering uncertainty that remains with the language of the last clause of that section (c) defeats the purpose of the overall exception which, as I say, is to give greater guidance to U.S. business persons as to what is permissible under the Foreign Corrupt Practices Act. Thus in an effort to promote clarity, the amendment I have presented deletes the last clause of section 104(c)(1).

Mr. President, I urge the passage of the amendment.

Mr. PROXMIRE. Mr. President, will the Senator from Rhode Island yield for a question?

Mr. CHAFEE. I certainly will.

Mr. PROXMIRE. May I ask the Senator, by deleting the language proposed does the Senator from Rhode Island intend to increase the scope of this exception——

Mr. CHAFEE. Not at all.

Mr. PROXMIRE. Let me just finish—beyond "grease" payments, that is the payment of small sums to lower level government officials where necessary? For example, the classic example given is to obtain action to which he is entitled on the unloading of perishable commodities at the dock where obviously this has to be done under circumstances as a practical matter or the commodities will be ruined?

Mr. CHAFEE. That is exactly the intent of the amendment that I have presented. It is not intended to change the intent of the so-called facilitating payments exception which is only to allow that low-level type of activity of which the Senator gave an illustration.

Mr. PROXMIRE. Mr. President, I am not going to ask for any vote on this amendment. I frankly personally do not favor it. But in the circumstances of the Senator's explanation I believe a vote is not necessay. I hope the House will take a close look at this provision because I think it is subject to some abuse, although I recognize the sincere effort on the part of the Senator from Rhode Island to overcome what to many business people seems to be an intolerable interference with their opportunity to conduct effective business with foreign countries.

Mr. HEINZ. Mr. President, as I understand the Chafee amendment—and I have looked at it quite carefully—what it would do is to delete the phrase "as distinguished from governmental action in which the exercise of judgment by the foreign official is a significant factor."

The purpose of the amendment is to eliminate the potential ambiguity arising from the judgment phrase. I think this is a difficult issue, but I think on balance

the Chafee amendment is the best way to do it, and I do support the amendment and I urge my colleagues to do so.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode Island.

The amendment (UP No. 709) was agreed to.

UP AMENDMENT NO. 710

(Purpose: To revise the exclusivity provision)

Mr. CHAFEE. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Rhode Island (Mr. CHAFEE) proposes an unprinted amendment numbered 710:

On page 32, line 2, strike out "shareholders" and insert in lieu thereof "any shareholders thereof acting on behalf of such domestic concern for a payment, gift, offer, or promise to a foreign official".

On page 32, beginning with the comma on line 2, strike out all through "defraud" on line 7, and insert in lieu thereof the following: "the foreign official or the domestic concern violated a duty to or defrauded the foreign government or the citizens of a foreign country".

Mr. CHAFEE. Mr. President, I am offering the amendment at the desk to section 7 of S. 708, which provides that no criminal action may be brought pursuant to sections 1341 or 1343 of title 18 against a domestic concern or any of its officers based on the theory that the foreign official receiving the payment violated his fiduciary duty to his country.

That is the existing language. The amendment would add language which would make it clear that no actions could be brought under sections 1341 or 1343 based on a theory of a violation of a fiduciary duty by a foreign official or that the foreign official defrauded its government or citizens by receiving an illegal payment from a U.S. company or its agent.

The current exclusivity provision excludes only one theory on which the Justice Department could bring a case under the wire and mail fraud statutes in a situation involving an overseas bribery by a U.S. company. With this amendment that we are now considering, the exclusivity provision will make clear that only the Foreign Corrupt Practices Act will determine the extent to which U.S. persons are liable for any illegal payments to foreign officials.

Section 7 is intended to preclude the unprecedented application of the wire and mail fraud statutes to extraterritorial situations that are not precisely defined.

Additionally, the laws of foreign countries provide protection of foreign governments and citizens from the criminal misconduct of its government officials. Therefore, the extraterritorial application of the wire and mail fraud statutes is not necessary.

Mr. PROXMIRE. Will the Senator yield for another question?

Mr. CHAFEE. I certainly will.

Mr. PROXMIRE. As I understand it, this amendment is in the nature of a technical amendment, and as reported by the committee the provision of the law would be the exclusive vehicle for criminal enforcement of the bribery of foreign government officials. Is that correct?

Mr. CHAFEE. Could the Senator repeat the last part of the question?

Mr. PROXMIRE. As supported by the committee, the provision of this law would be the exclusive vehicle for criminal enforcement of the bribery of foreign government officials.

Mr. CHAFEE. The provision of the Foreign Corrupt Practices Act?

Mr. PROXMIRE. That is correct.

Mr. CHAFEE. Yes.

Mr. PROXMIRE. This amendment is consistent with the committee provisions, I take it?

Mr. CHAFEE. That is correct.

Mr. PROXMIRE. Again, Mr. President, this is another provision I hope the House will take a close look at. I am prepared to move forward without a record vote on the amendment.

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER (Mr. COHEN). The Senator from Pennsylvania.

Mr. HEINZ. Mr. President, this amendment involves a provision of the bill which was amended in committee at the suggestion of the administration. Under section 7, prosecution of the foreign payment under the mail or wire fraud statutes would be precluded where the theory of prosecution is that the foreign official receiving the payment violated a fiduciary duty to his government or the citizens of his country. The amendment offered by the Senator from Rhode Island would broaden this preemption by precluding mail or wire fraud prosecution where the theory of prosecution is that the foreign official or the domestic concern either violated such a duty or defrauded the government or its citizens.

The principal purpose of the amendment, as I understand it, is to direct that prosecution for a foreign payment should be governed by the Foreign Corrupt Practices Act, as amended. However, there are a number of Federal statutes other than the mail or wire fraud statute which might be involved in particular cases, such as false representation to the U.S. Government about exports, failure to disclose a material fact about a payment under the securities laws, and other statutes.

Given that situation, Mr. President, I am prepared to accept the amendment of the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I move the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode Island.

The amendment (UP No. 710) was agreed to.

Mr. CHAFEE. Mr. President, I have some comments regarding the committee report language on section 104(b) of S. 708.

I would like to direct, if I might, a question to the manager of the bill, Senator HEINZ, in this connection.

I have reviewed the Banking Committee's report on this bill. In my mind, the committee report language on page 17 discussing the meaning of the term "course of conduct" leaves two important questions unanswered. The first question is whether the example of the standard of liability under section 104(b) requires actual knowledge. The second question is whether the examples of conduct which would violate section 104(b) which are discussed in the committee report are meant to be examples of prima facie violations or merely illustrations of the kinds of actions that might constitute a violation of section 104 depending on the circumstances of the case.

The committee report on section 104(b) with respect to your amendment inserting the words "expressly or by a course of conduct" indicated, among other things, that if an American company continued to employ an agent in the face of knowledge that he had made one or more corrupt payments within the preceding 2 years, the American company could be found to have violated the act.

Now, although the word "known" is not defined, it is my understanding that it is clearly not the same as "reason to know" as set forth in the present act. In other words, the term "known" in this sentence of the report means actual knowledge, which would, for example, include a copy of papers showing the agent had been convicted for bribery, or a direct admission of guilt by the agent to the company, but not hearsay, rumor, or cocktail party conversation.

The second issue that the report language on course of conduct raises is whether the example of the continued employment of an agent known to have paid a bribe is intended to establish a per se rule under which the employment of such an agent automatically constitutes implicit authorization. I do not believe that this was the intent of the example. Certainly, the fact that a company has advised its agent to stop making payments is also an important factor which should be considered in specific cases.

Mr. HEINZ. Will the Senator yield?

Mr. CHAFEE. I certainly will. I would be anxious to hear the Senator's answer.

Mr. HEINZ. Mr. President, the Senator's interpretation is correct. Actual knowledge is required to establish an authorization through a course of conduct and the example of the continued employment of an agent known to have made corrupt payments is merely illustrative and does not establish a per se rule.

Further, let me state that clearly rumor, hearsay, or cocktail party conversation should under no circumstances be construed to mean actual knowledge.

To clarify the second point further, these are illustrations that will depend on the circumstances of the case. They do not constitute, per se, prima facie violations.

Mr. CHAFEE. The other question that I would like to ask the distinguished manager of the bill is as follows: One of my chief objectives in drafting S. 708

was to insure that the enforcement of the act took into account foreign policy considerations. One aspect of that coordination is the notification of the State Department by the Department of Justice when it has decided to file a case. This is intended to enable the State Department to anticipate potential foreign policy problems that might arise as the result of the filing of an action under the act. Is it correct that it is the committee's intent that the Department of Justice notify the State Department when it decides to bring an action under the antibribery provisions of the act?

Mr. HEINZ. If the Senator will yield, the answer to his question is "Yes," the Senator is correct, and it is my understanding that the Justice Department has no objection to this.

Mr. CHAFEE. I thank the distinguished manager of the bill very much for his consideration.

Mr. PROXMIRE. Will the Senator yield on this particular issue?

Mr. CHAFEE. Yes.

Mr. PROXMIRE. I hope we do not have an understanding here that there should be prior clearance with the State Department before they file a case. A case should stand on its merits of whether or not the law is being violated, not on the basis of whether there is some foreign policy interest on the part of the State Department or some other legitimate interest. It ought to be filed, as I say, on the merits of the case and whether the law is violated and that should be the determination.

Mr. HEINZ. If the Senator will yield, the Senator is entirely correct. We are merely talking about notification. There is absolutely no implication here that there is any preclearance by the State Department required in any way, shape, or form. I totally agree with the Senator on that point.

Mr. PROXMIRE. I thank my colleague.

Mr. CHAFEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CHAFEE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, I ask for the yeas and nays on passage of S. 708.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the yeas and nays be vitiated.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. I yield to my distinguished colleague from Pennsylvania.

Mr. SPECTER. I thank the Senator for yielding. This is the first time I have had the pleasure of a colloquy with the senior Senator from Pennsylvania.

I am concerned, and have expressed this concern to the floor manager, the distinguished Senator from Pennsylvania, about subsection (c) (2) of section 104 of the bill. Subsection (c) (2) provides that subsections (a) and (b), the bribery provisions, shall not apply to "any payment, gift, offer, or promise of anything of value to a foreign official which is lawful under the law and regulations of the foreign official's country."

The concern which I have is that the prosecuting attorney may be held to have to establish that requirement, have the burden of proof whether the act is unlawful in the foreign official's country.

The first consideration I want to have this colloquy on is to have the legislative history clarified that it would not be sufficient for a defense to be raised under this subsection on grounds of custom.

Mr. HEINZ. Mr. President, let me say to the Senator that that would not be a sufficient defense. I would also say, anticipating, I think, the Senator's second question, that I know the Senator is properly concerned about making it difficult for a prosecutor to successfully prosecute a foreign corrupt payment and that, were the burden of proving whether a law or regulation of a foreign country permits a foreign corrupt payment placed on the prosecution, as opposed to being permitted to be raised as an affirmative defense, that would, in fact, constitute an unrealistic and counterproductive obligation on the prosecutorial authority and that that is explicitly not the intent of the language on page 27, lines 10 through 13, of the bill.

Mr. SPECTER. Mr. President, I thank the distinguished floor manager for that statement.

In addition to the clarification that custom shall not be a defense or establish that something is lawful under the laws of another country, as to the second point, it will not be the affirmative burden of the prosecution to establish in the prosecution's case in chief that the conduct is unlawful under the law and regulations of the foreign official's country. Rather, it shall be the affirmative obligation or the affirmative defense of the defendant to assume the burden of proving in the course of the trial, if the defense be tendered that the conduct is lawful under the laws of the foreign official's country, that the defense applies.

Mr. HEINZ. Not being a lawyer, I am hard put to disagree with anything the Senator says. I do believe he is correct, but let me put it in my words so there no misunderstanding.

The language in this bill on this point in subsection c(2), is not to be construed by any judge or jury, who is going to make a decision, to mean that the prosecution, the people enforcing the Foreign Corrupt Practices Act, would have the burden of proof, would have to prove that this is, in fact, not lawful under the laws of some foreign country.

This language is intended to permit a defense to be raised by the party on the receiving end of the complaint, the defendant. If he can prove—that whatever was done in the foreign country, under the laws of that country, was legal—that is intended to be a defense, but it has to be raised and has to be proved by the defendant.

Mr. SPECTER. Mr. President, I think that is well stated by a nonlawyer to a lawyer who has had experience with the prosecution of cases and affirmative defenses. I think that is a cogent, clear statement.

Mr. PROXMIRE. Mr. President, will the junior Senator from Pennsylvania (Mr. SPECTER) yield?

Mr. SPECTER. I yield.

Mr. PROXMIRE. Mr. President, I congratulate the Senator for coming in on this. As far as I know, we do not have any member of the committee who has prosecutorial experience. The Senator from Pennsylvania (Mr. SPECTER) has great skill in that area.

This has been a problem for us, Mr. President. We want a law that is effective, that can be prosecuted effectively. I have been very concerned and I think that this colloquy is most helpful. The Senator has made one point in connection with it. I would like to make another.

The Senator's position is that this should be a matter where the burden of proof is on the defense. The point I would like to make is that we are referring here not just to some unwritten regulation; we are referring to something that is in the Constitution of the country, the statute law, a judicial decision, or a written regulation. In other words, it has to be specific, written, it has to be something that is established and available and the defense itself has to use it.

Mr. SPECTER. Mr. President, I think the distinguished Senator from Wisconsin has articulated and filled out the first portion of the colloquy that Senator HEINZ and I had, which was abbreviated under the concept of custom. It would not be sufficient for an affirmative defense to be raised by the defendant that it was a matter of custom which is subject to some vagary or some generalization. As the distinguished Senator from Wisconsin has articulated, the lawfulness of the payment must be shown to exist in the Constitution or statutory law or specific written regulations of the foreign official's country so there will be no doubt that, in fact, it was a lawful area of conduct under the foreign country's laws and within its government, demonstrable by a written document of one sort or another, including a judicial decision.

Mr. HEINZ. Mr. President I commend my friend and colleague from Pennsylvania for having entered into what I think is a very appropriate colloquy, clarifying something that perhaps someone could have misconstrued. I want just to echo what Senator PROXMIRE has said. I thank my colleague.

Mr. SPECTER. Mr. President, I thank the senior Senator from Pennsylvania.

● Mr. DANFORTH. Mr. President, I rise today in support of S. 708, the Business Accounting and Foreign Trade Simplification Act. This bill would amend the Foreign Corrupt Practices Act by easing the strong disincentive to exports resulting from the current FCPA, while retaining a check on foreign bribery.

These changes are much needed and long overdue. The importance of exports to our economy cannot be underestimated. The impact of export disincentives such as those in the Foreign Corrupt Practices Act cannot be ignored.

Consider a few of the reasons that exports are so very important to our economy:

Every $1 billion in U.S. export creates 50,000 jobs and additional tax revenue.

One out of every 3 acres in our country is producing food for others to eat.

Nearly one-sixth of all goods produced in the United States is sold in foreign markets.

But as we move into the 1980's, America finds itself increasingly challenged by international competition. This, at a time when 40 percent of the oil we consume comes from abroad and we are more dependent on foreign trade than ever before.

U.S. exports face growing competition overseas even in areas such as computers and aircraft where we have traditionally dominated the world market. Domestic producers of an increasing number of products are experiencing intensified competition from imports. Consider these facts:

In 1971, the U.S. trade balance went into deficit for the first time in more than three-quarters of a century. Last year that deficit reached $26 billion.

The U.S. share of world markets has gone from 18 percent in 1950 and 1960 to barely over 15 percent in 1970. By 1979, our share had fallen to around 12 percent.

Over the past 20 years, productivity growth in the major economies in the world has been about twice that in the United States.

The Government has an obligation to encourage American exports, to remove foreign barriers to trade and to reduce disincentives to exports. Then it is up to American business to get out there and sell. Certainly we all have our work cut out for us:

Fewer than 10 percent of some 300,000 manufacturing firms in the U.S. export. Fewer than 2.000 companies account for 85 percent of our export trade. By one Department of Commerce estimate, some 20,000 American companies now selling only in the domestic market could sell overseas.

Clearly, now is the time for us to remove the remaining barriers to American exports. In this respect, the Senate's record this year is a good one: In April, we unanimously passed the Export Trading Company Act. The Economic Recovery Act of 1981 significantly reduced taxation on American businessmen abroad. Now, the passage of S. 708 represents another important step.●

CHANGES ARE NEEDED IN THE FCPA

Mr. ROTH. Mr. President, I support the Business Accounting and Foreign Trade Simplification Act (S. 708). As cochairman of the 74-member Senate Export Caucus, I am vitally concerned that we remove unnecessary regulatory impediments to U.S. overseas sales efforts. As it now stands, the Foreign Corrupt Practices Act (FCPA), which S. 708 is designed to amend, is a potent disincentive to exporting; and, while we must not allow foreign bribery, we need not shut the regulatory door so tightly that we lock out legitimate practices in exporting, as well.

Mr. President, the Foreign Corrupt Practices Act, while laudable in ambition, has dampened or snuffed out businesses' willingness to export. Small and medium-sized firms, in particular, because of their need to rely almost exclusively on overseas sales agents, have been discouraged from breaking new export ground. It is simply not worth it now for a firm to run the risk of criminal or civil prosecution for activities undertaken by uncontrollable foreign agents.

At a time when we desperately need to expand exports, create jobs, and reduce our balance of merchandise trade deficit, the 20,000-plus smaller firms that could be exporting cannot afford the gamble. Moreover, for small medium, and large firms alike, the costs of complying with the accounting and record-keeping standards are, indeed, daunting. The FCPA has forced our firms to operate in an atmosphere where they are presumed guilty unless meticulously kept and exhaustive records prove them innocent.

Mr. President, the legislation before us is designed to loosen the export-discouraging grip of the FCPA without compromising its prime intent, that is, the prohibition against bribery.

By clarifying a company's liability for the actions of overseas sales agents and the definition of allowable facilitating payments, S. 708 reduces the confusion of the FCPA. By eliminating the requirement that separate books and records be kept while improving internal accounting controls, S. 708 reduces the cost of complying with Government's regulations.

These changes should free up talent and capital for exporting and will help us achieve our goal of expanding sales of U.S. goods and services.

I call upon my colleagues in the Senate Export Caucus and, indeed throughout the Senate, to support the intent of S. 708 and approve this much needed legislation.

Mr. HEINZ. Mr. President, I think we are ready to move to third reading.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute as amended was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading.

The bill clerk proceeded to read the bill the third time.

Mr. ROBERT C. BYRD. Mr. President, I have an amendment.

The PRESIDING OFFICER. The Senator from West Virginia.

UP AMENDMENT NO. 711

(Purpose: To provide for small business representation on the Federal Reserve Board)

Mr. ROBERT C. BYRD. Mr. President, I have an amendment, which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) proposes an unprinted amendment numbered 711.

At the end of the bill, add the following:

SMALL BUSINESS REPRESENTATION ON THE FEDERAL RESERVE BOARD

SEC. 11. The President shall nominate an individual whose background is nonbanking, but who is representative of small business, to fill the first vacancy occurring on the Board of Governors of the Federal Reserve System after the date of enactment of this Act.

Mr. HEINZ. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HEINZ. Have we advanced to third reading already?

The PRESIDING OFFICER. We have not. The clerk was only part way through third reading.

Mr. HEINZ. I thank the Chair.

The PRESIDING OFFICER. The Senate will suspend for consultation with the Parliamentarian.

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. Mr. President, it is very much easier to recognize that a mistake has been made in itself to correct it. In this instance, I think we are all indebted to the Senator from Rhode Island (Mr. CHAFEE) for not only recognizing that we made an error in 1977, when we passed the Foreign Corrupt Practices Act, but also for giving us some guidance as to the best means of amending that error.

I have been happy to join him in cosponsoring S. 708, which does amend and clarify the Foreign Corrupt Practices Act and certainly in no sense abandons the high moral ground we adopted in 1977, in discouraging practices which tend to subvert normal commercial transactions. I believe it does place the whole purpose of the Foreign Corrupt Practices Act on a more realistic and rational basis.

Therefore, I am grateful to the Senator from Rhode Island for having taken the leadership in this matter. It was clear

79-059 O-85-11 (Pt. 22)

that what we attempted to do in 1977 was not working, that the effect of it was to place American business at a serious disadvantage, and that it was not really accomplishing the purposes for which it was intended.

I believe that the bill now before us will be a more realistic and, in the long run, a more effective measure. Therefore, I support it with a great deal of enthusiasm.

The ink was not dry on the original bill before I think many of us had misgivings that we had gone in the wrong direction. I believe that today we have an opportunity to change our course and to go in the right direction, and the Senator from Rhode Island deserves the lion's share of the credit for making this change.

Mr. CHAFEE. Mr. President, I thank the distinguished senior Senator from Maryland for his very kind comments. I appreciate what he has said. I think it is important to note that this was an effort that involved others. I am delighted to have the credit, but I do want to share that credit with those previously mentioned—the senior Senator from Wisconsin, the senior Senator from Pennsylvania, Senator DODD, Senator DIXON, Senator D'AMATO, and others.

Everybody pitched in. I hope we can get this piece of legislation passed quickly.

Again, I thank the senior Senator from Maryland for his kind comments.

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME AGREEMENT—S. 881, SMALL BUSINESS RESEARCH INNOVATION ACT OF 1981

Mr. BAKER. Mr. President, the minority leader and I have consulted with the managers of the bill on both sides with respect to a time agreement on another matter which I believe might resolve the issue of the amendment now at the desk and to be offered by the distinguished Senator from West Virginia. I will put this request at this time, and then we can address the other question.

Mr. President, I ask unanimous consent that when the Senate proceeds to the consideration of Calendar No. 283, S. 881, it be considered under the following time agreement:

Two hours on the bill, to be equally divided between the chairman of the Small Business Committee and the ranking minority member, or their designees;

One hour on amendments in the first degree;

Thirty minutes on amendments in the second degree;

Twenty minutes on any debatable motions, appeals, or points of order, if they are submitted to the Senate;

That the agreement be in the usual form, with the following exceptions:

That an amendment to be offered by the Senator from Texas (Mr. BENTSEN), which will be the text of Senate Resolution 238, be limited to 1 hour, equally divided;

That an amendment to be offered by the Senator from Florida (Mr. CHILES), dealing with interest rates, be limited to 1 hour, equally divided;

That an amendment to be offered by the distinguished Senator from West Virginia, the minority leader (Mr. ROBERT C. BYRD), dealing with budget cuts, be limited to 1 hour, equally divided;

That an amendment to be offered by the distinguished Senator from West Virginia, the minority leader (Mr. ROBERT C. BYRD), dealing with all business representatives on the Federal Reserve Board, be limited to 1 hour, equally divided;

That any substitute amendments or amendments in the first or second degree to the nongermane amendments identified above be limited to 30 minutes, equally divided, and be germane to the amendments they seek to substitute or amend.

Further, that the Senate proceed to the consideration of S. 881 after the disposition of the Department of Justice appropriation bill, which is scheduled, by previous order, to begin on November 30.

Further, that this agreement be subject to vitiation upon the disagreement of the distinguished Senator from Louisiana, the distinguished chairman of the Small Business Committee, and the distinguished chairman of the Judiciary Committee.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, will the distinguished majority leader clarify as to what he meant when he said that this agreement would be subject to vitiation? He does not mean the time agreement, does he?

Mr. BAKER. I am sorry. I did not speak with much particularity. What I meant, and do now request, is that the date for the consideration of the matter be subject to vitiation, not the time limitations and other arrangements made herein.

Mr. ROBERT C. BYRD. Mr. President, further reserving the right to object, is it clear, I ask the majority leader, that there will not be a Davis-Bacon amendment?

Mr. BAKER. Yes; that is clear.

Mr. ROBERT C. BYRD. That is part of the agreement; is it not?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The text of the agreement follows:

Ordered, That on Monday, November 30, 1981, following the disposition of H.R. 4995, the time of proceeding subject to vitiation by Senators Johnston, Weicker or Thurmond, the Senate proceed to the consideration of S. 881 (Order No. 283), a bill to amend the Small Business Act to strengthen the role of the small, innovative firms in federally funded research and development, and to utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy, with 1 hour on any amendment in the first degree (except a Bentsen amendment, containing the text of S. Res. 238, on which there shall be 1 hour; a Chiles amendment, dealing with interest rates, on which there shall be 1 hour; a Robert C. Byrd amendment, dealing with budget cuts, on which there shall be 1 hour; a Robert C. Byrd amendment, dealing with a small business representative on the Federal Reserve Board, on which there shall be 1 hour; and with any substitute amendments, or amendments in the first or second degree to the above identified amendments to be limited to 30 minutes each and to be germane to the amendments they seek to amend), to be equally divided and controlled by the mover of such and the manager of the bill; with 30 minutes on any amendment in the second degree, to be equally divided and controlled by the mover of such and the manager of the bill; and with 20 minutes on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided*, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: *Provided further*, That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 2 hours, to be equally divided and controlled, respectively, by the Senator from Connecticut (Mr. Weicker) and the Senator from Georgia (Mr. Nunn), or their designees: *Provided*, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

BUSINESS ACCOUNTING AND FOREIGN TRADE SIMPLIFICATION ACT

The Senate continued with the consideration of S. 708.

Mr. ROBERT C. BYRD. Mr. President, I withdraw the amendment which I sent to the desk.

The PRESIDING OFFICER. The amendment is withdrawn.

The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 708

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Business Accounting and Foreign Trade Simplification Act".

FINDINGS AND CONCLUSIONS

SEC. 2. (a) The Congress finds that—

(1) the enactment of the Foreign Corrupt Practices Act of 1977 was a positive and significant step toward the important objective of prohibiting bribery of foreign government officials by United States companies in order to obtain, retain, or direct business;

(2) the Foreign Corrupt Practices Act of 1977 has caused unnecessary concern among existing and potential exporters as to the scope of legitimate overseas business activities;

(3) the accounting standards requirements of the Foreign Corrupt Practices Act of

1977, which apply to all issuers of securities irrespective of whether they have foreign operations, are unclear and excessive and have caused costly and unnecessary paperwork burdens;

(4) United States agencies responsible for enforcement of the Foreign Corrupt Practices Act of 1977 have not sufficiently coordinated interpretation and enforcement practices with other agencies responsible for international trade policy, export promotion, foreign policy, international monetary policy, and other related civil and criminal statutes; and

(5) it is in the best interests of all countries to maintain responsible standards of corporate conduct in foreign markets to preserve free and equitable trading practices.

(b) The Congress concludes that—

(1) the principal objectives of the Foreign Corrupt Practices Act of 1977 are desirable, beneficial, and important to our Nation as well as to our relationships with our trading partners, and these objectives should remain the central intent of the Act;

(2) exporters should not be subject to unclear, conflicting, and potentially damaging demands by diverse United States agencies responsible for enforcement of the Foreign Corrupt Practices Act of 1977;

(3) general compliance and enforcement practices associated with the Foreign Corrupt Practices Act of 1977 should be developed in accordance with considerations underlying foreign relations, international trade, export promotion, international monetary policy, and other related civil and criminal statutes; and

(4) a solution to the problem of corrupt payments by firms to obtain or retain business demands an international approach; accordingly, appropriate international agreements should be initiated and sought by the United States agencies responsible for trade agreements and by the President.

AMENDMENT OF SHORT TITLE

SEC. 3. Section 101 of the Foreign Corrupt Practices Act of 1977 is amended to read as follows:

"SHORT TITLE

"SEC. 101. This title may be cited as the 'Business Practices and Records Act'.".

ACCOUNTING STANDARDS

SEC. 4. (a) Section 13(b)(2) of the Securities Exchange Act of 1934 is amended to read as follows:

"(2) Every issuer which has a class of securities registered pursuant to section 12 of this title and every issuer which is required to file reports pursuant to section 15(d) of this title shall devise and maintain a system of internal accounting controls sufficient to provide reasonable assurances that—

"(A) transactions are executed in accordance with management's general or specific authorization;

"(B) transactions are recorded as necessary (i) to permit preparation of financial statements in conformity with generally accepted accounting principles or any other criteria applicable to such statements, and (ii) to maintain accountability for assets;

"(C) access to assets is permitted only in accordance with management's general or specific authorization;

"(D) the recorded accountability for assets is compared with the existing assets at reasonable intervals and appropriate action is taken with respect to any differences; and

"(E) for the purposes of subparagraphs (A) through (D) of this paragraph, the issuer makes and keeps books, accounting records, and accounts which, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the issuer.".

(b) Section 13(b) of the Securities Exchange Act of 1934 is amended by adding at the end thereof the following:

"(4) No criminal liability shall be imposed for failing to comply with the requirements of paragraph (2) of this subsection.

"(5) No civil injunctive relief shall be imposed with respect to—

"(A) any issuer for failing to comply with the requirements of paragraph (2) of this subsection if such issuer shall show that it acted in good faith in attempting to comply with such requirements; or

"(B) any person other than an issuer, in connection with an issuer's failure to comply with paragraph (2), unless such person knowingly caused the issuer to fail to devise or maintain a system of internal accounting controls that complies with paragraph (2).

"(6) No person shall knowingly circumvent a system of internal accounting controls established pursuant to paragraph (2) for a purpose inconsistent with paragraph (2).

"(5) Where an issuer which has a class of securities registered pursuant to section 12 of this title or an issuer which is required to file reports pursuant to section 15(d) of this title holds 50 per centum or less of the voting power with respect to a domestic or foreign firm, the provisions of paragraph (2) require only that the issuer proceed in good faith to use its influence, to the extent reasonable under the issuer's circumstances, including the relative degree of its ownership over the domestic or foreign firm and under the laws and practices governing the business operations of the country in which such firm is located, to cause such domestic or foreign firm to devise and maintain a system of internal accounting controls consistent with paragraph (2). Such an issuer shall be conclusively presumed to have complied with the provisions of paragraph (2) by demonstrating good faith efforts to use such influence.".

REPEALER; NEW BRIBERY PROVISION

SEC. 5. (a)(1) Section 30A of the Securities Exchange Act of 1934 is repealed.

(2) Section 32 of such Act is amended—

(A) by striking out "(other than section 30A)" in subsection (a); and

(B) by striking out subsection (c).

(b) Section 104 of the Business Practices and Records Act is amended to read as follows:

"FOREIGN PAYMENTS

"SEC. 104. (a) It shall be unlawful for any domestic concern, or any officer, director, employee, or shareholder thereof acting on behalf of such domestic concern, to make use of the mails or any means or instrumentality of interstate commerce corruptly in furtherance of a payment, gift, offer, or promise, directly or indirectly, of anything of value to any foreign official for the purpose of—

"(1) influencing any act or decision of such foreign official in his official capacity, or inducing such foreign official to do or omit to do any act in violation of his legal duty as a foreign official; or

"(2) inducing such foreign official to use his influence with a foreign government or instrumentality thereof to affect or influence any act or decision of such government or instrumentality;

in order to assist such domestic concern in obtaining or retaining business for or with, or directing business to, any person.

"(b) It shall be unlawful for any domestic concern, or any officer, director or employee, or shareholder thereof acting on behalf of such domestic concern to make use of the mails or any means or instrumentality of interstate commerce corruptly to direct or authorize, expressly or by a course of conduct, a third party in furtherance of a payment, gift, offer, or promise of anything of value to a foreign official for any of the purposes set forth in subsection (a).

"(c) Subsections (a) and (b) shall not apply to—

"(1) any facilitating or expediting payment to a foreign official the purpose of which is to expedite or to secure the performance of a routine governmental action by a foreign official;

"(2) any payment, gift, offer, or promise of anything of value to a foreign official which is lawful under the law and regulations of the foreign official's country;

"(3) any payment, gift, offer, or promise of anything of value which constitutes a courtesy, a token of regard or esteem, or in return for hospitality;

"(4) any expenditures, including travel and lodging expenses, associated with the selling or purchasing of goods or services or with the demonstration or explanation of products; or

"(5) any ordinary expenditures, including travel and lodging expenses, associated with the performance of a contract with a foreign government or agency thereof.

"(d)(1)(A) Except as provided in subparagraph (B), any domestic concern which violates subsection (a) or (b) shall, upon conviction, be fined not more than $1,000,000.

"(B) Any individual who is a domestic concern and who willfully violates subsection (a) or (b) shall, upon conviction, be fined not more than $10,000, or imprisoned not more than five years, or both.

"(2) Any officer or director of a domestic concern, or stockholder acting on behalf of such domestic concern, who willfully violates subsection (a) or (b) shall, upon conviction, be fined not more than $10,000, or imprisoned not more than five years, or both.

"(3) Whenever a domestic concern is found to have violated subsection (a) or (b) of this section, any employee of such domestic concern who is a United States citizen, national, or resident or is otherwise subject to the jurisdiction of the United States (other than an officer, director, or stockholder acting on behalf of such domestic concern), and who willfully carried out the act or practice constituting such violation shall, upon conviction, be fined not more than $10,000, or imprisoned not more than five years, or both.

"(4) Whenever a fine is imposed under paragraph (2) or (3) of this subsection upon any officer, director, employee, or stockholder of a domestic concern, such fine shall not be paid, directly or indirectly, by such domestic concern.

"(e)(1) When it appears to the Attorney General that any domestic concern, or officer, director, employee, or stockholder thereof, is engaged, or is about to engage, in any act or practice constituting a violation of subsection (a) or (b) of this section, the Attorney General may, in his discretion, bring a civil action in an appropriate district court of the United States to enjoin such act or practice, and upon a proper showing, a permanent or temporary injunction or a temporary restraining order shall be granted without bond.

"(2) For the purpose of all civil investigations which, in the opinion of the Attorney General, are necessary and proper for the enforcement of this Act, the Attorney General or any attorney or attorneys of the Department of Justice designated by him are empowered to administer oaths and affirmations, subpena witnesses, take evidence, and require the production of any books, papers, or other documents which the Attorney General deems relevant or material to the inquiry. Such attendance of witnesses and the production of such documentary evidence may be required from any place in the United States, or any territory, possession, or com-

monwealth of the United States, at any designated place of hearing.

"(3) In case of contumacy by, or refusal to obey a subpena issued to, any person, the Attorney General may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, papers, or other documents. Any such court may issue an order requiring such person to appear before the Attorney General or attorney designated by the Attorney General, there to produce records, if so ordered, or to give testimony touching the matter under investigation or in question; and any failure to obey such order of the court may be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or wherever he may be found. The Attorney General shall have the power to make such rules relating to civil investigations as may be necessary or appropriate to implement the provisions of this subsection.

"(f) As used in this section—

"(1) The term 'domestic concern' means (A) any individual who is a citizen, national, or resident of the United States; or (B) any corporation, partnership, association, joint-stock company, business trust, unincorporated organization, or sole proprietorship which has its principal place of business in the United States, which is organized under the laws of a State of the United States or a territory, possession, or commonwealth of the United States, which has a class of securities registered pursuant to section 12 of the Securities Exchange Act of 1934, or which is required to file reports under section 15(d) of the Securities Exchange Act of 1934.

"(2) The term 'foreign official' means (A) any officer or employee of a foreign government or any department, agency, or instrumentality thereof, or any person acting in an official capacity for or on behalf of any such government or department, agency, or instrumentality; or (B) any foreign political party or official thereof or any candidate for foreign political office.".

DEFINITIONS

SEC. 6. Section 13(b) of the Securities Exchange Act of 1934 is amended by adding at the end thereof the following:

"(6) For the purpose of this section, the terms 'reasonable assurances' and 'reasonable detail' mean such level of detail and degree of assurance as would satisfy prudent individuals in the conduct of their own affairs, having in mind a comparison between benefits to be obtained and costs to be incurred in obtaining such benefits.".

EXCLUSIVITY PROVISION FOR OVERSEAS BRIBERY

SEC. 7. No criminal action pursuant to section 1341 or 1343 of title 18, United States Code, may be brought against a domestic concern, its officers, directors, employees, or any shareholders thereof acting on behalf of such domestic concern for a payment, gift, offer, or promise to a foreign official based upon the theory that the foreign official or the domestic concern violated a duty to or defrauded the foreign government or the citizens of a foreign country.

AUTHORITY TO ISSUE GUIDELINES

SEC. 8. Title I of the Business Practices and Records Act is amended by adding at the end thereof the following:

"GUIDELINES AND GENERAL PROCEDURES FOR COMPLIANCE

"SEC. 105. (a) Not later than six months after the date of enactment of this section, the Attorney General, after consultation with the United States Trade Representative, the Secretary of State, the Secretary of Commerce, and the Secretary of the Treasury, and after consultation with representatives of the business community and the interested public through public notice and comment and in public hearings, shall determine to what extent the business community would be assisted by further clarification of section 104 of this Act and shall, based on such determination and to the extent necessary and appropriate, have the authority to issue—

"(1) guidelines describing specific types of conduct associated with common types of export sales arrangements and business contracts which the Attorney General determines constitute compliance with the provisions of section 104 of this Act; and

"(2) general precautionary procedures which issuers or domestic concerns may use on a voluntary basis to ensure compliance with this Act, and to create a rebuttable presumption of compliance with this Act.

The guidelines and procedures referred to in the preceding sentence shall be issued in accordance with sections 551 through 557 of title 5, United States Code.

"(b) The Attorney General, after consultation with other Federal agencies and representatives from the business community, shall establish a Business Practices and Records Act Review Procedure for the purpose of providing responses to specific inquiries concerning enforcement intentions under this Act. The Attorney General shall issue opinions, within thirty days, in response to requests from domestic concerns, regarding compliance with the requirements of the provisions of section 104 of this Act. An opinion that certain prospective conduct does not involve a violation shall be final and binding on all parties, subject to the discovery of new evidence. When appropriate, and at reasonable intervals, the responses derived from the review procedure will be reviewed by the Attorney General to determine whether such compilation of responses should be included in a new guideline pursuant to subsection (a).

"(c) Any document or other material provided to, received by, or prepared in the Department of Justice, or any other department or agency of the United States Government, in connection with a request by a domestic concern for a statement of present enforcement intentions under the Business Practices and Records Act Review Procedure pursuant to subsection (b) of this section, or in connection with any investigations conducted to enforce this Act, shall be exempt from disclosure under section 552 of title 5, United States Code, regardless of whether the Department responds to such a request or the applicant withdraws such request prior to receiving a response. The Attorney General shall protect the privacy of each applicant, and shall adopt rules assuring that materials, documents, and information submitted in connection with a review procedure request will be kept confidential and will not be used for any purpose that would unnecessarily discourage use of the review procedure. The review procedure shall be developed and instituted in accordance with sections 551 through 557 and 701 through 706 of the title 5 United States Code.

"(d) The Attorney General shall make a special effort to provide timely compliance guidance to potential exporters, and smaller businesses, who as a practical matter are unable to obtain specialized counsel on issues pertaining to this Act. Such assistance shall be limited to requests for enforcement intention disclosures provided for under this Act, and general explanation of compliance responsibilities and of potential liabilities under the Act.

"(e)(1) On September 1 of each year the Attorney General shall transmit to the Congress and make public a detailed report on all actions which the Department of Justice has taken pursuant to this Act, along with its views on problems associated with implementation, its plan for the next fiscal year to further implement the Act, and recommendations for amendments.

"(2) On September 1 of each year the Chairman of the Securities and Exchange Commission shall file with the Congress a detailed report on all actions which the Commission has taken pursuant to section 13(b) of the Securities Exchange Act, its views on problems associated with implementation, its plans for the next fiscal year to further implement such section, and its recommendations for amendment.".

INTERNATIONAL AGREEMENTS

SEC. 9. (a) It is the sense of the Congress that the President should pursue the negotiation of an international agreement among the largest possible number of nations on illicit payments, including, a process by which problems and conflicts associated with such practices could be resolved.

(b) Within one year after the date of enactment of this Act, the President shall report to Congress on—

(1) the progress of the negotiations referred to in subsection (a);

(2) those steps which the administration and Congress should consider taking in the event that these negotiations do not successfully eliminate the competitive disadvantage of United States business; and

(3) possible actions that could be taken to promote cooperation by other nations in international efforts to prevent bribery of foreign officials, candidates, or parties in third countries.

This report shall also include recommendations for any new legislation required to give the President authority to take appropriate action to achieve such objectives. The report shall contain an analysis of the potential effect on the interests of the United States including United States national security of the corruption of foreign officials and political leaders in connection with international business transactions involving persons and business enterprises of other nations. In addition, the report shall assess the current and future role in curtailing such corruption of private initiatives such as the Recommendations to Governments and Rules of Conduct to Combat Extortion and Bribery developed by the International Chamber of Commerce.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, the Foreign Corrupt Practices Act proved to be a watershed in legislative compromise, and I want to take this opportunity to commend the distinguished Senator from Rhode Island, Senator CHAFEE, the author of the bill, the distinguished Senator from Wisconsin, Senator PROXMIRE, the author of last year's bill, and the distinguished manager of the bill, Senator HEINZ, for their careful and constructive negotiations behind the scenes which resulted in the swift passage today of the Foreign Corrupt Practices Act.

Additionally, I would like to thank William Brock. my good friend who, as the U.S. trade representative, assisted the Congress in the passage of this important measure.

Mr. HEINZ. Mr. President. I take one moment to thank. first. mv distinguished comanager of the bill. Senator PROXMIRE, for his great care and work on this legis-

lation. I think the bill is a vastly improved product because of the care, time, and attention he has put into this effort.

I also pay my respects to the incredible diligence and fortitude of the Senator from Rhode Island, who, notwithstanding a great deal of heat that his original version of this bill generated, has persevered and moved this bill through the Senate. He has done so without, to my ear, not a single—and I am pressing his luck and mine—not a single dissenting vote raised against what might have been an extremely controversial measure.

It is a great tribute to Senator PROXMIRE, Senator CHAFEE, Senator DODD, Senator D'AMATO, and others that we have been able to get this legislation through.

And I thank all Senators for their understanding and cooperation.

Mr. PROXMIRE. Mr. President, will my good friend from Pennsylvania yield?

Mr. HEINZ. I yield.

Mr. PROXMIRE. My friend from Pennsylvania is a silvery tongued orator and he also does more with his silver tongue. He attributed to me a vote I did not cast.

I agree there is enormous improvement on the original bill. The Senator from Pennsylvania did a splendid job of leadership on this bill. Frankly, I did not vote in favor of this bill. If I have to be put on record, I voted against the bill. I did so recognizing, as I say, it has improved, and I hope it will be improved further in the House of Representatives.

I again congratulate my good friend from Pennsylvania, the distinguished Senator from Rhode Island, who did a marvelous job under difficult circumstances over a period of many months, and the Senator from Utah (Mr. GARN), the chairman of the committee, who, of course, supervised the whole operation.

I think we have done something today that was an improvement on what was but would have been better if we had not done it at all.

Mr. GARN. Mr. President, I compliment both Senator HEINZ and Senator D'AMATO, two subcommittee chairmen of the Banking Committee, and in particular, Senator CHAFEE. They have worked on this long and hard. It has been a difficult process.

I think the original intent of this bill was excellent. It did not come out in this matter and has caused some difficulty.

I very much appreciate the work also of Senator PROXMIRE who did not agree with some of the changes that we wanted to make but nevertheless has been actively involved as he always is and is sincere in his beliefs.

So I simply wished to add those remarks about how much I appreciate the members of the Banking Committee on the work they have done on this issue.

Mr. CHAFEE. Mr. President, I particularly thank the staff members who worked on this. This was a situation where the staff had to meet time and time again both with all the parties affected, not only the Senators but also the members of the business community, and accounting profession, and I tip my hat particularly to John Daniels, Paul Freedenberg, Lindy Marinaccio, Bill Reinsch, Bill Mattea, and, of course, Christine Bliss from our staff.

They really worked extremely hard and all too often the credit is given to Senators, and we are delighted to take it, but this was the case where a hard, persevering effort by those staff members that I mentioned and others helped produce this result unquestionably.

Mr. PROXMIRE. Mr. President, will the Senator from Rhode Island yield on that point?

Mr. CHAFEE. I yield.

Mr. PROXMIRE. Mr. President, I could not agree more. I think the staff did a superb job and worked long on this. My own staff, Charles Augustus Lindbergh Marinaccio, was especially starring. I am proud of the job he did. He is a former prosecutor as we know and that showed up.

Mr. HEINZ. Mr. President, if the Senator will yield, I agree with him. I commend Paul Freedenberg, John Daniels, Bill Reinsch, and Lindy Marinaccio.

I commend the staff because this bill has really tested everyone's patience. It has been incredibly difficult to get down into the details of every word, and on that we really demanded a great deal of research and careful evaluation from the staff, and we are most appreciative.

I second what Senator PROXMIRE and Senator CHAFEE have said.

I thank the Senator for yielding.

Mr. CHAFEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DODD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE SECOND CONTINUING RESOLUTION

Mr. DODD. Mr. President, last evening the Senate passed the conference report on the continuing resolution. This morning the President—predictably—vetoed that resolution, charging that Congress was perpetuating inflation by overspending.

Mr. President, I wish the RECORD to show that those two events were not stages in the legislative process but rather two scenes in a very carefully orchestrated political charade.

Regardless of the events in acts 1, 2, and 3 of the continuing resolution, the President was determined to veto the continuing resolution regardless of what transpired in the conference that carried on late in the evening last week.

First of all, the conference report did not overspend.

Mr. President, I ask unanimous consent at this juncture to have printed in the RECORD a copy of the "Talking Points on Second Continuing Resolution" which David Stockman, Director of the Office of Management and Budget, used in explaining the administration's position to Congress.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TALKING POINTS ON SECOND CONTINUING RESOLUTION

OVERALL SAVINGS

On September 24, the President asked for a 12 percent reduction in discretionary appropriations for domestic agencies. This would have saved $8.5 billion in FY 82 outlays and additional amounts in future years.

In a letter to Senator Baker earlier this week, the President indicated a willingness to meet Congress half-way and accept a $4.0 billion outlay savings as achieved by the Senate Continuing Resolution with the Baker 4 percent amendment.

The Continuing Resolution Conference Report now pending will save only $2 billion in discretionary outlays, or less than one-fourth of the original request.

CONFERENCE REPORT ADDITIONS TO THE SENATE CONTINUING RESOLUTION WITH 4-PERCENT AMENDMENT

The Conference Continuing Resolution will add $3.5 billion in budget authority to the eight domestic agency bills as follows:

Item	Senate	Conference	Difference
Total new budget authority	$213	$214.5	+$1.5
Adjustment for conference underfunding of entitlements	0	1.7	+1.7
Invalid budget authority savings in conference CR base	0	.3	+.3
Total	213	216.6	+3.5

The above increase in new budget authority will increase outlays by $2.0 billion in FY 82 and additional amounts in future years.

GENERAL CONSIDERATIONS

Implementation of the President's Economic Recovery Program requires large additional spending reductions in FY 83 and FY 84—at least $75 billion.

Failure to hold down the base of discretionary spending in FY 82 will only increase the over-spending problem in future years and add to out-year deficit size.

Without a steady and substantial reduction in Federal spending growth and deficits, a renewal of high interest rates, inflationary pressures and impediments to economic growth and job creation are threatened.

COMPARISON OF SENATE CR AND CONFERENCE AGREEMENT ON 8 DOMESTIC AGENCY BILLS

	Senate	Conference CR	Difference
(1) Total budget authority as calculated by HAC	213,005	214,516	+1,511
(2) Adjustment for underfunding of entitlements in Conference CR (increase to discretionary budget authority)		1,728	+1,728
(3) Adjustment for invalid Budget Authority reductions and 2% calculation in Conference CR		320	+320
(4) Total	213,005	216,564	+3,559
Memorandum: Reconciliation to Reported Budget Authority Totals			
(5) Total Budget Authority as calculated by HAC for 8 Domestic Agency Bills	213,005	214,516	+1,511
(6) Military Construction	6,746	6,216	−530
(7) Foreign Assistance	11,400	10,075	−1,325
(8) Defense	196,712	196,712	0
(9) DC and Other	602	546	−56
(10) Subtotal (6–9)	215,460	213,549	−1,911
(11) Grand total, HAC reported	428,465	428,065	−400

Mr. DODD. Mr. President, this memo demonstrates conclusively that the conference report actually saves $400 million more than the Senate version which the administration pronounced as acceptable only a few days ago.

It would simply stretch the limits of human credulity to believe that 14 Senators of the majority, who are members of the conference committee, would have affixed their signatures to the report after they had the opportunity to confer with Mr. Stockman on precisely that issue without assurance that the President found it acceptable.

The Stockman memo shows in no uncertain terms that Mr. Reagan's objective was not to the bottom line of the conference report but to its components.

Frankly, the President did not like its priorities. The Stockman memo shows that the administration believes we are spending $1.5 billion too much on domestic spending and $1.3 billion too little on foreign assistance.

The Stockman memo shows that this administration wants to spend more than Congress desires on foreign aid and less than Congress wants on the American people.

This is not a theory or a hypothesis or an interpretation on my part. It is a cold and cold-hearted fact that shows up on the neat columns of Mr. Stockman's own arithmetic.

In short, the Stockman memo shows that this administration's priorities are the issue and those priorities are disgracefully skewed.

As to last night's performance on the Senate floor, here were some of the highlights. The conference report which the President had announced his intention to veto was passed last evening by overwhelming support of the majority of this body against strong opposition by the minority.

Trying to invent a rationale for what was clearly an irrational act, Senators of the majority party argued that they were going to vote for the report because it was so bad they could not wait for the President to veto it. Trying to orchestrate a majority vote for the resolution to conclude the drama, the majority members of this body switched sides more often than one sees in a square dance.

It was, we saw, not only an exercise in bad legislation or bad procedure or bad appropriations it was all there, and it was a high price to pay to allow the President to veto a bill for reasons that it refuses to admit even though they are clear on the record.

It was also an unnecessary price. The debate last evening made clear that if we had rejected the conference report, a course urged by a number of Senators on this side of the aisle, it would actually have speeded up the resolution of this issue and provided the funds so that the Federal Government could continue to function.

That alternative had qualities of sound policy and commonsense. It was, therefore, rejected so that the administration could veto a bill which should not have been passed, for reasons that it refused to acknowledge.

Mr. President, I think the real reason becomes quite clear when one looks at the talking points that the Director of the Office of Management and Budget used. A $1.5 billion excess in the conference report and a $1.3 billion shortfall in foreign aid from the administration's point of view is clearly where the issue resides. It is not in the level of spending. And this memo clearly makes that evident.

Mr. President, I draw my colleagues' attention particularly to the first page of this report entitled, "Memorandum: Reconciliation To Reported Budget Authority Totals." Note there the figures identify the amount supported by this body, with a total of $428,365,000,000. The conference report language which reported a figure of $428,065,000,000 showed actually $400 million less than the Senate had adopted only a few nights before. Then with pluses and minuses attached to them the Budget Director pointed out that we had spent $1.5 billion too much in domestic agency bills, $530 million too little in military construction, $1,300,000,000 too little in foreign assistance, and $56 million too little in the District of Columbia and other items. The aggregate is $400 million less than the administration would have liked, as this memo indicates. Let the record show that such is the only real reason for an administration veto.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not past the hour of 4 o'clock in which Senators may speak for not more than 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DANFORTH). Without objection, it is so ordered.

ORDER TO HOLD HOUSE MESSAGE ON CONTINUING RESOLUTION AT THE DESK

Mr. BAKER. Mr. President, I have conferred with the distinguished minority leader who has cleared this request: I ask unanimous consent that the message from the House on the December 15th continuing resolution be held at the desk when received pending further disposition by the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL BUDGET PROCEDURES

Mr. FORD. Mr. President, the country today is experiencing a shameful example of the weaknesses and failures of our national budget procedure. Without dwelling on the merits of this present veto controversy between the President and the Congress, I wish to make only one brief general observation.

In my opinion, the tragic stalemate we have reached in providing funds for the operation of the Government stems quite largely from our retention of the archaic annual budget system—a system which simply does not afford time for the executive and legislative branches to budget and appropriate effectively.

I call attention again to S. 1683 which several of our colleagues and I introduced several weeks ago. The time has now come to give serious consideration to going to a 2-year budget and appropriation cycle—and I urge the appropriate committees to schedule hearings on this measure at the earliest opportunity.

Mr. President, tomorrow I should like to speak at greater length on the need for a 2-year budget cycle, and at this time I should like to ask the leadership for time during the morning hour.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE ECONOMY

Mr. JOHNSTON. Mr. President, to say that the Nation is in economic distress is perhaps an understatement. Housing starts are at the lowest position they have been in since they have been keeping records on that subject. More people are unemployed in this country than were unemployed at the end of the Great Depression in 1939. The steel industry is sick. The housing industry is sick. Small businessmen are going bankrupt at record levels. The automobile industry is virtually defunct in this country. Farmers are in great difficulty. Thrift institutions are threatened with bankruptcy.

In general, the economy is exceedingly sick and getting sicker by the day.

The question is, Mr. President, how do we as a Nation, how do we as a Congress, solve that problem? What we are about today, Mr. President, whether to pass or not pass this continuing resolution, is almost beside the point on the question of solving that great problem. Whether or not the appropriate spending level is $428 or $426 billion, which was the question at issue on the veto vel non of this

continuing resolution as of yesterday, really is totally beside the point. The American people need to understand that whichever side you were on as far as that continuing resolution is concerned, you are neither going to solve the problem nor are you going greatly to contribute to that problem.

I fear that, as I read the morning press accounts, you had two positions: One position which the Congress took, that is to say, one position that the Republican majority in this body took, which was to pass a resolution which contained spending which, according to the President, was too great; and the other position was to be against the resolution, which I and my colleagues took.

But the question of whether or not that resolution was passed or was not passed is almost beside the point. It is beside the point, Mr. President, because the measure of our difficulties is immensely greater than the $2 billion difference in the different versions of that continuing resolution.

The deficit this year will probably approach $80 billion, or perhaps even more. In the direction we are going, the deficit, by fiscal year 1984, could reach $148 billion, by recent estimates.

Those kinds of deficits are going to breed high interest rates, even higher than we have now; they are going to breed inflation, perhaps of a quantity and level that this country has not known, at least in modern times.

Those kinds of economic difficulties, Mr. President, called for not just a midcourse correction, but a somewhat radical change in how we do business in this country.

Mr. President, we have a very popular President who has been called "The Great Communicator." I have tried to support him in much that he has done because I think much that he has said has gone in the right direction. But it is perfectly obvious, Mr. President, that the present course we are embarked upon, with or without the continuing resolution that we have passed, is not going to work. With a President with that kind of mandate, with that kind of leadership, with that kind of ability to communicate, it is his responsibility, Mr. President, to come up with an economic plan that promises to work and promises to work rather quickly.

In the Budget Committee, Mr. President, we grappled with that question of whether or not we ought to make that basic change in direction. We were told that the President was against that change in direction at this time; that he wished to delay until his January 15 budget message in order to present those basic changes in our economic policy.

I regret that the delay was necessary. It seems to me that the level of difficulty of this present economic crisis calls for action and action now, and the passage of 2 or 3 months before we get the policy means 2 or 3 months further into the difficulty we are faced with.

Nevertheless, it is clear at this point we will not receive that basic message, that basic change, until January 15.

I think what we have to face up to and what we need to prepare the American people for is that come January 15 we are going to have a debate as to the basic economic policy which this county must follow for the next year or two, or the next decade. It will involve sacrifice; it will involve difficulty; it will involve compromising the interests of basic constituencies. Those are going to be the issues that are going to make the difference in whether we can bring interest rates down. They are not going to be decided by whether or not we cut or do not cut $2 billion from the budget.

A friend of mine described the way the press treats some of these economic questions as a Superbowl mentality, who is ahead at a particular time in terms of whether they pass or do not pass a policy.

In terms of a Superbowl mentality, I think the President's veto of this continuing resolution in the public mind may put the President ahead in terms of being ahead a few yards or being ahead a few points in a particular contest, in a particular confrontation, between the Congress and the President. But, Mr. President, the time has rapidly come when we can no longer afford a Superbowl mentality when we deal with the economic questions of this country.

The kind of mentality which we have to have, it seems to me, Mr. President, is one of joint cooperation, bipartisan, and also one in which the Executive and the Congress work together, because if we do not have that kind of common purpose we are not going to lead the American people to make the kind of sacrifices which they must make in order to change policy. And policy must be changed. We cannot tolerate a $148 billion deficit in fiscal year 1984.

Mr. PROXMIRE. Will the Senator yield briefly?

Mr. JOHNSTON. Yes, I will.

Mr. PROXMIRE. I commend the distinguished Senator from Louisiana for what he is saying. There has been too little talk from the administration or anyone else about sacrifice. That is what the Senator from Louisiana is talking about. Sacrifice in terms of paying higher taxes, if necessary, than the President has proposed; sacrifices in terms of spending cuts that do hurt and hurt greatly; and making compromises in areas where we feel otherwise we would like to go ahead.

This is the kind of talk that the Senator from Louisiana is giving us now that we should hear more about in this country because we will not make the kind of progress we have to make, to get our inflation under control, to bring down the interest rates, without a genuine sacrifice, including a policy that holds down wage increases and price increases, that has a free trade policy, an antitrust policy.

All these things have to be put in place. They all cause pain and difficulty on the part of many, many people. I am delighted the Senator from Louisiana is making this statement. It is a good statement to make and I support it.

Mr. JOHNSTON. I thank the distinguished Senator from Wisconsin.

Mr. President, my message is complete. We must be prepared for the big battle ahead. This is not the big battle. The big battle is in January.

Mr. HART. Mr. President, if the Senator will yield, I would like to associate myself with the statement made by the Senator from Louisiana.

He makes a very important point. When the President decided 2 weeks ago to, in effect, walk away from this economic mess we are in until mid-January and put the issues over until the 1983 budget, he, in fact, created the kind of economic and fiscal backing that has brought the chaos of the past 72 hours or more. I think it lies ill with the President now to criticize the Congress for trying to solve a problem that he himself abandoned, and abandoned voluntarily, until next year.

It was an honest effort, a bipartisan effort, an effort by both Houses of Congress, to keep the Government in operation. I think, frankly, the actions taken by the President, given his abandonment of responsibility here, are not too worthy of the office.

I want to associate myself entirely with the Senator's analysis of the present situation and also his projection about what lies ahead.

What we do here today is not approaching solutions to the problems of this country one iota. It is just maintenance of the status quo and an attempt to buy time until the real serious fundamental, structural problems of this country's economy can and must be addressed.

There, we must look to the White House and the President for leadership and guidance and direction. We may or may not agree with him, but I think, frankly, that putting the whole thing off until January was a very serious mistake.

Mr. BAKER. Mr. President, has time for morning business expired?

If the Senator from Louisiana wishes me to, I shall extend it. We are ready to receive a message from the House on the continuing resolution. I am prepared to go with that or extend morning business.

Mr. LONG. Mr. President, I would like to have a minute or two.

EXTENSION OF TIME FOR MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for morning business be extended to 4:15 p.m.

The PRESIDING OFFICER (Mr. QUAYLE). Without objection, it is so ordered.

Mr. LONG. Mr. President, in mind of what my colleague said, I think the sooner the administration faces the situation that we are not going to be able to finance this Government with the Laffer curve, the better off we are going to be. I am aware that when you cut taxes, it stimulates the economy, or we hope it will. When interest rates come down, that will stimulate the economy and generate more revenue. That will also help.

Even with these economic considerations, unless the Laffer theory works a great deal better than most of us here think it will, this Government is going to need more revenue. The tax cut created a problem that will live with us for quite a while to come.

I think it is time that we recognized that we are not going to be able to fi-

nance national defense and the other essential needs of this country with a free lunch. It is not going to work.

Mr. NUNN. Will the Senator from Tennessee allow me 2 minutes here? I want to pose a couple of questions to the Senator from Louisiana.

Mr. BAKER. Yes, Mr. President.

Mr. NUNN. Mr. President, last night, he posed a question to the majority leader and the majority leader answered him very frankly and candidly, but the answer left us in some degree of confusion. The question was, if we wanted to help the President last night, should we vote for the continuing resolution that he wanted to veto, or should we vote against the continuing resolution that he wanted to veto because of some bad points. Did the Senator from Louisiana ever get the answer to that question? Can he clarify it now?

Mr. JOHNSTON. I think the answer now——

Mr. BAKER. Mr. President, would the Senator let me answer the question?

Mr. NUNN. I would prefer to hear the Senator from Louisiana first.

Mr. BAKER. Mr. President, if I were in the courtroom, I would object on the hearsay rule, but I shall let them go ahead.

Mr. NUNN. I will ask another question in a moment.

Mr. JOHNSTON. Actually, the question was asked of the distinguished Senator from Illinois (Mr. PERCY), who said that that question addressed itself to the conscience of each Senator individually. Incredibly, the conscience of all the Senators on that side said no and the conscience of all the Senators on this side said yes—or maybe it was vice versa. I cannot understand why a question of conscience should have been decided on party lines.

Mr. NUNN. Mr. President, what I want to ask is that last night, we were told if we wanted to help the President, what we should do is send him a bad bill which he condemned so he could veto it. Now it is my understanding that we have a continuing resolution from the House that the President agrees with. If the logic last night was that we vote yea and send him a bad bill which he can veto, does that mean the logic today is to vote nay, because it is a good bill that pleases him?

Mr. JOHNSTON. To be consistent, Mr. President, I would say that is where the logic lies. [Laughter.]

Mr. BAKER. Mr. President.

The PRESIDING OFFICER. There will be order in the Senate. The Senator from Georgia has the floor.

Mr. NUNN. I would like the Senator from Louisiana to complete the answer so we can all be clear on this subject.

Mr. JOHNSTON. Mr. President, if the Senator is in a search for consistency, I think he will not find it anywhere in the city of Washington today. Frankly, the whole thing is totally mystifying to me, why this artificial crisis should have been created. I read in the paper today that the President had sent word to all the agencies only to come to work with a view to shutting down to create this great air of crisis. A crisis? Why?

I hear the President being very critical of the Congress for irresponsible actions which they have taken. Well, just who passed that resolution last night? Who was irresponsible last night? Not I. Not the Senator from Georgia. Just who was it that was so irresponsible?

Mr. BAKER. Mr. President, all I can say is if you want to clarify this and help the President, let me bring this message in from the House.

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, is there further morning business?

The PRESIDING OFFICER. Is there a request for further morning business? If not, morning business is closed.

THIRD CONTINUING APPROPRIATIONS, 1982

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House just received.

The PRESIDING OFFICER. The clerk will state the continuing resolution by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 368) making further continuing appropriations for the fiscal year 1982.

The Senate proceeded to consider the resolution.

Mr. BAKER. Mr. President, I have no idea how long the Senate wishes to debate this matter. There is one amendment to the resolution which was adopted, other than the date change. I recommend that the Senate make no change at all and that the Senate concur in the resolution as passed by the House of Representatives.

Mr. President, may I inquire of the distinguished minority leader or managers of the bill how long we may take on this? I am prepared to enter into a time agreement. Sometimes that prolongs the debate rather than shortens it. It is now 4:15 or a little after. I know some Members here, perhaps all the Members in the House, are trying to make their plans, at least in part, based on how fast the Senate deals with this matter.

Could the minority leader indicate to me whether it will be possible to have a time agreement for the consideration of this resolution?

Mr. ROBERT C. BYRD. Mr. President, I think that it should be agreed to go to vote no later than 5 p.m. today.

Mr. BAKER. Mr. President, I ask unanimous consent that the vote on this measure occur no later than 5 o'clock and that the time between now and 5 o'clock be divided equally, if it is agreeable to the minority leader, between the two managers of the resolution.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HART. Mr. President, will the Senator from Tennessee yield for a question?

Mr. BAKER. Yes.

Mr. HART. I wonder if the distinguished majority leader would care to outline in brief terms what the resolution is so we know what we are voting on?

Mr. BAKER. Mr. President, the resolution is the product of a resolution introduced by the distinguished chairman of the Committee on Appropriations, I believe, on the House side—Mr. WHITTEN, to provide for a continuing resolution at the levels of the continuing resolution which expired at midnight on November 20 forward to February 1, as amended by a motion to recommit by the distinguished minority leader in the House, with instructions for the committee to report back for it with that same resolution with a December 15 expiration date instead of a February 1 expiration date; and adding one amendment.

The House added one amendment dealing with funding levels for public service hospitals and clinics.

Mr. HART. So, in a word, would it be accurate to say that this resolution will continue the operations of the Government at the same levels as they were operating at before the debate this week?

Mr. BAKER. Yes.

Mr. HART. I thank the majority leader.

Mr. EXON. Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, I yield to the Senator.

Mr. EXON. Mr. President, I should like to ask a question of the majority leader. I should like to ask the majority leader, Mr. President, regarding the recommendations that he has just made to us. Before I ask the question, I wish to refresh the memory of my colleagues that I rose in similar fashion on Saturday a.m., sometime between 3 and 4 o'clock, and asked the majority leader at that time if the President would sign the continuing resolution that we were then debating if, indeed, the figures incorporated in the Byrd-Baker amendment were eventually accepted. The answer at that time by the majority leader was, yes, he could assure us that that would be the case.

I cast no aspersions at all on the sincerity of the majority leader at that time. I do not know what happened thereafter, but I happen to feel that the majority leader may have been let down somewhere along the line. He made that commitment to the Senate but I emphasize once again that I do not think the letdown or the change in signals was in any way anticipated by the majority leader; indeed, I would suspect that he would say there was no change in signals.

I ask this question: Can the majority leader assure us without any ifs, ands, or buts, or can he make an unequivocal assurance to the Senate that, if we go along with the measure now before us, which is what many of us on this side of the aisle wanted to do several days ago and which most of us on this side of the aisle, indeed, wanted to do last night, to eliminate this fake chaos in Government—basically, can the majority leader assure me, without any exceptions, that the President had made a firm commitment to sign this conference report and not veto it if we pass it?

Mr. BAKER. Mr. President, may I say in response to my friend from Nebraska that, indeed, he is correct in his surmise. I will contend—I contended then and I assert now—that the representation made by me to the Senate, and the representation made to me by the President were abided by and were never changed. That is to say, if the Senate concurrent resolution as amended by the Baker-Byrd amendment, were adopted—that is, survived conference—the President would sign it. Mr. President, it did not survive conference.

While it is true that, on the late evening of the final night of the conference, there were many who asserted that the numbers that were adopted by the conference report were the equivalent of the Senate-passed bill, on careful examination it was determined that they were not the equivalent of the Senate-passed bill—not because anybody was deceitful or trying to deceive, but, rather, because the House has assumed one base for computation, the Senate bill assumed a different base. Thus there was a difference of numbers that amounted to something in the range of $2 billion. It was on that basis that the President vetoed the bill.

The President. however, was constant in his position. He would have signed it had those numbers survived. He never wavered from that commitment.

Mr. President, I am prepared to tell the Senate now and I do represent to the Senate that if this resolution is adopted without amendment, the President will sign it.

Mr. EXON. Mr. President, I thank the majority leader very much. If that is a direct answer, then I think we can understand and I am sure that this one Senator therefore will enthusiastically vote for this amendment. I only wish that we could have done it last night to stay away from all these theatrics.

Mr. SARBANES. Will the Senator yield?

Mr. EXON. I shall yield in just a moment, Mr. President.

When the majority leader was speaking, I noticed the distinguished chairman of the Committee on Appropriations sitting in his chair. I meant to ask him a question last night and since it was brought up once again, I wonder if the head of the Appropriations Committee would respond to a question.

I should like to ask him, as a point of reference, at 1:30 in the morning, or thereabout, on Sunday last, when he and all the other members of the majority side on the conference committee signed that report—the head of our conferees, the distinguished chairman of the Appropriations Committee—were he and the other conferees led to believe at that time, when they signed that report, that the figures imposed and anticipated in the Byrd-Baker amendment were in fact the consensus of the reporting committee?

Mr. HATFIELD. Mr. President, I say, in response to the Senator from Nebraska, that we left that conference with high expectation that that would satisfy all the parties involved. But I must always say that I have been in this business now for 30 years, and I never count anything for certain until the signature is on any document or until the last vote is counted.

However, I want the Senator to know that there was high expectation that this would satisfy the criteria laid down by the administration and which was reaffirmed by the Senate action taken in our own bill, House Joint Resolution 357—that is, our version of the bill we took to conference.

I will say, too, that along the way there had been some ongoing disagreements among the computers, as I said last night, that there were certain data that we did not agree upon. It did indicate the possibility of the results we then finally experienced. We had hoped that we could overcome those disagreements of the data between the computers and get the bill signed.

Mr. EXON. I thank my good friend. I should like to ask one follow-up question.

In the opinion of the chairman of the Appropriations Committee, were the figures that were finally reported to the Senate by the House and the conference report substantially different from those that were embodied in the Byrd-Baker compromise?

Mr. HATFIELD. There was a $400 million differential in budget authority as we computed our budget authority. We went into that conference with $428.4 billion, and we came out of the conference with $427.8 billion.

Therefore, in effect, we were $400 million under the Senate version. Actually, it was $600 million. I said $400 million, and I misspoke myself. It was actually $600 million under.

Again, there has been a reconfiguration of those accounts and those titles within the conference. There is no question about it. We did make some changes in the accounts and titles. Having made those changes, the reaction of the administration was that it had greater impact on the real spending than the original figure.

Let us bear in mind that the budget authority, the BA, is what the House works on, and that is what we work on to a lesser degree; but we still have our emphasis in the Senate Appropriations Committee on budget authority. But, again, the OMB has historically worked more with the budget outlay factor. We know that the difference between budget authority and budget outlay can be great or little, depending on the rate of expenditure, and so forth. But from the budget authority standpoint, we were $600 million under the Senate version.

Mr. EXON. I thank my distinguished friend and colleague from Oregon, for whom I have the highest respect.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, I listened to the President of the United States this morning with admiration and with interest and with amazement—admiration because the President was able to put the matter in a very simplistic context, focusing on a somewhat irrelevant aspect of the whole problem and of course leaving the viewing audience for the most part, I suppose, with the idea that here the President was battling to veto a bill that constituted budget-busting figures, Mr. President, let us see if we can take a look at this picture in its proper context.

The country is faced with a drain on the Treasury, resulting from the Kemp-Roth tax cut, of $38 billion this year, $93 billion next year, $150 billion the third year, $199 billion the fourth year, and $268 billion the fifth year—making a total of about $749 billion.

We are faced with a recession. We are faced with high interest rates. We are faced with unemployment that is now at 8 percent. We are confronted with bankruptcies that are running 41 percent or 42 percent above last year—roughly 15,000 bankruptcies to date. We are faced with massive deficits down the road, as a result, in large part, of the enactment of the multiyear Kemp-Roth tax cut.

Now the administration realizes that it is up against these prospective massive deficits, but it wants to make people believe that those deficits will have been caused by an uncooperative Congress, by a Congress that is passing "budget-busting" bills, and that the President is saving the country by having vetoed a budget-busting continuing resolution that was $2 billion above what he wanted.

The President referred to the continuing resolutions that have been passed from time to time. He refers to those as "budget busters." He stated that Congress ought to pass the appropriation bills. He refers to them as budgets.

The previous Presidents had the same problem, but they, from time to time, also had to accept continuing resolutions; but in this case, the President was not going to accept it.

Now, was it a budget buster? The amendment that was offered by Mr. BAKER, which called for a 4-percent cut, exempting defense and certain other categories, would have saved, in the words of Mr. BAKER, $3.2 billion. The President stated that the conference report that had been passed by Congress and sent to him would not save enough to meet his requirements.

What was the difference? The amendment by Mr. BAKER would have save $3.2 billion. The conference report that was agreed to by Congress would have saved $2 billion. So there is a difference of $1.2 billion. What is $1.2 billion when we are talking about $428 billion, which was involved in the whole conference report? It is one-fouth of 1 percent of the total—$1.2 billion as against $430 billion.

So what the President was doing here was vetoing a measure because it was $1.2 billion under what he said he would accept—meaning the Baker proposal. He said he would accept that amendment. Now he vetoes the measure because it is $1.2 billion below that figure and yet represents only one-fouth of 1 percent of the total.

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I will yield in a moment.

Mr. President. what we have is what I said this morning was a manufactured

shoot-out at the OK Corral, and that is what it was.

Last night, we witnessed on this floor the adoption of a conference report that was supported by 44 Republican Senators. They had worked hard in conference; they had acted in good faith in conference. All the conferees on the Republican side, except one, signed the conference report, and all the Republican Senators who voted last night, with the exception of six, voted for the conference report.

So the President then vetoed that measure, which had been supported by the overwhelming majority of Republican Senators.

What is the real problem confronting the country? The real problem is the recession that has been brought on by the Kemp-Roth tax cut, the high interest rates, and the looming prospective budget deficits down the road that will result in large measure from the enactment of the Kemp-Roth tax cut which was rammed through Congress by the administration.

The administration is in trouble because of the high interest rates, because of the sluggish economy, and because of the recession.

So now it seeks to distract the attention of the people away from the recession, unemployment, and high interest rates and make the people believe that the $1.2 billion by which the conference report fell short of what the President said he would accept in the form of the Baker amendment was a "budget buster" and that a veto of that measure is some big deal.

The President blames Congress because the appropriations bills have not been passed and sent to him.

Mr. President, I hope that we will focus on the real problem. The administration needs to get its economic house in order. It is in disarray. The Republican majority in the Senate voted overwhelmingly for the conference report that the President vetoed. Why? We on this side said last night in this Chamber that if the conference report were rejected, the other body would immediately initiate another continuing resolution providing for an extension of the date and the Government would not begin shutting down this morning at a cost to the taxpayers of something like $1 billion, I am told.

So where we are now is where we were last night. We have a continuing resolution that has a date of December 15, only 3 days short of the date of December 18 which this Senate rejected when it was offered as an amendment by me on behalf of the Democratic minority a few days ago. We sought then to extend the date to December 18. We were defeated on a party line vote. Now the resolution before us calls for a December 15 date.

Mr. President, we could have had this same resolution last night if the Republican majority had joined with the Democratic minority and voted down the continuing resolution.

The House of Representatives would have sent over another resolution immediately. The House of Representatives stayed in session until after the Senate went out last night. The House of Representatives was still in session.

No, we heard the cry from some on the other side of the aisle that "I do not like this conference report, it is all bad, but the President is going to veto it and I am going to vote for it so the President can veto it."

What kind of reasoning is that?

I think it was clear that the stage was set for a Presidential veto and that was the way the script ran.

The vote was for the continuing resolution which the President had pledged to veto. Flying in the face of that threat from the President, the majority of the Senate voted for the continuing resolution. The President vetoed it. The President went on television and he presented himself now as having saved the country from a "budget-busting" measure foisted on him by "the Congress."

Mr. President, I hope that the American people will see through this charade.

We could have had this same resolution last night before we went home, and the Government workers today would not be calling in on the telephone asking whether or not they are going to get their pay checks.

Mr. President, I intend to vote for this continuing resolution extending the date, but I wish to ask the distinguished majority leader a question.

The PRESIDING OFFICER. The time under the control of the minority leader has expired.

Mr. ROBERT C. BYRD. I wish to ask the majority leader a question.

The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. Mr. President, I am very happy to yield time to the minority leader for asking his question as soon as we locate the majority leader and get him back to the Chamber.

Mr. President, I yield 2 minutes to the distinguished minority leader.

The PRESIDING OFFICER. The minority leader is recognized for 2 minutes.

Mr. ROBERT C. BYRD. Mr. President, I have heard and seen the President twice on television blaming Congress for not sending the appropriations bills down to him.

There are on the Senate calendar four appropriations bills—Labor, HHS, Defense, military construction, Treasury, and Postal Service. The Defense appropriations bill is scheduled for next Monday by order of the Senate.

As I understand it, the conference report on the Interior bill has been adopted by the House of Representatives and is ready to be taken up in the Senate.

May I respectfully ask the distinguished majority leader whether or not he intends to call up these remaining appropriations bills and act on them if at all possible before the December 15 date which is contained in this resolution?

Mr. BAKER. Yes, I do.

As the minority leader knows, the Defense bill is set for November 30. State, Justice, Commerce has been temporarily laid aside and will recur as the pending business on a call for the regular order. Treasury has not yet been set. Military construction will be scheduled soon, and I am told by the chairman of the committee it will take perhaps half a day.

Mr. President, it is my intention to try to complete all of these bills before the expiration of the continuing resolution.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader. I hope we can do that because I do not think that Congress should continue to be blamed for not having sent these measures down to the President.

The House of Representatives has acted on all but one of the appropriation bills. The Senate Appropriations Committee, under the leadership of the very able chairman, Mr. HATFIELD, has acted dutifully on all the appropriations bills, and reported them all to the calendar.

The PRESIDING OFFICER. The 2 minutes yielded to the Senator from West Virginia have expired.

Mr. ROBERT C. BYRD. I respectfully urge the distinguished majority leader to call up the appropriations bills as soon as he possibly can. This side of the aisle has been ready to act on them so that the President will get the appropriations bills and this will go a long way toward resolving the——

The PRESIDING OFFICER. The time yielded to the Senator from West Virginia has expired.

Mr. ROBERT C. BYRD. This will go a long way toward resolving——

Mr. HATFIELD. I am happy to yield.

Mr. PERCY. Does the Senator have time to yield?

The PRESIDING OFFICER. Who yields time?

Mr. HATFIELD. Mr. President, I yield how much the Senator wishes.

Mr. ROBERT C. BYRD. Just long enough to complete my sentence.

Mr. HATFIELD. I yield another minute to the minority leader.

The PRESIDING OFFICER. The Senator from West Virginia is recognized for an additional minute.

Mr. PERCY. Does the distinguished floor manager have time to yield?

Mr. HATFIELD. I have time to yield. We have not used any time. I have yielded time for the asking of a question.

Mr. ROBERT C. BYRD. Mr. President, it seems to me that if we were to finish action on these appropriations bills, at an early date, it would go a long way toward relieving all of us of the problem of a continuing resolution.

Mr. HATFIELD. Mr. President, I yield to the majority leader the time he needs.

Mr. BAKER. Mr. President, the minority leader is right. This side of the aisle has been most cooperative in getting these bills up. I attach no blame to them nor indeed to the Senate.

I believe we could finish these appropriations bills in a relatively short period of time, and I assure him and all Senators that we will attempt to do that.

The PRESIDING OFFICER. Who yields time?

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

Mr. HATFIELD. Mr. President, what is the time situation?

The PRESIDING OFFICER. The Senator has 15 minutes and 40 seconds.

Mr. ANDREWS. Mr. President, will the Senator yield?

Mr. HATFIELD. I yield to the Senator from North Dakota.

Mr. ANDREWS. Mr. President, I appreciate my chairman yielding.

Briefly, following up the remarks of the distinguished minority leader, some of us on the Republican side of the aisle, of course, were conferees and we signed the conference report when we felt the President was in favor of the bill. But we signed it largely because we thought it was a good bill, and after the President's announcement about a veto came down we voted for it irrespective of the veto announcement because we still thought it was a good bill.

Might I point out to the distinguished minority leader that the continuing resolution we are now voting on is less of a budget buster than the one we voted on 2 days ago. It is under the original target. As a matter of fact, the continuing resolution we are now voting on will carry on nondefense spending to the tune of about $3 million a day less than the one that was vetoed and, of course, defense spending will be less.

The reason I wanted to pose a question to the chairman of the Appropriations Committee is that people in the Federal buildings in my State have been leaving in droves. The Department of Agriculture offices and the social security offices are not staffed. In fact, my own staffs in the Federal building have been told, "do not come in, in the morning because we are not going to have anyone to heat the building. We cannot turn the lights on. We cannot open the door."

I find this to be a bit of theatrics more than anything else. I wish to ask the chairman of the Appropriations Committee whether these Federal employees will, in effect, be paid for this hiatus of a day or two, or whether they are going to have their pay docked in their next pay envelope?

Mr. HATFIELD. Mr. President, I respond by quoting from the language of the resolution that we have pending before us now which in effect says that we will strike out the November 20, 1981 expiration date and insert in lieu thereof December 15 which means that we go back and pick up the hiatus, eliminate the hiatus and continue at 1981 level of spending.

So consequently those employees thereby could be paid under the continuity established by this continuing resolution.

Mr. ANDREWS. So that the evening news could tell those Federal workers that they are not going to find a shortage in their paycheck irrespective of all of the headline hunting from both sides of the political aisle that seem to have been going on in the last 48 hours?

Mr. HATFIELD. I hope that the communication could be set up that would relieve that anxiety for all those Federal employees who now feel that they somehow are going to be reduced for that period of time that they have been sent home.

Mr. ANDREWS. I appreciate the comments of the chairman.

Mr. SARBANES. Mr. President, will the chairman yield for a comment at this point?

Mr. HATFIELD. We have not had the floor until just now. Let me fulfill my commitments to those to whom I have promised to yield, and if we have additional time I am happy to yield to the other side.

Mr. SARBANES. Fine. I wished to commend the chairman on some of his work.

Mr. HATFIELD. I am very happy to yield for that any time.

Mr. SARBANES. I simply wish to commend the chairman for that response to what I perceive to be a manufactured crisis that created this turmoil today. I appreciate the response which the chairman has just given. As I understand it, the chairman and his conferees sought to avoid a crisis with a continuing resolution to begin with. They were, in effect, disappointed on that.

We could have done last night what we are doing now, which would have avoided the crisis. But I do appreciate that it does go back and pick up and that, therefore, reassurances can be given to the employees.

Mr. HATFIELD. I appreciate the remarks by the Senator. I know the Senator represents a great number of such people and is very careful to look after their best interests.

I agreed to yield to the Senator from Washington next.

Mr. GORTON. I thank the Senator from Oregon. I wish to echo briefly the remarks of the distinguished Senator from North Dakota in stating that I, too, voted in favor of the continuing resolution last night not with a desire for the President to veto it, but because I felt it represented a responsible approach and a responsible compromise between the Senate and the House under very, very difficult circumstances.

During the course of a relatively limited debate last night, there seemed to be a general assumption on the floor of the Senate that success in the process of writing a continuing resolution was measured by the degree to which the proposed 12 percent across-the-board cuts in discretionary programs recommended by the administration in September were actually reached. Along with the chairman of the Appropriations Committee, I disagreed with that presumption.

That success, I suppose, was to be related to the necessity or the goal of reaching a balanced budget at some time in the future. But any such success on such a limited basis could have been no more than a mirage, as the contribution to a balanced budget of the difference between what was passed here last night and what the President asked for was so different, as far as I am concerned, as simply to have been de minimis, as well as unfair in singling out for cuts, for the third consecutive time after reconciliation, after what the Appropriations Committee had done, exactly the same programs which have been cut already twice during the course of this year.

In my view, it is still appropriate, it is still necessary, for this Congress to aim at a balanced budget in 1984. I am unwilling to give up that goal. But we will not reach that goal until we are willing to take on courageously the fact that it is necessary not just to look at discretionary appropriations, 10 or 15 percent or less of the overall budget, but to look at the growth in expenditures for national defense and to look especially at the growth and the rate of entitlement spending, perhaps the most difficult problem which will face this Congress but the single area of spending which is the largest. And, also, very bluntly, to look at the necessity for additional revenues coming from some sources other than the personal income tax of last summer.

When that takes place, we will balance the budget, we will control inflation and control interest rates truly. What we are doing here today to clean up after this minor mess of last night is a show but it is not the substance of the changes we need. I commend the chairman of the Appropriations Committee.

Mr. HATFIELD. I thank the Senator from Washington State. I yield to the Senator from Wisconsin for 1 minute.

Mr. KASTEN. I thank the chairman.

The Senator from Washington is correct. I think all of us understand that we have to get revenues and entitlements under control and that we are only whittling down one very small part of the overall budget.

The Senator from North Dakota is correct when he says we are spending at a higher rate. That is why we were successful in getting the December date rather than the February date the House of Representatives would have preferred. But I think it is also important to recognize that the President vetoed this bill not only because we did not reach the goals he sought, but also because of the fake savings that were in the bill. It is important to recognize that account after account was underfunded—these are entitlement accounts—and we would have to pay this money eventually in a supplemental. That is the key. The President said he is not going to stand for this kind of fake accounting.

I think if there is one thing the President has demonstrated it is that he is a man of his word. He is going to keep his commitments. And whether it is with the air traffic controllers or if it is the Libyans attacking our Air Force fighters, or what have you, this is a man who is going to stick to his guns. The amount might be small, but the message to the American people is great.

The PRESIDING OFFICER. The 1 minute yielded to the Senator has expired.

Mr. KASTEN. May I have 30 additional seconds?

Mr. HATFIELD. I yield 30 seconds more.

Mr. KASTEN. Mr. President, the misstatements creating yet more misunderstanding with reference to the U.S. Government's foreign assistance policy continue today.

We in the Senate have worked hard, and I think successfully, to continue the

tradition of a bipartisan approach to foreign policy. That has especially been the case with actions taken by both the Foreign Relations Committee and the Appropriations Committee.

The continuing resolution now before us is a simple extension of the previous stopgap funding mechanism—I emphasize "stopgap." When this resolution was first approved on September 30, it was looked upon simply as a temporary measure until the regular appropriations bills were passed.

With reference to the foreign assistance programs, the language of the resolution, which sets a rate at the lower of the fiscal year 1981 rate or the fiscal year 1982 budget request, provided for a markedly reduced level compared to the previous fiscal year. At the time this presented no concern because it was considered to be, again, a temporary stopgap measure.

Mr. President, the level of funding for foreign assistance in this resolution is approximately $9.6 billion. This compares to a House reported bill of approximately $11.1 billion, a Senate passed bill of approximately $11.6 billion, and a level of spending for fiscal year 1981 of more than $12.2 billion. As these figures show, the Senate passed appropriations for foreign assistance are below last year's funding, not above as is being bandied about from one end of the Capitol to the other. It is especially interesting to note that the House Appropriations Committee's own bill for foreign assistance, as reported by that committee, is $1.5 billion more than the stopgap funding measure.

Mr. President, I hope that the short time this resolution is in effect will allow for a needed cooling of tempers and some soul searching by some who for short-term benefit would jeopardize U.S. foreign interests around the world.

Mr. HATFIELD. I yield 2 minutes to the Senator from Idaho.

Mr. McCLURE. I thank the Senator for yielding.

I take this time only because I am afraid of the misconception that is brought as to the meaning or the intent or what might be read into the way the resolution last night was presented and ultimately voted upon. And I regret that. Maybe my words are going to fall on deaf ears and maybe it is impossible to convince people that the seeming meaning of events do not really mean that.

It has been suggested that there was a scenario intended for a veto; that that was tied to the package all along. But I can tell the Members who are nodding their heads so vigorously now that they are utterly wrong. And I mean that most sincerely.

Having been involved with the attempts in the Appropriations Committee, within the leadership on this side of the aisle and in their conversations with the people from the administration, I can say that well past noon on Sunday the efforts were still going on to avoid a veto. And yet, when we got through last night, by the time we got into the vote, we found out that the people who were voting for the resolution were against it and all those who were against it were voting for it.

Well, that is not quite right, because we had a few that actually cast their vote on the side they felt about that particular resolution. But, if, as a matter of fact, the minority leader is going to tell us today that because we voted for it we must have been in favor of it, then I would assume that everybody on that side of the aisle who voted against it was opposed to it. As a matter of fact, that is not true.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. McCLURE. The circumstances just kind of inverted that and for many of us it was a hard choice. The choice that I had was simply: How in the world do you get to the point of clearing away the wreckage so that you can start in building a consensus on a continuing resolution that we can all support before we adjourn? Believe me, there was no intention that I could devine from anything that I saw in the negotiations that were going on that intended that we come up with a product up here which the President could then veto.

The PRESIDING OFFICER. The 2 minutes yielded to the Senator have expired.

Mr. HATFIELD. I yield 2 minutes to the Senator from Illinois.

Mr. PERCY. Mr. President, I would like to address my remarks to the distinguished minority leader, who has called this activity in the White House a "charade." George Elliott said, "Leave us not inquire into the motivations of man." I feel that the motivations of the President were sincere. He felt deeply about this important issue.

First of all, the conference resolution reflected less than 25 percent of the $8.5 billion reduction request that he made.

The President reached agreement with the Senate when we went 50–50 with him and settled on a $4 billion cut. That was subsequently reduced to less than half of the agreed upon figure.

After all, as Everett Dirksen used to say to us frequently, "A billion here and a billion there and pretty soon you are talking real money." And $2 billion is a signal. If we cannot increase this amount this fiscal year, then we are not going to cut the $75 billion that he has asked for in 1983 and 1984.

Second, I think that it is terribly important that we all recognize that we have decimated the fiscal year 1982 foreign economic and military assistance program. We have truly undercut our ability to carry on our security interests in the Free World, to protect the Persian Gulf and carry on programs that we have committed ourselves to that we have worked on for one solid year, and that we have already ourselves cut this administration request by $900 million.

So I believe the President is not only sincere. As I said last night I voted to send the bill downtown because I felt the President should veto the bill himself. If he is going to bring the Government to a halt, he is the Chief Executive of the executive branch of Government, and he has the responsibility to unwind to this issue as he did with the Cabinet this morning.

I felt he ought to have that responsibility because the Congress had reached an impasse, we had conflicting figures, and this is what the President indicated he wanted to do. He was willing to send this signal—a near shutdown of the Federal Government—to the country. That is how serious he considered the matter and how dramatically he wanted it underscored.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. PERCY. I have no time remaining to yield.

Mr. ROBERT C. BYRD. The Senator referred to me.

Mr. PERCY. I would be happy to yield if I have any time remaining.

The PRESIDING OFFICER. The Senator from Oregon has 2 minutes remaining.

Mr. HATFIELD. I yield 1 minute to the Senator from Alaska.

Mr. STEVENS. Mr. President, I just want to make very plain one item, within the continuing resolution before us and see if the Senator from Oregon agrees with me. I have been made aware that many Federal employees were furloughed and told to either take leave or they would not be paid today. It is my understanding that the Senator said—and I believe it is our intent—that this continuing resolution goes back to the expiration on November 20. Therefore, there is to be no hiatus in the Government or in the payment of salaries to Federal employees. This is in effect a retroactive application of this resolution.

Mr. HATFIELD. The Senator is absolutely correct. That is legislative intent. I would not presume to make a legal ruling, because I am not qualified to do so. But that is the legislative intent.

Mr. President, I yield 30 seconds to the Senator from New York.

Mr. MOYNIHAN. I thank the distinguished chairman.

Mr. President, to set the record straight, I voted against the joint resolution originally last evening, but then, on the impression which the Senator from Idaho has rather confirmed this afternoon that a great many persons voting for it were actually against it, I changed my vote in order to ask that there be a vote on reconsideration. Alas, that was not successful and we are where we are today where we could have been last evening. I thank the Senator.

Mr. HATFIELD. I yield 30 seconds to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I join in commending the Appropriations Committee on its good faith effort, but I share the feelings that have been expressed here that this situation has all the earmarks of a publicity stunt.

My office in Boston has been trying to help an elderly woman who had arranged to obtain a passport on an emergency basis to visit a relative in the Middle East. She drove 50 miles from New Hampshire to Boston to get the passport. But the passport office in Boston was closed this morning.

It was closed here in Washington as well.

Real people are being hurt. I am very hopeful that we are not going to go through this kind of a charade again in mid-December.

The PRESIDING OFFICER. Twenty seconds remain.

Mr. HATFIELD. Mr. President, I just want to point out again that it is absolutely necessary to pass this in order to give us the breathing time, in order to get back to the drawing board. December 15 will keep the continuity of our Government.

Mr. President, I have no time left. Both sides are out of time.

The PRESIDING OFFICER. All time has expired.

Mr. BAKER. Mr. President, could I inquire of the minority leader, is there a requirement for more time on this side? I am prepared to ask for more time.

Mr. ROBERT C. BYRD. Does anyone else wish to speak?

SEVERAL SENATORS. Vote.

Mr. BAKER. Mr. President, I ask unanimous consent that the minority leader be recognized for 2 additional minutes.

The PRESIDING OFFICER. Without objection, the Senator from West Virginia is recognized for 2 additional minutes.

Mr. ROBERT C. BYRD. Mr. President, may I say that the conferees on both sides of the aisle worked hard and in good faith. I would not want anything I have said to be construed as applying to the conferees, and particularly those who led the fight, Senator HATFIELD and others on both sides. I think they fought hard for the resolution. They voted for the continuing resolution last night in good faith. They thought it was a good conference report. I understand there was a lot of consternation and a considerable amount of anger among Republican conferees when they heard that the President was going to veto the conference report after they had worked so diligently, so long, so patiently, and so dedicatedly in behalf of it.

Last night, I indicated I was inclined to support the conference report until I heard an argument on the part of a Senator or so across the aisle who were not conferees, but who said they were going to vote for it because the President was going to veto it.

Mr. PERCY has put his finger on one item when he says that he regrets the conference report last night did not go far enough on foreign assistance. I think that was probably one of the things that the President had against the conference report. I understand he wanted another $1.5 billion for foreign assistance, and was willing to cut the domestic programs in order to get it, although he left that out of his speech this morning.

I thank the distinguished Senator from Illinois (Mr. PERCY) for stating that for the RECORD.

Mr. EAGLETON. The conference report on the first continuing resolution stated:

The conferees wish to stress that the continuing resolution maintains the current levels of participation for the Special Supplemental Food Program, known as "WIC", and the Commodity Supplemental Food Program (CSFP). Any efforts to reduce funding allocations to the States, thereby affecting levels of participation, would be clearly contrary to the provisions of the joint resolution.

It is my understanding that under the new resolution these directives remain in effect. Is that correct?

Mr. HATFIELD. Yes; since we have only changed the operative date of the original resolution, all directives contained in the body of that resolution and in the joint explanatory statement of the committee of conference remain in force for the period of this resolution.

Mr. EAGLETON. There has been some suggestion that the first resolution may have funded the WIC program at only a rate of $720 million a year which would cause massive reductions in caseload. Such an interpretation seems clearly at odds with both the requirements of the resolution that current participation levels be maintained and with the provisions of H.R. 4119 as passed by the House, which provided funds to maintain the September 1980 participation levels for WIC. Is it correct that the resolution we are considering here today provides funds for the WIC program at a rate necessary to maintain the current food packages for the participation levels in effect at the end of fiscal year 1981, the September participation levels, rather than at the sharply reduced rate of $720 million?

Mr. HATFIELD. It is my understanding that the first resolution, Public Law 97–51, funded the activities of the Department of Agriculture under the levels provided in H.R. 4119, as passed by the House, or at the current rate, whichever was less. The House-passed version of H.R. 4119 provided $1,069,000,000 for these programs which was more than what was necessary to maintain the September caseloads. It is clear that Public Law 97–51 required maintenance of the September 1981 participation levels for these programs.

Mr. EAGLETON. Is it correct that any action to delay allocations to States of WIC or CSFP funds that causes States to shut their programs down or cut their caseloads would be contrary to the resolution and to the requirement that participation levels be maintained?

Mr. HATFIELD. Yes, that is correct.

Mr. HAYAKAWA. Mr. President, the resolution which the House of Representatives has passed, and sent to this body for action, continues the functions of Government on a temporary basis presumably until Congress can submit to the President a long term resolution that is acceptable to him. We all know what the criteria are for such a resolution; all we need to do is agree that it must be done. The current legislation will allow the Congress to take a deep breath and begin again, with the knowledge that our President is serious about the economic program we have embarked upon.

That is not to say that I support this kind of legislating. I voted in favor of the conference report to House Joint Resolution 357, not because I thought it was an acceptable product, but because I wanted the President to send the clearest message possible to the House of Representatives and the appropriations conferees that any funding measure which violated the economic recovery program requirements would not be tolerated. He sent that message when he vetoed the resolution.

I will vote for the resolution currently before us because the Government must continue, but we must come to grips with the longer term problem of reducing spending. I hope that this short term resolution will give all parties involved a time to reassess the situation and present both the Congress and the President with a responsible measure.

Mr. HATFIELD. Mr. President, I ask unanimous consent that there be printed in the RECORD at this point a table illustrating the funding levels provided under House Joint Resolution 368, which is the extension of the existing continuing resolution; those provided under House Joint Resolution 357, the continuing resolution passed by the Senate Friday morning; and those provided in the conference agreement on House Joint Resolution 357, which was vetoed by the President early this morning.

In asking that this table be printed I am not seeking to prolong the debate on outlay estimates. That issue will need to be resolved, and I have every expectation it will be, but at this time my only interest is to inform Members as to the various differences in budget authority available under the continuing resolution which we are today extending to December 15.

Another point that has been raised in the discussion does need further elaboration. It has been stated several times that the level of $428.4 billion in budget authority provided in the Senate-passed version of House Joint Resolution 357 was a level acceptable to the President, and an amount in excess of that level would not be signed.

I want to stress, Mr. President, that the level of $428.4 billion is a target only for House Joint Resolution 357, and should not be construed as a ceiling on spending for the entire fiscal year under regular appropriations bills. Our only ceiling at this time is our allocation under the first concurrent budget resolution, which is $464 billion. So I hope that Members will not be under the misapprehension that individual appropriations bills for fiscal year 1982 will have to meet the levels specified in this table, individually or in total.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

	Public Law 97–51	Senate-passed H.J. Res. 357	Conference agreement H.J. Res. 357
Agriculture	$21, 599, 839, 000	$22, 709, 991, 000	$22, 665, 171, 000
Commerce	8, 148, 071, 000	8, 519, 831, 000	8, 564, 373, 000
Defense	171, 654, 869, 000	196, 712, 002, 000	196, 712, 002, 000
District of Columbia	490, 737, 600	557, 170, 000	546, 027, 000
Energy and Water	11, 648, 017, 000	12, 463, 930, 000	12, 222, 585, 000
Foreign operations	9, 575, 404, 871	11, 430, 624, 000	10, 075, 405, 000
HUD	60, 698, 970, 200	59, 908, 953, 000	60, 313, 060, 000
Interior	7, 492, 450, 000	7, 257, 976, 000	7, 392, 500, 000
L-HHS	83, 917, 472, 000	82, 470, 479, 000	83, 196, 742, 000
Military Construction	5, 331, 142, 000	6, 746, 792, 000	6, 216, 316, 000
Transportation	10, 327, 506, 439	10, 348, 437, 000	10, 407, 138, 000
Treasury	9, 735, 903, 000	9, 339, 134, 000	9, 624, 191, 000
Total	400, 611, 382, 110	428, 465, 319, 000	427, 875, 510, 000

Mr. MITCHELL. Mr. President, this morning, I sent word to the White House of a replacement nomination for a Maine delegate to the upcoming White House Conference on Aging. I was told that the White House office which handles these nominations could not do it because "no one is there."

I understand the President's desire to dramatize his budget priorities. But this is taking the Washington Monument ploy to new heights.

The Washington Monument ploy is the well-known executive branch game where a threat is made to shut down the venerable monument if a nickel is taken from the Park Service budget. The Congress has come to recognize and discount symptoms of this phony exercise over the past several years. I had hoped we might have moved beyond the need to play such irresponsible games.

But instead we are now faced with an allegedly unstaffed White House because Congress has failed to take $1.3 billion from domestic programs and put it into foreign aid, or because Congress has spent $400 million too much, or because Congress has spent $1.3 billion too much, or because some other figure is not to the President's personal liking. The figures are in dispute; their allocation is in dispute, and it seems that the White House cannot stick to one preference long enough for anyone to work out exactly what Congress should do to avoid a veto.

What is all this designed to prove?

Does it have anything whatever to do with economic problems or program needs or fiscal planning?

What will a $400 million or even a $1 billion cut now do to the $80 billion deficit we will have next September?

The President's veto of the continuing resolution needed to keep the Government operating has taken the budget question out of the realm of political debate and economic debate and straight into the sphere of political theater.

The latest act in this play has the entire nondefense Federal work force being furloughed because of a money difference that is less than one-half of 1 percent of the entire spending resolution.

The lost man-hours and wasted time in this manufactured crisis may well cost as much in the long term as these disputed savings numbers.

From an administration whose latest figures give us a deficit of $80 billion this year and well over $100 billion in the following years, this farcical public concern about big spending is difficult to take seriously.

The President has been on national television announcing that this resolution will cause economic disaster unless it is stopped. That is political melodrama of the least defensible kind.

What the President did not mention on national television was that he has been demanding that $1 billion more be cut from domestic programs, not to save money, but to give foreign aid. This is not just a matter of spending levels, whatever the disputed figure may finally be. It is a matter of spending priorities: The President's priorities demand $1 billion more for foreign aid. Congress disagrees.

If the President really believes foreign aid should be increased by $1 billion, let him say so directly. Let us debate it. That is the way policies and priorities are set in democratic societies. If he believes that domestic programs can be cut further, let him say where, precisely, those cuts should be made. The Nation is used to hearing pleasant-sounding generalities from the White House. It is used to hearing generalized scorn thrown at the last 35 years of economic policy. It is becoming adjusted to generalized predictions of economic disaster unless further spending cuts are made.

It is time for more detail and less theater from the White House. It is time the President explained why he thinks the last 35 years, which saw working people's incomes and living standards rise dramatically, are such a disaster that they demand a governmental counterrevolution. It is time he made clear just how a $3 trillion national economy will be affected if $1.3 billion is spent on domestic program rather than on foreign aid.

The simple fact of the matter is that this entire exercise in all-night congressional sessions, dramatic televised veto threats, and hurried emergency Cabinet sessions has been caused by nothing more than a desire to score some political points and deflect critical examination of what is actually happening to our economy.

On Sunday evening, the Republican leadership brought to the Senate a conference report which it endorsed—and which was put together with the help of Mr. Stockman and other White House aides—and denounced it as being too costly and deserving of a veto. So the vast majority of Republican Senators proceeded to vote for this too-costly bill, just as the President could veto it. What is that but pure and total political fraud?

I understand the exercise was based on a desire to let the President demonstrate his political strength by vetoing the bill and having his veto upheld. I have nothing against the President displaying his political strength anyway he sees fit. But to place Government in turmoil, to waste money on a fake close-down exercise, and to needlessly upset the families of Federal workers whose job status is thrown into doubt is to ask the entire country to pay for the political muscle flexing.

The sad fact is that no amount of muscle flexing will alter the reality. And reality has caught up with the unrealistic economic projections of the Reagan economic plan. Reality has brought us high interest rates, the worst housing situation since the Second World War, potential disaster to our auto industry, and the highest rate of small business bankruptcies in a decade. The reality is that inflation cannot be subdued without economic pain. And the further reality is that the Reagan economic plan makes the working people and the small enterprises of this country carry that pain.

It does not surprise me that the President wants to avoid any share of the responsibility for this outcome. What is surprising is that the Republican leadership of the Senate has so supinely gone along with this desire.

We could, far more sensibly, have simply extended the present continuing resolution further, without these theatrical displays, and avoided the entire scenario where Government work time is lost and confusion ensues for people in State and local governments and individuals who use Government programs. That would have been the sensible and right thing to do. We could have taken that action on Sunday night, and all of today's theatrics would have been unnecessary.

Instead, we have a situation in which the Congress will be attacked for failing to meet a constantly changing White House spending figure. The President will attack the Congress for failing to cut spending by a sum he has agreed not to request. He will attack Congress for not holding the line, while behind the scenes he argues for $1 billion more for foreign aid. He will blame Congress for high interest rates, rising unemployment, and economic recession. And he will dislocate the entire Federal Government in order to play out this charade.

We know we will enact a spending bill to keep Government operating. The President knows it too. And I would judge that most Americans know it as well.

So what does this exercise gain?

Apart from short-term political points, not much. What damage it does is another thing entirely.

A democratic society demands cooperation, compromise, consensus, and care in its governance. When comity between the branches of Government breaks down, when political rhetoric takes precedence over governance, the trust and confidence that people have in Government is eroded. It matters not if the short-term blame is placed on one or another political party or one or another Government institution. What matters is that the overall public trust is breached a little more, civil debate is lessened, and respect for Government is eroded. And that damage affects all of us, sooner or later, regardless of our political party, our philosophic preferences, or our economic projections.

It is regrettable that the President felt he could appeal to Americans in no other way than to engage in a manufactured crisis.

Mr. BAKER. Vote!

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the third reading of the joint resolution.

The joint resolution (H.J. Res. 368) was ordered to a third reading and was read the third time.

The PRESIDING OFFICER. The joint resolution having been read the third time, the question is, "Shall the joint resolution pass?"

Mr. BAKER. Mr. President, I ask for the yeas and nays on passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The joint resolution having been read the third time, the question is, "Shall the joint resolution pass?" The yeas and nays have been ordered and the clerk will call the roll.

Mr. BAKER. There will be no more rollcall votes tonight, Mr. President.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr.

GOLDWATER) and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. DURENBERGER) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Delaware (Mr. BIDEN), the Senator from Oklahoma (Mr. BOREN), the Senator from Arkansas (Mr. BUMPERS), the Senator from Florida (Mr. CHILES), the Senator from Arizona (Mr. DECONCINI) and the Senator from Montana (Mr. MELCHER) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from Oklahoma (Mr. BOREN) and the Senator from Montana (Mr. MELCHER) would each vote "yea."

The PRESIDING OFFICER (Mr. MATTINGLY). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 88, nays 1, as follows:

[Rollcall Vote No. 426 Leg.]

YEAS—88

Abdnor	Hart	Nickles
Andrews	Hatch	Nunn
Armstrong	Hatfield	Packwood
Baker	Hawkins	Pell
Baucus	Hayakawa	Percy
Boschwitz	Heflin	Pressler
Bradley	Heinz	Proxmire
Burdick	Helms	Pryor
Byrd, Harry F., Jr.	Hollings	Quayle
	Huddleston	Randolph
Byrd, Robert C.	Humphrey	Riegle
Cannon	Inouye	Roth
Chafee	Jackson	Rudman
Cochran	Jepsen	Sarbanes
Cohen	Johnston	Sasser

Grassley	Murkowski	

NAYS—1

Cranston

NOT VOTING—11

Bentsen	Chiles	Leahy
Biden	DeConcini	Melcher
Boren	Durenberger	Tower
Bumpers	Goldwater	

The joint resolution (H.J. Res. 368) was passed.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the joint resolution passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I want to take this opportunity to once again thank and commend the distinguished chairman of the Appropriations Committee, Senator HATFIELD, for the tireless and professional resolve which he exhibited throughout the last long, long week.

Senator HATFIELD has been a fixture of determination and intellectual insight; the Senate Appropriations Committee reported and managed a bill that was acceptable to the President. Unfortunately the conference report did not reflect the exact terms of the bill. It was not the fault of the Senate conferees; in order to get the agreement the Senate conferees had to give up more than the President was willing to accept.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business, not to extend past 5:45 p.m., in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

ADJOURNMENT OF THE TWO HOUSES OVER THE THANKSGIVING HOLIDAY—HOUSE CONCURRENT RESOLUTION 228

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on House Concurrent Resolution 228.

The PRESIDING OFFICER. The Chair lays before the Senate House Concurrent Resolution 228, which will be stated.

The legislative clerk read as follows:

H. CON. RES. 228

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on Monday, November 23, 1981, and that when the Senate adjourns on Tuesday, November 24, 1981, or on Wednesday, November 25, 1981, pursuant to a motion made by the Majority Leader in accordance with this resolution, they stand adjourned until 12 o'clock meridian on Monday, November 30, 1981.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 228) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, as I announced a moment ago, there will be no more record votes today.

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess untill 11 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I do not anticipate record votes tomorrow.

There will be a further announcement later this afternoon on other items of business that we may be able to transact today or tomorrow, but at this moment, that is all I have.

The PRESIDING OFFICER. Is there further morning business?

NATIONAL ADOPTION WEEK

Mr. DENTON. Mr. President, I am particularly pleased to call the Senate's attention to the fact that this week is National Adoption Week.

Adoption of the homeless young is an ancient custom. Yet, even in this compassionate Republic, which by international judgment has made at least a reasonable effort to deserve the title, "One Nation Under God," we have permitted obstacles undermining the custom of adoption. With millions of homeless or grossly neglected, unloved children, there were only 150,000 adoptions last year in the United States.

The majority of children adopted are healthy infants—white infants. This narrow classification of adoptees should be broadened, but even couples seeking to adopt in this classification have experienced long, frustrating delays and difficulties because many of those who traditionally placed their offspring for adoption are no longer choosing that option.

According to the latest calculations, no more than 4 percent of unmarried teenagers who give birth are choosing an adoption plan for their babies. Some estimate that there has been over a 50-percent decline in the number of these adoptions between 1970 and 1980. Moreover, the legalization of abortion has dramatically decreased the number of adolescents who give birth to the babies they have conceived. In 1979, nearly twice as many babies were destroyed in the womb as were carried to term by teenagers.

Unfortunately, many young pregnant girls do not know the positive aspects of adoption for a child. Many do not know that their babies can have an intact and loving family that can often provide a more secure and brighter future. Legislation I introduced and which has been signed into law—the Adolescent Family Life Act—seeks to reverse this regrettable trend in which our youth become parents before they become adults.

The program funded by the act will encourage voluntary adoption with discreteness and confidentialy afforded to the girls and their families who have been faced with an unintended or unplanned pregnancy as a constructive means of creating new families.

There is another group of children who are in need of the benefits of adoption into the security of a permanent home. This group is comprised of so-called "special needs" children—those who are older, or who are handicapped, or who are from minority groups. For these special children, there are few prospective adoptive families and large numbers of waiting children, including more than half of those currently estimated to be in the foster care system.

The Subcommittee on Aging, Family, and Human Services, which I chair, conducted a hearing earlier this year on adoption practices. The hearings was an effort to identify means of facilitating

the adoption process for both infant and special needs children by providing incentives and removing disincentives.

Among others at that hearing, we were privileged to hear from Father George Clements, of the Holy Angels Church in Chicago, Ill. Father Clements initiated a campaign entitled, "One Church—One Child," in an attempt to increase the number of potential black parents who would be interested in special needs adoption. He believes that one of the largest barriers to minority adoptions has been the attitude of government that such adoptions are the responsibility of government rather than that of minority communities.

Over 150 parishioners attended his meeting where slides were shown of 21 black children who needed adoptive parents. At the end of the meeting, 17 families made known their intentions to adopt, and 3 of these families eventually did adopt black children. Of the 21 children featured that evening, 11 have since been placed for adoption.

Father Clements is telling it like it is, and black people are proving that they will respond to the beauty of truth. Our Government should stimulate this kind of voluntarism.

Another area in which government can provide leadership for compassionate individual initiative is the granting of preference for immigration to children illegtimately fathered overseas by Americans. Presently, that area is a travesty and its improvement is the subject of a bill, S. 1698, which I have introduced jointly with Senators LEVIN, LAXALT, HAYAKAWA, and DECONCINI. The bill amends the Immigration and Nationality Act to provide preferential treatment to children of U.S. Armed Forces personnel in Asia.

This Amerasian children's bill could foster adoptions in the United States, and as we refine it at the committee level, I would encourage my colleagues to contribute to its improvement. The problem is real and this Nation has a responsibility to find ways to bring these children home.

I know that every Senator joins me today in congratulating the many fine organizations that work so hard to appropriately place adoptable children into loving families. I am certain that this Congress will continue in its bipartisan efforts to insure good adoption practices in the United States.

During this Thanksgiving season, so many of us across this country look forward to giving thanks for our great blessings and spending time with our families and loved ones. At this especially propitious moment, I urge my esteemed colleagues to be mindful of the positive, family-building and loving option that adoption is: Providing children with the advantages and joys of family life. I urge them to act in pursuance of that concept.

UNION STATION COMPLETION ACT OF 1981

Mr. BENTSEN. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. 1192.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1192) to amend the National Visitor Center Facilities Act of 1968 to provide for the rehabilitation and completion of Union Station in Washington, District of Columbia, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Environment and Public Works with amendments, as follows:

On page 2, line 1, strike "Completion", and insert "Redevelopment";

On page 3, line 4, after "in", insert "the";

On page 3, line 5, after "Station", insert "complex";

On page 3, line 6, strike "and"

On page 3, after line 6, insert the following:

(6) the Union Station complex and its vicinity present an opportunity for successful commercial development integrated with the transportation functions of the facility; and

On page 3, line 11, strike "(6)", and insert "(7)";

On page 3, line 12, strike "restored", and insert "improved";

On page 3, line 16, strike "Section 101", and insert "Title I";

On page 3, strike line 19, through and including page 14, line 15, and insert the following:

(1) by striking "National Visitor Center" in the caption of title I and inserting in lieu thereof "Union Station";

(2) by inserting a new caption "Subtitle A—National Visitor Center" immediately after the new title I caption; and

(3) by adding at the end of title I the following new subtitle:

"Subtitle B—Union Station Redevelopment

"SEC. 111. (a) Upon the request of the Secretary of Transportation, the Secretary shall assign to the Secretary of Transportation all of the Secretary's right, title, and interest in the Union Station complex, including all agreements and leases entered into under subtitle A of this title. Such assignment may reserve to the Secretary the right to lease space for visitor services, to the extent the Secretary and the Secretary of Transportation may agree. For purposes of this title, the "Union Station complex" shall include all the real property, air rights, and improvements leased by the Secretary under subtitle A of this title, together with any property acquired and all improvements made in accordance with this subtitle.

"(b) Notwithstanding the provisions of subsection (a) of this section, the Secretary shall, not later than twelve months after the date of enactment of this subsection, complete the installation of new roofs and associated drainage systems on all existing roof surfaces of the historic Union Station building. Of funds appropriated to the Secretary under the construction appropriation for the National Park System for the fiscal year ending September 30, 1982, not less than $8,100,000 shall be available to and allocated by the Secretary for such roof work. In the event the assignment provided for in subsection (a) of this section occurs prior to completion of such roof work, the Secretary shall continue to be responsible for such roof work until its completion, except as the Secretary and the Secretary of Transportation may otherwise agree.

"(c) Prior to the assignment provided for in subsection (a) of this section, the Secretary shall permit the Secretary of Transportation to carry out or cause to be carried out the activities authorized by this subtitle or by title VII of the Railroad Revitalization and Regualtory Reform Act of 1976 (45 U.S.C. 851 et seq.).

"(d) After both the assignment provided for in subsection (a) of this section and the completion of the roof installation required by subsection (b) of this section, the Secretary shall be relieved of the authority and obligation under subtitle A of this title to construct and operate a National Visitor Center at Union Station. The provisions of subtitle A of this title shall thereafter be deemed superseded by any contrary or inconsistent provisions of subtitle B of this title.

"SEC. 112. The Secretary of Transportation shall provide for the rehabilitation and redevelopment of the Union Station complex primarily as a multiple-use transportation terminal serving the Nation's Capital, and secondarily as a commercial complex, in accordance with the following goals:

"(a) Preservation of the exterior facade and other historically and architecturally significant features of the Union Station building;

"(b) Restoration and operation of a portion of the historic Union Station building as a rail passenger station, together with holding facilities for charter, transit, and intercity buses in the Union Station complex;

"(c) Commercial development of the Union Station complex that will, to the extent possible, financially support the continued operation and maintenance of such complex; and

"(d) Withdrawal by the Federal Government from any active role in the operation and management of the Union Station complex as soon as practical and at the least possible Federal expense consistent with the goals set forth in subsections (a) through (c) of this section.

"SEC. 113. (a) There are authorized to be appropriated to the Secretary of Transportation such sums as may be necessary to meet lease and other obligations, including maintenance requirements, incurred by the Secretary and assigned to the Secretary of Transportation under this subtitle. The Secretary shall transfer to the Secretary of Transportation at the time of such assignment such sums as may have been appropriated to the Secretary to meet such obligations and not yet expended as of the date of such assignment.

"(b) Notwithstanding the provisions of section 102(a)(5) of this title, the Secretary of Transportation is authorized to purchase for the United States any property that was leased by the Secretary under subtitle A of this title and assigned to the Secretary of Transportation under this subtitle. The purchase agreement for such property may provide for payment by the Secretary of Transportation over a term not to exceed six years. There are authorized to be appropriated to the Secretary of Transportation, in addition to the sum authorized by subsection (a) of this section, not to exceed $275,000 per year for not to exceed six years to carry out such purchase. Such purchase shall not be subject to the provisions of title III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4651 et seq.).

"SEC. 114. (a) The Secretary of Transportation shall, on an emergency basis, carry out an engineering survey of all existing structures at the Union Station complex for the following purposes:

"(1) to determine those actions necessary or desirable to preserve the long-term structural integrity of, and provide functional utility systems for, the historic Union Station building;

"(2) in cooperation with Amtrak, to determine those actions necessary or desirable to restore rail passenger handling functions to

the historic Union Station building and otherwise improve rail passenger service facilities at Union Station, including improved passenger access to the trains; and

"(3) to prepare detailed estimates of the costs of such rehabilitation and improvement.

"(b) Concurrently with the engineering survey required by subsection (a) of this section, the Secretary of Transportation shall carry out a planning and market feasibility study to assess the commercial development potential of the Union Station complex. Such study shall also include, but not be limited to, an assessment of the feasibility and desirability of:

"(1) providing passenger transportation services from Union Station to the commercial airports in the area;

"(2) constructing a heliport at or near the Union Station complex; and

"(3) relocating to office space in Union Station the offices of Federal or other public transportation agencies.

"(c) The Secretary of Transportation shall complete the engineering survey required by this section not later than six months after the date of enactment of this section, and shall complete the planning and market feasibility study required by this section not later than twelve months after the date of enactment of this section.

"(d) Of amounts appropriated under section 704(a) (1) and (2) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854(a) (1) and (2)), $1,000,000 shall be available to and be utilized by the Secretary of Transportation to carry out the purposes of subsections (a) and (b) of this section.

"(e) Within twelve months following the date of enactment of this section, the Secretary of Transportation shall submit a report to the Congress on the results of the engineering survey and planning and market feasibility studies carried out under this section. Such report shall include a specific commitment of Federal funds for completion of the rehabilitation of the historic Union Station building, together with any necessary request for appropriations, in the amount determined by the Secretary of Transportation to be necessary in light of the survey and studies carried out under this section, from either or both of the following sources:

"(1) funds authorized to be appropriated and not yet appropriated under section 704 (a) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854(a)) that are in excess of the amounts set out in the last sentence of such section 704(a); and

"(2) funds programed or reprogramed from any other appropriation available to the Secretary of Transportation.

"SEC. 115. (a) In order to achieve the goals set out in section 112 of this subtitle, the Secretary of Transportation is authorized to select and subsequently enter into one or more agreements (hereafter in this Act referred to as 'development agreements') with one or more responsible individuals, corporations, or other private entities with demonstrated experience in the financing, undertaking, and managing of commercial real estate development (hereafter in this Act referred to as 'developers').

"(b) The Secretary of Transportation shall prescribe the procedures and criteria for selection of a developer for the Union Station complex: *Provided*, That no final developer selection shall be made unless and until at least two developers meeting minimum criteria prescribed by the Secretary of Transportation have submitted to the Secretary of Transportation specific design and financing proposals for the rehabilitation and redevelopment of the Union Station complex, and specific proposals for the acquisition, conveyance, or lease of real property. The Secretary of Transportation is directed to initiate discussions with potential developers as soon as possible following enactment of this section to assure the earliest possible selection of a developer or developers.

"(c) Development agreements entered into under this section shall be considered cooperative agreements for purposes of the Federal Grant and Cooperative Agreement Act of 1977 (41 U.S.C. 501 et seq.). With respect to such development agreements, the Secretary of Transportation is authorized to modify or waive the application of regulations otherwise applicable to Federal or Department of Transportation financial assistance agreements, to the extent the Secretary of Transportation determines in his discretion to be necessary to accomplish the purposes of this subtitle at the lowest cost to the Federal Government.

"(d) The Secretary of Transportation is further authorized to enter into such other agreements and contracts, except any agreement or contract to sell property rights at the Union Station complex, with such persons, corporations, financial institutions, Federal, regional, or local agencies, or the Architect of the Capitol as the Secretary of Transportation deems necessary or desirable to carry out the purposes of this subtitle. Any such agreement may be made assignable to a selected developer or developers of the Union Station complex.

"SEC. 116. (a)(1) The Secretary of Transportation is authorized to acquire for the United States, by lease, purchase, or otherwise, any interest in real property (including, without limitation, interests in the nature of easements or reservations) and any other property interest (including, without limitation, contract rights) in or relating or adjacent to the Union Station complex that the Secretary of Transportation deems necessary to carry out the purposes of this subtitle.

"(2) If the Secretary of Transportation determines that property under the jurisdiction of the Architect of the Capitol in squares 721 and 722 eastward of the historic Union Station building is necessary to carry out the purposes of this subtitle, the Secretary of Transportation may request assignment of such property to the use of the Secretary of Transportation, as a part of the Union Station complex, and subject to the provisions of this subtitle, and the Architect of the Capitol shall so assign such property.

"(b) Notwithstanding any other provision of law, the Secretary of Transportation is authorized to maintain, use, operate, manage, and lease, either directly, by contract, or through development agreements, any property interest held or acquired by the Secretary of Transportation for the United States under this subtitle, in such manner and subject to such terms, conditions, covenants, and easements as the Secretary of Transportation deems necessary or desirable to carry out the purposes of this subtitle.

"SEC. 117. (a) The Secretary of Transportation is authorized to use income and proceeds received from activities authorized by this subtitle, including, without limitation, operating and leasing income and payments made to the Federal Government under development agreements, to pay expenses incurred by the Secretary of Transportation in carrying out the purposes of this subtitle, including, without limitation, construction, acquisition, leasing, operation, and maintenance expenses, and payments made to developers under development agreements.

"(b) A special deposit account is hereby established in the Treasury of the United States, to be known as the Union Station Fund, which shall be administered as a revolving fund. Such special deposit account shall be credited with receipts of the Secretary of Transportation from activities authorized by this subtitle and the balance in such special deposit account shall be available in such amounts as are specified in annual appropriation Acts for making expenditures authorized by this subtitle.

"SEC. 118. (a) Notwithstanding any other provision of title 23, United States Code, and other Acts pertaining to Federal-Aid Highways, the Secretary of Transportation shall immediately approve the completion of the parking facility, and associated ramps (including any necessary pedestrian access and walkways, escalators, elevators, moving sidewalk access, and connections) at Union Station, to be financed with interstate highway funds apportioned to the District of Columbia. To the extent necessary to complete such project, such apportionment shall not be subject to any obligation limitation enacted for the fiscal year ending September 30, 1982, or the fiscal year ending September 30, 1983. The amount of such apportionment necessary to complete such project, not to exceed $40,000,000, shall remain available to the District of Columbia until expended, without regard to the provisions of section 118(b) of title 23, United States Code. The Federal share shall be 100 per centum of the total cost of such project.

"(b) Within sixty days of the enactment of this section, the Secretary of Transportation shall enter into an agreement with the District of Columbia's Department of Transportation for the Secretary of Transportation's administration of the project described in subsection (a) of this section. Such project agreement shall provide that all right, title, and interest in such parking facility shall remain in the United States. The rate of fees charged for use of the parking facility may exceed the rate required for maintenance and operation of the facility, and shall be established in a manner that encourages its use by rail passengers and participants in activities in the Union Station complex and area.

"SEC. 119. (a) The Secretary of Transportation is authorized, on such terms and conditions as he may prescribe, to release the Washington Terminal Company from any or all of its obligations under agreements and leases entered into under subtitle A of this title, including, without limitation, the obligation to construct a new railroad passenger station as provided in section 102(a)(4) of this title.

"(b) The Secretary of Transportation shall waive such statutory or contractual restrictions on the use of the parking structure and associated ramps described in section 118 of this subtitle as would otherwise be required or imposed because funds for such construction were or are provided under the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.).

"(c) The Secretary of Transportation is authorized to use funds appropriated under section 704(a)(2) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854(a)(2)) to carry out the purposes of this subtitle without regard to the matching funds requirement of section 703 (1)(B) of such Act (45 U.S.C. 853(1)(B)). Funds appropriated under section 704(a) of such Act may not be used for design, construction, or operation of a heliport at or near Union Station.

"(d) The Architect of the Capitol is authorized to enter into agreements with the Secretary of Transportation or his designee or assign to furnish steam or chilled water or both from the Capitol Power Plant to the Union Station complex, at no expense to the legislative branch.".

SEC. 4. (a) The Act approved November 5, 1966 (Public Law 89-759) and section 108 of the National Visitor Facilities Act of 1968 (Public Law 90-264) are repealed.

(b) Section 102(b) of the National Visitor Center Facilities Act of 1968 (40 U.S.C. 802

(b)) is amended by striking the word "title" and inserting in lieu thereof the word "subtitle".

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Union Station Redevelopment Act of 1981".

SEC. 2. The Congress finds and declares that—

(1) Union Station in Washington, District of Columbia, commissioned by Congress in 1903, designed by Daniel H. Burnham in monumental Beaux Arts style, and completed by the Washington Terminal Company in 1907, is an important historic and architectural landmark of the Nation's Capital;

(2) Union Station was built and used exclusively as a rail passenger station until Congress decided to make the historic Union Station building a National Visitor Center in 1963, allocating rail passenger operations to a replacement facility behind the historic building;

(3) the use of rail passenger service to and from Washington, District of Columbia, declining when the National Visitor Center Facilities Act of 1968 was enacted, has dramatically increased since that time with the advent of and substantial Federal investment in the National Railroad Passenger Corporation and the northeast corridor improvement project, justifying a reversal of the policy adopted 13 years ago;

(4) the historic Union Station building is now unsafe and unusable, and the replacement railroad station is inconvenient and inadequate for present and projected rail ridership demand;

(5) it is in the national interest to preserve the architectural features of Union Station and to provide in the Union Station complex a sound and fully operational transportation terminal;

(6) the Union Station complex and its vicinity present an opportunity for successful commercial development integrated with the transportation functions of the facility; and

(7) the purposes of this Act are to achieve the goals of historic preservation and improved rail use of Union Station with maximum reliance on the private sector and minimum requirement for Federal assistance.

SEC. 3. Title I of the National Visitor Center Facilities Act of 1968 (40 U.S.C. 801 et seq.) is amended—

(1) by striking "National Visitor Center" in the caption of title I and inserting in lieu thereof "Union Station";

(2) by inserting a new caption "Subtitle A—National Visitor Center" immediately after the new title I caption; and

(3) by adding at the end of title I the following new subtitle:

"Subtitle B—Union Station Redevelopment

"SEC. 111. (a) Upon the request of the Secretary of Transportation, the Secretary shall assign to the Secretary of Transportation all of the Secretary's right, title, and interest in the Union Station complex, including all agreements and leases entered into under subtitle A of this title. Such assignment may reserve to the Secretary the right to lease space for visitor services, to the extent the Secretary and the Secretary of Transportation may agree. For purposes of this title, the 'Union Station complex' shall include all the real property, air rights, and improvements leased by the Secretary under subtitle A of this title, together with any property acquired and all improvements made in accordance with this subtitle.

"(b) Notwithstanding the provisions of subsection (a) of this section, the Secretary shall, not later than twelve months after the date of enactment of this subsection, complete the installation of new roofs and associated drainage systems on all existing roof surfaces of the historic Union Station building. Of funds appropriated to the Secretary under the construction appropriation for the National Park System for the fiscal year ending September 30, 1982, not less than $8,100,000 shall be available to and allocated by the Secretary for such roof work. In the event the assignment provided for in subsection (a) of this section occurs prior to completion of such roof work, the Secretary shall continue to be responsible for such roof work until its completion, except as the Secretary and the Secretary of Transportation may otherwise agree.

"(c) Prior to the assignment provided for in subsection (a) of this section, the Secretary shall permit the Secretary of Transportation to carry out or cause to be carried out the activities authorized by this subtitle or by title VII of the Railroad Revitalization and Regulatory Reform Act of 1976 (46 U.S.C 851 et seq.)

"(d) After both the assignment provided for in subsection (a) of this section and the completion of the roof installation required by subsection (b) of this section, the Secretary shall be relieved of the authority and obligation under subtitle A of this title to construct and operate a National Visitor Center at Union Station. The provisions of subtitle A of this title shall thereafter be deemed superseded by any contrary or inconsistent provisions of subtitle B of this title.

"SEC. 112. The Secretary of Transportation shall provide for the rehabilitation and redevelopment of the Union Station complex primarily as a multiple-use transportation terminal serving the Nation's Capital, and secondarily as a commercial complex, in accordance with the following goals:

"(a) Preservation of the exterior facade and other historically and architecturally significant features of the Union Station building;

"(b) Restoration and operation of a portion of the historic Union Station building as a rail passenger station, together with holding facilities for charter, transit, and intercity buses in the Union Station complex;

"(c) Commercial development of the Union Station complex that will, to the extent possible, financially support the continued operation and maintenance of such complex; and

"(d) Withdrawal by the Federal Government from any active role in the operation and management of the Union Station complex as soon as practical and at the least possible Federal expense consistent with the goals set forth in subsections (a) through (c) of this section.

"SEC. 113. (a) There are authorized to be appropriated to the Secretary of Transportation such sums as may be necessary to meet lease and other obligations, including maintenance requirements, incurred by the Secretary and assigned to the Secretary of Transportation under this subtitle. The Secretary shall transfer to the Secretary of Transportation at the time of such assignment such sums as may have been appropriated to the Secretary to meet such obligations and not yet expended as of the date of such assignment.

"(b) Notwithstanding the provisions of section 102(a)(5) of this title, the Secretary of Transportation is authorized to purchase for the United States any property that was leased by the Secretary under subtitle A of this title and assigned to the Secretary of Transportation under this subtitle. The purchase agreement for such property may provide for payment by the Secretary of Transportation over a term not to exceed six years. There are authorized to be appropriated to the Secretary of Transportation, in addition to the sums authorized by subsection (a) of this section, not to exceed $275,000 per year for not to exceed six years to carry out such purchase. Such purchase shall not be subject to the provisions of title III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4651 et seq.).

"SEC. 114. (a) The Secretary of Transportation shall, on an emergency basis, carry out an engineering survey of all existing structures at the Union Station complex for the following purposes:

"(1) to determine those actions necessary or desirable to preserve the long-term structural integrity of, and provide functional utility systems for, the historic Union Station building.

"(2) in cooperation with Amtrak, to determine those actions necessary or desirable to restore rail passenger handling functions to the historic Union Station building and otherwise improve rail passenger service facilities at Union Station, including improved passenger access to the trains; and

"(3) to prepare detailed estimates of the costs of such rehabilitation and improvement.

"(b) Concurrently with the engineering survey required by subsection (a) of this section, the Secretary of Transportation shall carry out a planning and market feasibility study to assess the commercial development potential of the Union Station complex. Such study shall also include, but not be limited to, an assessment of the feasibility and desirability of:

"(1) providing passenger transportation services from Union Station to the commercial airports in the area;

"(2) constructing a heliport at or near the Union Station complex; and

"(3) relocating to office space in Union Station the offices of Federal or other public transportation agencies.

"(c) The Secretary of Transportation shall complete the engineering survey required by this section not later than six months after the date of enactment of this section, and shall complete the planning and market feasibility study required by this section not later than twelve months after the date of enactment of this section.

"(d) Of amounts appropriated under section 704(a)(1) and (2) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854(a) (1) and (2)), $1,000,000 shall be available to and be utilized by the Secretary of Transportation to carry out the purposes of subsections (a) and (b) of this section.

"(e) Within twelve months following the date of enactment of this section, the Secretary of Transportation shall submit a report to the Congress on the results of the engineering survey and planning and market feasibility studies carried out under this section. Such report shall include a specific commitment of Federal funds for completion of the rehabilitation of the historic Union Station building, together with any necessary request for appropriations, in the amount determined by the Secretary of Transportation to be necessary in light of the survey and studies carried out under this section, from either or both of the following sources:

"(1) funds authorized to be appropriated and not yet appropriated under section 704 (a) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854 (a)) that are in excess of the amounts set out in the last sentence of such section 704 (a); and

"(2) funds programed or reprogramed from any other appropriation available to the Secretary of Transportation.

"SEC. 115. (a) In order to achieve the goals set out in section 112 of this subtitle, the Secretary of Transportation is authorized to select and subsequently enter into one or more agreements (hereafter in this Act referred to as 'development agreements') with

one or more responsible individuals, corporations, or other private entities with demonstrated experience in the financing, undertaking, and managing of commercial real estate development (hereafter in this Act referred to as 'developers').

"(b) The Secretary of Transportation shall prescribe the procedures and criteria for selection of a developer for the Union Station complex: *Provided*, That no final developer selection shall be made unless and until at least two developers meeting minimum criteria prescribed by the Secretary of Transportation have submitted to the Secretary of Transportation specific design and financing proposals for the rehabilitation and redevelopment of the Union Station complex, and specific proposals for the acquisition, conveyance, or lease of real property. The Secretary of Transportation is directed to initiate discussions with potential developers as soon as possible following enactment of this setcion to assure the earliest possible selection of a developer or developers.

"(c) Development agreements entered into under this section shall be considered cooperative agreements for purposes of the Federal Grant and Cooperative Agreement Act of 1977 (41 U.S.C. 501 et seq.). With respect to such development agreements, the Secretary of Transportation is authorized to modify or waive the application of regulations otherwise applicable to Federal or Department of Transportation financial assistance agreements, to the extent the Secretary of Transportation determines in his discretion to be necessary to accomplish the purposes of this subtitle at the lowest cost to the Federal Government.

"(d) The Secretary of Transportation is further authorized to enter into such other agreements and contracts, except any agreement or contract to sell property rights at the Union Station complex, with such persons, corporations, financial institutions, Federal, regional, or local agencies, or the Architect of the Capitol as the Secretary of Transportation deems necessary or desirable to carry out the purposes of this subtitle. Any such agreement may be made assignable to a selected developer or developers of the Union Station complex.

"SEC. 116. (a)(1) The Secretary of Transportation is authorized to acquire for the United States, by lease, purchase, or otherwise, any interest in real property (including, without limitation, interests in the nature of easements or reservations) and any other property interest (including, without limitation, contract rights) in or relating or adjacent to the Union Station complex that the Secretary of Transportation deems necessary to carry out the purposes of this subtitle.

"(2) If the Secretary of Transportation determines that property under the jurisdiction of the Architect of the Capitol in squares 721 and 722 eastward of the historic Union Station building is necessary to carry out the purposes of this subtitle, the Secretary of Transportation may request assignment of such property to the use of the Secretary of Transportation, as a part of the Union Station complex, and subject to the provisions of this subtitle, and the Architect of the Capitol shall so assign such property.

"(b) Notwithstanding any other provision of law, the Secretary of Transportation is authorized to maintain, use, operate, manage, and lease, either directly, by contract, or through development agreements, any property interest held or acquired by the Secretary of Transportation for the United States under this subtitle, in such manner and subject to such terms, conditions, covenants, and easements as the Secretary of Transportation deems necessary or desirable to carry out the purposes of this subtitle.

"SEC. 117. (a) The Secretary of Transportation is authorized to use income and proceeds received from activities authorized by this subtitle, including, without limitation, operating and leasing income and payments made to the Federal Government under development agreements, to pay expenses incurred by the Secretary of Transportation in carrying out the purposes of this subtitle, including, without limitation, construction, acquisition, leasing, operation, and maintenance expenses, and payments made to developers under development agreements.

"(b) A special deposit account is hereby established in the Treasury of the United States, to be known as the Union Station Fund, which shall be administered as a revolving fund. Such special deposit account shall be credited with receipts of the Secretary of Transportation from activities authorized by this subtitle and the balance in such special deposit account shall be available in such amounts as are specified in annual appropriation Acts for making expenditures authorized by this subtitle.

"SEC. 118. (a) Notwithstanding any other provision of title 23, United States Code, and other Acts pertaining to Federal-Aid Highways, the Secretary of Transportation shall immediately approve the completion of the parking facility, and associated ramps (including any necessary pedestrian access and walkways, escalators, elevators, moving sidewalk access, and connections) at Union Station, to be financed with interstate highway funds apportioned to the District of Columbia. To the extent necessary to complete such project, such apportionment shall not be subject to any obligation limitation enacted for the fiscal year ending September 30, 1982, or the fiscal year ending September 30, 1983. The amount of such apportionment necessary to complete such project, not to exceed $40,000,000, shall remain available to the District of Columbia until expended, without regard to the provisions of section 118(b) of title 23, United States Code. The Federal share shall be 100 per centum of the total cost of such project.

"(b) Within sixty days of the enactment of this section, the Secretary of Transportation shall enter into an agreement with the District of Columbia's Department of Transportation for the Secretary of Transportation's administration of the project described in subsection (a) of this section. Such project agreement shall provide that all right, title, and interest in such parking facility shall remain in the United States. The rate of fees charged for use of the parking facility may exceed the rate required for maintenance and operation of the facility, and shall be established in a manner that encourages its use by rail passengers and participants in activities in the Union Station complex and area.

"SEC. 119. (a) The Secretary of Transportation is authorized, on such terms and conditions as he may prescribe, to release the Washington Terminal Company from any or all of its obligations under agreements and leases entered into under subtitle A of this title, including without limitation, the obligation to construct a new railroad passenger station as provided in section 102(a)(4) of this title.

"(b) The Secretary of Transportation shall waive such statutory or contractual restrictions on the use of the parking structure and associated ramps described in section 118 of this subtitle as would otherwise be required or imposed because funds for such construction were or are provided under the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.).

"(c) The Secretary of Transportation is authorized to use funds appropriated under section 704(a)(2) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854(a)(2)) to carry out the purposes of this subtitle without regard to the matching funds requirement of section 703(1)(B) of such Act (45 U.S.C. 853(1)(B)). Funds appropriated under section 704(a) of such Act may not be used for design, construction, or operation of a heliport at or near Union Station.

"(d) The Architect of the Capitol is authorized to enter into agreements with the Secretary of Transportation or his designee or assign to furnish steam or chilled water or both from the Capitol Power Plant to the Union Station complex, at no expense to the legislative branch.".

SEC. 4. (a) The Act approved November 5, 1966 (Public Law 89–759) and section 108 of the National Visitor Facilities Act of 1968 (Public 90–264) are repealed.

(b) Section 102(b) of the National Visitor Center Facilities Act of 1968 (40 U.S.C. 802(b)) is amended by striking the word "title" and inserting in lieu thereof the word "subtitle".

Mr. GORTON. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc and that they may be further amended.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 712

(Purpose: to clarify the intent of the bill)

Mr. GORTON. Mr. President, on behalf of myself and the Senator from New York (Mr. MOYNIHAN), I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Washington (Mr. GORTON), for himself and Mr. MOYNIHAN, proposes an unprinted amendment numbered 712.

Mr. GORTON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19, line 9, insert ", in cooperation with the National Railroad Passenger Corporation," after "Secretary of Transportation".

Page 21, after line 3, insert the following new sentence:

"Notwithstanding any other provision of this subsection, no funds from the Northeast Corridor Improvement Project and other rail or rail-related programs in excess of $29,000,000 shall be available for the completion of the rehabilitation of the historic Union Station building or other purposes determined by the Secretary of Transportation to be necessary in light of the survey and studies carried out under this section if within 90 calendar days of continuous session of the Congress after any request for such excess funds either the Committee on Energy and Commerce of the House of Representatives or the Committee on Commerce, Science, and Transportation of the Senate disapproves of the availability of such excess funds for such purposes by majority vote. For purposes of this subsection, continuity of session of the Congress is broken only by an adjournment sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the period described in this subsection."

Page 20, after "section." on line 13, insert the following:

"Such report shall be referred to the Committees on Commerce, Science and Transportation and Environment and Public Works of the Senate and the Committees on Energy and Commerce and Public Works and Transportation of the House, respectively."

On page 27, insert the following immediately after line 7:

"SEC. 5. As used in section 502(a)(1)(B) of the Rail Passenger Service Act, the term 'Amtrak Commuter' shall mean, with respect to the period prior to January 1, 1983, 'Conrail'.".

Mr. GORTON. Mr. President, I think it appropriate, before voting on the amendment, to discuss the bill with the distinguished Senator from New York.

I urge the Senate's approval of this bill, which will bring back to life one of this city's finest architectural creations. The bill is designed to revive Union Station as a major railroad terminal, as well as a new and lively commercial center.

I was not a Member of the Congress during years of the decline and fall of Union Station. But I have toured that shuttered building. I have seen the mushrooms growing in the floor, the water damage, the sad state into which this great building has fallen.

And I believe I also can see the opportunity for this structure: to resuscitate it as the southern terminus of the Northeast corridor railroad project, and to develop its significant commercial potential at the city's transportation hub, close to Capitol Hill.

Specifically, the bill:

Shifts responsibility for the project to the Department of Transportation from the Department of the Interior.

Authorizes a 1-year, $1,000,000 study of the building's structural integrity, rail passenger handling functions, and its potential for privately financed commercial development and use.

Directs the Department of Transportation, once the study is completed, to spend already authorized, but unappropriated, Northeast corridor rail improvement funds, or to reprogram other authorized funds, for necessary building repairs and improvements.

Authorizes the Department of Transportation to select a private developer, through a competitive process, and to enter into a cooperative development agreement, with minimum Federal financing, for the commercial development of the building under long-term leases.

Requires that rail passenger services be returned to the main Union Station building.

Authorizes completion of the parking garage and ramps, using up to $40 million in Interstate Highway moneys apportioned to the District of Columbia.

I want to emphasize my view that rail service must be given primary attention under this bill. That is clear in the language of the bill.

Since Congress, in 1968, determined that Union Station would become a National Visitor Center, with only incidental accommodations for rail passenger service, rail patronage of Union Station has increased more than tenfold. Rail passengers must now walk around to the back of the building to gain access to the train facility. Congress can no longer tolerate this situation. The concept of a National Visitor Center was unsuccessful, and no longer should be the primary focus of the structure.

Those concerned about the Northeast Corridor project should be advised that this legislation contains a delicate compromise which enables the Secretary to obligate already authorized funds from the Northeast Corridor program to this building. Such use of Northeast Corridor funds has been contemplated since 1977. This legislation in no way interferes with any policy affecting the Northeast Corridor program contained in the Omnibus Reconciliation Act of 1981—Public Law 97-35.

I know that some persons at the Department of Transportation are concerned over the bill because it fails to give the Secretary of Transportation the right to condemn adjacent properties that would be turned over to the selected developer. Personally, I find that the need for condemnation is simply not supported by the facts or equity.

Adjacent lands are in private ownership, the owner of which wish to develop them. I see no sound basis for paying millions of taxpayers dollars for such lands so that another developer can then build on those lands.

Mr. President, this bill offers a reasonable solution to a difficult problem. It deserves the support of the Senate, and the signature of the President. I urge the Senate's approval of the legislation.

Mr. MOYNIHAN. Mr. President, I am honored to request that the name of the distinguished senior Senator from West Virginia (Mr. RANDOLPH) be added as a cosponsor of the amendment and of the bill itself, which has been reported from the committee over which he presided with distinction for so many years.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I express my great appreciation to the Senator from Washington, who has been indefatigable in this matter and who I hope will see the last of it. This will be the fifth statute in 13 years devoted to Union Station. It is our fond expectation that it will be the last one.

Mr. President, our involvement with Union Station goes back to the beginning of this century. In 1901, the Senate Committee on the District of Columbia established a commission on the design of this part of the Capital, the McMillan Commission, as it was called. It is not within the memory even of the senior Senator from West Virginia that at that time the Pennsylvania Railroad Station stood at the bottom of Capitol Hill. It was at the behest of the McMillan Commission that it was moved to its present site. The Post Office was located alongside it, and that most distinguished of American architects, Daniel Burnham, was chosen to create one of our great public buildings.

We believe that the Committee on Environment and Public Works and the Committee on Commerce have devised a solution which will be permanent, which will restore a building which, after 74 years of use, needs structural repair, and which will bring it back to its pristine purpose as a railroad station and restore it to its proper place as—to repeat—one of the great public buildings of our Capital.

I thank the Chair.

I once again express my appreciation to the Senator from Washington.

May I ask the Senator from Washington if he does not agree that the present passenger station behind the Union Station building is grossly inadequate? It reminds me of the comment Vincent Scully, the Yale University architectural historian, made about the demolition of Penn Station in New York City. That magnificient Beaux Arts building—like Union Station, designed on an ancient Roman model—was torn down and replaced with a subterranean passenger terminal. Scully remarked:

One used to enter New York like a god; now one scurries in like a rat.

Mr. GORTON. I do agree with the Senator from New York. With the best of intentions, we converted a dignified and functional train station to other, as it turns out, less practical uses. The replacement station is neither dignified nor functional—it is grossly inadequate.

Mr. MOYNIHAN. Am I correct in stating that the primary purpose of S. 1192, as reported from both the Committee on Environment and Public Works and the Commerce Committee, is to turn the Union Station building back into a train station?

Mr. GORTON. As a member of both committees, I can tell the Senator he is correct.

Mr. MOYNIHAN. Could you describe for us the actions S. 1192 would require of the Secretary of Transportation to provide an adequate passenger terminal in Union Station?

Mr. GORTON. The bill makes clear that any plan for the Union Station building must include a rail passenger facility and that the design of the facility must protect the Government's interest in maintaining adequate rail passenger service and addressing future passenger needs. We expect that the Union Station building will house a full range of rail passenger service and operational functions, including but not limited to, information, ticketing, passenger handling, station administration and support, public services, and baggage handling. We expect the Secretary to plan the facility to handle adequately the current Union Station peak period passenger levels, as well as projected growth through the 1990's. As the Environment and Public Works Committee's report specifically states:

In no event should the rail passenger services in the historic building provide less usable space than the current "replacement" station.

In all probability significantly more space will be so used. The committees also expect the Secretary to adhere to the criteria set out in the Northeast corridor station performance standards which the Department of Transportation has applied to the other Northeast corridor stations.

Mr. MOYNIHAN. The legislation requires that the Secretary's plan provide improved passenger access to the train. However, it falls short of specifically directing the Secretary to provide for the extension of the tracks to the concourse, as past legislation has required.

Mr. GORTON. That is correct. The legislation directs the Secretary to study those actions that are necessary or desirable to improve passenger access to

the trains. Past plans and studies, including those conducted by the Department of Transportation, have indicated that extending the tracks to the Concourse is the best way to improve passenger access to the trains, and in the long run represents the least costly alternative. It is the committees' expectation that extension of the track to the Concourse would be part of the Secretary's plan, unless the Secretary can develop an alternative that would provide passenger access to the trains which is equivalent to extending the tracks to the Concourse.

Mr. MOYNIHAN. Amtrak's experience in passenger service handling is a valuable resource that the Secretary should utilize in developing recommendations to Congress on Union Station. In addition, as a major owner and developer of real estate, Amtrak can lend its expertise to the commercial development of Union Station. This is addressed in the legislation, is it not?

Mr. GORTON. As provided for in the legislation, the Secretary is to consult closely with Amtrak in developing the rail passenger facility. The committees anticipate that before presenting his plans to Congress for the development of Union Station, the Secretary will have reached agreement with Amtrak on space allocation and location of rail passenger functions in the Union Station building.

The committees recognize that Amtrak has a strong incentive to assure the success of any future development of Union Station. The accompanying Environment and Public Works Committee report S. 1192 has stated that the Secretary's report to Congress should include a plan for managing the redevelopment of Union Station, with recommendations to enable the Federal Government to withdraw from active management of Union Station. The report indicates that Amtrak is a likely candidate to manage the redevelopment program.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Washington.

The amendment (UP No. 712) was agreed to.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. RANDOLPH. Mr. President, it is a privilege for me to commend the Senator from the State of Washington (Mr. GORTON) and the Senator from New York (Mr. MOYNIHAN) in presenting this subject matter this afternoon in the Senate.

They have been, in a sense, the architects of a realistic balance from the standpoint of the use of Union Station. Although they may have been somewhat misguided, the previous efforts to make it a visitors center were not without, let us say, a certain appeal at the time they were undertaken.

Union Station itself was completed in 1907. The Senator from New York has with meaning and eloquence spoken about the earlier efforts to locate a rail station other than at the present site.

Millions of men, women, and children have used Union Station as their entry by rail into Washington, D.C. West Virginians by the hundreds of thousands moved over the Baltimore & Ohio and the Chesapeake & Ohio to our Capital City.

Perhaps it is not too personal, but I was one of the earlier arrivals at the Union Station. I came to Union Station 70 years ago. I came as a young man, a passenger, riding the Baltimore & Ohio Railroad from central West Virginia into the city. I came not to see the White House or this Capitol in which I have worked, on this side and on the House side for 37 years, but I came to see Ty Cobb play baseball at the old Griffith Stadium. I wanted to see Ty Cobb because I was intensely interested in baseball and to me he was the hero of the professional game.

He could not only hit, he could not only run the bases, but he also was preeminent in the field. So he was a triple star in a sense, and I came to see him.

Having ridden all night in the day coach and then having trudged my way through to the old Griffith Stadium, having sat in the bleachers in the blazing sun, it was not a day lost for me because he performed as he apparently did on most occasions.

Then, I went back to West Virginia by day coach. Having ridden all night to be here I returned riding all night to be back in my native State and to go to Salem, W. Va., where I recall so well my mother looking down Main Street and seeing someone coming up with, let us say, a glow upon his face, soot covered and rumpled.

It was a great experience and I mention it—perhaps at too great a length—to indicate that from its beginnings, Union Station has been a very important development in the life not only of the Nation's Capital but the Republic as a whole.

Washington's Union Station has long been generally acknowledged as one of our country's architectural treasures. Yet, for the past dozen years, it has been the victim of bureaucratic infighting, hesitancy on the part of public officials and, yes, poor decisions by the Congress itself. The result has been our continued inability to resolve the Union Station question which culminated yesterday in the closure of the building for safety reasons.

Mr. President, for more than 4 years, members of the Committee on Environment and Public Works have worked in an effort to develop a rational and reasonable solution to this problem. Hearings were conducted, extensive discussions were held with involved parties and legislation has been proposed.

The only positive action before today was the enactment late in the 96th Congress of a bill reported by our committee which authorized $11 million in emergency repairs to protect the structural integrity of Union Station. Roof repairs have been nearly completed,

Mr. President, we recognize that substantial amounts of money have been expended on Union Station building in recent years. Many of these expenditures were the result of the perhaps ill-advised plan to convert the building into a National Visitor's Center. To reverse the rapid deterioration of the building and to return it to its proper function as a major transportation center will require the expenditure of additional funds. This is a fact we must acknowledge. It is not, however, a case of throwing good money after bad. Whatever additional funds are needed for Union Station must be provided to protect the millions which have already been invested.

The alternative is the further deterioration of the building to the extent that it could soon be beyond the point of salvation. The legislation we act on today would restore to Union Station its primary function as a transportation center at a time when railroad travel is enjoying a surgence. The authority to use some portion of the building as a visitor center would be retained.

This measure will do more than preserve a magnificient building that is a part of our architectural, transportation, and political heritage, even though this is a worthwhile objective. It will correct past mistakes in directing the use of Union Station and again make it a railroad station and an entrance to this great Capital City worthy of our Republic and the people of all our States.

So I am very grateful to be included in the amendment offered, to be given the opportunity to speak these words and most importantly to commend all the members of the Committee on Public Works in an earlier period on both sides of this Capitol, to include those members who are today handling this legislation, the Senators whom I have made not cursory remarks toward but very sincere remarks for their leadership in this matter.

I feel that what is being done here is in the best interest not only of that edifice but also the city of Washington and the country as a whole.

● Mr. STAFFORD. Mr. President, this bill, the Union Station Redevelopment Act of 1981, is sound legislation. I urge its adoption by the Senate. As one who has struggled for years to find a solution to the difficulties of Union Station, I am confident that this bill will provide a sound resolution. It is one that will attract private capital and enable the Federal Government to fulfill its role as owner.

It must be noted that this bill is not much different from legislation that passed the Senate in 1978, a bill that never become law. I hope that this time the bill can pass the Senate, and soon be on the President's desk for his signature.

This bill represents a compromise approach. It completes the parking garage, while studying the building's structure and its development potential. The bill is designed to attract as much private capital as possible.

More importantly, it seeks to return the building to partial use as a rail station, with development of commercial use of the remainder of the building.

I would note that this building provides large blocks of space that can and should be developed. Over 210,000 square feet of space is available on the ground

and basement levels for use by Amtrak, as well as for leasing to commercial enterprises. In addition, the building contains 80,000 square feet of office space, with a prime location close to Capitol Hill. Personally, I believe it would provide an excellent location for transportation oriented agencies or corporations. It might even be used effectively by the Department of Transportation for some of its own offices.

I would also extend a word of commendation to Transportation Secretary Lewis for his close examination of this issue, as well as to the distinguished Senator from Washington (Mr. GORTON). Senator GORTON worked hard and diligently on this issue, both in the Committee on Environment and Public Works and earlier in the Committee on Commerce, Science, and Transportation. Without Senator GORTON's continuing interest and ideas, we might never have solved this difficult and frustrating issue.

This is a great building. It is a noble building. It must be renovated and developed with those descriptions in mind. It must never become a haven for quick-buck developers who might cheapen this wonderful example of American architecture.

Mr. President, I ask unanimous consent that an article and an editorial from the Washington Post a month ago be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNION STATION: ON THE RIGHT TRACK

Hold your applause for now, but we may soon hear the final trumpet of that great white elephant we once knew and loved as Union Station. Without going into the depressing and outlandishly expensive details of how this once-grand train terminal was trampled to near-rubble by a herd of mischievous bureaucrats, we are pleased to note that a financially and structurally sound Union Station may live again, thanks to a bipartisan effort that is due for its first congressional consideration today.

Coming up for action by a Senate committee is a bill worked out and supported by Transportation Secretary Drew Lewis and key congressional leaders from both sides of the Hill as well as its aides. The basic idea is to 1) stop an insane financial drain on all U.S. taxpayers; 2) restore the building as quickly and as economically as possible, and 3) return the facility to its primary function as a lively and commerically successful transportation hub, instead of a broken-down and boarded-up "visitor center."

While the Interior Department would continue its open-pit surgery—fixing the roof and shoring things up—the bill being considered today would transfer jurisdiction to the Transportation Department, where it belongs. Studies—not the open-ended, made-for-distraction kind—would be completed within a year to determine what permanent structural work is necessary, what to do with office space in the facility and how commercial space might be used in and around the station. Recommendations would include consideration of other transportation facilities, such as a heliport and a terminal for various bus services.

The legislation is not—repeat not—simply another formula for pouring good money after bad. That's already happening, with taxpayers forking out $3.5 million a year for a lease on the place; this bill is a modest attempt to stop the waste and turn a financial sink-hole into the commercially successful and historically important landmark it once was.

RAIL STATION PLAN GETS REAGAN NOD

(By John Burgess)

After long months of negotiation, the Reagan administration has agreed to a Senate plan to revitalize Union Station. The plan would complete roof repairs already under way and finish the parking garage begun several years ago. If feasible, structural repairs would be made and contracts signed with private firms to develop a commercial complex in and around the monumental Beaux Arts-style station.

A Senate committee is scheduled to mark up a bill today outlining the plan, which also would move control of Union Station to the Transportation Department from Interior. Yesterday, during a lunch at The Washington Post, Transportation Secretary Drew Lewis indicated that he supports the bill's basic elements.

The new plan is the latest in a series of costly and unsuccessful federal efforts to rescue the 74-year-old station, once among the world's grandest rail gateways but today a crumbling white elephant with corroded plumbing and a leaky roof.

On July 4, 1976, the Interior Department opened Union Station as a National Visitor Center, moving trains to a smaller, modern structure to the rear. Despite $46 million spent on the conversion, the station never caught on in this role and it continued to deteriorate structurally. In February it was closed after rainwater seeped through the roof, dislodging huge chunks of plaster from the ceiling and flooding carpeted floors.

Committee sources predicted yesterday that the bill will be approved by the Senate Environment and Public Works Committee and has a good chance to make it through the full Senate. After that, it would go to the House, where the outcome appears less certain. There is no equivalent legislation in the House.

As now worded, the bill calls for Interior to complete $8 million of already funded roof repairs and to turn the building's management over to the Transportation Department. The bill also authorizes the District of Columbia to trade in $40 million in federal highway funds for a like sum to complete a large parking garage last worked on in 1976.

The garage money represented a concession on Lewis' part. In testimony before Congress last July, he opposed allowing the city to shift its funding that way.

In addition, the Senate bill would authorize $1 million for two major studies of Union Station. One would survey the building's structural problems and determine what repairs are needed and how much they would cost. The other would explore the feasibility of entering into joint development of the station and surrounding property with private developers.

Congressional concern over the station was revived last February following the station's closure. The bill now under consideration is being shepherded through Environment and Public Works by Sen. Slade Gorton (R-Wash).

Earlier versions of the bill proposed that large sums be diverted to Union Station from ongoing capital programs and to modernize rail lines along the Northeastern corridor. Lewis strongly opposed such diversions.

Both sides, however, agreed that action was needed to save a national monument like Union Station. In negotiations between Senate and Transportation Department staff members, alternative wording was worked out that would take only $1 million from the Northeast Corridor funding to pay for the two studies. The department would be free to finance certain other spending as it chose.

The development study would explore running transportation to area airports from the station, and constructing a helicopter pad. Lewis would have to report back to Congress within a year with a specific plan for revitalization, assuming that it was found to be economically feasible.

The bill would authorize the department to buy the station over a six-year period (it currently is leased from private railroad interests). The department also could make further repairs to the building, buy surrounding property and contract with private companies for development, under the plan.

The bill specifies that the old building must again become a rail station, with ticketing, baggage handling and other such functions. However, only a fraction of the mammoth station would be needed for this, with remaining space occupied by retail stores and restaurants.

Senate sources said that though the bill contains no specific requirement, its intent is to remove the new station behind the old one where rail passengers now board their trains.

Mr. MOYNIHAN. Mr. President, before I conclude my remarks, could I impose on the Senate just a moment to say that particularly ingenuous and effective solutions being reached for this could not have come about but for the work of Mr. Mat Scocozza of the Commerce Committee staff, and Mr. Hal Brayman and Mr. Robert Peck of the staff of the Committee on Environment and Public Works.

I thank the Chair.

Mr. GORTON. Mr. President, I should like also to thank both the Senator from New York and the very distinguished Senator from West Virginia for their kind comments. I am, of course, new at this business. Each of them has been working diligently toward the objective of this bill for a number of years. Each of them deserves a great deal of credit for what we hope will prove to be a successful restoration of Union Station.

In addition, I need to say for the record that notwithstanding the Congressional Budget Office cost estimate, this measure is not intended to create new appropriations for fiscal year 1982. Any expenditures of funds will be encompassed within appropriations otherwise made available for related purposes.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendments to be proposed, the question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1192

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Union Station Redevelopment Act of 1981".

SEC. 2. The Congress finds and declares that—

(1) Union Station in Washington, District of Columbia, commissioned by Congress in 1903, designed by Daniel H. Burnham in monumental Beaux Arts style, and completed by the Washington Terminal Company in 1907, is an important historic and architectural landmark of the Nation's Capital;

(2) Union Station was built and used exclusively as a rail passenger station until Congress decided to make the historic Union Station building a National Visitor Center in 1968, allocating rail passenger operations to a replacement facility behind the historic building;

(3) the use of rail passenger service to and from Washington, District of Columbia, declining when the National Visitor Center Facilities Act of 1968 was enacted, has dramatically increased since that time with the advent of and substantial Federal invest-

ment in the National Railroad Passenger Corporation and the northeast corridor improvement project, justifying a reversal of the policy adopted 13 years ago;

(4) the historic Union Station building is now unsafe and unusable, and the replacement station is inconvenient and inadequate for present and projected rail ridership demand;

(5) it is in the national interest to preserve the architectural features of Union Station and to provide in the Union Station complex a sound and fully operational transportation terminal;

(6) the Union Station complex and its vicinity present an opportunity for successful commercial development integrated with the transportation functions of the facility; and

(7) the purposes of this Act are to achieve the goals of historic preservation and improved rail use of Union Station with maximum reliance on the private sector and minimum requirement for Federal assistance.

SEC. 3. Title I of the National Visitor Center Facilities Act of 1968 (40 U.S.C. 801 et seq.) is amended—

(1) by striking "National Visitor Center" in the caption of title I and inserting in lieu thereof "Union Station";

(2) by inserting a new caption "Subtitle A—National Visitor Center" immediately after the new title I caption; and

(3) by adding at the end of title I the following new subtitle:

"Subtitle B—Union Station Redevelopment

"SEC. 111. (a) Upon the request of the Secretary of Transportation, the Secretary shall assign to the Secretary of Transportation all of the Secretary's right, title, and interest in the Union Station complex, including all agreements and leases entered into under subtitle A of this title. Such assignment may reserve to the Secretary the right to lease space for visitor services, to the extent the Secretary and the Secretary of Transportation may agree. For purposes of this title, the "Union Station complex" shall include all the real property, air rights, and improvements leased by the Secretary under subtitle A of this title, together with any property acquired and all improvements made in accordance with this subtitle.

"(b) Notwithstanding the provisions of subsection (a) of this section, the Secretary shall, not later than twelve months after the date of enactment of this subsection, complete the installation of new roofs and associated drainage systems on all existing roof surfaces of the historic Union Station building. Of funds appropriated to the Secretary under the construction appropriation for the National Park System for the fiscal year ending September 30, 1982, not less than $8,100,000 shall be available to and allocated by the Secretary for such roof work. In the event the assignment provided for in subsection (a) of this section occurs prior to completion of such roof work, the Secretary shall continue to be responsible for such roof work until its completion, except as the Secretary and the Secretary of Transportation may otherwise agree.

"(c) Prior to the assignment provided for in subsection (a) of this section, the Secretary shall permit the Secretary of Transportation to carry out or cause to be carried out the activities authorized by this subtitle or by title VII of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 851 et seq.).

"(d) After both the assignment provided for in subsection (a) of this section and the completion of the roof installation required by subsection (b) of this section, the Secretary shall be relieved of the authority and obligation under subtitle A of this title to construct and operate a National Visitor Center at Union Station. The provisions of subtitle A of this title shall thereafter be deemed superseded by any contrary or inconsistent provisions of subtitle B of this title.

"SEC. 112. The Secretary of Transportation shall provide for the rehabilitation and redevelopment of the Union Station complex primarily as a multiple-use transportation terminal serving the Nation's Capital, and secondarily as a commercial complex, in accordance with the following goals:

"(a) Preservation of the exterior facade and other historically and architecturally significant features of the Union Station building;

"(b) Restoration and operation of a portion of the historic Union Station building as a rail passenger station, together with holding facilities for charter, transit, and intercity buses in the Union Station complex;

"(c) Commercial development of the Union Station complex that will, to the extent possible, financially support the continued operation and maintenance of such complex; and

"(d) Withdrawal by the Federal Government from any active role in the operation and management of the Union Station complex as soon as practical and at the least possible Federal expense consistent with the goals set forth in subsections (a) through (c) of this section.

"SEC. 113. (a) There are authorized to be appropriated to the Secretary of Transportation such sums as may be necessary to meet lease and other obligations, including maintenance requirements, incurred by the Secretary and assigned to the Secretary of Transportation under this subtitle. The Secretary shall transfer to the Secretary of Transportation at the time of such assignment such sums as may have been appropriated to the Secretary to meet such obligations and not yet expended as of the date of such assignment.

"(b) Notwithstanding the provisions of section 102(a)(5) of this title, the Secretary of Transportation is authorized to purchase for the United States any property that was leased by the Secretary under subtitle A of this title and assigned to the Secretary of Transportation under this subtitle. The purchase agreement for such property may provide for payment by the Secretary of Transportation over a term not to exceed six years. There are authorized to be appropriated to the Secretary of Transportation, in addition to the sums authorized by subsection (a) of this section, not to exceed $275,000 per year for not to exceed six years to carry out such purchase. Such purchase shall not be subject to the provisions of title III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4651 et seq.).

"SEC. 114. (a) The Secretary of Transportation shall, on an emergency basis, carry out an engineering survey of all existing structures at the Union Station complex for the following purposes:

"(1) to determine those actions necessary or desirable to preserve the long-term structural integrity of, and provide functional utility systems for, the historic Union Station building;

"(2) in cooperation with Amtrak, to determine those actions necessary or desirable to restore rail passenger handling functions to the historic Union Station building and otherwise improve rail passenger service facilities at Union Station, including improved passenger access to the trains; and

"(3) to prepare detailed estimates of the costs of such rehabilitation and improvement.

"(b) Concurrently with the engineering survey required by subsection (a) of this section, the Secretary of Transportation, in cooperation with the National Railroad Passenger Corporation, shall carry out a planning and market feasibility study to assess the commercial development potential of the Union Station complex. Such study shall also include, but not be limited to, an assessment of the feasibility and desirability of:

"(1) providing passenger transportation services from Union Station to the commercial airports in the area;

"(2) constructing a heliport at or near the Union Station complex; and

"(3) relocating to office space in Union Station the offices of Federal or other public transportation agencies.

"(c) The Secretary of Transportation shall complete the engineering survey required by this section not later than six months after the date of enactment of this section, and shall complete the planning and market feasibility study required by this section not later than twelve months after the date of enactment of this section.

"(d) Of amounts appropriated under section 704(a) (1) and (2) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854(a) (1) and (2)), $1,000,000 shall be available to and be utilized by the Secretary of Transportation to carry out the purposes of subsections (a) and (b) of this section.

"(e) Within twelve months following the date of enactment of this section, the Secretary of Transportation shall submit a report to the Congress on the results of the engineering survey and planning and market feasibility studies carried out under this section. Such report shall be referred to the Committees on Commerce, Science, and Transportation and Environment and Public Works of the Senate and the Committees on Energy and Commerce, and Public Works and Transportation of the House, respectively. Such report shall include a specific commitment of Federal funds for completion of the rehabilitation of the historic Union Station building, together with any necessary request for appropriations, in the amount determined by the Secretary of Transportation to be necessary in light of the survey and studies carried out under this section, from either or both of the following sources:

"(1) funds authorized to be appropriated and not yet appropriated under section 704 (a) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854(a)) that are in excess of the amounts set out in the last sentence of such section 704(a); and

"(2) funds programed or reprogramed from any other appropriation available to the Secretary of Transportation. Notwithstanding any other provision of this subsection, no funds from the Northeast Corridor Improvement Project and other rail or rail-related programs in excess of $29,000,000 shall be available for the completion of the rehabilitation of the historic Union Station building or other purposes determined by the Secretary of Transportation to be necessary in light of the survey and studies carried out under this section if within 90 calendar days of continuous session of the Congress after any request for such excess funds either the Committee on Energy and Commerce of the House of Representatives or the Committee on Commerce, Science, and Transportation of the Senate disapproves of the availability of such excess funds for such purposes by majority vote. For purposes of this subsection, continuity of session of the Congress is broken only by an adjournment sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the period described in this subsection.

"SEC. 115. (a) In order to achieve the goals set out in section 112 of this subtitle, the Secretary of Transportation is authorized to select and subsequently enter into one or more agreements (hereafter in this Act referred to as 'development agreements') with one or more responsible individuals, corporations, or other private entities with

demonstrated experience in the financing, undertaking, and managing of commercial real estate development (hereafter in this Act referred to as 'developers').

"(b) The Secretary of Transportation shall prescribe the procedures and criteria for selection of a developer for the Union Station complex: *Provided*, That no final developer selection shall be made unless and until at least two developers meeting minimum criteria prescribed by the Secretary of Transportation have submitted to the Secretary of Transportation specific design and financing proposals for the rehabilitation and redevelopment of the Union Station complex, and specific proposals for the acquisition, conveyance, or lease of real property. The Secretary of Transportation is directed to initiate discussions with potential developers as soon as possible following enactment of this section to assure the earliest possible selection of a developer or developers.

"(c) Development agreements entered into this section shall be considered cooperative agreements for purposes of the Federal Grant and Cooperative Agreement Act of 1977 (41 U.S.C. 501 et seq.). With respect to such development agreements, the Secretary of Transportation is authorized to modify or waive the application of regulations otherwise applicable to Federal or Department of Transportation financial assistance agreements, to the extent the Secretary of Transportation determines in his discretion to be necessary to accomplish the purposes of this subtitle at the lowest cost to the Federal Government.

"(d) The Secretary of Transportation is further authorized to enter into such other agreements and contracts, except any agreement or contract to sell property rights at the Union Station complex, with such persons, corporations, financial institutions, Federal, regional, or local agencies, or the Architect of the Capitol as the Secretary of Transportation deems necessary or desirable to carry out the purposes of this subtitle. Any such agreement may be made assignable to a selected developer or developers of the Union Station complex.

"SEC. 116. (a)(1) The Secretary of Transportation is authorized to acquire for the United States, by lease, purchase, or otherwise, any interest in real property (including, without limitation, interests in the nature of easements or reservations) and any other property interest (including, without limitation, contract rights) in or relating or adjacent to the Union Station complex that the Secretary of Transportation deems necessary to carry out the purposes of this subtitle.

"(2) If the Secretary of Transportation determines that property under the jurisdiction of the Architect of the Capitol in squares 721 and 722 eastward of the historic Union Station building is necessary to carry out the purposes of this subtitle, the Secretary of Transportation may request assignment of such property to the use of the Secretary of Transportation, as a part of the Union Station complex, and subject to the provisions of this subtitle, and the Architect of the Capitol shall so assign such property.

"(b) Notwithstanding any other provision of law, the Secretary of Transportation is authorized to maintain, use, operate, manage, and lease, either directly, by contract, or through development agreements, any property interest held or acquired by the Secretary of Transportation for the United States under this subtitle, in such manner and subject to such terms, conditions, covenants, and easements as the Secretary of Transportation deems necessary or desirable to carry out the purposes of this subtitle.

"SEC. 117. (a) The Secretary of Transportation is authorized to use income and proceeds received from activities authorized by this subtitle, including, without limitation, operating and leasing income and payments made to the Federal Government under development agreements, to pay expenses incurred by the Secretary of Transportation in carrying out the purposes of this subtitle, including, without limitation, construction, acquisition, leasing, operation, and maintenance expenses, and payments made to developers under development agreements.

"(b) A special deposit account is hereby established in the Treasury of the United States, to be known as the Union Station Fund, which shall be administered as a revolving fund. Such special deposit account shall be credited with receipts of the Secretary of Transportation from activities authorized by this subtitle and the balance in such special deposit account shall be available in such amounts as are specified in annual appropriation Acts for making expenditures authorized by this subtitle.

"SEC. 118. (a) Notwithstanding any other provision of title 23, United States Code, and other Acts pertaining to Federal-Aid Highways, the Secretary of Transportation shall immediately approve the completion of the parking facility, and associated (including any necessary pedestrian access and walkways, escalators, elevators, moving sidewalk access, and connections) at Union Station, to be financed with interstate highway funds apportioned to the District of Columbia. To the extent necessary to complete such project, such apportionment shall not be subject to any obligation limitation enacted for the fiscal year ending September 30, 1982, or the fiscal year ending September 30, 1983. The amount of such apportionment necessary to complete such project not to exceed $40,000,000, shall remain available to the District of Columbia until expended, without regard to the provisions of section 118(b) of title 23, United States Code. The Federal share shall be 100 per centum of the total cost of such project.

"(b) Within sixty days of the enactment of this section, the Secretary of Transportation shall enter into an agreement with the District of Columbia's Department of Transportation for the Secretary of Transportation's administration of the project described in subsection (a) of this section. Such project agreement shall provide that all right, title, and interest in such parking facility shall remain in the United States. The rate of fees charged for use of the parking facility may exceed the rate required for maintenance and operation of the facility, and shall be established in a manner that encourages its use by rail passengers and participants in activities in the Union Station complex and area.

"SEC. 119. (a) The Secretary of Transportation is authorized, on such terms and conditions as he may prescribe, to release the Washington Terminal Company from any or all of its obligations under agreements and leases entered into under subtitle A of this title, including, without limitation, the obligation to construct a new railroad passenger station as provided in section 102(a)(4) of this title.

"(b) The Secretary of Transportation shall waive such statutory or contractual restrictions on the use of the parking structure and associated ramps described in section 118 of this subtitle as would otherwise be required or imposed because funds for such construction were or are provided under the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.).

"(c) The Secretary of Transportation is authorized to use funds appropriated under section 704(a)(2) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 854(a)(2)) to carry out the purposes of this subtitle without regard to the matching funds requirement of section 703(1)(B) of such Act (45 U.S.C. 853(1)(B)). Funds appropriated under section 704(a) of such Act may not be used for design, construction, or operation of a heliport at or near Union Station.

"(d) The Architect of the Capitol is authorized to enter into agreements with the Secretary of Transportation or his designee or assign to furnish steam or chilled water or both from the Capitol Power Plant to the Union Station complex, at no expense to the legislative branch.".

SEC. 4. (a) The Act approved November 5, 1966 (Public Law 87-759) and section 108 of the National Visitor Facilities Act of 1968 (Public Law 90-264) are repealed.

(b) Section 102(b) of the National Visitor Center Facilities Act of 1968 (40 U.S.C. 802(b)) is amended by striking the word "title" and inserting in lieu thereof the word "subtitle".

SEC. 5. As used in section 502(a)(1)(B) of the Rail Passenger Service Act, the term "Amtrak Commuter" shall mean, with respect to the period prior to January 1, 1983, "Conrail".

Mr. MOYNIHAN. Ms. President, I move to reconsider the vote by which the bill was passed.

Mr. GORTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, before the Senator starts, I ask unanimous consent that the time for the transaction of morning business be extended until 6 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. I thank the distinguished majority leader and the distinguished Senator from New York for yielding.

DEFENSE AND THE B-1 BOMBER

Mr. HOLLINGS. Mr President, to understand the controversy over the B-1 bomber, a person must appreciate: First, the nature of modern weapons; second, the limits of our economic resources; and third, the limits to the usefulness of a manned penetration bomber.

THE NATURE OF MODERN WEAPONS

The strategy for American survival is premised on the superiority of technology. We do not and cannot compete against the Russians or Chinese militarily on a man-for-man basis. We do not and cannot compete against the Soviets one tank versus one tank.

We have 11,000 tanks while the Soviets have 50,000. How do we hope to fight and win given this ratio? The answer is in a superior tank with a superior tank operator.

We intentionally include on our tanks sophisticated fire control systems, advanced suspension systems, laminated armor, and other state-of-the-art gear because we know it is not going to be one-for-one situation. Our one tank must be capable of knocking out 5 or 10 of theirs in order to prevail.

We are constantly hearing today that America's weaponry is too sophisticated, that it contains too much expensive technological gear, and that we cannot find the skilled personnel to operate

and maintain the weaponry. Some argue that all we need is a cheap, "tough" tank—like the Soviets build—to survive better in battlefield conditions.

We could easily produce that kind of tank, if we are ready, willing, and able to produce and man 50,000 of them. This we cannot do. For one thing, we do not intend to have that large a standing Army, so we go for the superior tank, making sure the advanced technology is designed for the needs of the battlefield. This has always been our military approach.

It applies to the shoes the soldier wears as well as to the bombers we send aloft. The constant task facing Congress is to insure that we keep ahead with technology. We want our troops to have the best equipment in every aspect. Of course, we must also be able to afford it.

THE LIMITS OF OUR ECONOMIC RESOURCES

When we fought World War II, an M–1 rifle cost $41.20. A Sherman tank went for $40,000. And a B–17 manned penetration bomber cost $97,000. Right now it appears that the projected cost for each B–1 bomber would be $400 million.

Everyone knows that today we are operating with limited economic resources. In a world reeling under inflation and high interest rates, every program is being cut. While we are trying to increase our defenses, that is not to say we are trying to increase our costs. We must look at each proposed military expenditure from every angle—not only how much it costs, but how much it costs to repair; not only how much one of them costs, but how much do 100 cost and what is the effect on the budget and the economy.

We must make economical buys, and when it comes to bombers they must last. We are not looking at the cost of just long-range bombers, but the cost of medium bombers, the cost of fighter bombers, the cost of fighters, of helicopters, and observation planes all the way down to the Piper Cub. And we must figure the cost of the manned Shuttle because it too has military applications.

These costs must be seen within the larger context of the overall defense budget—the cost of equipping the infantry, the cost of building aircraft carriers and Trident submarines at $2 billion apiece, and the cost of ammunition from the rifle bullet to one piece of ammunition fired from a plane—the Phoenix missile costing over $1 million a copy. Over and above hardware come personnel costs which exceed $100 billion a year.

All these defense costs must be considered against the backdrop of other Government endeavors—like law enforcement, highways, health costs, social security, price supports for agriculture, and aid for small business. Somewhere there is a limit—and we have been exceeding the limit. We have been borrowing from the next generation in order to pay for all this Government. The results—busted budgets, tax cuts written in red ink, and high interest rates.

At $400 million each, the 100 B–1 bombers being asked for will cost us $40 billion; $40 billion over the next 5 years is about what we had hoped to increase the entire defense budget.

For $40 billion, we can buy a lot of sorely needed infantry-fighting vehicles, submarines, tanks, helicopters, destroyers, pre-positioning ships, landing gear for the Marines, and ammunition for everybody.

So before we commit to $40 billion and 5 years on a single weapon, we must stop, look, and listen. We must understand that our conventional forces are in a sorry state of readiness—the principal trouble being that we have denied them the equipment, the flying hours, the steaming hours, and the vehicles necessary for training, mobility, and readiness.

We are 60,000 trucks short in the Army right this minute. Look at our inability to defend against gas or chemical warfare. The next war will not be fought by one soldier just shooting at another man. The field of battle for conventional forces may very well be gassed by our adversary. The Russians have already used gas in Laos, Cambodia, and Afghanistan.

Their infantry wears protective clothing developed for this kind of warfare. In another advance, Soviet troops travel in modern infantry-fighting vehicles. They have 76,000 of these—the United States has none. It is tough to tell the Commandant of the Marine Corps that we cannot give him the gear he needs because the B–1 has just gobbled up all the money. I just did that this week.

We are not prepared to fight a conventional war. Clausewitz said, "History shows that a nation fights the war that it is prepared to fight."

We are not prepared to fight in the Indian Ocean, so we will not. We are not prepared to fight a conventional war in NATO, so we will not. We are only prepared to fight a nuclear war—so we will if one comes. The best way to avoid the nuclear holocaust is to be prepared to fight the conventional battle. But the B–1 is a nuclear carrier. Underprepared for conventional war, the B–1 overprepares us for nuclear.

The Soviets did not march on Angola or Afghanistan with a nuclear attack. They went with conventional forces. For 10 years now, we have been "détenting" and dillying and disarming while the Soviets have been beefing up and outspending us militarily by $500 billion.

We cannot repair this difference in a year. It will take several years. So we must set priorities. Is the primary need another Trident submarine, or is it an aircraft carrier? Is the first order x number of tanks, or helicopters? A manned bomber, or more and better equipment for our conventional forces?

I believe the first priority is manpower. I have written about the draft in a previous newsletter. I believe that the one best move to build our military and show our commitment is the universal draft. It would get a cross-section of our society participating in America's defense. It would give us the skills. It would cost less, and it would evidence our will power as well as our military power.

My second priority would be readiness. That includes money for ammunition, money for fuel, money for operations and maintenance of the equipment, and money for adequate flying, steaming, and training hours.

Rather than $40 billion for a single weapon—a manned penetration bomber—I would rather spend that same amount over the next 5 years on fleshing out the Rapid Deployment Force in the Indian Ocean, equipping the Marines, equipping our National Guard and Reserves, refitting nine Navy ships, buying some attack submarines, tanks, helicopters and fighters, and speeding up development of the next generation of manned, penetration bombers—the Stealth.

THE LIMITS TO THE USEFULNESS OF A MANNED PENETRATION BOMBER

So you will understand where I am coming from, I am a strong believer in the military and a strong supporter of the Air Force. At this moment, we have many bombers. We have long-range penetration bombers, such as 345 B–52's and 63 FB–111's. We have many medium- and short-range bombers such as the F–15's, remember the Saudis were asking for bomb racks for their F–15's; hundreds of F–16's, remember this is the plane that Israel used to bomb Baghdad. We soon will have the superior F–18 fighter-bomber by the hundreds. We have A–6's, A–7's, and VSTOL fighter-bombers. I touch on this to emphasize the difference between medium-range bombers and the long-range bombers needed to penetrate Soviet defenses. We are continuing to build and capitalize on America's technology. But as concerns the B–1, there are limits to its ability to penetrate. Generally, there are limits on the manned bomber which makes it necessary for us to put our eggs in more than one basket.

Everyone agrees that the B–1 bomber can no longer be depended upon as a penetration weapon after 1990. We know that the B–52, old as it is, can carry us that far. And we know that we cannot get the first squadron of B–1's flying until 1987 at the earliest.

The bottom line then, if everything proceeds on schedule is a $40 billion program to provide penetration for the 3 years between 1987 and 1990. After that the state of Soviet defenses will make it impossible for either the B–52 or the B–1 to get through.

The B–1 has simply become too expensive for its primary mission. Surely it can be used after 1990 as a stand-off cruise missile carrier but paying $400 million a copy for this role is unthinkable. The $400 million cost has been disputed.

But special studies by the General Accounting Office and the Congressional Budget Office confirm this cost.

Finally as a maneuver with the Congress, the Air Force has been citing inflated costs to keep the B–52's going until the 1990's inferring that rather than paying the expense to keep the B–52's in the air, you could use the same money to buy the new B–1.

Whether you go for the B–1 or go for the Stealth or go for both or go for nei-

ther, every plan shows that the B–52 must be kept current and flying until 1993. And so those costs will have to be paid.

Then when they are phased out in 1993, the question is: shall they be replaced totally by the Stealths that can penetrate or by the B–1 that cannot or by both—if we had the money.

The B–1 is a superb plane and I wish we had 200 B–1's on the line today. Five years ago, I implored President Carter to move forward with the B–1. Instead we wasted 5 years and $5 billion and the opportunity to have them flying over the kind of reasonable lifetime that such a huge investment requires.

Carter made his decision, the factory has closed down, and the cost has soared from $100 million apiece to $400 million. There is a time for every weapon, and the B–1's is passing.

On November 5, Secretary of Defense Caspar Weinberger testified:

> I think there is no question whatever that we will not be able to use the B–1 as a penetrator after 1990.

Earlier, Secretary Weinberger had emphasized the limits of the B–1 after 1990 by stating:

> If you do the B–1 only you spend a lot of money—again I am trying to guess at the extent of development of the Soviet air defenses, so if I use a couple of years, give me leeway 1989, 1990, probably 1988 to 1989—you lose the ability to penetrate unless someone wants to direct suicide missions and that is not anything I am going to do.

This only confirms a similar statement by Fred C. Ikle, Under Secretary of Defense for Policy before the Armed Services Committee on October 27, 1981.

Recently, the United States has been developing a Stealth or advanced technology bomber. This plane is designed to confuse the enemy radar and fire control system so that it can penetrate successfully and reach targets well within the land mass of the Soviet Union. Some would argue that the technology is unproved, too "chancey" to count on and will not be ready by 1990.

However, the technology has been been proved and as former Assistant Secretary of Defense for Policy Perry has stated, it can be developed by 1989.

Wanting both the B–1 and the Stealth, the Air Force is dragging its feet on the Stealth to make it seem that both planes will be necessary.

Accordingly, the administration has requested both the B–1 and the Stealth. Given the limited usefulness of the B–1, given our other defense needs, and given the general state of the budget and the economy, I do not believe we can afford to proceed with both.

It would be far more cost effective, and far better for the overall strength of the military, if we speeded up the Stealth bomber and tried to get it on line a year or two earlier than presently projected.

To understand the limits on manned bombers generally—and to appreciate why proceeding with two new systems is outlandish—we need to remember that America's strategic defense consists of a triad: First, the intercontinental ballistic missile, or ICBM; second, the Poseidon or Trident submarine; and third, the manned bomber.

These provide the options for penetrating the defenses of the Soviet Union over a long distance. If the military need ever comes to penetrate all the way to Moscow, the best way is with a ballistic missile launched from either land or sea.

An almost equally good way is with a cruise missile, whether it is land launched from Europe, submarine launched from the sea, or launched from a B–52 standing off outside the borders of Russia. The most inefficient way is by manned bomber, given Soviet defenses and the vulnerability of the weapon.

So, in recent years, the long-range manned bomber role is being more and more taken over by the small, difficult-to-detect cruise missile. It is relatively cheap, accurate, and better able than a bomber to get through to its target.

Some of our armchair experts argue for the superiority of the bomber over the missile by saying that once the missile is launched, there is no calling it back. My answer is that we better not have a plane with a nuclear bomb wandering around Moscow while we are still wondering if we have given the right order

In fact, I cannot imagine an American Commander in Chief ordering a manned bomber to attack Moscow unless we are already into a nuclear holocaust.

When that point in warfare has been reached, it seems pretty clear that we would be going with our ICBM's, intermediate ballistic missiles, and cruise missiles.

This is not to say that the role for the manned bomber is finished. But it is to say that it does not have the commanding role it once had. It is now part of a larger weapons inventory that includes faster and more accurate systems.

Some, like the cruise missile, are far cheaper. We can and should retain the ability to penetrate Soviet airspace with a manned bomber. We have that capability with the B–52 which has served us long and well and which can be used to fly those 3 additional years beyond 1987.

After 1987, neither the B–52 nor the B–1 will be able to penetrate Soviet air defenses. After that, only the Stealth will be able to get through.

So is it not the wisest policy to accelerate Stealth? It will be able to penetrate from the 1990's on, and it can be delivered as early as 1989. By taking this course, we can save the $40 billion and expend it on readiness and in all those other areas of preparedness that we have been short changing for the past decade.

I know this disappoints my friends in the Air Force. Secretary of Defense McNamara back in 1964 canceled the B–70, and in 1977 President Carter canceled the B–1. I am sure by now that if someone could give a guarantee that the Stealth would be built as a replacement for the B–52, the Air Force would abandon its drive for the B–1.

They have been worried for years about a replacement for the B–52 and now they have a President, finally, willing to go along—even though it is economic nonsense.

As a result of this paranoia, the Air Force has requested a $400 million conventional bomber and a $300 million Stealth strategic bomber. For a conventional bomber, we could easily and far more economically beef up our FB–111's at $64 million a copy rather than $400 million as recommended by Gen. Richard H. Ellis, former Commander in Chief of the Strategic Air Command. But we cannot afford the B–1 and the Stealth.

We need to strengthen our Triad with the Stealth. We need to strengthen our overall readiness in defense. The task is to allocate limited resources. On this basis, I oppose the B–1, favor expediting the Stealth, and favor immediately allocating this $40 billion to readiness.

THE IMPORTANCE OF AMERICA'S PREEMINENCE IN SPACE

Mr. CANNON. Mr. President, once again the Space Shuttle has flown successfully and returned to Earth, and I would like to take this opportunity to congratulate the fine NASA-industry team which made this flight such a success and the magnificent skill of Astronauts Joe Engle and Richard Turly.

Unlike other nations, the United States is not afraid to let the international press view every step in the development of its civilian space program, and the Space Shuttle has not been an exception. We are willing to share with the world our successes as well as our failures as we develop this tremendous capability.

The fact that NASA had a problem with one of the three fuel cells on board the Shuttle should not cause undue concern. The Shuttle needed only one operable fuel cell to be able to return to Earth, and any research and development effort, such as the Space Shuttle, requires a period of time to work out the "bugs" in its design.

It takes a lot of talent, effort, and dedication to translate the initial conception of a major space system like the Shuttle into an operational reality, and I am fully confident that we will develop this capability. We are, with this first-time-ever return of the same vehicle to space, well on the way to doing so.

Mr. President, while I am proud of the continuing success of the Shuttle's development, I am also concerned about a waning resolve to move forward and insure our preeminence in space during the 1980's. The Space Shuttle, as magnificent as it is, is still just a transportation system capable of transferring astronauts and cargo from the Earth's surface to an orbit several hundred miles above the Earth.

What we ought to be thinking about and planning for now is how to use this capability for various commercial, scientific, and national security missions, and defining what other basic capabilities are needed to complement and enhance our use of the Shuttle.

While we follow the development of the Shuttle into an operational capability, we must recognize that we cannot stand still in the other areas of the space program. We must also invest in these areas as well, or we will lose our leader-

ship in space to other nations who are willing to make the investment—and other nations are moving in that direction.

Our investment will not involve large amounts of additional funding, but rather a commitment to fund NASA in the future at approximately its current level, adjusted for inflation.

In the past our main source of competition was the Soviet Union. This no longer is true as other nations develop the capability to operate in space. We are entering a new era of international competition in space, particularly for commercial purposes. The primary competitors in the future, in addition to the Russians, will be the Europeans and the Japanese.

We must view our space program in this new context of competition while retaining the long-standing benefits of cooperation in the exploration of the solar system and the universe beyond.

Let us also not lose sight of the goal, stated in the National Aeronautics and Space Act of 1958, that:

Our activities in space should be devoted to peaceful purposes for the benefit of all mankind.

The use of space for national security purposes has helped to preserve world peace and lessen the likelihood of a global war. Since some of the capabilities needed by the military space program are also needed by the civilian space program, a development in one area can be used in the other.

The Space Shuttle is one example of this, and weather satellites are another. Thus, funding for our civilian space program can either directly or indirectly aid our military space program.

The commercial use of space, while almost 20 years old, is still in its infancy. During the 1980s, a tremendous growth in the use of communications satellites is anticipated. Not only will existing services be expanded, but new uses will also be developed.

In addition, the use of satellites to detect and monitor the Earth's resources, and the manufacture of various products in space are being investigated by NASA and industry, and these capabilities may further expand our commercial use of space in the 1990's.

In a real sense, our commercial use of space parallels our commercial use of aviation. Today, aviation is at least a $100 billion a year enterprise in the United States alone. Who would have thought that this would have occurred at the time of the Wright Brothers' first flight, or for that matter, at the time of Charles Lindbergh's flight about 20 years later.

Our continued commercial success in the field of aviation depends upon NASA doing the high risk research and development that industry cannot afford to do. Without that help, our industry would soon lose its preeminence to foreign competition.

Similarly, our preeminence in the commercial use of space depends upon NASA performing the high risk research and development in order to develop the knowledge necessary for private industry to build viable commercial systems.

The exploration of the solar system and the universe beyond is the greatest adventure of our time, and the Apollo, Viking, and Voyager missions may someday be seen to have been as important to the world as the voyages of Columbus, Magellan, and Drake. Not only are we learning a tremendous amount about the origin and nature of the universe, but we are also laying the foundation for the expanded use of space by future generations of Americans.

EXPANDING OUR COMMERCIAL USE OF SPACE

Mr. President, I should now like to describe the three areas that are likely to lead our expanded use of space for commercial purposes in the next 10 to 20 years: Communications satellites, remote sensing satellites, and the manufacture of various products in space.

COMMUNICATIONS SATELLITES

Communications satellites have been the only commercial product that has made a profit in the past. This business will continue to expand during the 1930's. According to a recent comprehensive study by Western Union, the worldwide communications satellite market is estimated to be $35 to $50 billion over the next 20 years.

The U.S. market alone is estimated to be $16 to $20 billion during this time period.

This estimate includes such potential new services as video teleconferencing which could improve productivity and reduce the amount of business travel; and the direct broadcast of television signals from a communications satellite to individual homes which could vastly increase the number of television channels received and would not require the installation of an extensive cable television network.

Starting with the Syncom series of spacecraft which established the feasibility of using the geosynchronous orbit, the United States has led this field for many years. NASA developed a significant in-house expertise, funded the development of new technology by several U.S. contractors, and played a leadership role in making this a uniquely U.S.-dominated field.

In late 1972, the U.S. Government thought that the industry had matured to the point where it could support its own R. & D. needs and decided that NASA should not initiate any communications satellite flight programs beyond the sixth applications technology satellite (ATS–6).

The funding for such programs, which had ranged between $80 and $120 million per year, in 1981 dollars, over the period 1962–74, was sharply reduced to approximately $10 million per year.

The reduced amount was just sufficient to allow operation of on-going experiments, low-level technology development, and limited system concept studies.

Europe and Japan were quick to fill the vacuum left by NASA's withdrawal from satellite communications, as evidenced by their increased investment and rapid rise to leadership in several communications satellite technologies.

Even more important is the fact that European and Japanese manufacturers are moving from the fabrication of components to the fabrication of subsystems and complete systems, and changing their roles from that of subcontractor to prime contractor.

A recent Japanese report estimates that Japan's space industry will expand to five times its present size by 1990 and continue this growth during the 1990's. Much of this growth will occur in communications satellites. Let us make sure that we do not wind up buying our communications satellites from Japan in the future and becoming second-best in another commercial sector.

In order to meet this challenge, NASA working with the communications satellite industry, should develop the 30/20 GHz frequency band. This will enable the United States to maintain its preeminence in communications satellites into the 1990's.

REMOTE SENSING

Remote sensing satellites can help us discover new sources of non-renewable resources, monitor the size and quality of our water supply and agricultural crops, and detect major sources of environmental pollution.

Thus, they can help us sustain and improve the quality of life around the globe by providing us with accurate information with which to make vital decisions which will affect us all.

For more than a decade, Congress has expressed an interest in establishing an operational civil land remote sensing system. The operational system would build upon NASA's experimental Landsat system.

The evolution to an operational system has not yet occurred because the financial risks in operating such a system are great and the profit not clearly defined. The Carter administration proposed that the Federal Government operate an interim operational system during the 1980's until it was feasible for private industry to take over the system.

Earlier this year, the Reagan administration decided that the Federal Government should limit its support for an interim system to Landsats D and D,' with the hope that private industry would take over the system after the demise of Landsat D'—nominally about 1988.

The goal of having the private sector take over the system was the same; the difference between the positions of the two administrations was in the timing and the role of industry and Government.

Recently, the Senate Subcommittee on Science, Technology, and Space and the House Subcommittee on Space Science and Applications held joint hearings to gather additional information and opinions on the best way to accomplish the transition to an operational system and the role of private industry in such a system. There was general agreement among the witnesses that:

First, the Landsat data was useful;

Second, data continuity and increased marketing was the key to the success of an operational system;

Third, the cost of the data should be more realistically priced; and

Fourth, NASA should continue to do the high risk R. & D. in remote sensing.

There was no agreement on the best way to accomplish the transition to an operational system and the role of private industry in it.

Additional time will be needed before this can be resolved. One thing ought to be clear, however, the United States has invested over a billion dollars in developing a civilian remote sensing capability, and we should think of a payoff in this area on a long-term basis.

Now is not the time to be penny-wise and pound foolish and thus lose our commercial remote sensing capability to foreign competition.

The French are planning to build a remote sensing system called SPOT. Their first satellite will be launched in 1984, and it will have some performance characteristics that are better than, or not available with, the Landsat satellites.

Japan, the European Space Agency (ESA), and India are also studying possible additional remote sensing systems during the 1980's. Competition with our Landsat system is real and just over the horizon.

With this in mind, I would like to propose an approach for the transition to an operational remote sensing system which will enable it to occur as soon as possible, protect the public interest and the U.S. taxpayers' investment, and permit the maximum participation by private industry. The U.S. Government should insure data continuity by agreeing to continue to operate the space segment, that is, the Landsat satellites, until the early 1990's or until industry is capable of taking over the space-based segment, whichever comes first.

Private industry would take over the operation of the ground segment on a competitive basis. Raw data transmitted to the ground from the Landsat satellites, as well as processed data, would be sold to anyone who wishes it.

This will encourage maximum competition in private industry and enable private industry to market the data to as many users as possible.

By pursuing the above approach, we will provide sufficient time to permit additional information to be obtained on the usefulness and cost of providing remote sensing data. We will also guarantee the continuity of data for a sufficient time in the future to match any known foreign competition and to satisfy the needs of the user community.

MANUFACTURING IN SPACE

The United States, Russia, Germany, and Japan have conducted, or are planning to conduct, scientific experiments in space with various materials. This area of the space program is at a very early stage of development, and no one appears to be able to state exactly what the costs and benefits are of manufacturing various products in space.

Pharmaceuticals and semiconductor crystals appear to be the likeliest commercially viable products.

In addition to manufacturing products in space, the results of the initial experiments on materials in the absence of gravity may also improve the manufacture of Earth-based products by providing a better understanding of the effect of gravity upon various materials as they are processed.

CONTINUING OUR EXPLORATION OF THE SOLAR SYSTEM

Mr. President, the exploration of the solar system increases our scientific knowledge, adds to our understanding of the Earth, raises the level of our technology, is a source of national pride and international prestige, and fits our pioneering heritage.

Furthermore, it is carried out in fulfillment of the first stated objective of the National Aeronautics and Space Act of 1958; namely, "The expansion of human knowledge of phenomena in the atmosphere and space." From the viewpoint of NASA's budget, it is not a large amount of money. Clearly, this effort should be continued.

Recently the two Voyager spacecraft passed by Jupiter and Saturn and gave us the first detailed look at both of these planets. Voyager II is now on its way to an encounter with Uranus in 1986 and Neptune in 1989.

Thus, by the end of this decade, all of the major planets and their moons will have been visited by unmanned spacecraft, with the exception of Pluto. However, we have just begun to understand the solar system. Not only should we be planning additional planetary missions, but we should also be planning missions to some of the comets and asteroids as well.

In a congratulatory message sent to the Voyager team earlier this year, President Reagan stated:

> No other area of endeavor so galvanizes and inspires the American spirit as the conquest of space.

Unfortunately, these fine words have not been matched with needed funding in this area. Quite the contrary, the United States recently withdrew from the joint International Solar Polar Mission in which the Europeans have invested so heavily in. This can hardly help our credibility on future international programs.

The United States has also missed the opportunity to send a probe to Halley's Comet during its closest approach to the Sun. Its next approach will be about 80 years from now. What is even more disturbing, the continued exploration of Jupiter and Venus, with the Galileo and Venus orbiting imaging radar (VOIR) projects, is in some doubt.

I believe that we can and must do better than this, that funding for our unmanned exploration of the solar system should be continued, and that the United States should be planning a major mission for 1992—the 500th anniversary of Christopher Columbus' landing in the New World.

DEVELOPING OUR BASIC CAPABILITIES TO OPERATE IN SPACE

Mr. President, we ought to take the long view about our use of space beyond the 1980's and proceed accordingly. The Space Shuttle is a step in the right direction. It is a reusable spacecraft which can transfer astronauts and payloads from the Earth to orbits several hundred miles above the Earth in an economically more attractive manner than using expendable launch vehicles.

In addition to developing the Space Shuttle, NASA is also beginning to define the capabilities needed for an orbital transfer vehicle and a space station. These and other related capabilities will provide our Nation with the basic tools to expand our presence in space for commercial and national security purposes, and some of these capabilities could also be used to expand our exploration of the solar system.

Since about 40 percent of our satellites are placed in geosynchronous orbit 22,300 miles above the Earth's surface, another reusable vehicle, called an orbital transfer vehicle, will eventually be needed to transfer astronauts and payloads from the Space Shuttle to geosynchronous orbit. And, to allow the Space Shuttle to perform its primary task of transportation, a space station will be needed in orbit several hundred miles above the Earth. The space station will take over the Shuttle's in-orbit functions. This will include: Deploying, servicing, and retrieving satellites; berthing, maintaining, and refueling the orbital transfer vehicles; and performing various experiments in space.

FUTURE CHALLENGES

Mr. President, my comments should not be interpreted to suggest that the benefits to be gained by expanding our use of outer space will come automatically or easily. There will be challenges of a technological nature and policy issues that we will need to address.

For example, the Space Shuttle is still an experimental vehicle. Much still remains to be done before it can be viewed as operational. When it becomes operational, we will face other questions such as: Who should operate it, what should the pricing policy be for commercial launches, how many Shuttle orbiters will we need, how long will we have to have expendable launch vehicles, and so forth.

In the area of space science, how do we pick up the pieces and resume our policy of international cooperation after canceling the U.S. spacecraft for the joint United States-European International Solar Power Mission?

In the area of space applications, what is the best way for us to help less developed countries use space for various commercial purposes, and should we go to the U.N.-sponsored conference UNISPACE 1982?

Another area of concern is assuring that NASA has an adequate work force to perform the tasks that ought to be done to maintain our preeminence in space. It is essential that NASA have positions available to reinvigorate the work force in a rapidly changing technical environment, and to halt the increasing average age of agency personnel.

Without a steady influx of new people, NASA will be without the capacity to accomplish the research, development, and management tasks essential to maintaining leadership in space technology.

One final point on the personnel issue. A prerequisite to attracting and retaining new and outstanding talent is a rec-

ognized national commitment to a comprehensive space program such as the one I have outlined above.

All of the tasks that I have mentioned could be accomplished during the next 10 to 15 years without requiring a large increase in future funding for NASA. In fact, NASA's budget would continue to remain less than 1 percent of the overall Federal budget.

What is required, is a halt to the further decline in NASA's budget, and to provide NASA with an annual level of funding in the future which is approximately constant and equal to its current budget, adjusted for inflation.

We ought to recognize that our civilian space program is not just another line item in the Federal budget. Not all Federal expenditures are the same. Some, like the space program, are investments that will provide many long-term benefits, and because of this distinction, it is vital that we halt the decline in support for the space program which has occurred over the past 15 years.

Mr. President, President Kennedy recognized the importance of our civilian space program and made the decision to send men to the Moon by the end of 1969. In 1962, Kennedy stated:

> Our leadership in science and in industry, our hopes for peace and security, our obligations to ourselves as well as others, all require us to make this effort, to solve these mysteries, to solve them for the good of all men, and to become the world's leading space-faring nation.

At the present time, we are the world's leading space-faring nation, and it is my hope that we will remain so in the decades ahead.

THE U.S. RESPONSE TO BREZHNEV'S PLAN FOR WORLD DOMINATION

Mr. ARMSTRONG. Mr. President, Communist Party Leader Leonid Brezhnev believes the U.S.S.R. can bring America to its knees by 1985. This belief is not based on ideology or bluster. And Brezhnev is not daydreaming. He has a definite plan.

If we ignore his plan, or fail to effectively counter, it could succeed.

At a secret meeting of Warsaw Pact leaders in Prague, in 1973, Brezhnev predicted that by 1985 the Soviet Union would be able to cut off the economic lifeline of the West and, thereby, obtain the Communist goal.

He told his Communist colleagues:

> Our aim is to gain control of the great treasure houses on which the West depends: the energy house of the Persian Gulf and the mineral treasure house of central and southern Africa.

Brezhnev's words lend ominous significance to Soviet aggression in Afghanistan, the Soviet military buildup along the Iranian border, Soviet activities in Iraq and Syria, and the presence of thousands of Soviet and East Germany military advisers in South Yemen, strategically located on Saudi Arabia's vulnerable southern flank.

It is not just oil that is endangered by the Soviet grasp for an economic stranglehold on the West. Economists and industrialists have identified nine basic raw materials which are absolutely necessary for an industrial nation to provide for its day-to-day civilian life, let alone its military defense. Foremost among these are industrial metals such as cobalt, platinum, manganese, and chromium. Cobalt is indispensable for mining operations and for manufacturing machine tools. Manganese is essential for hardening steel, and for producing dry cell batteries. Stainless steel cannot be produced without chromium. Platinum is essential to the manufacture of jet engines.

America must import nearly all of these critical minerals, mostly from African countries that are either occupied or threatened by the Soviet-financed Cuban Afrika Korps of more than 20,000 troops.

Oil and other strategic materials do not do us any good until they are delivered to our shores. That is why the Soviets are attempting to gain control of strategic waterways such as the Panama Canal. The importance of the Panama Canal to international trade, and especially to our own economy, should make us all the more concerned about the presence of hundreds of Soviet and East German advisers in Nicaragua, and the thousands of tons of Soviet military equipment that are being delivered each month to Nicaragua and, through Nicaragua, to the Communist guerrillas in El Salvador.

THE SOVIET MILITARY BUILDUP

The key to Brezhnev's plan is for the Soviet Union to develop a conventional military superiority so overwhelming that the U.S.S.R. would be able to seize and hold the resource areas vital to the West, and a strategic nuclear superiority so intimidating the United States would be deterred from striking targets vital to the Soviet Union.

In order to implement the plan the Soviets, for the last decade and a half, have engaged in the greatest arms buildup in world history. They have been spending nearly three times as much of their gross national product on the military as we have.

This unprecedented Soviet military buildup has borne impressive fruit. The Soviets now lead the United States in virtually every measure of military strength, sometimes by breathtaking margins:

The United States has 16 Army and 3 Marine divisions. There are 180 divisions in the Soviet ground forces.

The Soviets have built as many tanks since 1970 as there are tanks in the entire U.S. Army. Overall, the Soviets have a 50,000 to 10,500 advantage, and an even greater qualitative advantage, since most U.S. tanks were built before 1970.

The Soviets have a 6-to-1 advantage in artillery pieces, a 4-to-1 lead in armored personnel carriers, a 2-to-1 lead in fighter aircaft, and a 3-to-2 edge in antitank missiles. In addition, the Soviets have fielded whole families of weapons systems, like the Katyusha "Stalin organ" rocket launcher, for which there are no counterparts in the U.S. Army.

Even on the high seas, the U.S. Navy is outnumbered and in danger of being outgunned. Our Navy has 189 cruisers, destroyers, and frigates, compared to 275 in the Red navy. They have 266 attack submarines to our 80, a better than 3-to-1 advantage.

Soviet superiority is greatest where it counts most. It would take us nearly 2 weeks to move just our lightest division, the 82d Airborne, to the Persian Gulf in the event of a crisis there. The Soviets could move at least 10, and perhaps as many as 20 divisions, most of them armored, to the scene within that period of time.

With that kind of power projection capability, the Soviets seem very capable of meeting with the Brezhnev timetable.

While the Soviet Union has been leaping forward in military capability, we have been falling backward. In 1964, the Air Force had 3,538 fighters and 1,364 bombers. Today, the Air Force has 2,982 fighters and 409 bombers. In 1964, there were more than 600 ships in the Navy, compared to just 355 today. The Army had 971,000 soldiers under arms in 1964, compared to just 776,000 today.

The reason for this relative decline is not hard to find. In 1964, we devoted 43.5 percent of the Federal budget, and 8.4 percent of our gross national product to national defense. By last year, defense spending had fallen to 23.1 percent of the budget, and just 5.2 percent of GNP.

If we are to derail the Brezhnev timetable, we will have to spend more for defense than we have been spending for the last decade. There simply is not any other way to rebuild our defenses. Our task will be especially difficult because it will take a lot longer and cost a lot more to try now to do the things we should have done but did not do over the last 10 years.

In the long run, America's future will be determined by our faithfulness to our ideals, the strength of our economy, the ingenuity of our diplomacy, our willingness to strive and sacrifice to achieve excellence in science, education, and other fields. And, perhaps, our national sense of purpose and destiny. But military power, sufficient to deter war or to win if necessary, is absolutely essential. Our freedom and very survival depend on such power.

SPENDING DEFENSE DOLLARS MORE WISELY

To achieve a strong response capability will be costly and we must spend wisely.

Just as we must have a strong defense in order to keep our economy strong, we must have a strong economy in order to maintain a strong defense. Only if our economy is healthy and growing can we afford the sustained military buildup that will be required to lift the shadow of war from our doorstep.

It is arrant nonsense to assert, as some have, that because of the uncertain state of our economy, we cannot afford to spend more for defense. If we cannot protect our industrial lifeline, there is no hope of economic recovery. But it is equally wrong to argue that all else should be sacrificed to the defense budget. If we try to increase defense spending too much too fast, without regard for its impact on our prospects for economic recovery, we will find we cannot sustain

real growth in the defense budget, and the gains we thought we were making will prove illusory.

In other words, we cannot talk about economic recovery and national defense as if they existed apart from one another. They are opposite faces on the same coin. If we do not rebuild our economy and our defenses together, we will be able to restore health to neither.

The defense budget, in fact, is even more vulnerable to the ravages of inflation than the rest of the Federal budget, or your family budget. The Consumer Price Index increased 30.7 percent in the last 4 years. But the cost of defense purchases increased 41.8 percent in the same period. However bad inflation has been to you and me, it has been half again as harmful to our defense efforts.

Our plans to rebuild our defenses will be thwarted if inflation is much higher than we expect. President Reagan's plans for 7 percent real growth in the defense budget each year for the next 5 years are based on some very optimistic assumptions about inflation. If the rate of inflation through 1985 is as high as the Congressional Budget Office estimates, two-thirds of the President's proposed gains in defense spending would be wiped out. And CBO made its estimates before we discovered we could be as much as $100 billion short of our goal of a balanced budget by 1984.

It sounds like a contradiction, but it could be that the only way to preserve real growth in the defense budget in the critical years ahead is to spend less than the President has proposed, at least initially. We have to get inflation under control. That cannot be done without balancing the budget, and the budget cannot be balanced without some reduction in the proposed increase for defense.

There are other sound reasons for thinking carefully before we commit huge sums of money to new defense programs. Not only did our military forces wither in the 10 years of neglect that preceded President Reagan's election, but so did the defense industrial base on which we rely to produce the weapons we need. Hundreds of subcontractors and thousands of parts suppliers have left the defense business. Many of the prime contractors are in ailing financial condition, and their production facilities are aged and decrepit.

Because of the inefficiencies that have developed, it can take as much as 3 years from the time the order is placed for a fighter plane to be delivered. It simply is not possible to try to increase defense production across the board without setting off a scramble for resources and skilled workers that will bid up the price of weapons systems faster than the already horrendous rate of defense inflation. In the near term, the result will not be more weapons, just more expensive weapons.

The Defense Department is perhaps the best managed of all Federal agencies, but that is like being the fastest in a three-legged race. DOD is a bureaucracy like other Federal bureaucracies, and billions of dollars are squandered each year through duplication, waste and maladministration.

President Reagan understands the problems we have been having with the defense industrial base, and with the management of the Department of Defense itself. He has ordered a study of comprehensive reforms of how we buy weapons, and how we run the Department of Defense. But the Reagan reforms have to be implemented, and they have to have time to work. If we make major commitments to new weapons systems now, under the old processes, we cannot avoid wasting billions of dollars we cannot afford to waste which could have been saved if we had waited until reformed procedures were in place.

We also need to rethink our strategy and our defense priorities. The lion's share of American military planning is based on repelling a Soviet thrust into Western Europe. But it makes more strategic sense for the Soviets to try to destroy the West by grabbing a stranglehold on the vital raw materials we import. That is what Brezhnev and other Soviet leaders say they intend to do, and that is in fact what they have been doing. Would it not make more sense for us to plan to meet the Soviet thrusts where they have been occurring rather than to devote most of our resources to repelling a thrust that probably never will come?

Furthermore, by some measures, the United States has been spending more to defend Western Europe than the Europeans have been spending. That was justifiable at the end of World War II, when Europe was prostrate and we were, relatively speaking, omnipotent. But it is hardly justifiable today, when the economies of many Western European countries are in better shape than our own.

The magnitude of our commitment to the defense of Western Europe is especially hard to justify in view of our unilateral assumption of the responsibility for defending Middle Eastern oil supplies. The United States would suffer greatly from an abrupt cutoff of Persian Gulf oil. But the Europeans would suffer much more. We import less than half the oil we use, and less than half the oil we import comes from the Persian Gulf. But the Europeans import nearly all the oil they use, and most of their imports come from the Middle East. Yet every last soldier in the rapid deployment force is an American. If we are to assume the responsibility for defending the oilfields, the Europeans should reciprocate by spending more on their own defense.

Finally and most important, we need to come to grips with the consequences of the technlogical revolution our Armed Forces have been undergoing. Congressional pacifism and parsimony alone cannot explain why our force structure has shrunk so much.

Although defense spending has declined enormously as a percentage of Federal outlays and of GNP, we are spending about as much, in dollars adjusted for inflation, on defense today as we did 30 years ago, or at any point within the last 30 years. But we are getting a lot less for the money we spend. The chief reason for this is the skyrocketing price of acquiring and operating the highly complex weapons systems we are buying today. While 10 years ago, it cost $3.3 million a copy to buy what was then the chief Air Force air superiority fighter, the F–4, today, we are replacing the F–4 with the more capable F–15.

But in constant fiscal year 1972 dollars, the F–15 costs $8.1 million, more than twice as much. The absolute cost of maintenance has gone up by a comparable amount, because the F–15 has more things that can go wrong than the F–4, and they take longer and cost more to fix.

The inevitable consequence of procuring these expensive systems is that we will have far fewer of them. Not even the substantial boosts President Reagan has proposed for defense will be enough to keep forces at present levels if the cost of the weapons we buy continues to double, in absolute terms, every 6 or 7 years. If the shrinkage in force structure that will occur if we continue to procure only high-tech systems seems too much to bear, we should consider buying simpler weapons, but many more of them. Neither step is a step we should take lightly, or without careful consideration within the executive branch, Congress, and in the country.

THE MOST IMPORTANT DEFENSE PRIORITY: PEOPLE

There are some steps we can and must take now to strengthen our defenses while we are thinking through these important questions. Because of our fixation for weapons procurement, we have given short shrift to the servicemen and women we expect to use those weapons. Military pay and benefits and training funds have been cut back in order to get more wheels on the ramp. This is as self-defeating as it is unfair to the men and women who have sacrificed so much to wear the uniform of their country.

Often more than half the cost of a weapons system is expended to get a 5 percent increase in capability. But because we have not been paying skilled military personnel enough to keep them in the service, and because we have not been training their replacements as thoroughly as we should, our servicemen cannot get maximum performance from their weapons, and the money we spent to get it is wasted.

Congress finally has recognized the damage done by its decade of neglect of the needs of our servicemen. President Reagan signed into law earlier this year a substantial military pay raise. But our military manpower problem will not be solved until we also enact a new GI bill of rights to attract the best and the brightest of our young people into military service.

In addition to being perhaps the most effective step we could take to strengthen our defenses, the GI bill also could save us a considerable amount of money. There would be no cost at all for at least 2 years, and the countervailing savings that could be generated in the Department of Defense as a result of having a smarter force, coupled with the reductions that could be justified in other Federal education loan and grant programs, could make the GI bill a money-making proposition for the taxpayer for years to come.

We also need to increase our purchase of ammunition and spare parts for the weapons we already have. If a war

started today, our Armed Forces would only have enough ammo to fight for 2 weeks. Our stocks of ammunition and spare parts can be replenished without the inflationary consequences of some other type of procurement spending.

These are important questions. In the weeks ahead, Congress must come to grips with specific proposals about how we can get more bang for our defense bucks, proposals involving a rethinking of our strategic options, reform of the weapons procurement process, and reorganization of the Department of Defense.

In the meantime, I would like to hear from you. I would like to know what you think can be done to stretch our defense dollars. Please write to me here in Washington or at one of my Colorado offices. We all need to get involved if we are to keep our country strong and free.

We are in a period of great danger, but I think we will pass through it safely. No foe has ever been able to match Americans in vigor, imagination, or in our determination to defend our homes, our families, and our freedoms. Our difficulty has not been in responding to threats, but in recognizing that a threat is being posed. We have tended to be too peaceful and too trusting for our own good. That has certainly been the case for the last 10 years. We deluded ourselves into thinking that Soviet intentions were as noble as our own. But now we know better. We know we need to rebuild our defenses if we are to preserve peace and freedom in the world. And because we know what we have to do, I am confident we will get the job done.

VETERANS DAY

Mr. CANNON. Mr. President, November 11 was Veterans Day and was witnessed by celebration by veteran groups throughout the land.

I know everyone talks about veteran accomplishments at that time, but some say it better than others. Mr. Bill Morris, the commander of chapter 3 of the DAV in Las Vegas did a superb job of laying it on the line, and, accordingly, I was to share it with my colleagues. Mr. President, I request unanimous consent that his article be printed in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Las Vegas Sun, Nov. 8, 1981]

VETERANS' NEWS BRIEFS

(By Bill Morris)

This column is in honor of Veterans Day, Nov. 11, 1981.

"It was the nakedness of Bryce's left calf-bone that bothered me. Every strip of flesh and muscle had been torn away, so that the splintered bone looked like a broken ivory stick."

That ghastly description of a war wound came from the pages of Philip Caputo's Vietnam combat novel, "A Rumor of War." The scene is haunting. It's brutal. But it's a scene that's been repeated countless thousands of times in the wars America has fought.

Such scenes echo the pounding of German artillery as it turned the trenches of WWI into rivers of precious American blood. They echo the crashes of Japanese Kamikaze planes that transformed the decks of American ships into fields of flame.

And they echo the firing of communist machine guns, as they mowed down young Americans on the banks of Korea's Yalu River. Over and over again, the horrifying scenes of disabling injuries have been repeated in the eight wars and other military actions our country has been forced to fight.

On Veterans Day, 1981, the veterans ask all of our Nation's citizens to remember the courageous men and women whose blood paid the price for peace.

They call on our country's people to understand that war is seldom like the movies on TV . . . films that focus on the glory of war. The sudden arrival of death or permanent disability is not clean or fine, or glorious. War is ugly. War is hell. They do not show the reality of combat.

The reality of war is like Caputo's description of a shattered leg bone. In another period of history, it was the horror of a Civil War soldier crawling across the forest floor toward death, as described in one of Stephen Crane's stories.

War is young Americans being slaughtered and maimed. It's other young Americans mopping from their faces the sweat of fear . . . fear that their number will come up next. These are the men and women who have paid the price for peace, and peace isn't cheap.

Veterans Day is their day. And you can be sure America's 30 million living veterans recall the blood and sacrifice that Veterans Day commemorates. They gave greatly of themselves, risking death and disability, to purchase peace for their country.

The birthright we Americans enjoy . . . a heritage most of us take for granted . . . was bought with anguish and pain.

A million and a quarter of our finest young men and women sacrificed their lives to defend our right to choose our own leaders at the ballot box. Countless thousands will never again enjoy peace of mind, because of mental wounds they suffered while fighting to assure that all of us can worship as we wish. Thousands will forever blame themselves for letting their buddies be killed. Thousands will forever remember the sight of a small Viet Nam child throwing a grenade into the middle of their platoon.

America's veterans had to interrupt their lives to answer their country's call to duty. They left their jobs, their schools and families behind to risk death and disability on the field of battle, in the air or on the sea.

Today, too many young Americans view military service as a responsibility to be avoided at almost any cost. But, they who have served know differently. They know it is not an easy task to be a soldier, a sailor, an airman or a marine when our country is at war.

As we look at today's world, we understand that it isn't easy to wear the uniforms of our Armed Forces even during peace-time. Just in the past few months, two Soviet-backed countries have attacked American aircraft.

Our military officers and bases have become targets for terrorist assaults. And, at least five times this year, communist troops have instigated fire fights with American forces stationed on the demilitarized zone separating North and South Korea.

It's not child's play when you have to face enemy fire . . . when you have to watch your comrade die in the arms of a corpsman . . . you see another human being fall after you've pulled the trigger.

Dealing with such terrifying realities is no everyday job. America owes a sacred debt to those who have purchased peace through such sacrifices.

This is what Veterans Day stands for.

The next time you see a veteran in a wheelchair, or walking with a white cane, or lying in a hospital unable to move for the rest of his life or see a Vietnam veteran searching for his identity, don't turn your back—instead smile and say, "Thanks for keeping us Free."

SMALL TRANSPORTS FOR THE LONG HAUL

Mr. CANNON. Mr. President, my frequent trips from my home State of Nevada to the Capitol continue to remind me of the need for further improvements in the level of air service available to many of the small communities and cities of our country which are not among the top 20 or so of the Nation's metropolitan centers. When the Congress 3 years ago supported my bill to deregulate the airline industry, we broke down the stifling regulatory barriers to open competition, which is essential to attainment of more extensive and economical services for all communities. We have achieved important results provided by many new entrants into the market and many new economies, admittedly constrained by the explosion in fuel costs that took place during that period.

Beyond the past regulatory barriers, there still exists severely limiting technological and attitudinal barriers which I will point out now.

Most conspicuous is the fact that we do not have small transport technology developed to the point that commuter class carriers can offer the quality of aircraft service for small communities that has long been routine for major intercity travel. This means pressurized cabins for overweather flight, stand-up headroom, turbofan powerplant performance and reliability, state-of-the-art electronic communications and navigation equipment, nominal cabin amenities, safety, and schedule reliability.

Our country is suffering in two ways because of the lag in appropriate commuter class technology development. For one thing, many travelers are denied the quality of air service contemporary technology should make available. For another, our commuter carrier industry is forced to go abroad for purchase of most of its new small transports at a time when our employment and economy urgently need revival in about every domestic sector.

I referred also to an attitudinal barrier restraining the development of small community air service. There is a deeply imbedded mind-set throughout the aviation industry which has decreed that travelers between two nonmetropolitan, or nonhub cities, will forever be denied direct service between smaller cities of origin and destination simply because the volume of traffic between such cities cannot economically support service with large modern transports.

In that scenario, the tens of millions of those travelers are programed for a short haul commuter flight from origin to a regional hub city, transfer to a large transport for travel to another regional hub, and connection there to another commuter class flight to destination. This can often mean doubling back in direction of travel at either or both the origin or destination segment of the itinerary. It can mean missed connections, long delays, and badly timed origin

departure and destination arrival times. It can mean overloading the airplane handling capacity, or slot positions, at major hubs. It imposes the inescapable economic burden of unwanted short haul segments on long haul travelers.

With that mind-set in place, we will never develop the small transport technology which will permit frequent direct service commensurate in speed and quality with that of trunkline carriers at affordable, if not equal, cost.

It was, therefore, very refreshing for me to read an editorial by Arnold Lewis in the September issue of Business & Commercial Aviation, which is chipping away at that mind-set. He cites testimony and eye-opening statistics provided at a Senate Commerce Committee hearing by Anthony A. duPont, designer of a proposed 30- to 44-passenger transport that can operate nonstop at transcontinental distances at mach 9 and provide competitive 100-mile segment performance from 3,500-foot runways.

Mr. President, I ask that this article by Mr. Lewis, captioned "The Long Haul Commuter" be printed in its entirety. It is my hope that NASA and other important segments of the aviation industry will take note and give careful consideration to the concept there discussed. Certainly my fellow citizens from Nevada communities will join me in this expression of an intolerable gap in the level of airservice available to them. This is a gap which airline deregulation will help to close if NASA moves forward aggressively with advanced small transport technology development and industry leaders break free from their previous mind-set.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE LONG HAUL COMMUTER

It sounds daft on the surface—a commercial airline operating nonstop between Albuquerque, New Mexico, and Washington, D.C., several times a day with 30-passenger turbofans?

Corporate jets do things like that, but not commercial airliners. Everybody knows that when one wants to fly between Albuquerque and Washington, one must first fly from Albuquerque to Denver, then from Denver to St. Louis, and finally from St. Louis to Washington National Airport.

But wait a minute. Every once in a while someone comes up with a better idea—at least one that's worth exploring. That someone in this case is Anthony A. duPont, an aeronautical engineer from Torrance, California. He recently appeared before the Senate Commerce Committee's science, technology and space subcommittee advocating what he described as a "new concept which could improve air service dramatically."

What he didn't say was that the concept also could cut right into the heart of corporate aviation by providing point-to-point transportation to localities not currently served by scheduled airlines.

"You cannot today fly nonstop from Albuquerque to Washington, D.C.; or from Las Vegas to New Orleans; or Buffalo to Phoenix; or Charleston to New York; or Huntsville to Los Angeles; or Indianapolis to San Francisco; or Los Angeles to Wichita; or Detroit to Seattle," duPont told the subcommittee. "And there are many other city pairs where CAB passenger statistics indicate demand of large economic proportions for nonstop service where there is none today," he added.

DuPont calls it an "important gap in airline service" and notes that 53,000 people made that Albuquerque-Washington trip in 1980. "With this many passengers, a 30-seat aircraft could offer four trips a day each way. A 100-seat DC–9 or 737 could offer a single daily round trip, but the 1,727-mile distance is more than is normally flown by these 100-seat aircraft."

The 30-passenger aircraft duPont envisions would be too small for commercial transport builders to develop, and might be beyond the technological reach or interest of general aviation manufacturers. He sees an FAR Part 25 aircraft with a supercritical wing and an advanced engine installation "with thrust vectoring to achieve a high cruising speed without incurring fuel consumption penalties.

"It would be more fuel-efficient than even our newest large airliners or commuter aircraft on either a long or short (100-mile) flight." DuPont quotes 75 seat-miles per gallon on a transcontinental trip, and 37.5 seat-miles per gallon on a 100-mile flight, "which is still more fuel-efficient over the 100-mile segment than any current turboprop aircraft, which were specifically designed for this type of short-haul service."

But the new generation of 35-passenger commuter aircraft can achieve such fuel efficiency over a 100-sm segment.

DuPont also believes his concept must include "some V/STOL features" to permit the use of discrete runways no more than 3,500-feet long at major hubs in order to increase airport capacity and allow for greater frequencies of service.

"With such a unique combination of speed, range, economy and short-field performance, present passenger-load figures indicate that passengers riding between 20 and 30 percent of the airline miles traveled today in the United States would be served more promptly, economically, and with less fuel than with present aircraft," duPont said.

An analysis of the "low-density airline" market, he adds, "shows there is a current market in the United States for at least 1,200 such aircraft and an estimated market abroad for an additional 4,000 airplanes."

Furthering his analysis, duPont selected from the CAB's list of the top 1,000 city pairs (in terms of revenue passenger-miles) those cities that could be served by two to eight round trips per day with 30-passenger aircraft with a 55-percent load factor.

From that list he deducted 50 percent of the traffic "as that which might be carried by larger aircraft between those cities requiring five to eight round trips with these (30-passenger) aircraft."

As a result, duPont said that "about 27 percent of the revenue passenger-miles (between those cities) could be conveniently flown with 30-seat aircraft. Examination of the Official Airline Guide dated March 1, 1981, shows that the great majority of city pairs selected in this manner have no nonstop service between them at the present time and that very few have more than a single one-stop flight (daily)."

An important assumption made by duPont was that only city pairs that board less than 100,000 passengers per year were candidates for service with the advanced 30-passenger aircraft. The 100,000 passengers represent only two and a half daily round trips in a 100-passenger aircraft, "which is not really considered adequate service.

"One DC–9 trip and five trips with the new aircraft would make 100,000 passengers per year, or two DC–9 trips and two trips with the new advanced airplane would make 104,-000 passengers per year giving a six-flight-a-day or four-flight-a-day frequency (respectively)," duPont concluded.

Even if duPont's "special" aircraft could be developed, his concept would require fundamental changes in the air transportation system. Such changes would offer major and unique opportunities for today's commuter operators to become long-haul carriers with small aircraft in what could be considered specialty markets.

On the other hand, implementation of the concept might have a significant impact on corporate aviation. But a network of 30-passenger aircraft that would serve the diverse array of destinations that currently attract business aircraft is highly unlikely.

Corporations have been forced to solve their own air transportation problems as a result of declining or nonexistent commercial airline services. Will they be willing to rely again on the commercial airlines (even specialized operators) to satisfy their transportation needs?

IMPACT OF THE FEDERAL R. & D. BUDGET ON THE HEALTH OF U.S. SCIENCE AND TECHNOLOGY

Mr. CANNON. Mr. President, on October 26 and 27 the National Academy of Sciences held an unprecedented convocation of the U.S. leaders in the field of science and technology. The purpose of this meeting, which was arranged by Dr. Frank Press, president of the National Academy of Sciences, was to review the Federal R. & D. budget for fiscal year 1982 and future years.

Some of the most prestigious leaders from academia, industry, and Government met under the auspices of the National Academy of Sciences to review the implications of the Federal R. & D. budget reductions in this fiscal year and the projected reductions in future fiscal years. This meeting provided an opportunity to exchange information on the administration's position with regard to science and technology. Based upon this exchange, the Nation's leaders were able to provide an indication of the impacts of the administration's new directions.

I need not convince my knowledgeable colleagues on the vital contribution that science and technology make in meeting our national security, economic, and social needs. I would encourage my colleagues to review the results of this meeting. It is a frank evaluation of what the budget reductions will mean for the future health of this Nation's science and technology base. Across-the-board budget reductions without any regard to policies, priorities, and programs will not serve the interest of this Nation.

Mr. President, I wish to include in the RECORD a summary of the conference by our Nation's science and technology leaders. The results of this conference should be extremely valuable to the Members of Congress, who must make budgetary decisions on the allocation of scarce Federal resources. I think the summary and statement are thoughtful and germane to our deliberations. I hope my colleagues will have a chance to review them in the course of deciding upon the Federal R. & D. budgets.

I ask unanimous consent to have printed in the RECORD the summary and statement to which I have made reference.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONFERENCE ON THE RESEARCH AND DEVELOPMENT BUDGET FOR 1982 AND FUTURE YEARS

SUMMARY

In brief, the purposes of the meeting, held October 26 and 27, 1981, at the National Academy of Sciences in Washington, D.C. were to:

Obtain factual information on federal budgetary plans for FY 1982 and beyond, from government officials directly concerned with science policy and with civilian research and development budgets;

Develop an informed dialogue among conference participants and with agency officials about the impacts of the prospective reductions;

Propose budgetary alternatives, for FY 1982 and for future years; and

Consider initiating reviews of the institutional structures and procedures for supporting research and development in the national laboratories and in the universities.

During his welcoming remarks to the conferees, Dr. Frank Press, president of the National Academy of Sciences, stressed that he had convened the meeting because he believed all could benefit from an informed dialogue, and, secondly, that he did not view the conference as the basis for confrontation with officials representing the departments and agencies. Dr. Press also stressed that he was acting as a convenor of a number of key officials in government with leaders in research and development, and that it was not a meeting of the Academy.

On October 26, the conferees met with representatives from six governmental departments and agencies. A number of conference participants served as panelists for discussion. Comments from the floor followed each panel presentation. On October 27 the conferees met in executive session, at which time they adopted a consensus statement. [The consensus statement and the list of participants are attached.]

This summary first discusses the current and prospective budget plans, as presented by the governmental representatives and as shown in the analysis by Dr. Willis Shapley, consultant to the American Association for the Advancement of Science. Secondly, it describes impacts—immediate and beyond—of the prospective budgetary reductions. Finally, it reports on possible involvements by the scientific and technical community in governmental decision making.

CURRENT AND PROSPECTIVE BUDGET PLANS

Overview of the current budget and its status

The FY 1982 budget presented by the Administration in March 1981 reduced the totals proposed for research and development by the previous Administration, but it generally maintained the principles of federal responsibility for longer-term research and those applied research and development activities that support recognized federal missions such as national security. The exception in the March budget to these principles was the severe reduction in support for basic research in the social sciences. However, in September, the Administration proposed a further reduction in the FY 1982 budget—the so-called "12 percent across the board cut." That proposal would reduce the $42.2 billion of R&D appropriations request of the March budget by $3.1 billion—$1.0 billion from the Department of Defense (DOD) and $2.1 billion from all other programs. Of the $42.2 billion, about $5.5 billion is ascribed to basic research and that amount would be cut by about $600 million.

In constant 1980 dollars and applying the Administration's annual inflation rate of 9 percent, the percentage difference between the 1980 budget and the proposed September budget is: DOD, +26 percent; NASA, −7 percent; DOE, −29 percent; NSF, −17 percent; HHS, −19 percent (NIH, −18 percent). For basic research, the overall reduction is 11 percent.

The present actions of the Congress on the FY 1982 appropriations requests call for reductions from the March budgets of lesser magnitude, being a reduction of about $1.0 billion from total R&D funding and taken from the DOD budget. While some other reductions have been made by the appropriations committees, there have also been increases totalling about $200 million. The Congressional actions are not complete; the government is currently operating on a continuing resolution empowering agencies to expend at levels and rates consistent with 1981 appropriations levels. The Administration, however, has further instructed agencies to expend at rates consistent with the proposed September revisions to the 1982 budget. The Administration proposes to set these levels formally through the deferral process, and deferral requests were being sent to the Congress by the Administration in late October. The resolution of the 1982 appropriation process will require much further discussion between the two governmental branches. Several participants at the October 26–27 Conference, including Administration officials, indicated that the outcome will be negotiated, and that the conferees should not assume that the 12-percent reduction proposals will be enacted as such.

Views of administration officials

The Administration, through the Executive office of the President, was represented by Dr. George A. Keyworth, director of the Office of Science and Technology Policy, and Mr. Frederick Khedouri, the Associate Director for Natural Resources, Energy, and Science in the Office of Management and Budget. Dr. Keyworth cautioned against assuming the worst possible scenario concerning the budget. He indicated that he felt that, overall, science was healthy; that the Administration would still adhere to a philosophy of supporting research; but that it would take a more critical attitude toward demonstration programs, especially where the civilian sector might be expected to do the job. He felt greater attention needed to be placed on identification of research areas of maximum promise, with the assumption that these would be supported. Maintaining the strength of top research universities, supporting high quality research, and responding to instrumentation needs were all urged by Dr. Keyworth.

Mr. Khedouri acknowledged that the budget outcome for 1982 is unclear; there will be negotiation and the gap between the Administration and Congress will narrow. The Administration's aim is to establish targets and to stick to goals; there will be active, not passive, response by the Administration to revisions of targets, by the Congress or by revised economic forecasts. This will require two to three years of hard budget decisions. He indicated that the usual budget process might have to be abridged over these years, but that the framework for research would be protected. He advanced the notion that from his perspective the issue was about a change in rate of growth of the budget rather than absolute reductions. Mr. Khedouri asserted that, overall, there was some real growth in research; and that basic science was faring well compared to demonstration and social programs. One should not assume, however, that there can be, or should be, more and more science support from the government. The scientific community could help in reallocation.

Research agencies

The research and development leaders from NSF, NASA, and the Departments of Energy and Health and Human Services (NIH) made a number of points concerning the budget proposals, including that they are using different tactics to cope with the proposed reductions.

National Science Foundation: The NSF, for example, is attempting to shield basic research in the mathematical, physical, and engineering sciences to a greater extent than some other areas because of the underfunding over a decade in these disciplines. Dr. John Slaughter, Director of the NSF, said that the National Science Board (NSB) and key NSF executives recognize NSF's critical role in research and that in this period of tight funding the catalytic effect of NSF funding—in prompting funding by other agencies, industry, and, other private sources—needs exploration and emphasis. The NSF will support research in the social sciences. The statement of the NSB on the social sciences was stressed.

Further, the NSF has continued to be concerned about instrumentation and has led an interagency group considering ways to increase instrumentation funding. NSF is avoiding applying "simplistic" formulas, such as ratios of the existing grants renewed to new ones funded.

However thoughtful these tactics, there will, realistically, be significant effects on money actually available and the nature of what is funded. For example, in NSF's case, some 60 percent of its grant money is committed to projects having another year or more to run.

National Aeronautics and Space Administration: NASA is terminating, or grossly reducing, specific programs, rather than applying across-the-board cuts. Which program to cut is a derivative of several variables, including the long-term gain for science generally as, for example, the broad gain in astronomy promised by the orbiting later this decade of the Space Telescope. Hans Mark, Deputy Administrator of NASA, made several comments about the budget situation. It is only partly true that Shuttle costs are reducing funding for science. There are severe problems of inflation, exacerbated by the lack of technical craftsmen and skilled workers, affecting not only the Shuttle but all aerospace procurement, e.g., Atlas Centaur launch vehicles. NASA recognizes that procurement and development costs associated with the Shuttle obscure other elements of the budget and has sought and received from OMB an agreement that the Shuttle be budgeted separately from the rest of the agency's programs.

NASA has told OMB that it cannot operate a planetary program with only one project each decade, and that this activity should be supported properly or not at all. Other research missions, e.g., aeronautics research, are being viewed in a similar fashion. Mark said that he and Administrator Beggs want the advice of the scientific community. With regard to cooperative missions, such as the Solar Polar Mission, it was difficult to generate diplomatic support, since in the broader context many agreements are honored neither by the United States nor by the Europeans. Mark shared the frustration of losing support for projects with interagency funding, such as the National Oceanic Satellite System, and the difficulty of turning the high public interest in space into political and budgetary strength for the program.

The Department of Energy: The budgetary situation in the DOE is complicated by the announced plan of the Administration to abolish the department. There are no decisions and Dr. Alvin Trivelpiece, Director of the Office of Energy Research, reported no emerging preferred alternatives. At present, the agency plan is to effect a percentage reduction across all elements of the department, including the large commercial-scale demonstrations, the basic energy sciences, and the high-energy physics programs.

The Energy Research Advisory Board has begun to look at the future roles of the national laboratories. DOE recognizes that universities use some facilities of the national laboratories, such as computers. The twin uncertainties of DOE funding in the basic sciences and the future of the Department are severely hampering the ability of laboratory directors and individual scientists to plan research programs.

Department of Health and Human Services: Dr. Edward Brandt, Assistant Secretary

for Health, in summarizing the situation at NIH, said that he recognizes that the proposed budget reduction will severely affect the policy of supporting an adequate number of new research grants each year and training clinicians for research careers; it will certainly affect NIH's special responsibility in biomedical research. Moreover, Dr. Brandt acknowledged that the current year cut was severe because of the commitments to continuing grants, and that level or reduced funding would severely affect basic biomedical research, with perhaps as much as a 40% reduction in new project starts. He offered no solutions. The Department is not planning for drastic responses to the proposed budget reductions, e.g., elimination of an NIH institute, because of the low likelihood that such a step would be sustained.

Department of Defense: From a cross-agency perspective, there is little likelihood that reductions in basic research funding will be offset, wholly or in part, by increases in DOD funding for basic research. The reasons include the uniqueness of the DOD mission and, more heavily, the several years of constrained spending that DOD now wishes to recoup. DOD increases will be scrutinized by Congress; further, sustaining basic research under the combined pressure, of anticipated reductions in the rate of growth of the DOD budget and new or intensified development programs will be difficult.

Other agencies

It was noted that the effects of the costs extend not only to the immediate plans of the larger, more visible R&D agencies, but may be—in fact, are—more severe for the smaller agencies; for example, a proposed 50 percent reduction in EPA's research budget; a 15 percent cut in NOAA's budget, and so forth. A danger is that in the effort to restore funding for the more prominent research agencies that those severe cuts in the smaller, less visible agencies may be sustained.

It was also noted that some research is the result of "piggybacking" and may be lost through what seem, on first order, to be nonresearch cuts. This piggybacking is particularly illustrated in the social sciences: demographers in census, economists in assembling national economic accounts, anthropologist in international exchange programs, and so forth depend on other programs as the framework for their research efforts. As these activities are reduced in scope, the effect on social science research will be severe.

IMPACTS: IMMEDIATE AND BEYOND

The effects of federal budget reductions—namely the proposed September levels—can be examined in several ways: by the effects on the basic research enterprise, per se; by the effects on national goals, including national security, improved productivity, availability of adequate number of scientists and engineers, and by the ability of the industrial R&D endeavor to offset reductions in federal R&D work and support. These and many other effects were addressed by many of the conferees. A number of the major points made by conferees are summarized below.

Effects on the basic research enterprise

American science, especially its basic research component, is now appraised as generally healthy. However, slippage has been taking place in recent years. That is revealed in several ways, such as the erosion, vis-a-vis other research nations, of the historic American leadership in high energy physics and in astronomy. Virtually no part of a decadal strategy for space science research prepared in 1975 has been done. X-ray astronomy may in future years be dominated by observational work of European and Japanese Astronomers. Other nations will be sending missions to Halley's Comet; the U.S. will not. In high-energy physics, Europeans are leading in reporting experimental results, and, with the money invested in new European facilities, that dominance will continue and probably widen. In any case, the implications of reductions in basic research support need to be faced early. Sustained reductions over several years will lead to a major change in the U.S. position vis-a-vis European nations and Japan.

Some participants in the conference did not share the view that the research enterprise was generally healthy and stressed that it is more fragile than planners in Washington realize. They further cited the quality of life in the laboratory here and the contrast in laboratory working conditions and resources in the United States vis-a-vis Europe. The behavior of the funding agencies is another indicator of problems for the research enterprise. Sustained underfunding of research has many ramifications. One outcome, given prospects for further reductions in successive fiscal years, is conservatism in funding extended projects: established operations may do better; new people will be denied programs and lost. It is a misconception to say that investigators whose funding is skipped for a few years can then come back.

Some agencies by virtue of their missions are more vulnerable to current and future reductions. For example, NSF, with most of its money allocated for grants, has less flexibility in responding to cuts than does DOE, which conducts a more heterogeneous research program, one that includes not only basic science but also development and demonstration programs. While there is greater flexibility in some agencies, there are also great pressures to continue investments in large scale demonstration plants. These pressures will inevitably affect those supporting longer-term research.

Some at the conference stressed the multiplier effects of budget cuts, stating that the system was in many ways taut, that small changes, up or down, in funding had pronounced impacts on all aspects of research, funding for procurement, manpower and training, and so on.

Mismatches: Budgeting and the Research System: Damage is done by the "mismatches" between the dynamics of government actions and the time constants of the research system. Government budgets change drastically, in amounts and within months. The basic research system generally operates in considerably longer time frames, typically several years; that is, the time needed to conduct an experimental program, to construct large facilities, to develop research teams that can work harmoniously and effectively, for a graduate student to complete a thesis. When mismatches occur between the timing of budget reductions or redistributions and those time constants of research, the effects can be severe—in sunk costs losts, in incompleted theses, in aborted careers in science and engineering. The majority of research performers have no reserves; universities have less funds to support transitions between grants. The results are severe dislocations when precipitate budget changes occur. Leverage effects are a consequence of these mismatches; that is, relatively small cuts having greatly magnified effects, in research productivity and in time lost.

Instrumentation: Instrumentation of research universities is now in quite bad shape, with apparently no immediate prospects for relief. Students are using obsolescent equipment. The first of several efforts over the coming years intended to reduce this problem, a $75 million request by the NSF, was deleted in the March budget. An interagency effort to share the burden of instrumentation funding has produced an agreement among department and agencies that the instrumentation problem is serious; but, because of funding pressure, the outcome of any proposed budgetary initiative is in doubt.

Manpower: The decline in the number of Ph. D's in physics is symptomatic of difficulties in the research system, given that, at the graduate level, training and education commingle with basic research. Despite a rough doubling of the GNP (1972 dollars) since 1963 and a substantial increase in the working age population, the number of Ph. D. graduates in physics will decline in the near future to pre-sputnik levels. That decline will directly affect the country's national security; that is, in having sufficient scientific and technical talent to develop new defense technologies.

NIH training grants will be reduced substantially. Moreover, the government has no way to cope with the already evident decline in the number of physicians training for a basic or clinical research career. (Note: After the conference, the NSF fellowship support programs were reinstated by OMB in the FY 1982 request.)

National laboratories: The budget reductions are already severely affecting the national laboratories. Given future plans, some laboratories may be virtually dismantled or greatly reduced. Unique capabilities may be irreversibly damaged; thus, the dismantling of programs in planetary science may impoverish the Jet Propulsion Laboratory, even though JPL has taught the world a lesson in quality control. The role of the national laboratories needs examination, including the nature and quality of their basic research that is done and their relations with the research universities.

Impacts on national concerns: Productivity and national security

Research—basic work in the natural, social, and engineering sciences—is the country's major investment in the future use of its resources, most directly in providing fertile ground for new technologies that amplify the value of increasingly restricted resources. Without adequate investments in intellectual capital, there may be continuing erosion in the country's ability to compete internationally in high technology. The real growth of U.S. funding of basic research over a ten-year-period has been less than that of Japan, West Germany, and France. Data on expenditures for research and development in the industrial countries, such as those contained in Science Indicators, were cited, and supported with first-hand observations, by both industry and academic participants. Several conferees stressed that future international competitiveness require more, not less, investment in research by the government and by industry. A continued flow of trained manpower for industry and universities requires a strong governmentally supported research effort.

There should be collaboration between government, the universities, and industry; however, attitudinal changes were necessary to a more favorable spirit of collaboration. The tax measures recently enacted will help, but, when considering both government and industry investment, it should be kept in mind that the proportion of the national resources being directed to R&D is declining in the United States in comparison to some other industrial nations. The relationships of the budget actions to defense and national security were of concern to the conferees. The effect of sustained tight budgets in basic research on manpower availability and the general knowledge base on the nation will be pronounced.

Industry research

Industry couples directly to the basic research system in its concern with the health of graduate education; that is, in assuring the continuing production of people trained in research and fully conversant with the frontiers of fundamental science.

While a number of specific agreements between particular universities and industries exist or are being arranged, the amount of support by industry for academic research

particularly and university education generally is likely to be limited. Thus, a tripling over the next decade of industrial support currently directed to university based research would about equal the proposed federal cut in R&D funding for one year. There is no indication that industry can or will have the capacity to substitute for the government's historical role in the support of basic research. It is a misconception to believe that the scale of changes being proposed in the federal funding will be offset by industry's activity on campuses or in its own laboratories. Further, it should be kept in mind that industry will likely focus its increased support of research in universities on a few fields or disciplines, such as electronics and geology.

DECISIONS INVOLVING THE S&T COMMUNITY

As a first principle, the conferees agreed that several years of reductions in basic research funding will be damaging. However, given that overall budgetary reductions will occur in FY 1982, the issue is how to manage budget redistributions so as to protect the basic research system.

A number of the attendees at the conference asserted that a process or dialogue needed to be restored to the budget process. The root issue is participation by the scientific community itself in the decisions that are made: A measure of due process is needed. Barring that, we will get second-rate science, second-rate technology, and become a second-rate world power, said one participant. The problem to be faced, it was noted, is that the research system is now entering a negative growth cycle. How can we see to productivity in research in a period of chronic negative growth?

There is again a mismatch problem: between the day-to-day, often crisis environment of governmental decision making and the ability of the scientific community to mobilize and to prepare consentient advice. Whatever the difficulties advice and judgments—on the quality of programs, relative importance of different fields and subsets within fields, and so forth—are critical. NASA, for example, needs advice—political and scientific—as to what sort of institution it should be. Other agencies, such as DOE, don't have good standards as to what to support. For example, how many fellowships should there be and in which fields?

For its part, the research community needs sufficient notice of departures from previous budgetary trends, to allow corrections in the number of graduate students accepted, faculty positions offered, equipment purchased, major experiments, and so on. Does the government, for example, believe that "crisis budgeting," similar to the revised budget issued in September, will recur for several years?

In all, what is need is an interactive, continuing exchange of information between the government's fiscal and science policy officers and the scientific and engineering community. No adequate mechanism to accomplish that now exists. As a corollary, there is now no apparent way to manage "an orderly retreat" from the present R&D effort, in lieu of "brute force" methods. As an example, can funds be set aside to provide for termination of grants, which, while small in amount, would lessen the dislocations of a transition, when it occurs, from full funding to no funding?

As to tactics, one way to conserve funds for basic research, to protect the enterprise, may be to combine the government's retreat from development and demonstration programs—those efforts that private sector should do, excepting those that are so costly and long term, such as fusion, that industry cannot support them—with increased funding for basic research.

STATEMENT

The conference on research and development was a meeting on October 26–27, 1981, of about 100 university officials, laboratory directors, industrial research executives, scientists and engineers, and individuals experienced in public policy, who were drawn together at the invitation of Dr. Frank Press, President, National Academy of Sciences. The conferees met to discuss the impact of the prospective budget reductions proposed by the Administration upon the Nation's scientific research capabilities. Officials of the Administration discussed their proposals with the group. Observers from the staff of the Congress and the press were present. The conferees reached consensus on the following:

The problems of the economy—inflation, high interest rates, industrial stagnation—have eroded research and development just as they have impacted other sectors of our society. The participants in the conference understand that the nation must pass through a period of restraint in public expenditures. Yet the proposed reductions in the President's September or Fall Budget will do irreversible damage unless longer term research, in contrast to development and demonstration, is protected.

It is the view of the conference that continued sound investments in research and development by the Federal Government are essential to our national goals, including public welfare, a strong national security, and a renewal of growth in productivity. Much of our economic growth over the last three decades is directly attributable to research and development that has been supported by both government and industry and even earlier investments in research. Because of the important relationship between research, technology and increased productivity, the expressed goals of this Administration for a strong economy and improved national security demand more, rather than less investment in basic research. Furthermore, the intrinsic relation between the performance of basic research and the training of scientists and engineers makes continuing strong support necessary to prevent future critical personnel shortages.

Within the current support by the government of research and development, nearly $10 billion, less than 15 percent represents basic scientific and engineering research. Support of scientific research is a public expenditure from which all sectors of society benefit. Basic science is a long-term investment, and depends on government support. There are no significant sources of support for such a collective benefit which can replace the Federal Government.

Instability and abrupt changes in funding have severe effects: research teams are broken up; investments in experiments involving large facilities such as accelerators, spacecraft, oceanographic vessels and other instruments are poorly used. The continued flow of new researchers into our industrial and university laboratories is best maintained by their stable and continued participation in university based graduate research.

Because of low investments in research over a decade and high inflation, many fields of science are now especially sensitive to decreases or increases in funding. The conference urges that the Government plan carefully for the support of the natural sciences, engineering sciences and social sciences, and protect such plans from abrupt change.

In the March budget revisions the Administration recognized the general, long accepted principles of the Federal role in support of research and development. There is special concern for defense and renewed growth in productivity.

The proposed reductions in the President's Fall Budget Program would establish an overall percentage cut in all the various budgetary accounts. The conference strongly recommends instead that the Administration and Congress should:

View research and development across the entire government, making budgetary adjustments or reductions that maintain the basic sciences by reallocating funds between research and development;

Instruct Departments and Agencies to maintain the strength of science in agency budget allocations;

Direct a larger part of the increased budget for national security to the funding of basic research that is essential to the maintenance of that security;

Recognize that the scientific base of the nation has suffered a decade of little or no growth and must be strengthened in order to maintain competence in the nation's laboratories;

Recognize that education in the sciences is inextricably linked to research and continue graduate student support through research grants, fellowships, and traineeships;

Recognize the need to revitalize the instrumentation and facility base on which future scientific and technological advance depends.

These principles should be applied to the budget for 1982 and beyond.

A much strengthened mechanism is needed through which the scientific and engineering communities advise on resource allocations and analyze the impacts and benefits of various shorter term and longer term budget strategies for government investment in research and development.

It is timely to initiate an analysis and evaluation of the institutional system for the support of research and development including the distribution of resources, the continued need for some facilities, grant mechanisms, etc. There should be input into this review from the scientific and engineering communities in universities, the national laboratories and industry. Further, review must look across Departments and Agencies to achieve the most productive allocation of resources.

The strength of the nation depends on the continued supply of scientists and engineers. A large number of the best young people must be attracted into these disciplines for careers in industry, the government, and universities. Policies at all levels of government to insure the continued flow of scientists and engineers must be developed. The education of the nation's youth in science and engineering requires priority attention not only by the Federal Government, but also by citizens and officials at the state and local levels and also by the private sector.

The growing relation between universities and industry are laudible and the nation can only benefit from these partnerships. Yet such a relation cannot become a substitute for the strong government-university partnership in support of basic research which now exists. The industrial members of the conference strongly support the continued investment in basic research by the government.

THIRD LAW OF THE SEA CONFERENCE

Mr. CANNON. Mr. President, over the past 7 years the United States, along with over 150 other countries, have been drafting a convention on the law of the sea. Using the Third United Nations Conference on the Law of the Sea as a forum the nations of the world are attempting to compose an international legal frame-

work that addresses territorial limits, navigational rights, fishing rights, environmental protection, marine scientific research, mineral resource exploration, and other ocean issues. Essentially every aspect and use of the ocean will be affected one way or another by this convention. To date these laborious negotiations have resulted in a document entitled "Draft Convention on Law of the Sea" which contains 320 articles and 8 annexes.

However, a few days before the tenth session of the Third Law of the Sea Conference was scheduled to convene in March of this year, Secretary of State Alexander Haig announced that he had instructed the U.S. delegation to the conference "to insure that the negotiations (did) not end" at that session. Secretary Haig also called for a "thorough review" of the convention by the U.S. Government which would then be used to determine our position toward future negotiations of the conference. As a result, the United States adopted a non-negotiating posture. The Haig announcement was made over 8 months ago and the State Department has just recently completed its review.

In the interim, the March session of the conference in New York and the August session in Geneva, Switzerland, have passed with U.S. participation at both sessions being confined to observation and "informal discussion." Due to the inability of the United States to negotiate, the conference has come to a standstill. Many of its participants, including our allies and Third World countries are becoming more and more impatient and frustrated by our lack of commitment, one way or the other, regarding participation at the conference.

With the review having just been completed, I understand the President will soon be presented with the results. He must make a decision as to whether or not the United States will participate further in the conference or withdraw completely from the negotiations. This is obviously not a decision that can be made easily or taken lightly and therefore will require time to formulate. This decision-making process will likely result in still further delays and prolong the period of time that the United States is without a coherent and articulate policy regarding these important and far-reaching negotiations.

I am becoming very concerned that whatever the President decides, there will not be enough time to lay the groundwork needed to implement his decision before the next session of the Law of the Sea Conference reconvenes early next year in New York. Postponement of the completion of the review has already added an additional month to the original review schedule proposed by the Department of State.

In any international negotiating arena, progress is slow and the scheduling of events must take into account the pace of realistic negotiation. In the case of the Law of the Sea negotiations, future intersessional meetings with many different countries may be required, as may one-on-one informal discussion with individual countries before the next session. The review has taken entirely too much time and as a result could create some very real practical problems for the individuals responsible for implementing the President's decision, whatever it may be.

It is time the United States adopt a policy position regarding future negotiations of the Conference. A quick and thoughtful decision by the President on this matter is critical to allow the U.S. delegation to the Conference the necessary time to thoroughly prepare before the next scheduled session in March of 1982.

As a corollary to the Law of the Sea, last year the Congress passed the Deep Seabed Hard Mineral Resources Act. As chairman of both the Senate Commerce, Science, and Transportation Committee and the national ocean policy study during the last Congress, I was deeply involved with steering this legislation through the Senate. This act promotes the conservation and development of the hard mineral of the seabed, particularly manganese nodules, by citizens of the United States.

In the relevant hearings that were held in the Senate to hear testimony concerning this legislation, it was pointed out that other nations, such as the Federal Republic of Germany, were investigating a similar initiative. Today the United States and several other countries have domestic seabed mining legislation and still other countries are pursuing it in their legislative bodies.

It is clear, as nations around the globe pass laws which will regulate their deep seabed miners, that some mechanism to provide for international compatibility among these problems is necessary to facilitate the kind of international cooperation needed to maximize the use of hard mineral resources of the seabed.

Consequently, a section was included in the seabed mining legislation which allows the Administrator of NOAA, in consultation with other departments and agencies, to designate foreign nations as "reciprocating states" if their licensing and permitting requirements for exploration and commercial recovery of hard minerals from the seabed are compatible with those of the United States.

The United States has been negotiating for over a year a reciprocating regime with a small group of other countries, the so-called "like-minded" nations which have implemented or are soon likely to implement domestic seabed mining programs. Although consistent progress has been made, it has been slow, and I urge both the Department of Commerce and the Department of State to continue the ongoing reciprocating states negotiations in an expeditious manner.

Final regulations implementing our domestic seabed mining legislation were issued September 15, 1981 except for that portion outlining procedures for applications based on exploration which commenced prior to enactment of the seabed mining legislation. This section was omitted because NOAA believes that this part of the regulations must detail comparable procedures and rules agreed to among the "like-minded" nations. Consequently, a timely reciprocating States umbrella agreement is particularly important to allow for the completion of U.S. domestic regulations and thereby allowing U.S. citizens which have already invested in the exploration of the seabed, the opportunity to apply for an exploration license.

Regardless of whether the reciprocating States regime will eventually stand alone or be transitional in nature and evolve into part of a broader law of the seabed regime, the reciprocating States must move ahead under the leadership of the United States.

Once again I reiterate these two separate, yet related, points. First, I urge the President to act swiftly in outlining a policy for the United States regarding the law of the sea negotiations, and second, I further encourage the Departments of Commerce and State to move forward in negotiating a reciprocating agreement as mandated by the Deep Seabed Hard Mineral Resources Act.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations and a withdrawal which were referred to the appropriate committees.

(The nominations and withdrawal received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE RECEIVED DURING THE RECESS

ENROLLED JOINT RESOLUTION SIGNED

Under the authority of the order of the Senate of November 22, 1981, the Secretary of the Senate, on Monday, November 23, 1981, received a message from the House of Representatives announcing that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 357. Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes.

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

MESSAGE FROM THE HOUSE

At 4:16 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 368. Joint resolution making further continuing appropriations for the fiscal year 1982.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 220. Concurrent resolution providing for the commemoration of the one hundredth anniversary of the birth of Franklin Delano Roosevelt; and

H. Con. Res. 228. Concurrent resolution providing for an adjournment of the House from November 23 to November 30, 1981, and an adjournment of the Senate from November 24 or November 25 to November 30, 1981.

The message further announced that the House has passed the bill (S. 1086) to extend and revise the Older Americans Act of 1965, and for other purposes; with amendments; it insists upon its amendments to the bill, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. PERKINS, Mr. BIAGGI, Mr. ANDREWS, Mr. CORRADA, Mr. WILLIAMS of Montana, Mr. RATCHFORD, Mr. ASHBROOK, Mr. COLEMAN, and Mr. PETRI as managers of the conference on the part of the House.

At 5:52 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House has agreed to the following resolution:

H. Res. 285. Resolution electing the Honorable Thomas S. Foley, a Representative from the State of Washington, as Speaker pro tempore.

ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker pro tempore has signed the following enrolled joint resolution:

H.J. Res. 368. Joint resolution making further continuing appropriations for the fiscal year 1982.

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

HOUSE CONCURRENT RESOLUTION HELD AT THE DESK

The following concurrent resolution was ordered held at the desk by unanimous consent:

H. Con. Res. 220. Concurrent resolution providing for the commemoration of the one-hundredth anniversary of the birth of Franklin Delano Roosevelt.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations, without amendment:

S. Con. Res. 45. Concurrent resolution expressing the sense of the Congress with respect to the rights of the people of Afghanistan.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary:

Jesse E. Eschback, of Indiana, to be United States Circuit Judge for the Seventh Circuit;

Richard A. Posner, of Illinois, to be United States Circuit Judge for the Seventh Circuit;

James C. Cacheris, of Virginia, to be United States District Judge for the Eastern District of Virginia;

John H. Moore II, of Florida, to be United States District Judge for the Middle District of Florida;

David V. O'Brien, of the Virgin Islands, to be United States District Judge for the District of the Virgin Islands for the term of eight years;

Clyde H. Hamilton, of South Carolina, to be United States District Judge for the District of South Carolina;

Jim J. Marquez, of Kansas, to be United States Attorney for the District of Kansas for the term of four years;

Robert N. Miller, of Colorado, to be United States Attorney for the District of Colorado for the term of four years;

James M. Rosenbaum, of Minnesota, to be United States Attorney for the District of Minnesota for the term of four years;

Ronald D. Daniels, Jr., of New Hampshire, to be United States Marshal for the District of New Hampshire for the term of four years.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HUMPHREY (for himself and Mr. JOHNSTON):

S. 1885. A bill to amend the Federal Power Act and the Public Utility Regulatory Policies Act of 1978 to place electric utilities, including members of registered holding company systems, on the same basis as nonutilities with respect to encouraging their investment in cogeneration and small power production facilities, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. MATHIAS:

S. 1886. A bill to amend the Foreign Service Act of 1980 with respect to the number of chiefs of diplomatic mission who are career members of the Foreign Service; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HUMPHREY (for himself and Mr. JOHNSTON):

S. 1885. A bill to amend the Federal Power Act and the Public Utility Regulatory Policies Act of 1978 to place electric utilities, including members of registered holding company systems, on the same basis as nonutilities with respect to encouraging their investment in cogeneration and small power production facilities, and for other purposes; to the Committee on Energy and Natural Resources.

FEDERAL POWER ACT AMENDMENTS

Mr. HUMPHREY. Mr. President, I introduce today, with my distinguished colleague from Louisiana (Mr. JOHNSTON) as an original cosponsor, a bill which would amend the Federal Power Act and the Public Utility Regulatory Policies Act of 1978 (PURPA) to place utilities, including members of registered holding companies, on the same basis as nonutilities with respect to encouraging their investment in cogeneration and small power production facilities.

Since the Arab oil embargo of 1973 woke this Nation up to the fact that we had become dangerously dependent on imported sources of energy, considerable efforts have been made to diversify our energy mix, make greater use of indigenous and renewable resources, and to make more efficient use of the energy we use through the practice of conservation. This national objective was recognized and encouraged with the enactment of sections 201 and 210 of PURPA, which provide certain rate incentives and regulatory exemptions for qualified small power producers and cogenerators.

Under PURPA, qualified cogeneration and small power production facilities are exempted from State regulation regarding utility rates and financial organization, from Federal regulation under the Federal Power Act (other than licensing), and from the Public Utility Holding Company Act. In addition, qualifying facilities are entitled to sell power to utilities at full "avoided cost" rates and purchase back-up power from utilities at nondiscriminatory rates.

Even with today's prohibitive environment for making high-risk, long-payback investments, over 1,800 megawatts of electrical capacity nationwide are presently being developed as a result of these incentives. I might add that my home State of New Hampshire has played a leading role in this process, especially in the area of small-scale hydro development. New Hampshire was the first State in the Nation to fully implement section 210 of PURPA, and at present there are over 50 applications on file at the Federal Energy Regulatory Commission to develop new and existing dam sites in my State.

Our impediment to the optimal development of cogeneration and renewables, however, is the 50-percent limitation on utility ownership of facilities which qualify for benefits under sections 201 and 210 of PURPA. By removing this limitation, I believe that our bill will be an important step toward unleashing the utilities' financial capabilities, technical expertise, and regulatory experience in developing technologies such as cogeneration, wind, solar, and hydro. The 50-percent limitation has already been lifted for utility-owned geothermal small power production facilities. Our bill would simply extend the notion that it is the nature of the power production facility, rather than its ownership, which should be the basis for encouragement under PURPA.

Mr. President, as chairman of the Subcommittee on Energy Regulation in the Senate Energy Committee, I have become increasingly disturbed by the poor financial condition of this Nation's electric utilities. The rate of return on stockholders' equity for the 50 largest investor-owned utilities has fallen from 12.3 percent in 1972 to 11 percent in 1980, more than than 3 percent less than they are authorized to earn by State public utility commissions.

Stock in investor-owned utilities is currently selling at only 70 percent of its face value, and the bond ratings of many have fallen significantly, causing their bonds to be more expensive and difficult to sell. By giving utilities an equal business opportunity to benefit from the development of cogeneration and renewables, we will also be contributing to the long-range financial health of the industry—something which is in everyone's best interest.

Hearings were conducted this past spring and summer in the House Subcommittee on Energy Conservation and Power on this subject, and we plan to schedule Senate hearings sometime early next year. I welcome any comments or

questions our colleagues might have on this legislation, and of course, I encourage their cosponsorship. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1885

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

AMENDMENTS TO THE FEDERAL POWER ACT

SECTION 1. (a) QUALIFYING SMALL POWER PRODUCERS.—Section 3(17)(C) of the Federal Power Act is amended to read as follows:

"(C) 'qualifying small power production facility' means a small power production facility which the Commission determines, by rule, meets such requirements (including requirements respecting fuel use, fuel efficiency, and reliability) as the Commission may, by rule, prescribe.".

(b) DEFINITION OF QUALIFYING COGENERATORS.—Section 3(18)(B) of the Federal Power Act is amended to read as follows:

"(B) 'qualifying cogeneration facility' means a cogeneration facility which the Commission determines, by rule, meets such requirements (including requirements respecting fuel use, fuel efficiency, and reliability) as the Commission may, by rule, prescribe.".

AMENDMENT TO PUBLIC UTILITY REGULATORY POLICIES ACT OF 1978

SEC. 2. Section 210(e)(1) of the Public Utility Regulatory Policies Act of 1978 is amended by inserting after "qualifying small power production facilities" the following: "or any investment or acquisition of any other interest therein".

Mr. JOHNSTON. Mr. President, virtually every day statements are made on the floor of this body and elsewhere which cite the need to increase domestic energy production and eliminate restrictive and counterproductive governmental regulation. Without recounting those arguments, I will simply say that the bill we are introducing today seeks to achieve both of those goals.

This bill would eliminate the arbitrary 50-percent limitation on utility ownership of cogeneration facilities which is present in section 210 of the Public Utility Regulatory Policies Act (PURPA). Cogeneration is a means whereby the steam which is used in certain industrial processes is also used to turn an electric generator. Thus, a more efficient use of the fuel resource is made, and we develop two useful end products as opposed to one.

However, under section 210 of PURPA, cogeneration facilities which are more than 50 percent utility owned do not qualify for certain legal exemptions which are granted to other owners of such facilities. Among these are exemptions from State regulation regarding utility rates and financial organization, certain Federal regulations under the Federal Power Act, and from the Public Utilities Holding Company Act. By withholding these exemptions from utilities, we are destroying the economic incentives for the one industry which can effectively employ cogeneration technology.

As a practical matter, few private industrial concerns are willing to undertake cogeneration because of high capital costs, lack of expertise, and a fear of governmental regulation in spite of the PURPA exemptions. The result has been that cogeneration technology has failed to reach its potential as a viable and competitive energy source. Our bill would remove the ownership limitation on utilities, and thereby help make energy production from cogeneration facilities a reality.

By Mr. MATHIAS:

S. 1886. A bill to amend the Foreign Service Act of 1980 with respect to the number of chiefs of diplomatic mission who are career members of the Foreign Service; to the Committee on Foreign Relations.

CHIEFS OF DIPLOMATIC MISSIONS

● Mr. MATHIAS. Mr. President, for several years I have advocated placing statutory restrictions on the percentage of nonprofessionals appointed to ambassadorial rank as chiefs of U.S. diplomatic missions. I believe that limiting the percentage of political appointees to 15 percent would both improve the morale of the career Foreign Service officers and bring greater professional competence to the conduct of our diplomacy.

In 1974, I proposed to the Senate that a 20-percent ceiling be placed on noncareer ambassadorial appointments. This amendment passed the Senate on October 2, 1974, but did not survive conference. In 1975, the idea was revived again both in my bill, S. 202, and by a separate Foreign Relations Committee proposal. These measures were considered by the committee but not adopted.

In 1976, I introduced an amendment to the State Department authorization bill proposing a limit of 15 percent for political ambassadorial appointees. In conference it was weakened and emerged, in diluted form, in Public Law 94-350 of July 12, 1976. Section 120 of the law declares:

It is the sense of the Congress that a greater number of positions of ambassador should be occupied by career personnel in the Foreign Service.

As of mid-October 1981, 9 months into President Reagan's administration, 44 percent of the President's new ambassadorial appointments have gone to individuals outside of the career Foreign Service although comprehensive figures including retained ambassadors are not so high. Should this trend continue, however, this administration would have the highest percentage of nonprofessional chiefs of mission of any administration in the postwar period, as the following chart, provided by the American Foreign Service Association, demonstrates.

	Number career	Number non-career	Percent career	Percent non-career
President:				
Truman	115	63	65	35
Eisenhower	156	72	68	32
Kennedy	72	52	58	42
Johnson	94	56	63	37
Nixon	157	73	68	32
Ford	47	29	62	38
Carter	141	52	73	27
Reagan	45	36	56	44
Total	827	433	66	34

I do not mean to imply that the United States has not greatly benefited from the services of many distinguished diplomats who were appointed from outside the ranks of the career Foreign Services. Such able and dedicated men and women as Ellsworth Bunker, John Sherman Cooper, Shirley Temple Black, and Averell Harriman brought to their ambassadorial positions great energy, skill, and experience. Indeed, the occasional appointment of qualified men and women from outside the career Foreign Service can bring to our diplomacy a fresh perspective on the problems and opportunities facing American foreign policy. There is a role for the political appointee. In the past, however, that role has often been abused, to the detriment to our foreign policy and the national interest.

Too often, political appointees to our embassies lack the experience and expertise required to represent competently America's complex interests abroad. Ambassadorial posts have often been granted in exchange for political support or campaign contributions. Our national security is too important to be subordinated to the patronage requirements of partisan politics.

The proliferation of political appointees abroad has affected the career Foreign Service as well. Morale is undermined when many of the most responsible and prestigious foreign assignments are given to neophytes in foreign affairs. Not only must the beleaguered career officer work overtime to compensate for the shortcomings of a well-intentioned but inexperienced chief of mission, but he or she must do so in the realization that ultimately, the highest levels of the profession may be inaccessible to the majority of aspiring Foreign Service professionals because of the proliferation of political appointees.

The professional Foreign Service is comprised of a relatively small cadre of highly trained, very dedicated American men and women. They endure countless hardships—hostile climates, frequent relocations, difficult living conditions, disruptions in family life, and, increasingly, personal danger—in the service of the United States. It is unthinkable to deny such men and women the access through normal promotion to the highest positions of their profession. Yet that is the trend. I believe that the Senate in its special responsibility in the area of foreign affairs should amend the Foreign Service Act of 1980 to reverse the trend.

In an age of increasing complexity and heightened dangers, American chiefs of mission play a crucial role as this Nation's first line of defense. In keeping with this administration's dedication to excellence in foreign policy, the time is ripe to examine and perhaps reassess the role of the Ambassador in U.S. foreign policy for the 1980's. Today, as a vehicle for these discussions, I am introducing S. 1886, a bill to limit the percentage of political appointees to the position of chief of diplomatic mission to 15 percent.

It is my hope that the Senate Foreign Relations Committee will hold hearings at the earliest convenient date.●

ADDITIONAL COSPONSORS

S. 1787

At the request of Mr. ROBERT C. BYRD, the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from Nevada (Mr. CANNON), the Senator from Florida (Mr. CHILES), the Senator from Illinois (Mr. DIXON), the Senator from Nebraska (Mr. EXON), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Vermont (Mr. LEAHY), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Montana (Mr. MELCHER), the Senator from Rhode Island (Mr. PELL), the Senator from Arkansas (Mr. PRYOR), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Texas (Mr. BENTSEN) were added as cosponsors of S. 1787, a bill to assure the American people that the administration's budget goals will be met, that the deficit for fiscal year 1982 will not exceed $43,100,000,000 that the deficit will not exceed $22,900,000,000 for fiscal year 1983, and that the budget will be balanced in fiscal year 1984, and to assure the representation of small business interests on the Board of Governors of the Federal Reserve System.

S. 1881

At the request of Mr. SASSER, the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Kansas (Mr. DOLE) were added as cosponsors of S. 1881, a bill to provide for the issuance of a commemorative stamp to honor the dedication of the Vietnam Veterans Memorial.

SENATE CONCURRENT RESOLUTION 45

At the request of Mr. GRASSLEY, the Senator from Idaho (Mr. MCCLURE), the Senator from New York (Mr. D'AMATO), the Senator from West Virginia (Mr. ROBERT C. BYRD), and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of Senate Concurrent Resolution 45, a concurrent resolution expressing the sense of the Congress with respect to the rights of the people of Afghanistan.

SENATE RESOLUTION 247—RELATING TO THE NEXT VACANCY ON THE BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

Mr. WEICKER submitted the following resolution; which was referred to the Committee on Banking, Housing, and Urban Affairs:

S. RES. 247

Whereas, interest rates have reached record high levels in 1981;

Whereas, high interest rates are having a devastating effect on the credit-sensitive sectors of the economy, particularly small businesses, which includes small farms;

Whereas, business bankruptcies are nearly 50 percent above 1980;

Whereas, Federal Reserve System money and credit policies directly affect the cost and availability of credit;

Whereas, Sec. 10 of the Federal Reserve Act of 1913, as amended, provides that in submitting nominations for the Board of Governors of the Federal Reserve System, the President shall have due regard to a fair representation of the financial, agricultural, industrial, and commercial interests, and geographical divisions of the country;

Whereas, the 96th Congress adopted S. Res. 434 stating the sense of the Senate that nominations to the Board of Governors of the Federal Reserve System should reflect consideration of the requirements for regional and economic interest representation;

Whereas, over 97 percent of the businesses in the United States are small businesses, which account for nearly 50 percent of the Gross National Product, 90 percent of the new jobs created in the private sector, and nearly half of the Nation's industrial innovations;

Whereas, the term of service of one of the members of the Board of Governors is expiring on January 31, 1982: Now, therefore, be it

Resolved, That it is the sense of the Senate, that the next vacancy on the Board of Governors of the Federal Reserve System should be filled by an individual who has substantial small business experience.

● Mr. WEICKER. Mr. President, today I am submitting a resolution which states that the next vacancy on the Board of Governors of the Federal Reserve System should be filled by an individual who has substantial small business experience.

This resolution reflects a position I have long held concerning the need to have fair and equitable representation on the Federal Reserve, consistent with the original law and with the unique problems of our economy. In a recent speech before the procurement conference in Connecticut, I urge the President to nominate someone to the Board who brings an understanding of the credit needs of the small business sector of the economy.

This position was further reinforced by the Senate Small Business Committee's National Advisory Council.

On June 22, 1981, Senator NUNN and I announced the formation of the National Advisory Council of the Committee on Small Business. This Council is made up of 25 small business men and women from around the country who have agreed to work with the committee to provide a grassroots view of small business issues and concerns.

The first meeting of the Council was held in Washington, on October 28. And I wish that all of my colleagues in the Senate could had the opportunity to participate in this truly beneficial meeting. I felt then, and feel even more strongly now that it is absolutely crucial to establish the kind of ongoing communication between small business and Washington that this Council will provide.

These people, involved with a small business on a day-to-day basis, are in the best position to tell us what the problems of inflation, high interest rates, and excessive regulations are doing to them and their businesses.

It is noteworthy that during the course of this day-long session, the one issue deemed to be of greatest significance to the small business community by the Council dealt with the appointment of a small business person to the Federal Reserve Board. I would like to have printed as part of the RECORD at this point the Council's recommendation which was transmitted to the Small Business Committee through its chairman, Mr. Shaw Mudge, together with a list of the Council's membership.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SHAW MUDGE & CO.,
Stamford, Conn., November 2, 1981.

Hon. LOWELL WEICKER, JR.,
Chairman, Senate Committee on Small Business, Washington, D.C.

DEAR MR. CHAIRMAN: As Chairman of the Senate Small Business Committee's National Advisory Council, I would like to thank you and the other Committee members for hosting our first meeting on October 28, 1981. The Council believes that it was a most productive and worthwhile session.

I would also like to take this opportunity to officially notify you that at the close of the business session, the Council unanimously passed a Resolution calling on the Senate Small Business Committee to take a leadership role in assuring that a small business owner, or someone with considerable small business background, is appointed to the vacancy that will be created on the Board of Governors for the Federal Reserve System when Board Vice Chairman, Frederick H. Schultz's term expires on January 31, 1982.

After considerable discussion, the Advisory Council came to the conclusion that the special credit and monetary needs of the small business sector of the economy have not been adequately addressed by the Federal Reserve Board. It is our hope that the appointment of a small business man or woman to the Board by the President would do much to increase the Board's sensitivity to the special economic and fiscal conditions that affect a small entrepreneur.

We believe that the Senate Small Business Committee should be in the forefront of activity leading to the long-overdue appointment of a small business person to the Federal Reserve Board.

We hope that the Committee will act on our Resolution in an expeditious manner.

Sincerely,

SHAW MUDGE,
Chairman, National Advisory Council.

NATIONAL ADVISORY COUNCIL TO THE SENATE COMMITTEE OF SMALL BUSINESS

Hugh Allred, Cullman, Ala.
James Beavers, Clinton, Ark.
Leon Brassard, Hudson, N.H.
David Bruce, Bozeman, Mont.
Mary Diener, Research Triangle Park, N.C.
William Farden, Seattle Wash.
Walter Floss, East Amherst, N.Y.
Leonard Forsgren, Portland, Oreg.
Bruce Hopewell, New York, N.Y.
Oscar Hornsby, Somerset, Ky.
Michael Lefkiades, Bay City, Mich.
Helen Leslie, St. Petersburg, Fla.
Bill Lyttle, Bridgeport, Conn.
Forrest Merto, Ponca City, Okla.
Thelma Moss, Dorchester, Mass.
Shaw Mudge (chairman), Stamford, Conn.
Therman McKenzie, Forest Park, Ga.
Bill Nourse, Nashville, Tenn.
Arthur Obermayer, Cambridge, Mass.
Francis Ravel, Los Angeles, Calif.
James Rhoads, Atlanta, Ga.
Ralph Steinbarth, Chicago, Ill.
Glenn Stout, Minneapolis, Minn.
David Tomlinson, Salt Lake City, Utah.
Morris Womack, Friendswood, Tex.

Mr. WEICKER. Mr. President, the Board of Governors of the Federal Reserve as presently constituted does not have in its membership a person with a small business background or with substantial small business experience. It is time that the voice of small business be heard in the halls of the monetary policy makers of this land.

This fall, the Small Business Committee has held 5 days of hearings on interest rates and the impact on small business. You know what we found out? Not surprisingly, that small businesses are being killed by high interest rates. Businesses are going belly-up every day—bankruptcies are already running 50 percent over last year. And we are not talking statistics here, we are talking flesh and blood.

It is the industries dominated by small companies that are going under or are just barely hanging on. It is the small firms that are filing corporate bankruptcy all across the Nation, while big companies like Du Pont and Sears are acquiring other firms and getting bigger and bigger. Corporate America is able to weather skyrocketing interest rates very nicely, while the small business owner is out there dying on the vine.

Small business men and women are the forgotten foot soldiers in the war against inflation, and maybe it is time somebody pointed out to the administration that the casualties are mounting.

I think it is time we reminded the people who make policy in this country of the truth of the words they have been mouthing all along: That small business is the backbone, the bedrock, the foundation, and the mainstay of our economy. This country was built by individual merchants, tradesmen and laborers. It was they who gave it its spirit and its dynamism, not some corporate board of directors.

Despite all the mounting economic hardships, small business still accounts for 90 percent of the new jobs created in the private sector. Small firms still account for nearly 50 percent of the gross national product, and for nearly half of this country's industrial innovations.

And yet, year after year, our economic policymakers ignore these amazing small business contributions to our economy and continue to promote policies that favor the corporate giants.

Well, Mr. President, right now small business is leading the rest of the country into what could be a very severe recession. Finally people are beginning to realize that as small business goes, so goes the Nation. And small business is in very deep trouble right now.

And the problem is severe and immediate, but not irreparable. The administration's economic game plan has gone awry and we need a midcourse correction urgently. The 1981 fiscal and monetary policies do not add up—and I have been saying that all year. Ever since January I have been saying that you cannot cut taxes 30 percent, undertake a massive new arms buildup, tighten credit and still balance the budget.

In my judgment, the Fed has not been sufficiently sensitive to the agony of small business caused by record high interest rates. All through 1981 the Fed continued to tighten the screws on money and credit, each time pushing up interest rates and to new record highs. Sure they knew there would be pain, and bankruptcy and unemployment. But each month they voted to turn the screws tighter and tighter. And where was the voice of small business in the councils of monetary policymaking? The answer is clear—small business had been disenfranchised. There was no one on it with authority to say, "Wait. Shouldn't we take into account some of the special problems of Main Street? Of rural America? Do we have to worry only about Wall Street?"

I want the Main Street view of the Fed. And I think it is desperately needed there.

Mr. President, the resolution enjoys strong support within the small business community. For too long, the needs and concerns of small business have been an afterthought when monetary and fiscal policy is formulated.

It is important for the Senate to send a clear signal to the President of its interest and concern with respect to this nomination. Passage of this resolution would put the President on notice of a special, small business-oriented criterion to be taken into account in the confirmation process.

It is my understanding that on November 30, 1981, the Senate Banking Committee will hold hearings on this issue. I am aware that several resolutions have already been introduced in the House and Senate. Prior to the committee's consideration, I thought it was appropriate and timely for the chairman of the Small Business Committee to present the small business perspective on this important mutual issue.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Intergovernmental Relations of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Tuesday, November 24, to hold a hearing on State implementation of Federal standards: Resource Conservation and Recovery Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Judiciary Committee be authorized to meet during the session of the Senate at 2 p.m. on Monday, November 23, to discuss these nominations:

Jesse E. Eschbach, of Indiana, to be circuit judge for the seventh circuit court of appeals.

Richard A. Posner, of Illinois, to be circuit judge for the seventh circuit court of appeals.

Clyde H. Hamilton, of South Carolina, to be U.S. district judge for the district of South Carolina.

David O'Brien, of the Virgin Islands, to be U.S. district judge for the district of the Virgin Islands.

John Moore II, of Florida, to be U.S. district judge for the middle district of Florida.

James Cacheris, of Virginia, to be U.S. district judge for the eastern district of Virginia.

Robert Miller, of Colorado, to be U.S. attorney for the district of Colorado.

Ronald Daniels, Jr., of New Hampshire, to be U.S. marshal for the district of New Hampshire.

Jim Marquez, of Kansas, to be U.S. attorney for the district of Kansas.

James Rosenbaum, of Minnesota, to be U.S. attorney for the district of Minnesota.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON INTELLIGENCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Intelligence Committee be authorized to meet during the session of the Senate at 10:30 a.m. on Tuesday, November 24, to hold a closed hearing in relation to S. 1273, the Intelligence Reform Act of 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

ANNOUNCEMENT OF POSITION ON VOTES ON SECOND CONTINUING RESOLUTION

● Mr. BOREN. Mr. President, on Sunday, November 22, the Senate considered the conference report on House Joint Resolution 357 making further continuing appropriations for fiscal year 1982. I was necessarily absent during consideration of that measure, but had I been present and voting, I would have voted "no" on final passage of rollcall vote No. 424, and "no" on rollcall No. 425.●

POSITION ON VOTE

● Mr. GORTON. Mr. President, on Wednesday, November 18, a rollcall vote occurred on unprinted amendment numbered 651, offered by Senator ROBERT C. BYRD. The amendment to House Joint Resolution 357—the continuing appropriations resolution—would have changed the date on which the resolution terminates to December 18, 1981.

I was not present to vote on the amendment because Senator ARMSTRONG, Senator BOSCHWITZ, and I were meeting with the President at the White House to discuss the second concurrent budget resolution, then being marked up by the Senate Budget Committee. We attempted unsuccessfully to convince the President to endorse the budget plan being offered by Senator DOMENICI.

Had I been present, I would have voted against the distinguished minority leader's amendment, as I voted against his other similar amendments that day.●

THE REPUBLIC OF VENDA

● Mr. EAST. Mr. President, the Republic of Venda is the black nation of the Vhavenda people which became independent of South Africa on September 13, 1979. A proud, courageous and hardworking people, the nation of Venda is staunchly pro-American, firmly believes in private enterprise and human rights for all people. Rather than continuing to live under apartheid in South Africa, the people of Venda opted for political self-determination in 1979, after establishing self-government in 1969.

Strategically located between South Africa and Zimbabwe, the Republic of Venda is lead by its President, His Excellency Chief, Patrick Mphephu, who has been its leader since self-government. In commenting on relations with other southern African states, President Mphephu stated:

As part of Southern Africa, Venda is cooperating with other independent Southern Africa States of South Africa. Transkei and Bophuthatswana, in the realization of the new dispensation of Constellation of States. This is done with the clear understanding that there will be no interference with the political status of my country. This state of inter-dependence, especially on the economic sphere, will facilitate exchange of ideas and free movement of peoples across political borders.

To date, the United States has not chosen to recognize the Republic of Venda, however, I am hopeful this nation will receive full and sympathetic understanding from President Reagan and his administration.

Mr. President, I recommend the Independence Day speech by President Mphephu to all who are truly interested in furthering America's interest in Africa. I ask that it be printed in the RECORD.

The speech follows:

SPEECH OF HIS EXCELLENCY CHIEF PATRICK MPHEPHU

Mr. M. C., His Excellency the Ambassador of Republic of South Africa, The Chief Justice of Venda. Honourable Members of the Cabinet, Chiefs and all the people gathered here today. I greet you.

To the citizens of Venda, I say this is a great day in our life. You have gathered to make a success of and strengthen what belongs to you, which is the status reached by your country. The status in which Venda is found, and seen amongst other countries of the world. The status in which each Muvenda ought to be proud of because he has reached a stage where he can have freedom of thought and freedom of action.

To my people and all the guests, it goes without saying that by accepting independence in 1979, Venda has gone far on the political sphere. Since Venda is now politically advanced, there is no more time for lingering about, there is no time for depending on others. No longer do Vhavenda wait for people from other countries to tell them when and what to do because they themselves realise it.

Now, being at this stage in time and space, I appeal to all and every Muvenda to look at mountains, forests, plains, low-lying lands, precipices and ravines, and think what he can produce from them. Let mountains and rivers of this country be a source of inspiration and enthusiasm.

Even though it is still a short stretch, does retrospective observation from 1979 not reveal to you changes in all walks of life? Look at projects of plants and plantations in all the different areas of Venda. Take note of the precipices that are being demolished, and stones and boulders that are being rolled down and, rivers over which bridges are under construction to facilitate transport. Take note of secondary schools that are springing up like mushrooms to enable each and every child to be taught in his immediate vicinity. Have a look at Thohoyandou, Makwarela, Vuwani, Shayandima, Makhado and Tshandama and notice modern buildings that are being erected. Can you tell me any place in Venda which has no sign or indication of change? Vhavenda, fold up your sleeves because it is day-break.

The independence in which we are has promoted esprit de corps amongst the people as one nation with one language. This spirit deserves congratulations because, contrarywise, foreigners would disseminate disintegration. All this materialised as a result of mutual agreement and co-operation between the people and the government.

Mr. M.C., the status which Venda attained as a result of the granting of independence is not new to Vhavenda. It is a restoration of what the people and the country enjoyed before 1902. This status was lost through legislation by the South African Parliaments, which acted without consulting our forefathers. That is why Venda did not hesitate to opt for independence when the South African Government made an offer. Refusal by Venda to accept the offer would be a denial of her birth-right.

Our people have participated and contributed in the economic development of South Africa since the discovery of diamonds and gold in 1867 and 1886, respectively. They travelled all the way on foot, across the rivers, over the mountains and plains, to the diamond fields of Kimberly and gold fields of Johannesburg. They worked in the mines, on the roads, on the railway lines, in forest plantations at a time when there was no machinery. They worked in the gardens, steelwork, Sasol and all over. Their sons are still carrying on this work. In other words, they actively participated in the economic and social development of South Africa. It is for this reason that my country should have a share in the distribution of wealth in southern Africa.

Since the inception of the Bantu Authorities Act of 1951, the Vhavenda have moved along the road of separate development without which they would have been submerged by the nations with larger numbers. The implementation of the policy of separate development has remained a challenge to the successive South African Governments. It is a policy which South Africa chose to follow and which was accepted by the black nations of the country. The fact that they have accepted separatism is obvious as all of them have moved all the way from tribal authorities into legislative assemblies, and that is why they are pressing for rapid consolidation of their territories.

Fortunately, the South African Government, by winning the last general election, has been given a mandate to speed up the policy introduced in 1951. The United Nations and Organisation of African Unity will be forced to soften their attitudes if the 1936 Land Act is amended to accommodate the land aspirations of the national and independent states.

My Government has already submitted proposals for additional land due to Venda in order to make it economically viable. The delay in the consideration of my proposals is hampering the economic planning and development of my country.

As I have previously said, independence has created a strong sense of patriotism and national awareness among my people.

That is why traffic between Venda and metropolitan areas of the Republic of South Africa is very heavy, especially during weekends and public holidays. I will not be wrong if I say, 'If there were job opportunities here, most of them would prefer to come back.' It is for this reason that I appeal to businessmen and industrialists to invest their money in Venda. They should do this without any suspicion or fear, as Venda is committed to a system of free enterprise, practiced by the Western countries. In addition to this, Venda is a multi-national State.

In order to move away completely from Bantu education, I appointed a National Education Commission to investigate and, thereafter, to recommend to me what type of education should be introduced in Venda, an education which will satisfy the aspirations of the modern people of Venda, while, at the same time, rendering them acceptable to the world at large. This Commission has already started and it will submit its report before the end of the year.

As part of Southern Africa, Venda is cooperating with other independent Southern Africa States of the Republic of South Africa, Transkei and Bophuthatswana, in the realisation of the new dispensation of Constellation of States. This is done with the clear understanding that there will be no interference with the political status of my country. This state of inter-dependence, especially on the economic sphere, will facilitate exchange of ideas and free movement of peoples across political borders.

Outside the borders of Southern Africa, positive advances were made and contacts have been established. This will be extended in the course of time.

Mr. M.C., returning to Venda, whose offspring are well fed, I am addressing each and every Muvenda by birth, or a Muvenda by virtue of citizenship, that we should approach the third year being united intellectually and spiritually.

Let us unite as children of the same Mother. Enmity, misunderstanding, hatred and differences should die a natural death today on 12 September 1981. In case any differences should crop up, let these be the results of observation and opinion, and not those that will spark off hostilities. Let there be unity, peace and understanding. When we emulate what others are doing, let this be encouragement that we also produce the same. Let there be an end to friction and gossips, as these are stumbling blocks of progress. Everywhere, where we will be found, let us be examples of social interaction, virtue and co-operation. Let us learn self-sacrifice and dedication to duty from countries such as Taiwan, Japan, Malawi and other developed countries. Let there be mutual respect between man and man.

Mr. M.C., with these words I wish every luck to each and every citizen of Venda. May the New Year of Independence, that will start tomorrow, bring all prosperity and all luck in our physical and spiritual life. May the children attend schools properly and be taught in a satisfactory manner in order that they may pass. All the workers must put the interests of their country first. Let there be a cool breeze to promote peace among the people.

This is what I had in my pocket for Venda and the world at large.

Thank you.●

LIVING WITH AGING

● Mr. HEINZ. Mr. President, I would like to take this opportunity to commend Mr. Sheldon W. Fantle, president and chief executive officer of Peoples Drug Stores and Dr. Robert Butler, director of the National Institute on Aging for their valuable contribution to the special health and social needs of our Nation's older Americans. I am pleased to bring to the attention of my colleagues their ex-

ample of a strong partnership between the private and public sectors, which promises to provide a valuable service to the elderly and those responsible for their care.

Their "Living With Aging" program, makes readily available to the elderly, and those who care for them, authoritative information on topics of concern to the older people. This information is based on NIA research and will address issues such as high blood pressure, proper use of medication, accident prevention, and nutrition. Directories of community services organizations will also be distributed in order to improve the elderly's access to services such as housing and transportation. "Living With Aging" also includes pharmacy outreach programs through which trained pharmacologists will be available to answer specific questions regarding the health care needs of older Americans.

Today, 1 out of every 9 Americans is over 65—and this number will grow to 1 out of every 5 early in the next century. As people live longer, their health care needs become greater. The elderly alone consume 25 percent of all drugs dispensed in this country today. Public information fashioned to address these concerns will result in a better educated public better equipped to face the common health problems of the aging.

Peoples and the NIA are to be commended for their leadership and contributions to the health education of the elderly and their families. It is my hope that other organizations—both private and public—will follow their lead.●

NATIONAL DEFENSE AND THE ECONOMY

● Mr. NUNN. Mr. President, as spending for national defense needs as a percent of GNP increases, the relationship between that spending and the overall performance of the economy will also become increasingly important. In a recent issue of Aviation Week and Space Technology, political economist Eliot Janeway discusses at great length his views on this critical issue.

Mr. President, I ask that Mr. Janeway's article be printed in the RECORD.

The article follows:

DEFENSE REQUIREMENTS AND THE NATIONAL ECONOMY: A HISTORICAL PERSPECTIVE AND A CURRENT ANALYSIS

Clemenceau's famous dictum about war—"it's too important to be left to the generals"—is an echo from that bygone and simple world when generals could still expect to commandeer resources overnight. The Great German General Staff, which was universally admitted to be headquarters for expertise at the commandeering of resources in Clemenceau's time, paid a bitter price for blundering into World War 1 without taking the precaution of accumulating any inventories of shot and shell beforehand. Instead, it put its trust in the perfectly logical calculation that it would blitz its way to victory without any need to draw on ordnance inventories. Glaring though this error proved to be, the Kaiser's army recovered and went on to fight a formidable four year war, which it almost won in spite of its military planners.

As recently as 1950, miscalculations as glaring as those which proved traumatic, yet not fatal, for the Great German General Staff of 1914, were still readily correctable. In the second week of June, 1950, Truman's universally respected Chairman of the Joint Chiefs, General Omar Bradley, assured House Armed Services Committee Chairman Carl Vinson that the Pentagon would never again have any need for amphibious craft and, therefore, that it had no plans for ordering any.

This judgment was fated to prove sustainable for about as long as an average official economic forecast: three weeks. Nevertheless, the damage done by this miscalculation of requirements proved retrievable in the simpler, shorter terms of defense planning and production still in force thirty years ago. Shipyards began making up for lost time, and hammering out the missing vessels, about as fast as the training camps began to ship troops for them to carry.

Clearly, our fates and our fortunes are in the hands of the arcane practitioners of the gnomic art of defense planning. They appear, however, to be suffering from a bad case of schizophrenia: unable to decide whether they are reckoning our security requirements in terms of combat ready firepower or the dollar cost of shopping for it. The symptoms of this schizophrenia are putting us on notice that the business of defense planning, to paraphrase Clemenceau, has become too important to be left to defense planners.

Certainly, no quick fixes can still be trusted to retrace wrong turns in defense planning for the 1930s. Long before Jeb Stuart formulated the first rule of warfare as the race it is "to get there fustest with the mostest," and long before Hannibal established his fleet of elephants as the secret weapon of his transalpine blitz, the two ingredients of strategic success have been time and the mobilization of resources in order to steal head starts.

Since the abandonment of SALT and the resumption of the Cold War, the time span of the military mobilization cycle has dramatically lengthened from a standard three-year swing to a ten-year period of gestation (if not necessarily for our adversary, certainly for us). If the evidence furnished by the markets means anything, surely their demoralization is our warning that inflation is still escalating the cost of the accruals, the conversions, the experiments and the casualties built into the arms race. But our cost structure has been inflated, and our physical capacity shrunken, before we multiply a lengthened military mobilization time cycle by an expanded requirements base. The painful preliminaries to the national debate over how to do so are putting a penalty on the risk of every wrong turn—and even of every realistic start.

FAITHFUL FACSIMILE

No country's military apparatus feeds on a social vacuum. Certainly, the Red military establishment is a faithful facsimile of the strengths and the stresses in the Kremlin power structure and the Soviet social structure. By the same token, America's reenactment of the fiasco in the Bay of Pigs in the Iranian desert conjures up routine images of cars stranded with hoods up in highway jams. If America's industrial strength is concentrated in her Buck Rogers technology, and her weakness in her goofball maintenance, it's unrealistic to expect the military apple to fall far from the civilian tree. The Pentagon is bound to be caught in the middle of the same anomaly.

Before our new Cold War triggered the arms race, it flared up as an oil war. America's miscalculations in coping with that challenge were at least as glaring as those of the German Kaiser's generals in 1914 and of the American President's Pentagon in 1950. We fought the oil war on the side of our suppliers, who were gouging us under the guidance of our economic planners; they, in turn, fell for the myth of the oil shortage hook, line and sinker. Consequently, we spent the 1970's in a slow motion reenactment of the sinking of the Titanic: Going down with the best people. The bookkeepers who were running the auto companies, the engineers who were running the oil companies and the Ph. D.'s in human relations who were making the technical decisions for our government all assured us that the conventional wisdom asserted by our adversaries in the oil war was the wisdom to heed. The result began by leaving us laughably overprepared to put up with the shortage that never was. It ended by leaving us clumsily unprepared to turn the glut that has now developed to our advantage.

Consistency being well known as the hobgoblin of little minds, our defense planners are now busily buttressing our security by practicing economics. Lyndon Johnson was a very funny man, but his jokes were always serious and pointed. When he punctuated the farewell ceremony of a departing economic advisor with the throwaway line that "my economic advisor needs an economic advisor," he reminded us that our political leaders have suffered more political defeats at the hands of their economic advisors than in confrontations with their political opponents.

We have not heeded this sober warning of Johnson's yet. The ongoing spectacle of defense planners basing their projections, and risking this country's security posture, on consensus economic thinking recalls one of those old Wall Street sayings which has become old because it has earned its keep with successive generations of speculators: "Never hold a grudge against anyone who costs you money because you can always get it back; but never forgive anyone who costs you time because you can't ever get it back." If our defense planners persist in consulting our economic oracles about the military mobilization called for by the policies of our political leaders, they will compound miscalculations on where our economy is going. They will not strengthen our economic performance; but they will weaken our military prospects.

Specifically, Secretary of Defense Weinberger has now been beguiled into betting his well-earned reputation for judiciousness in the quantification of costs on the judgment that the projected step-up in defense programming will not be inflationary. More provocative still, he has buttressed this assertion with the calculation that the buildup will account for no more than a fractional increase in the portion of GNP claimed by the Pentagon budget. To judge by comments from the media, including the comments from the financial media, that's the end of it. Perhaps for this very reason, the Administration believes it; though for this very same reason, that formidable silent majority of market participants, whose separate but private money decisions measure the ability of our economy to support the needs of our military, have learned not to believe it. The GNP calculation is not the count that matters.

Inflation is not the measure of muscle, but it is the price we pay for building it. Any buildup in military power which fails to pack an inflationary punch will also fail to pack a military punch. This was true when military technology was still rudimentary enough to permit emergencies to come in cycles. It will be inescapably so now that the non-stop revolution in military technology is outgrowing the traditional cyclical limitation on defense planning. As a matter of fact, the tough talk which President Reagan, Secretary Haig and Secretary Weinberger have mounted against the Red Commanders argues for the Administration not to spare the horses now that the race is on to put muscle, which the Kremlin will respect behind mere mouthings.

INVESTMENT RETURN

The return on a national investment in a military program is firepower bought, not the price paid for it in inflation. Either a military catch-up effort will be formidable enough and, therefore, will be mounted massively enough to impress "our adversary," as President Reagan is now realistic enough to call Russia, or its failure to make waves throughout our economy will signal its failure to make waves inside the Kremlin. The inescapable corollary, however, is that the cost of preempting resources for the purpose of buying that firepower needs to be reckoned in its inflationary impact. Bernard Baruch, that master of the impact of emergency events on inflated markets, taught us these two interrelated lessons before economists got into the habit of using GNP numbers to measure the way the world works.

Devotees of the GNP yardstick for measuring the inflationary impact of defense invariably advance comparisons with the portion of GNP "our adversary" in Moscow allocates to defense. These are meaningless comparisons. There can be no common standard of measurement for the Soviet Union and the U.S. on this score because the Soviet Union never had a GNP to reflect money flows. Our own GNP tabulation is so bloated by money flows which overstate our productivity that it no longer means anything. Russia operates on an arbitrary allocation system, which subjects the production and distribution of goods and services to rigid disciplines, reversing the priorities represented by economic pressures and immeasurable by any money standard.

To take just one fact of productive life in Russia that is in total conflict with a basic fact of economic life in the U.S., the Soviet system clamps a rigid control on interest payments and receipts. By contrast, the American system is structured to stop the reach of emergency wartime controls—even on wages and credit—short of touching interest rates. Surely, no common yardstick for gauging the draft of defense on productivity in the two rival superpowers can pass muster as a tool which reckons without the toll admittedly taken by interest costs here, but arbitrarily suppressed there. Soviet finance stems from Marxist economics which, in turn, the prophet based on the theories of the classical English economists, who made their mark on history without, however, developing a theory of interest. But that is part of another story. To balance their system, which pays off by issuing tickets insulated from interest charges, with our system, which pays off by cloning dollars subject to interest charges, is a juggling act too academically abstract and too strategically reckless to be included in any analysis assessing the use Russia has made of the military head start we have spotted her.

We are already on notice to be wary of statistics-as-usual. The time we have wasted in answering the Soviet challenge and the resources we will need to commandeer in the effort, put us on notice to be wary of bromides that go with business-as-usual. The costly cross-ups between optimistic stimuli offered to the markets in the form of official statistics, and the suspicious responses of those markets, suggest that something is rotten in the kingdom of the computer.

In matters of practical decision-making, answers are never a problem; only questions are. Their relevance determines the practicality of the answers offered. How, in a world dominated by Russia's head start and her challenge to America to launch a catch-up effort, can anyone rest the case for security and survival upon an accounting system which equates a pound of steel bought to go into a tennis racket with a pound of steel bought to go into a machine tool? Our GNP blurs the distinction. The American accounting system is a statistical exercise dedicated to monetizing the principle formulated in the 14th Amendment which declares all citizens free and equal. The GNP declares all dollars equally productive. In a world miraculously freed from nuclear terror, all dollars would be less unequal than they are today. In the world as it is, however, the GNP, unadjusted for inflation, clocks little more than the rate at which our national product mix is continuing to shift from basic industries suffering shrinkage to self-indulging services expanding by the day. Adjusted for inflation, the GNP understates inflationary reality. So does our budget, it assigns a disarmingly low 7.5 percent rate to interest costs when, in fact, the markets are sandbagging the Treasury with a brutal penalty more than double that rate. The rate of interest, precisely because it is uncontrollable, is the authentic and trustworthy indicator of the real rate of inflation. The single-digit GNP inflator is just a public relations decoy.

The time has come for the Pentagon to put together a shopping list to fit into the shopping bag represented by the pool of resources now available to carry it. Money is the criterion of the inflation we will buy, not of the firepower that we can agree we need. Only an itemization of the physical units of firepower claimed for the program, and their supporting components of productivity, will make sense in translating the dollar terms in which we are conditioned to think into the "real things" our adversary is challenging us to have on the ready. If the shopping list measured in castings, forgings, master mechanics and petty officers won't fit into the present contours of the shopping bag, we will be on notice to find a bigger and better shopping bag by the simple expedient of expanding our industrial base or, alternatively, rationing our resources. We have done this before with sensational success; we can do it again and we will. We need a realistic yardstick to work with and it's not the GNP.

NEED FOR DEFENSE WORK

It's time to bring the debate back to the starting point Baruch identified for it: It's impractical for us to be worrying about the money load the economy can bear; the operational question is how heavy a physical load the Pentagon needs to make it bear. The economy does not need defense work as a crutch; nor is defense work an obstacle in the way of its recovery. If it is time to start catching up in the arms race, it's time to separate what the military will need in the next decade from what the economy can give it without putting our society on rations or inflating the muscle out of it. Preparedness is too important to be left to economists; the economy is too vigorous to need solicitude from defense planners.

Our "adversary" in Moscow has been invited to stake out the arms race course on which we are undertaking to catch up with her. The choice of weaponry is hers and it is, of course, military. If it were ours, it would be economic and she would have no chance of catching up with us. But with firepower the goal, and with ticketed claims to resources her method of reaching it, we are on notice to graduate from statistical gamesmanship to resources mobilization.

Despite the slump in building, the depression in Detroit and the epidemic of business bankruptcies, the stubborn refusal of interest rates to buckle is a portent of the problem the Pentagon faces in scheduling deliveries. Whether we rely primarily on economic or military weaponry in the stand we now make against "our adversary," the economy is our workhorse. The responsibility of our defense planners is to tell the economy what they want from it, not to promise it what they won't do to it.●

UNITED STATES-SAUDI ARABIA RELATIONS

● Mr. METZENBAUM. Mr. President, during the debate over selling AWACS, AIM 9–L missiles, and other advanced military technology to Saudi Arabia, the Congress and the people of this country were assured repeatedly by the Reagan administration that the sale would bolster our position in the Middle East.

We were told of a special relationship between our country and Saudi Arabia.

We were informed that the Saudis agree with what President Reagan said to the Washington Post in an interview published on November 1, that:

> The greatest threat in the Mideast to both Israel and the Arab States is the Soviet Union.

And we were also told that if only they got these weapons, the Saudis would at long last take a serious interest in peace.

President Reagan said in his November 1 interview:

> Saudi Arabia is a leader of the moderate Arab States. I believe that the Saudis are the key to spreading peace throughout the Mideast instead of just having it confined to Israel and Egypt.

Peace, moderation, a special relationship, an anti-Soviet consensus, who could not be for these things?

But, Mr. President, those are not the things we are getting from Saudi Arabia. Far from it. And it is high time to ask just what the Reagan administration thinks is going on.

During the AWACS debate, for example, we were told time and again about the gratitude we ought to feel toward the Saudis for their restraint on oil prices.

But the day after the AWACS sale was approved, our special friends raised the price of oil by $2 a barrel and cut back production by 1 million barrels a day.

Hobart Rowen wrote in his column of November 8:

> Remember the propaganda until now about how the Saudis engineered the oil glut, all for the benefit of the good ole USA. Now, they are beginning to engineer the shortage.

During the AWACS debate, we were assured and reassured of Saudi Arabia's unflinching opposition to Soviet influence in the Middle East.

The Soviets, of course, already have a presence in the region.

The Soviet Union is and has been the military and political patron of Libya, Syria, and Iraq. These are the radical states, the anti-Americans, the diehard opponents of peace.

The Soviet Union has trained and supplied the terrorists of the PLO. And recently, Moscow upgraded the PLO's delagation to the status of a full-fledged embassy. But the Soviet Union has not in recent years had the influence it once enjoyed in the Middle East.

The late President Sadat kicked the Soviets out of Egypt. And in 1977, rather than let the Soviets back in through the Carter administration's proposed Geneva Conference, Sadat flew to Jerusalem and made peace with Israel.

But now, Mr. President, Saudi Arabia, this special friend of ours, this pillar of

the anti-Soviet consensus, is itself taking the lead in undoing Sadat's work.

The Saudis have done their utmost to wreck the Camp David accords. And now, they are going even beyond that by actively working to bring the Soviet Union back to center stage in the politics of the Middle East.

On November 5, the Saudi Foreign Minister announced his nation's intention to seek a U.N. resolution endorsing the Saudi peace plan. Passage of the resolution would be followed by an international conference on the future of the Middle East, under the auspices of the U.N. Security Council.

What does that mean?

To engage the Security Council means one thing, and that is to reengage the Soviet Union.

And Soviet reengagement is precisely what the Saudis have in mind.

When asked recently if his proposal would lead to negotiations with the Soviet Union, the Saudi Foreign Minister had this to say:

Of course with the Soviet Union. It is part of the Security Council.

So much for the claim that Saudi Arabia stands against Soviet influence. Now, the Saudis are inviting the Soviets into the Middle East, and I submit that is now what we have a right to expect from a country the President describes as "a leader of the moderate Arab States."

In that connection, I want to remind the Senate of a little-noticed statement issued by the Saudi News Agency on January 10, 1980:

There are many States such as the Soviet Union which are only too ready to supply the kingdom with everything it wants. In other words we could easily replace the Americans.

Is this just rhetoric that we are supposed to ignore? Perhaps. But in spite of the Reagan administration's fond hopes to the contrary, the Saudis show a notable lack of enthusiasm for joining an anti-Soviet coalition.

On November 10, for example, at a press conference opening a meeting of the Six-Nation Gulf Cooperation Council, the Saudi Foreign Minister publicly criticized Oman's military cooperation with the United States.

Why?

"Because," said the Saudis, "It's contrary to the principles of nonalinement."

Nonalinement is one thing, Mr. President, and a special relationship with the United States is another. And I am afraid that we are letting Saudi Arabia have it both ways.

Now that, Mr. President, is a fine arrangement for the Saudis.

When they want our top-of-the-line military technology, they are our special friends.

When we want their active help against the Soviet Union, they are nonalined.

"These people are on a different wavelength," said an American observer at the meeting of the Gulf Cooperation Council. "Apart from Oman, they do not see any immanency to a Soviet threat."

And let me add, Mr. President, that the Saudis do not see any apparent need to respect, let along support, this country's political and military interests.

Consider, for example, the spectacle of our alleged friends in Saudi Arabia openly pressuring the European countries to work actively against American policy in the Middle East.

On November 5, less than a week before criticizing Oman's pro-U.S. position, Foreign Minister Prince Saud held another press conference, this time in the company of Britain's Lord Carrington.

The Saudi Prince used that occasion to tell Lord Carrington that Britain should realize that if joining the Sinai peacekeeping force means joining the Camp David peace process, then there will be a contradiction between the European position and the position of the Arab world.

Lord Carrington did not see fit simply to acknowledge the Saudi view. In one of the most craven performances in recent memory by the representative of a supposedly proud country, he positively scurried away from even the implication that Britain could ever in any circumstances differ in the slightest with the House of Saud.

He said:

Britain would participate on the basis of seeing that Arab lands are returned to Arab countries and on no other basis at all.

Noble sentiments, Mr. President, but I cannot help but wonder how Lord Carrington would react to substituting in his statement the word "Irish" for the word "Arab." And I believe that he ought to be reminded of an obvious fact, that if the terrorism of the PLO is somehow legitimate, then so is the terrorism of the IRA.

That point, the issue of legitimizing terrorism, brings me to another area of very great concern, and that is the attitude of Saudi Arabia toward peace in the Middle East.

The President has said that "The Saudis are the key to spreading peace."

If that is the case, and if we take seriously the words of the Saudis themselves, then I am afraid that our hopes for progress toward peace may dwell in the realm of voodoo foreign policy.

Listen, for example, to what the Saudi leaders have had to say on the subject of peace since the AWACS sale was approved.

Prince Fahd, the heir to the Saudi throne, publicly congratulated President Reagan for confronting the Zionist pressure groups which waged a vicious, desperate battle to prevent passage of the deal.

Prince Fahd said:

What is now required from the present administration is to start the bigger and more important battle it must wage in order to establish a just and comprehensive peace.

Please note, Mr. President, that the Prince did not say requested or hoped for or even expected. He said required.

On November 16, the Washington Post carried an article by David B. Ottaway in which an authoritative official in Saudi Arabia tied to strategic cooperation with the United States to a Middle East settlement on terms dictated by the Saudis. Everything, he said, "is tied to the peace plan."

If that is achieved, "There is no reason not to have the strategic alliance with the United States that is not possible now."

I am sure that all of us are in favor of waging a battle for a just and comprehensive peace. But the problem is the specifics of Saudi Arabia's version of peace.

Are we talking about a peace that is fair to all? About a peace that will last? Or do we mean what amounts for the people of Israel to the peace of the grave?

Listen to the Saudis.

Camp David? Camp David is a "dead end." Forget about it.

Instead of Camp David, say the Saudis, we should accept a PLO-run Palestinian State, with Jerusalem as its capital.

We should stop casting doubt upon the PLO and its leaders.

And Prince Fahd has said that we should force Israel to accept Saudi principles, including the one that says "Brother Arafat" is the basic numeral in the Middle East equation.

Well, that is a fact, Mr. President. "Brother Arafat" is the basic numeral, the bottom line, or whatever expression we want to use to describe what Saudi policy is really all about.

"Brother Arafat," who a few years ago packed pistols into the General Assembly of the United Nations, heads an organization that has received $400 million in aid from Saudi Arabia.

That organization has a charter, adopted in 1964, amended in 1968 and reaffirmed in 1977, that explicitly spells out its agenda.

Article 19 states:

The establishment of Israel is fundamentally null and void.

The PLO Charter says:

Armed struggle is the only way to liberate Palestine and is therefore a strategy and not tactics.

And according to "Brother Arafat," the PLO's purpose is "not only the liquidation of an imperialistic base, but the obliteration of a society."

The PLO's tune does not change very much.

In 1977, for example, when President Sadat made his trip to Israel, Arafat's response was straightforward. "Blood and struggle," he said. And one of his top assistants stated that any agreement between Egypt and Israel "can be abrogated with a single bullet." That same PLO spokesman, upon hearing of the murder of Sadat, said, "We shake the hand that fired the bullets."

Time and again, Mr. President, we have heard that Israel's intransigence is at the root of the problems of the Middle East.

We hear that from King Hussein of Jordan, who has just concluded an arms deal with the Soviet Union.

We hear it from Saudi Arabia, whose king earlier this year stood in Islam's holiest shrine and called for a jihad, a Holy War, to cleanse Jerusalem of Jews.

In Riyadh, Mr. President, they will not even say the word "Israel," it is "the Zionist entity." And when the Saudi del-

egate to the U.N. stated recent that his country might envision some form of recognition of Israel, he was firmly and publicly repudiated by his home government.

Why?

One reason is the position of the PLO, whose spokesman said recently that a PLO decision to recognize Israel would have to be taken by a Palestinian government on Palestinian land. Israel, in other words, should acquiesce in the establishment of a PLO state and then, maybe, that state will make peace.

That is an absurd position. No Israeli Government could ever accept anything remotely like it, just as no Israeli Government could accept anything remotely like the Saudi plan itself.

Saudi Arabia knows that.

The PLO knows it.

And I hope that our own Government recognizes the difference between wish and reality in the Middle East.

Now that the AWACS debate is behind us, I believe that it is incumbent upon the Reagan administration to reexamine its own extravagant expectations about Saudi Arabia. It is time clearly to define this Nation's political and military interests in the Middle East. And let us now insist, firmly and without equivocation, that expressions of friendship are not enough.

Friendship, Mr. President, is a two-way street. And I submit that Saudi Arabia is not acting the part of a friend of this country.

I say to the Reagan administration that fond hopes, ivory tower concepts, and visions of commercial and strategic sugar plums are no substitute for a tough, hard-headed, and aggressive defense of this Nation's fundamental interests.

We are in danger of forgetting that, Mr. President. And I am profoundly concerned that our policy in the Middle East is on the road to catastrophe.●

THE ADMINISTRATION'S HOUSING POLICY

● Mr. MITCHELL. Mr. President, the housing industry is one of the biggest victims of the current recession. I am growing increasingly alarmed at the downturn in new home construction and in the sales of existing housing—and at the failure of the administration to respond.

Housing comprises fully 23 percent of the national economy. Yet it is in the biggest slump in the post-war era. The production of new housing is the lowest since 1946. Total housing starts for 1981 are forecast at only 1.06 million units. Despite interest rates that are beginning to fall, economic projections show that 1982 will be another low year, with housing starts not estimated to go beyond 1.2 million to 1.3 million units.

Sales of new single family homes dropped 13 percent from August to September, to an annual rate of 312,000—the lowest rate since the Commerce Department started keeping records in 1963. And that September rate was 45 percent below the sales rate in September 1980.

Moreover, sales of existing homes are at an annual rate of 2 million, a record low. In many cases, sales have only been possible by the assumption of existing mortgages with low interest rates or by seller financing. As a result, real estate agents and brokers are struggling just to stay alive.

Finally, the timber industry is being devastated. Half of it is either shut down or on reduced working hours.

While this administration professes to support business, the private credit markets have only been open to the largest American corporations who want financing for mergers with other companies. Prospective home buyers and small businessmen and women are simply unable to obtain affordable credit.

What has been the administration's response? The Federal Reserve Board intends to continue its course of tight monetary policy, keeping interest rates at high levels. The administration itself is cutting back further and further on Federal housing programs. And the free-market approach is to solve the problems of the industry.

Statements by administration officials confirm that their intent is to get out of housing production altogether. The President's Commission on Housing recently issued its interim report in which a recommendation was made to replace housing production under the section 8, section 202, and public housing programs with a voucher program for low-income families. Recently, the Secretary of Housing and Urban Development, Samuel R. Pierce, Jr., said:

> We hope by 1984 or 85, that we will have interest rates down enough so that we won't have to use the voucher system. We hope that maybe we'll even get out of that.

An article appearing in Saturday's Washington Post quoted Secretary Pierce, in an address before the annual convention of the National Association of Realtors, as saying that it was a great time for the realtors to start investing in housing, to buy unsold houses. And he made it clear that real estate firms should not look for any new Federal programs to help them out. The response from the realtors, predictably, was that they cannot afford to buy houses at a time when they are struggling just to maintain their offices.

Mr. President, we cannot simply let the housing industry die on the vine while the economy is in a deep recession and the prospects of relief do not appear promising before spring or summer of next year, at best. Small businesses do not have the means to survive indefinitely. They are doing their best to hang on under difficult circumstances.

Obviously, the great pressure on interest rates stems from the contradictory economics of the administration's program: a tight monetary policy, which shows no signs of relaxation soon, and an expansionary fiscal policy, comprised of tax reductions for some of the Nation's wealthiest businesses and speeded up defense spending for programs whose costs are a matter of great controversy. The administration's most recent economic projections indicate that the 1981 deficit will be nearer $80 billion than the $43 billion the President first promised. And the 1984 balanced budget goal has been abandoned in the face of economic projections which will give us deficits of over $100 billion.

In the face of these facts, it is essential to take action to ease the tight money policy which is devastating the small business community. It is essential to cast as critical an eye on defense spending as we have at every domestic program. And it is essential that the unwarranted and unwise tax giveaway in the major tax bill be repeated—the $18 billion break for oil companies would be a good place to start.

One important step which Congress can take to reduce the pressures on interest rates is to bring down the Federal deficit. The administration's policy favoring dramatically increased defense spending coupled with the large tax cut enacted this year may now result in deficits topping $100 billion in this fiscal year and in 1983 and 1984. Clearly, deficit spending of that magnitude will only keep the pressures on interest rates. Congress can make a positive contribution by bringing down the deficit, by spreading reductions in the Defense Department's budget as well as in domestic programs, and by repealing the large tax break given to the oil industry.

Further, the Federal Reserve Board should ease its policy of tight money. Such a policy cannot alone combat inflation—and it is contradictory to the expansionary fiscal policy that the administration has chosen.

Mr. President, the article I mentioned earlier is illlustrative of the administration's failure to respond to the crisis in the housing industry and of its intention to extricate itself from Federal housing programs to the maximum extent possible. I ask that the article be printed in the RECORD at this point.

The article follows:

[From the Washington Post, Nov. 21, 1981]

REALTORS URGED TO BUY HOUSES

(By Sandra Evans Teeley)

MIAMI.—Realtors looking for federal cures for their depression-ridden industry got only one new prescription from the Reagan administration at their annual convention here: heal thyself.

Secretary of Housing and Urban Development Samuel Pierce offered the group—depleted in number by this year's deep housing slump—a simple plan for improving record-low home-sales figures without the help of costly federal programs.

Realtors, Pierce told them, should start buying the homes themselves.

In line with the administration's free-market, private-sector emphasis, Pierce outlined a number of ways the federal government plans to diminish its role in the housthe market generally and made it clear that real estate firms should not look for any new programs to help them out.

But he did advise members of the National Association of Realtors that this is a great time for them to "reach out for new horizons" and start investing in housing. Particularly with recently enacted legislation for faster tax depreciation, this could be a good way for them to make money from investment property, Pierce indicated.

"I am suggesting that those Realtors that have been hit hard by diminishing commission income should think about the opportunity and incentive to become the provid-

ers of private-sector housing," he told the audience of 1,000 Realtors. "Certainly there are risks, and interest rates are still high," but these are starting to decline, he said.

Some delegates reacted with bitterness to the suggestion that barely surviving businesses can get into the buyers' market in a big way.

"With what?" retorted one broker from Colorado Springs, Colo. "Nobody has any money to do it. It takes everything we've got just to maintain our offices."

J. D. Sawyer of Naples, Fla., said Pierce had an interesting idea but, when asked if anyone in his area is doing more investing, he shook his head. "Nobody has the money," Sawyer said, adding: "Everyone is scared" of buying now.

There are those, including some in the Washington area, however, that say they are starting to buy properties at baragin-basement prices, counting on tapping future appreciation when interest rates drop and people start buying again.

Jack Shafran of Better Homes Realty in Northern Virginia, for example, reported that his firm is buying now for investment, and Mike Brenneman of Brenneman Associates said he is starting a syndication to pool investors' funds to take advantage of depressed prices in the Washington area.

The convention drew far fewer Realtors than in past years, a reflection of the current housing slump. Since 1978, as the housing market has worsened, the numbers attending have dropped, from about 27,000 in Honolulu four years ago to about 11,000 here this year. In addition, membership in the organization—which says it is the country's largest trade association—has dropped over the past year from 740,000 to 691,000.

The convention programs were a sign of the times. Seminars on creative financing techniques were well attended, as were talks on the use of computers and office management.

Other lectures were pep talks, such as one on "How to Overcome the Psychology of Recession"—a combination of Vince Lombardi and Norman Vincent Peale.

For those already overcome by the reality of recession there were talks on how to successfully reduce the size of one's company, auctioning off properties for quick cash, and how to assess the worth of one's real estate office, presumably of the most interest to those wanting to sell.

And, perhaps for those looking for semi-divine inspiration, there was Tim Foley, retired strong safety for the Miami Dolphins, who was booked to talk about "Celestial Meditations of a Fully Depreciated Athlete."

For many, the approximately 140 educational seminars being offered at the convention were far more important than the speeches and policy pronouncement by federal officials, delegates said. Veterans of previous conventions reported that this was generally a more serious crowd than in the past, intent on learning new ways to improve business or in some cases just to stay alive professionally.

In addition, the members who attended the convention were likely to be successful in their businesses, some said, because they were the only ones who could afford to go.

Some exhibitors said they had displays this year, not so much in hope of building business, but so competitors wouldn't spread the word that they were doing badly. In addition, the usual bragging about sales figures was totally absent this year, others noted.

"People are groping" for better business methods, said Bette June Ingham of Washington's Ingham & Associates.

"It's a hard-working group. They want to learn," added Kenneth J. Luchs of Shannon & Luchs.

Not all the news from the convention was bad. The meeting came at a time when interest rates have started to fall, and forecasts are for an upturn in the market.

"I do think we have hit bottom," said NAR Chief Economist Jack Carlson, with sales of existing homes running at an annual rate of about 2 million. Sales will start to pick up slowly this winter and then increase at a faster pace starting in the spring, Carlson predicted.

The new NAR forecasts put sales at 2.75 million in mid-1982 and at 3.5 million by mid-1983. "The worst times are behind us. Improvement is coming," Carlson said.

He said he expects to see conventional mortgage interest rates fall to 14 or 15 percent by spring from the current 17 to 18 percent.

The group also released a survey showing that true interest rates being paid by most buyers are 12 to 14 percent now, because of creative financing techniques. About 60 percent of all existing home sales involve creative financing, the survey showed, the most common being assumptions of old low-interest mortgages and seller financing.

While the convention was in progress, the government also announced it is reducing interest rates on FHA- and VA-insured mortgages by one percentage point for most types of loans. For single-family home mortgages, the rate was reduced from 16½ to 15½ percent.

Despite the favorable signs, the White House received a dose of criticism from the predominantly Republican group. At the start of the convention, Carlson launched a wide-ranging attack on the administration, deploring what he called its "antihousing policy." He cited large tax cuts that he said gave a bigger boost to investments other than housing, deregulation plans for savings and loans that would allow them to commit fewer funds to home mortgages, and talk among "key people" of limiting mortgage interest deductibility.

NAR President John R. Wood later tried to dispel the impression that the traditionally conservative organization is opposing the administration generally, but he ended up criticizing the White House for having no housing policy at all

"It's more a lack of a housing policy" than antihousing actions that members are concerned about, Wood told reporters. "There used to be a housing policy in this country, and we see that fading."

The Realtors—about 90 percent of whom voted for Ronald Reagan for president, according to NAR figures—got little by way of reassurances of action geared specifically to stimulating housing from the administration or other federal officials.

HUD Secretary Pierce emphasized that the administration is counting on its overall economic policy to reduce inflation and interest rates and therefore ultimately help housing.

To the disappointment of many members, Federal Reserve Board Chairman Paul A. Volcker remained steadfast in his refusal to allow money growth to increase faster, despite the Realtors' call for loosening restraints slightly in the hope of bringing interest rates down faster.

The convention delegates clearly put a balanced budget at the top of their list of federal policies they are pushing, clapping longest and loudest any time that elusive goal was mentioned.

Pierce, asked about Carlson's charge of an anti-housing policy, mentioned budget considerations, as well.

"I believe [the Realtors] know we don't have an antihousing policy. . . . We've tried to get interest rates down," he said. "There can't be any new building programs. It's just not in the cards, because it costs too much."●

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I see no other Senator seeking recognition. I am prepared now to proceed to a number of matters that are routine in the main, if no other Senator has a requirement for time in morning business.

ORDER AUTHORIZING CERTAIN ACTION DURING RECESS OF SENATE

Mr. BAKER. Mr. President, this request, I believe, has been cleared on the other side. I ask unanimous consent that during the recess of the Senate over until Tuesday, November 24, 1981, messages from the President of the United States and the House of Representatives may be received by the Secretary of the Senate and appropriately referred and that the Vice President and President pro tempore and Acting President pro tempore be authorized to sign duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATOR FORD TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow, after the recognition of the two leaders under the standing order, the Senator from Kentucky (Mr. FORD) be recognized on special order for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION OF APPROPRIATIONS FOR THE NATIONAL AERONAUTICS AND SPACE ADMINISTRATION—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on S. 1098 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1098) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

THE CONFERENCE REPORT ON THE NASA AUTHORIZATION

Mr. CANNON. Mr. President, today the distinguished chairman of the Committee on Commerce, Science, and Transportation, my valued colleague, BOB

PACKWOOD, has filed a conference report, reconciling the House and Senate NASA authorization levels in S. 1098 as amended. The conference of managers agreed to an authorization level which restored $50 million of the administration's originally requested reduction of $603 million from NASA's fiscal year 1982 budget as submitted to the Congress in January 1981.

This conference report should convey a message of importance. For myself, I think its importance lies in communicating to our respective Chambers and to the administration the commitment of the House and Senate authorizing committees for the NASA budget to the support of a strong civilian space and aeronautics program to fulfill the purposes of the National Aeronautics and Space Act of 1958.

Those purposes are no less important to our Nation today than they were when first set forth. But suddenly, in the face of worldwide and national acclaim for the delayed but spectacular establishment of mankind's first space transportation capability, we are confronted by an administration attitude, clearly signalled in its proposed 1983 and 1984 budget reductions of a billion dollars each year, which may lead to virtual abandonment of those goals and decimation of the agency charged with their attainment.

In a dynamic world of shifting attitudes and mores, in which the standing of our Nation has suffered severely, our space achievements have provided our one renewable hold on the respect and good will of peoples all over our planet. For the young in years among our own people, NASA's achievements have renewed their confidence in the Nation's otherwise waning commitment to science and discovery. And to the young in heart of all ages, our space achievements have reassured them that their Government, whatever its faults, can still respond to and help fulfill some of our people's highest aspirations.

But, many will say, we are faced by an economic crisis in which, for the time being, economic considerations must transcend all others. Because I understand and, indeed, share that view in many respects, let me focus briefly on that one form of NASA's return on investments, namely, massive contributions to our economy from our aviation industry, which can help alleviate our economic crisis.

Which of us, had we been here when NACA—the forerunner of NASA—was first authorized, would have imagined, or believed—if one of us had imagined—that in 1980 the Nation's aviation industry would:

Contribute over $13 billion net to our trade balance.

Provide 1.3 million full-time jobs distributed throughout our 50 States.

Market about $100 billion in products and services—which at nominal earning levels would return $2 to $3 billion to the Federal Treasury.

Carry 273 million passengers on its regularly scheduled airline flights in the United States without a passenger fatality—except in commuter class service.

The substance of that summary may not be new to any of you. But I ask you now to view its implications in the context of NASA's space program which now dominates that agency's budget. The competitive muscle of the U.S. aviation industry is the advanced technology developed through NASA. We have more reason now to believe that economic expansion into space activities will take place in the future than our predecessors had to believe in aviation's economic achievements for our time.

Typical of those activities will be communications, remote land and ocean sensing and exploration by satellite, advanced materials processing for metallurgical and pharmaceutical needs, solar power development and others unsuspected today. That economic expansion may well dwarf what we have experienced in earthbound aviation. With that beacon already there to guide us, we should not deny our offspring that expectation for their future.

Mr. President, it is my hope that our colleagues will share my sentiments and accept this conference report which conveys an unmistakable message of our support of NASA to the Congress, to the administration, and to the public.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE 100TH ANNIVERSARY OF THE BIRTH OF FRANKLIN DELANO ROOSEVELT

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House Concurrent Resolution 220, a resolution providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 220) providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt.

There being no objection, the Senate proceeded to consider the concurrent resolution.

The preamble was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 220) was considered and agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

(Later the following occurred:)

Mr. BAKER. Mr. President, I am advised that there is a request to vitiate the action just taken by the Senate in respect to House Concurrent Resolution 220. Mr. President, I ask unanimous consent that the action taken in the adoption of House Concurrent Resolution 220, a resolution providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt, be vitiated and that the measure be held at the desk pending further disposition of the Senate.

The PRESIDING OFFICER (Mr. DENTON). Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go into executive session.

There being no objection, the Senate proceeded to the consideration of executive business.

NATIONAL LABOR RELATIONS BOARD

Mr. BAKER. Mr. President, I send to the desk a resolution discharging the Committee on Labor and Human Resources of the nomination of John R. Van de Water to be a member of the National Labor Relations Board, and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, on behalf of Senators on my side of the aisle I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. I thank the minority leader.

EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, there are nominations on today's Executive Calendar beginning at page 2, continuing through page 3 through Nominations Placed on the Secretary's Desk which are cleared on our side for consideration. I inquire of the minority leader if he is in a position to consider those items at this time.

Mr. ROBERT C. BYRD. Will the distinguished majority leader repeat his request?

Mr. BAKER. Mr. President, the request was for the Executive Calendar for today on nominations beginning on page 2, under Department of State, continuing through page 3, including Nominations Placed on the Secretary's Desk in the Air Force and Navy.

Mr. ROBERT C. BYRD. Mr. President, the aforementioned nominations have been cleared on this side.

Mr. BAKER. Mr. President, I thank the distinguished minority leader.

Mr. President, I ask unanimous consent that the nominations just identified be considered en bloc and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF STATE

Edwin Gharst Corr, of Oklahoma, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Bolivia.

Melvin Herbert Evans, of the Virgin Islands, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Trinidad and Tobago.

DEPARTMENT OF DEFENSE

Melvyn R. Paisley, of Washington, to be an Assistant Secretary of the Navy.

U.S. ARMY

Lt. Gen. Richard Hulbert Groves, to be Lieutenant general.

CALIFORNIA DEBRIS COMMISSION

Brig. Gen. Homer Johnstone, Jr., Corps of Engineers, Col. Paul Bazilwich, Jr., Corps of Engineers, and Col. Paul Frederick Kavanaugh, Corps of Engineers, to be members of the California Debris Commission, under the provisions of section 1 of an act of Congress approved Mar. 1, 1893 (27 Stat. 507) (33 U.S.C. 661).

MISSISSIPPI RIVER COMMISSION

Maj. Gen. William Edgar Read, to be a member and president of the Mississippi River Commission.

Maj. Gen. Hugh Granville Robinson and Brig. Gen. Richard Samuel Kem, to be members of the Mississippi River Commission, under the provisions of section 2 of an act of Congress, approved June 28, 1879 (21 Stat. 37) (33 U.S.C. 642).

Rickey Dale James, of Missouri, to be a member of the Mississippi River Commission for a term of 9 years.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE AND NAVY

Air Force nominations beginning Ernest Z. Adelman, to be colonel, and ending Richard B. Yules, to be colonel, which nominations were received by the Senate and appeared in the Congressional Record on November 4, 1981.

Navy nominations beginning Hugh Highland, to be commander, and ending Craig Winters, to be lieutenant commander, which nominations were received by the Senate and appeared in the Congressional Record on November 4, 1981.

Navy nominations beginning Charles Ervin Aaker, to be commander, and ending Anne Marie Nelson, to be commander, which nominations were received by the Senate and appeared in the Congressional Record on November 9, 1981.

Navy nominations beginning Michael A. Harwell, to be lieutenant commander, and ending Ronald P. Howell, to be ensign, which nominations were received by the Senate and appeared in the Congressional Record on November 10, 1981.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominees were confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, is there an order for the Senate to convene tomorrow?

The PRESIDING OFFICER. There is an order for the Senate to convene at 11 o'clock.

Mr. BAKER. I thank the Chair.

ORDERS FOR TUESDAY

Mr. BAKER. Mr. President, after the Senate convenes at 11 o'clock and after the recognition of the two leaders under the standing order, the distinguished Senator from Kentucky, Mr. FORD, will be recognized on special order for not to exceed 15 minutes.

TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. President, I ask unanimous consent that, after the expiration of time for Senator FORD under the special order, there be a brief period for the transaction of routine morning business for not to exceed 20 minutes in which Senators may speak for not more than 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, after the expiration of the time for the transaction of routine morning business, it is hoped that the Senate can transact other business which may be available for action by unanimous consent. It is not expected, however, that there will be rollcall votes tomorrow.

RECOGNITION OF SENATOR DANFORTH

Mr. President, I ask unanimous consent that the distinguished Senator from Missouri (Mr. DANFORTH) be recognized on special order for not to exceed 15 minutes to follow after the Senator from Kentucky (Mr. FORD).

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. Mr. President, I know of no further business to be transacted by the Senate. I ask the distinguished minority leader if he has any other matter to address to the Senate.

Mr. ROBERT C. BYRD. Mr. President, I have nothing.

Mr. BAKER. Mr. President, I thank the distinguished minority leader.

Mr. President, I move, in accordance with the order previously entered, that the Senate now stand in recess until the hour of 11 o'clock tomorrow.

The motion was agreed to; and, at 5:52 p.m., the Senate recessed until Tuesday, November 24, 1981, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate November 23, 1981:

DEPARTMENT OF STATE

Franklin S. Forsberg, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Sweden.

THE JUDICIARY

Israel Leo Glasser, of New York, to be U.S. district judge for the eastern district of New York vice Jacob Mishler, retired.

DEPARTMENT OF JUSTICE

Joseph S. Cage, Jr., of Louisiana, to be U.S. attorney for the western district of Louisiana for the term of 4 years vice Joseph Ransdell Keene.

Gene S. Anderson, of Washington, to be U.S. attorney for the western district of Washington for the term of 4 years vice John C. Merkel, Jr., term expired.

David A. Faber, of West Virginia, to be U.S. attorney for the southern district of West Virginia for the term of 4 years vice Robert B. King, resigned.

James L. Meyers, of Louisiana, to be U.S. Marshall for the middle district of Louisiana for the term of 4 years vice Thomas A. Grace, Jr., retired.

William I. Berryhill, Jr., of North Carolina, to be U.S. Marshal for the eastern district of North Carolina for the term of 4 years vice Hugh Salter, term expired.

Wayne D. Beaman, of Virginia, to be U.S. Marshal for the western District of Virginia for the term of 4 years vice Paul J. Puckett, term expired.

MISSISSIPPI RIVER COMMISSION

Rear Adm. Herbert R. Lippold, Jr., National Oceanic and Atmospheric Administration, to be a Member of the Mississippi River Commission, vice Rear Adm. Allen L. Powell, retired.

IN THE AIR FORCE

The following-named officers for promotion as a Reserve of the Air Force, under the appropriate provisions of chapter 35 and 837, title 10, United States Code.

LINE OF THE AIR FORCE

Major to lieutenant colonel

Abbott, Thomas F., [redacted]

Maj. Richard L. Schmitt, [redacted].
Maj. Donald W. Shepperd, [redacted].
Maj. Donald M. Swayze, [redacted].
Maj. Paul A. Weaver, Jr., [redacted].
Maj. William S. Womble, [redacted].

LEGAL

Maj. Alan B. Johnson, [redacted].

CONFIRMATIONS

Executive nominations confirmed by the Senate November 23, 1981:

DEPARTMENT OF STATE

Edwin Gharst Corr, of Oklahoma, a career member of the Senior Foreign Service, class of Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Bolivia.

Melvin Herbert Evans, of the Virgin Islands, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Trinidad and Tobago.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

DEPARTMENT OF DEFENSE

Melvyn R. Paisley, of Washington, to be an Assistant Secretary of the Navy.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Richard Hulbert Groves, [redacted] (age 58), Army of the United States (major general, U.S. Army).

CALIFORNIA DEBRIS COMMISSION

Brig. Gen. Homer Johnstone, Jr., [redacted], Col. Paul Bazilwich, Jr., [redacted], and Col. Paul Frederick Kavanaugh, [redacted], all of the Corps of Engineers, to be members of the California Debris Commission, under the provisions of section I of an act of Congress approved 1 March 1893 (27 Stat. 507) (33 U.S.C. 661).

MISSISSIPPI RIVER COMMISSION

Maj. Gen. William Edgar Read, [redacted], U.S. Army, to be a member and President of the Mississippi River Commission; and Maj. Gen. Hugh Granville Robinson, [redacted], U.S. Army, and Brig. Gen. Richard Samuel Kem, [redacted], U.S. Army, to be members of the Mississippi River Commission, under the provisions of section 2 of an act of Congress, approved 28 June 1879 (21 Stat. 37) (33 U.S.C. 642).

Rickey Dale James, of Missouri, to be a member of the Mississippi River Commission for a term of 9 years.

IN THE AIR FORCE

Air Force nominations beginning Ernest Z. Adelman, to be colonel, and ending Richard B. Yules, to be colonel. (See Executive Journal proceedings of November 4, 1981, for complete list.)

IN THE NAVY

Navy nominations beginning Hugh Highland, to be commander, and ending Craig Winters, to be lieutenant commander. (See Executive Journal proceedings of November 4, 1981, for complete list.)

Navy nominations beginning Charles Ervin Aaker, to be commander, and ending Anne Marie Nelson, to be commander. (See Executive Journal proceedings of November 9, 1981, for complete list.)

Navy nominations beginning Michael A. Harwell, to be lieutenant commander, and ending Ronald P. Howell, to be ensign. (See Executive Journal proceedings of November 10, 1981, for complete list.)

WITHDRAWAL

Executive nomination withdrawn from the Senate November 23, 1981:

John L. Mevers, of Louisiana, to be U.S. marshal for the middle district of Louisiana for the term of 4 years, vice Thomas A. Grace, Jr., retired, which was sent to the Senate on November 4, 1981.

HOUSE OF REPRESENTATIVE—*Monday, November 23, 1981*

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 10 a.m., Monday, November 23, 1981.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O Lord, You have blessed us in every generation and Your spirit has sustained in good times and bad. We pray that Your providence will watch over our Nation and give strength and encouragement to all who seek to serve their neighbor. Bless all those who work in this assembly that they will see in their vocation the opportunity to do Your bidding by deeds of righteousness, justice, and mercy. Keep us and our families in Your good grace this day and during all the days to come. Amen.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled joint resolution earlier today:

H.J. Res. 357. Making further continuing appropriation for the fiscal year 1982, and for other purposes.

THE NATION'S BEST INTERESTS WOULD BE SERVED BY A VETO OVERRIDE

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, if I had one wish today, it would be that the Congress would have the courage to override the veto of the President of the United States.

The President is really playing the role of the riverboat gambler with the Congress and with the American people. It was clear to everyone, Republican and Democrat alike, that this weekend we had given the President what he wanted. David Stockman was there confirming the figures and saying we had acted in the correct way.

Well, I guess the President must know something about David Stockman that we do not. I guess we should not have given him the credibility again to listen to him, and hopefully we will not again.

Mr. Speaker, I hope that today we will act in the interests of the American people and our whole democratic process and override the President and not give in to this power play.

THE EFFECT OF THE WHITE HOUSE'S FOREIGN AID REQUESTS

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks, and to include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, I applaud the President of the United States for his performance during the press conference this morning during which he announced that he vetoed a bill that spends less money than he has requested.

Yesterday, I asked the chairman of the Appropriations Committee during the debate on the continuing resolution if the matter pending before this House was less than the President has requested. The answer was, yes—without one murmur of opposition from the other side of the aisle.

The fact remains that since 1943, the Congress has appropriated less money than the Presidents have requested for each and every year save one—1976.

Meanwhile, backstage, Mr. Stockman is recalculating the figures for the administration so that they will add up the President's way in order that the President can get another billion dollars for foreign aid.

CLEAR-CUT ORDERS, FAITH IN LEADERSHIP MUST AWAIT THE FUTURE

(Mr. MITCHELL of Maryland asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MITCHELL of Maryland. Mr. Speaker, let me remind my colleagues that soldiers in combat often display extraordinary ability. Sometimes they will go into a situation where they know 50 percent or more of their force will be wounded; some of them have gone into combat knowing that most of them would be killed. They go in under those conditions knowing, No. 1, that they had clear-cut orders, and, No. 2, that they had faith in the person commanding them.

We had something unusual that occurred the other day on this continuing resolution. There were some gallant Republican soldiers over on that side; there were some real Republican troopers who fought the good fight, who followed the order, and who had faith in their leadership, only to discover that their fight had been in vain.

So I just want to take 1 minute to salute those gallant Republican troopers and say to them, "Don't despair. You will get clear-cut orders in the future, and you will regain, I am certain, faith in those who lead you."

THE PRESIDENT'S VETO A COUP DE THEATRE

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, being President involves making hard and far-reaching decisions. For example, President Reagan yesterday had to decide whether it was better to leave for Thanksgiving at the ranch or to stage a public relations coup de theatre by vetoing the continuing resolution even though his people had told Senator BAKER it was OK. Obviously, he decided that by vetoing the resolution, he could have his turkey and eat it too.

Three aspects of this absurd and unnecessary situation need discussion:

First, our petulant President has caused a massive disruption in American society for the sake of a few headlines. Despite the fact that recently rehabilitated whistleblower David Stockman sat in Senator BAKER's office throughout the conference and signed off on the deal, President Reagan decided that PR is more important than prudence. The cynics who claimed that the President was intent on vetoing any bill, regardless of its content, were vindicated.

Second, the President is absolutely right that continuing resolutions are a terrible way to legislate. The House, however, has passed all of its appropriations bills, save one. The Republican-controlled Senate delayed, however, in the hopes that the President would tell them what he wanted. President Reagan never to this day

has told Congress what he wants in appropriations bills.

Third, it is utter misrepresentation to claim that the President vetoed the bill because it spent too much money. Indeed, he wanted to spend 2 percent more in defense and $1 billion more in foreign aid. To make these expenditures, he wanted us to cut deeper into domestic programs. So, the issue was not the amount of spending but rather where the spending was to go. President Reagan wanted the money to go to defense contractors and foreign dictators. Congress preferred to spend tax dollars on nutritional care for pregnant women, food to the hungry, and school lunches.

Presidential petulance, not legislative largess, killed the funding bill.

THE PRESIDENT'S VETO—A "GREAT ACTING JOB"

(Mr. MOFFETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOFFETT. Mr. Speaker, let me say to my colleagues that I think this is a very healthy commentary that is going on. I think it tends to put into perspective the great acting job of the President this morning. He is indeed a great actor, but what we are talking about here is not really cutting the budget.

What this crisis is all about right now is aid to Pakistan, as I think the gentlewoman from Colorado (Mrs. SCHROEDER) just indicated. This is about aid to Pakistan; it is about cutting school lunches and cutting poor pregnant woman off nutrition programs in order to give aid to a dictator in Pakistan.

Second, it is about getting David Stockman and Mr. Allen off the front pages.

Mr. Speaker, let me say this: "Mr. President, you are a great actor indeed, but this time it will not work."

VETO HIGHLIGHTS DESIRE FOR FOREIGN AID INCREASES AND MORE DOMESTIC PROGRAM CUTS

(Mr. MILLER of California asked and was given permission to address the House for 1 minute.)

Mr. MILLER of California. Mr. Speaker, let me say to the Members of the Congress that it is very clear what happened. For those of us who watched the conference committee work over the weekend, we saw that the Republican leadership in that room constantly trying to forge an agreement, and eventually that agreement was forged.

The problem they had was that throughout that conference the President wanted to add $2.5 billion for foreign aid, but the President did not want his name on that legislation. So what he wanted the conferees to do was to cut $2.5 billion out of domestic programs, out of job training programs, out of child health programs, out of nutrition programs, and out of education programs so that he could get $2.5 billion in military aid to Pakistan, to Sudan, and to other countries. But the conferees would not go along with that. Both Democrats and Republicans.

The foreign aid bill is ready to be reported off the floor of this House, but the Republicans will not support it because they do not want to be identified with it. The President did not want to be identified with it, so he asked the conferees to do his dirty work.

The conferees finally said, "Enough is enough. We can't cut $2.5 billion more out of poor people in this country, with unemployment going beyond 8 percent."

As a result of that, the Republican leadership in the Senate signed on the conference committee report and the Republican leadership in this House signed on the conference committee report, and yet 45 minutes into the debate on the floor of the House of Representatives the minority leader came to the floor, stammered and stuttered, and said, "Let me tell you, I just had a call from the President, and we need to veto this bill. We don't need to keep our Government running; we need to veto this bill."

The President ought to face up to whether he wants to go back on TV and tell the American people that what he really wants to do is sneak through $2.5 to give to foreign governments, at a time when, over the Thanksgiving holiday, we are losing programs for the American people.

PARLIAMENTARY INQUIRY

Mr. HARTNETT. Mr. Speaker, I have a point of order.

The SPEAKER. The gentleman will state it.

Mr. HARTNETT. Mr. Speaker, as one Member who was newly sent here by the poor people of South Carolina, I would like to inquire of the Chair, are we limited to 60 seconds, to 1 minute, or is that solely at the Speaker's discretion?

The SPEAKER. The Chair will inquire, what is the gentleman's point of order?

Mr. HARTNETT. My point of order is this, Mr. Speaker: Was he asking unanimous consent to speak for 1 minute?

The SPEAKER. The Chair will state that that is an inquiry, not a point of order.

Mr. HARTNETT. My point of order, Mr. Speaker, is that when he said he was asking permission to speak for 1 minute, he exceeded the time he got under unanimous consent.

The SPEAKER. Perhaps the Chair has been too lenient with the Members.

REPUBLICAN CAPITULATION TO ADMINISTRATION SEEN AS POLITICAL

(Mr. DOWNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOWNEY. Mr. Speaker, I do not blame the last Member for making the point of order. It was a painful speech; it just seemed a little longer.

Mr. Speaker, there are a number of problems. The first is that we have great theater at the expense of Federal workers and the American people, and at some point we are going to have to ask ourselves whether this form of governmental brinkmanship makes any sense for our country or for the people who are attempting to operate our Government.

Another problem that goes unmentioned is the way in which the Republican minority here and the Republican majority in the other body are moved around like marionettes by the administration.

For God's sake the House of Representatives, and the Senate that have capitulated its important congressional responsibilities and constitutional responsibilities to the President for no other purpose than political gain. It seems to me that Mr. Stockman, aside from his terminal candor, and Mr. Allen, for all his memories, deserve to be on the front page far more than this great theater which is only hurting our country, clouding the important issues of Government, and resolving nothing.

Mr. Speaker, I hope that the Republican Members of the House and the Senate can begin to stand up to their own lack of sincere leadership.

THEATER OF THE ABSURD

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, we see confusion, chaos, anarchy on the horizon. Where is the President coming from? Where is he taking the Nation? How does he think the rest of the world views the Reagan "theater of the absurd?"

Shutting down the Government of the United States, I suppose, is one way of eliminating those pesky life-giving domestic programs which Ronald Reagan so despises but to which the American people and this Congress seem to be committed.

A $37 billion cut in social programs obviously was not enough for the President. A $750 billion reverse Robin

Hood, robbing-from-the-poor-and-giving-to-the-rich, tax cut obviously was not enough for the President. Shutting down the Government clearly suits him much better.

When is the toga-fitting ceremony to take place? Will Congress be invited? Will the President allow Congress to continue to exist?

□ 1015

CONGRESSMAN PICKLE INTRODUCES LEGISLATION TO REQUIRE TWO-THIRDS VOTE ON CONTINUING RESOLUTION

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, today I am introducing a bill that would require a two-thirds affirmative vote before any continuing resolution could become effective, with an exception in case of certain national emergencies.

The underlying problem this week and in the last few Congresses is that we have come to rely on the passage of a continuing resolution to do our work for us, rather than to face up to the tough issues through our regular committee appropriations process. This continuing resolution is a bad practice, it is an abdication of legislative responsibility and it will literally destroy the committee system unless we put a stop to it. Requiring a two-thirds vote would simply mean it would be very difficult to use this regrettable stopgap measure except in extraordinary circumstances. Thus, the responsibility for Federal appropriations would return to the committee system where, philisophically, historically, and traditionally, it belongs.

The House has passed its appropriations bills, all but foreign assistance, and House Members can say rightly that the other body has failed to produce. I certainly have no criticism of my House Appropriations Committee, and particularly not in connection with this continuing resolution. The chairman of that committee, and the House conferees, have done a responsible job. The fact remains, however, that we are in this jam today because of an over-reliance on the continuing resolution. If we continue in this way, it will undermine the authority and the reputation of Congress.

Under present circumstances, the Members on both sides of the aisle are in an absolute quandary. Do we take the OMB figures using their economic assumptions, or do we take the Congressional Budget Office's, or do we take the House Budget Committee figures based on its economic assumptions? Or, do we simply play dead on the threat of a Presidential veto? Good and responsible Members have been torn with indecision because they cannot know who is right—though in this case, I believe our House Budget Committee has been closest to the mark.

Mr. Speaker, if we are to guarantee the integrity of our appropriations process, this is a step I believe we must take. I want Members to join me in this bill.

GAME OF BUDGETARY "CHICKEN"

(Mr. DICKS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DICKS. Mr. Speaker, I am deeply concerned about the game of budgetary chicken that is underway between the Congress and the administration. I am also concerned about the priorities that are being demonstrated by this administration.

Why is it that they want to spend $1.5 billion more than what is in the continuing resolution for foreign aid money to Sudan, Oman, Pakistan, and other foreign countries while they want to cut money what is in the budget to take care of the 8.5 million unemployed Americans that have been put on the streets by the high-interest-rate policy of this administration and the Federal Reserve Board.

This House has passed 12 out of 13 appropriation bills. The other body has not moved on the appropriation bills. I think it is time for the other body and the White House to get their act together.

Let us work together here in the House to reach our answer to this budgetary crisis.

CONGRESSMAN HOYER INTRODUCES LEGISLATION ON FEDERAL PAY CONTINUITY

(Mr. HOYER asked and was given permission to address to House for 1 minute and to revise and extend his remarks.)

Mr. HOYER. Mr. Speaker, I agree with much of what has been said today and associate myself with those remarks. I might also say that I agree to some degree with the remarks of the gentleman from Texas (Mr. PICKLE). I think this process is unfortunate.

But I will say further that I spent 2 days watching the distinguished chairman of the Appropriations Committee, Mr. WHITTEN, very patiently attempting to reach agreement with the conferees and the conferees of the other body going into the room of Mr. Baker and getting agreement, and presumably getting agreement of the President of the United States to move ahead as we had agreement.

Mr. Speaker, we are less than one-half percent away from agreement. For that the President of the United States has brought this Government to a close and 500,000 Federal workers are worried about whether they are going to get paid. Social Security Annuitants are worried about whether they are going to get their checks, irrespective of what the President has said.

I have introduced H.R. 4394, the Pay Continuity Act for Federal Workers that will not allow them to be held hostage either by this Congress or the President of the United States. I am going to ask for emergency hearings on that bill and I hope the Members of this House will join with me in support of that legislation.

CYNICAL MANEUVERING ON CONTINUING RESOLUTION

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, the country would probably not realize the cynical way in which the President decided at the last minute to change his mind and veto the continuing appropriations bill which nearly all the conferees signed, including all of the Republican conferees in the other body. The country also probably does not realize that the President seems to have at a late date and perhaps knowing he would veto the bill, manipulated the other body into voting for the bill so as to create an opportunity for a veto.

The sad truth of the matter is, I think, the President would probably have vetoed this bill even if there were zero dollars in it just to make a point. That is his prerogative.

I remember the remarks of the great late Senator Everett Dirksen who said "I am a man of principle, and my first principle is flexibility." While none of us is ideologically pure, the President has shown a great deal of flexibility on his provision for this bill during the past 3 days. But I think the Congress owes to the people of this country the duty to maintain its constitutional responsibilities. This is not a parliamentary system of government, the President is not the Prime Minister and we are not the English Parliament. We should act responsibly to preserve our system.

THE ADMINISTRATION'S WAR ON CRIME AND BUDGET CUTS

(Mr. EDWARDS of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDWARDS of California. Mr. Speaker, the President's announcement several weeks ago of the administration's war on crime is less than a skirmish. He has announced that he will cut back the FBI from 6 to 12 per-

cent, the Drug Enforcement Assistance Administration more than 12 percent, at a time when drugs are rampant in our country. He has removed all assistance to local police departments when he canceled out the Law Enforcement Administration and the bill that has been reported by the House Judiciary Committee for Federal assistance on a modest basis to local law enforcement agencies is also lying without any action or recommendation from the House.

U.S. attorneys are being cut back. These are our Federal prosecutors, Mr. Speaker.

All of this indicates that the President is thinking more of a small amount of money than of the war on crime.

THE HOUSE CAN NO LONGER HAVE BUSINESS AS USUAL

(Mr. LOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOTT. Mr. Speaker, the President has vetoed the continuing resolution spending bill for next year. Well, good! He said he would do it if sufficient cuts were not made; Congress called his bluff and he fulfilled his commitment.

Now comes the majority leader, Mr. WRIGHT, and assures us that "the House will cooperate and act responsibly." Since when, Mr. Speaker. Then Mr. WRIGHT, the gentleman from Texas, turns right around and says the House will pass another resolution at high levels and extend it to February 20. That will not get it, Mr. Speaker! If that high bill for that long a period goes to the President, look for another veto.

What is involved here is Congress insisting on doing things as they always have—spending where and how they want to, paying no attention to the working taxpayer of America. The House still wants business as usual!

Not this time, Mr. Speaker! We have a President with the courage to back up his convictions this time. The taxpayers will win this battle!

THE BIG SPENDERS ARE SQUEALING

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, the President has vetoed the continuing resolution. The President was absolutely right, and to know that he was right all you have to do is listen to what some of his opponents are saying. For instance, at least one of his opponents made the statement that we were only $1 billion or so apart. Only $1 billion? Anyone who thinks that $1 billion represents only nickels and dimes has been around here for far too long.

The problem is that the Congress has been spending only billions for far too long and the President has finally said that enough is enough.

Even if the liberals around here cannot see the facts, the American people can see that big spending is what has gotten us into our present problems. The big spenders are squealing and it is about time.

BIG SPENDING DEMOCRATS ARE GETTING THE MESSAGE

(Mr. DUNN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DUNN. Mr. Speaker, yesterday in an unusual Sunday session it was, indeed, business as usual. On the first hand we had the Democrats voting against a reasonable pay increase for loyal Federal workers who did this Nation a service in a time of crisis: These being the same people who stood up and spoke for an even bigger pay increase for people who had broken the law, the union leaders of PATCO.

In the next business as usual we had Democrats saying "I cannot understand why the President would veto this." They could not understand it last summer, last November, and I do not doubt that they could not understand it yesterday. They will get the message from the taxpayers of this Nation. It was, indeed, business as usual.

CONTINUING RESOLUTION BAD POLICY

(Mr. PURSELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PURSELL. Mr. Speaker, I just wanted to make a very basic point that the principle of continuing resolutions is bad public policy. We have 13 appropriations bills. The House has not passed a foreign aid appropriations bill in 3 years. The Defense bill only passed last Wednesday.

It is a very bad process to use a continuing resolution policy. The House is at fault, the Senate is at fault, and we should not blame the President for this. The Carter administration used a continuing resolution, and we are doing the same thing.

We ought to get back to our prerogatives, our constitutional responsibilities, and have the full budget before the President by October 1. If he wants to veto a particular bill, let him exercise his prerogatives, but let us not blame the President for these responsibilities that we should exercise as Members of Congress.

Present law requires Congress to carry out our constitutional duties by having all appropriations bills on the President's desk by October 1.

FOREIGN AID IMPORTANT TO NATIONAL SECURITY

(Mr. EVANS of Delaware asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS of Delaware, Mr. Speaker, speaking of theatrics, we have had our share of that in this body today.

There has been much discussion of foreign aid and I believe that needs to be placed in proper perspective.

The national security interests of our country are important to every citizen of the United States of America. We have no higher priority than our national security. The stability of our allies, like Oman, in the critical Straits of Hormuz with vitally needed oil flowing through those straits is important to us. Other allies such as Sudan, Somalia, Kenya, all a part of the Horn of Africa, as well as nations like Turkey and Thailand, are critically important to America.

Yet, the continuing resolution vetoed by the President provided no security assistance for any of these countries and that does not serve the cause of peace well.

I am hopeful that these concerns will be addressed in the near future and it is disappointing to hear some of my colleagues downplaying the importance of foreign assistance. I recognize that foreign aid is unpopular politically. However, it should be our responsibility to convey its relevance to our own economic and security interests.

I do not advocate taking funds away from vitally needed programs for people. However, we can certainly find these funds by creatively ferreting out waste and abuse of tax dollars across a broad range of Federal expenditures.

PRESIDENTIAL VETO OF CONTINUING RESOLUTION CONSISTENT WITH HIS POLICIES

(Mr. MORRISON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MORRISON. Mr. Speaker, we have been greeted this morning by a great flurry of words and puffs of political smoke, attempts to cloud the failures of this Congress.

I urge you to listen to the real story, and I quote directly from the President's veto message that is before us this morning:

This resolution presented me with a difficult choice:

Either to sign a budget-busting appropriations bill that would finance the entire Government at levels well above my recommendations, and thus set back our efforts to

halt the excessive Government spending that has fueled inflation and high interest rates, and destroyed investments for new jobs;

Or, to hold the line on spending with a veto, but risk interruption of Government activities and services.

I have chosen the latter. The failure to provide a reasonable Resolution means that some citizens may be inconvenienced and that there is a possibility of some temporary hardship. Nevertheless, a far greater threat to all Americans is the sustained hardship they will suffer by continuing the past budget-busting policies of big spending and big deficits.

Mr. Speaker, this is not theater. This is consistent policy. I can understand the problem of some of my Democrat colleagues. They do not recognize consistency because they have not seen it for years.

□ 1030

PRESIDENTIAL VETO OF CONTINUING RESOLUTION

(Mr. BETHUNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BETHUNE. Mr. Speaker, I know it is painful to Members of Congress when this institution comes under attack. But let us face it, taxing and spending have doubled since 1976. The President was right to veto this, not only because it was $2 billion or so over the budget targets, but it is time that we face another truth here in the Congress, and that is that the Byzantine budget process is not working.

Deadlines are not met, procedures are not followed. The numbers can be massaged by people on both sides of the aisle, and important decisions are stuffed into last-minute resolutions. This is simply ruining the appropriation and budget process that we should be following in this institution. The President was also right when he said this is no way to run a railroad and it is even less of a way to run a Government.

IT IS TIME FOR CONGRESS TO PRODUCE AN HONEST BUDGET

(Mr. GREGG asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. GREGG. Mr. Speaker, I think it is time we looked at the honest figures of this continuing resolution. The fact is that this continuing resolution set irrelevant and inaccurate figures for items such as medicaid, which was $938 million below the President's budget, the guaranteed student loan program, which was $633 million below the President's budget. They have basically made a statement in the continuing resolution which involves nothing more than balancing it through mirrors. In fact, it is $6 billion over in other categories, in eight other categories, $6 billion over the President's budget.

This is a fraud in the classic tradition of congressional budgeting. It is the same type of fraud which has led us in the last 10 years to $600 billion of deficits. It is the type of fraud which is crushing the American people. It is the type of fraud which has created interest rates which are crushing the American private sector. It is time that this Congress faced up to it and produced an honest budget.

CONSERVATIVE DEMOCRAT-REPUBLICAN COALITION WILL CONTINUE FIGHT FOR CUTS IN GOVERNMENT SPENDING

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, the American public can learn a great deal by watching the debate over the President's veto. Liberal after liberal gets up to complain about a veto over a billion or $2 billion. They argue that $1 billion is trivial. These liberals suggest that the entire salary of 50,000 American families is not worth fighting over.

In 1982, those Americans who agree that $1 billion is trivial should vote for the liberals. However, the conservative Democrat-Republican coalition will continue to fight for real cuts in Government spending and a real break for working Americans.

A vote for a continuing resolution to February is a vote for another veto. The Speaker does not have the votes to override a veto and, therefore, the Constitution is clear: The responsible thing would be to offer a responsible resolution to December 20, which the President would sign. If this crisis continues, the burden will be clearly on the liberal leadership which is unwilling to work out the constitutional process clearly mandated.

BUDGET REDUCTIONS MUST BE CARRIED OUT WITH SENSITIVITY AND COMMONSENSE

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PARRIS. Mr. Speaker, I am a longtime supporter of President Reagan. I agree with the President's belief that we must cut taxes and reduce the cost of Government if we are going to restore America's economic vitality. However, I have repeatedly counseled the President and his advisers that these cuts and reductions must be carried out with sensitivity and with commonsense.

The situation we find ourselves in today is shocking.

On one hand we have a Congress that has taken month after month to debate and discuss the budget but is unable to reach agreement on reductions of even microscopic proportions, a Congress that is being misguided by a Democratic leadership which seems to get some kind of perverse pleasure out of sticking it to Federal employees by such actions as killing the twice-a-year cost-of-living adjustment and failing to remove the Federal pay cap, actions that were taken, I might add, by voice vote.

On the other hand we have an administration that seems to think there is political mileage in asking the Federal workers to assume an unfair share of the burden of economic recovery.

We seem to be engaged in some sort of macho showdown here, a game of congressional chicken. But this is not a game. It is a disaster and the innocent victims are the members of the Federal bureaucracy who continue even at this moment to toil at their assigned tasks despite the fact that payment for their services is in doubt.

I am willing to bite the bullet to bring about some fiscal sanity in this Nation. But I am not prepared to swallow the gun barrel.

I voted for the continuing resolution last night and I will vote to override this veto. I urge my colleagues to do likewise. Enough is enough.

Let us stop this nonsense. I will support additional budget cuts. But not now and not here. We must keep the Government operating, we must act like the responsible legislators we proclaim to be.

RESPONSIBLE FISCAL MANAGEMENT

(Mr. McCLORY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCLORY. Mr. Speaker, the dilemma in which we find ourselves today bespeaks two very serious flaws. One is the mismanagement of our responsibility as Members of the Congress to provide funds for the operation of the Federal Government. The fact that we have not been able to act finally on appropriation bills prevents the President from the exercise of his constitutional prerogative to approve or to veto these measures. This failure on our part indicates that we are not doing our job. There is an immediate and primary need to improve the management of the business of the House of Representatives and of the other body in order that we may fulfill that responsibility.

The other aspect of our dilemma is also clear, and that is that the continuing resolution process is used as a device to increase Federal spending or

to perpetuate excessive spending that has gone on in the past.

The President has not violated his constitutional oath or his responsibility by vetoing the continuing resolution. On the contrary, he has fulfilled his constitutional responsibility. And now we have the opportunity to either override or sustain the veto. I am confident that we are going to sustain the veto, and then we have the opportunity to act promptly and responsibly to improve our management of the fiscal business of the Government.

FOREIGN ASSISTANCE VERSUS DOMESTIC PROGRAMS

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, I did not intend to take the well today, but I think some of the remarks, including those of the gentleman who just left the well, whom I admire and respect, the gentleman from Illinois (Mr. MCCLORY), deserve some comment.

First of all, we have passed 12 out of the 13 appropriation bills, as the gentleman knows. It is the other body which has not concluded the work, some of the bills 3 or 4 months pending on the other side.

Second, the President did not exactly tell the whole story today when he suggested that reckless Federal spending and the lavish deficit spending was responsible for the veto.

Look at the names of the Republican Members of the House and the Senate on the conference report and judge for yourselves whether those are reckless Federal spenders.

The real argument here is that the President made a last-minute decision and after it was clear to almost everybody on both sides of the aisle in both Houses that the figures of the conference report agreed to were adequate and acceptable to the administration, or indeed the Republican Members and the majority of this body and the other body would not have signed the conference report and voted for it.

Third, the fact of the matter is that the President wants more spending by about $1,400,000,000 for foreign assistance. That is one of the principal objections to the conference report, that it does not spend enough money on what he regards as this area.

Now, Americans have to decide whether, in a time of recession, cutting domestic spending, important to sustain people in a time of recession and crisis, should be denied while we use that money to supply additional funds for overseas foreign aid. That is one of the issues that we are debating here.

I do not think, with respect to some of my colleagues on the other side of the aisle, that they do a service to the body or the country with some of the comments that obscure the facts rather than inform the American people.

REAGAN VETO UNFAIR TO AMERICAN PEOPLE

(Mr. VENTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VENTO. Mr. Speaker, clearly the Reagan veto is a very astute political move by the President, but it is absolutely unfair to the American people and needlessly disrupts the delivery of services and operations of the Government.

The Reagan action calls into question whether the President can accept reality. While carefully choosing his words again, President Reagan invoked emotion, but not reason. When the President lacks the facts and sensible arguments that reality dictate, he does not hesitate to use the bully pulpit or a touch of the dramatic, the irresponsible—a veto of the truly compromised measure worked out by both Democrats and Republicans, signed by both Democrat and Republican conferees, and voted for by both the House and the Senate.

The resolution was under Reagan's third budget proposal offered September 24, 1 week before the start of the fiscal year. But he could not accept it because the cuts for the Pentagon were greater and military assistance cuts were greater, and there was a little more spending for social programs.

I just want to warn my Republican colleagues and Democrats that we cannot solve our budget problems that we have created last summer by providing special interest tax cuts and the recession that exists now by cutting Federal Government spending. In all probability, many of those categories are going to go up.

What is wrong with the continuing resolution process is that this President is attempting to circumvent the appropriation process and insulate certain programs that he wants insulated from any cuts, and savage social programs that many people need.

The real question that we are asking is what does the President want? Maybe an insurance policy to be written retroactively on his economic policy, Reaganomics, with all its defects, high interest rates, deficit-financed special interest tax cuts, budget-breaking Pentagon spending, high unemployment and recession. A Republican economic insurance policy at the cost of breaking our commitments to the American people.

The fact is that you can not drive a $750 billion, 5-year special-interest tax program and a $1.6 trillion 5-year defense budget by starving or even completely eliminating social program budgets.

How about a little commonsense regarding this economic program—this is an insurance policy and those in real need can not afford this premium.

CABLE NEWS NETWORK COVERAGE OF HOUSE PROCEEDINGS

(Mr. HOLLAND asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOLLAND. Mr. Speaker, I hesitate to say this because it is probably going to provoke a lot of additional speeches, but the Cable News Network is carrying this live. They are not editorializing on it, but I think it is appropriate to note that immediately after Mr. LOTT, and Mr. WALKER, and Mr. JOHNSTON, they broke for a toilet tissue commercial.

CONGRESS SHOULD SUSTAIN PRESIDENTIAL VETO OF CONTINUING RESOLUTION

(Mr. ROUSSELOT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

The SPEAKER. Is the gentleman going to speak from the Democratic side?

Mr. ROUSSELOT. Well, I thought I would, because there are so many here today—for a change.

Mr. Speaker, in response to my colleague from South Carolina (Mr. HOLLAND) I say, "Paperworkers of America, arise."

Now, so many of my Democratic colleagues have said, "Where is the President coming from?" The same place he has always come from. He says reduce unnecessary Federal spending. You Democrats have been busting the budget, and he wants to take you out to the woodshed to talk about how to get this out-of-control Government back in order.

Now, this is what the facts are: He asked for a 12-percent reduction in potential increases in spending for fiscal year 1982. You, my Democratic colleagues were unwilling to do that, and you control the majority here in the House.

So he then said, "Well, I will compromise, 6 percent, or half of that," and you could not even do that.

So that is why you are being taken back to the woodshed.

It has already been stated, I agree with my colleagues: We have misused the continuing resolution over and over again. Your President—Mr. Carter—came here and asked for a continuing resolution last year, and you gave it to him whether he needed it or not. Now we have got to stop that irresponsible action, and we need to

sustain the President's veto. I will be interested to see whether all of my colleagues who have recently been calling for a balanced budget will now sustain that veto.

□ 1045

WE SHOULD NOT ACCEPT ONE-MAN RULE

(Mr. FOWLER asked and was given permission to address the House for 1 minute and revise and extend his remarks.)

Mr. FOWLER. Mr. Speaker, I do not believe that I will try to match the decibel level of my friend from California. Since he purported to give "facts," but let me present the true facts.

The President of the United States has asked for over $45 billion in cuts this year. We made almost $40 billion in those cuts that he asked for. The President of the United States asked this House, Democrats and Republicans, for a continuing resolution to pass, and every Republican conferee in the Senate and all but three in the House, meeting this weekend, voted for that bill, signed it, and then came back to this House with a sudden change of heart: overnight they became opposed.

We in the Congress should not be pointing fingers at ourselves. We should not be searching for scapegoats. What we ought to be doing in a nation of clerks, of mechanics, of teachers—all citizens—is to find a common ground through our elected representatives, a legitimate compromise for essential Government services that will enable our country to continue.

What we must reject as Democrats and Republicans is one-man rule, to allow any President, Democrat or Republican, to change the rules in the middle of the night, to pull the rug out from under any party, to say that he believes one thing and then go on television and say the next morning that he believes another.

Our country has always rejected any attempt at one-man rule. We cannot quit that battle now.

A BALANCED BUDGET

(Mr. COLLINS of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLLINS of Texas. Mr. Speaker, the President of the United States placed his priorities where they belong. President Reagan talked about the national security, the national defense. It is interesting to remember that the last time this Congress had a balanced budget was when we were spending 44 percent of that budget on national defense.

Today, this budget only accounts for 25 percent on national defense. So that is important.

But the big issue before us is that it is time we balanced the budget so that we could reduce the interest rates in America. High interest rates are losing jobs in business and jobs are what are essential. Congress cannot keep spending and spending and spending, and unless we cut spending we are going to continue to have high interest rates.

It is going to mean more savings and loans in trouble. It is going to mean more automobile dealers in trouble, steel companies having more trouble.

We have to cut interest rates to develop business and the best way we can do it is, through a balanced budget. President Reagan is recommending that Congress cut expenses, cut spending, and move toward balancing the budget.

WHITE HOUSE DID NOT CHANGE SIGNALS

(Mr. MYERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MYERS. Mr. Speaker, there have been a number of speakers, particularly from the other side of the aisle, who this morning have stated that the President changed signals. Suggesting somehow the message was sent down to the conferees that he would accept the labors that we had given over 2 days and 2 nights, trying to reach a compromise.

The distinguished majority whip and several others, none of whom were present in the conference, let alone were conferees, either have made the statement, and left the impression that we all signed the resolution, the continuing resolution, the conference report.

But I did not. Not that I had any wise advice from on high or from down the street, but several of us, the gentleman from Ohio (Mr. MILLER), the gentleman from Florida (Mr. YOUNG), did not sign the conference report for a number of reasons. There are some false figures in the conference report.

We made a conscientious, hard-working effort to reach a compromise. I am not here faulting the Members that did sign, nor our efforts, but I do not want the impression left that the White House changed any signals or said they would sign it because that would be wrong.

What the President has done is not really his fault, because the impression is being left here today that somehow President Reagan devised this continuing resolution process.

This morning at 6:30, the first appropriation bill went to the President for signature, which is 54 days after the end of the fiscal year. So do not blame President Reagan for the condition we are in. We have created it here in the Congress and we have had some help, but now the job is to pick up the bits and to go back to work and quit the rhetoric.

PUT THE BLAME WHERE IT BELONGS

(Mr. HEFNER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HEFNER. Mr. Speaker, I think it is a bit ridiculous for us to say that we have created all the problems right here when we have had 12 appropriations bills languishing in the Republican-controlled Senate.

Now, let me say this to the Members.

Also, when we talk about numbers and bad numbers, we have been dealing on the Budget Committee all year with ouija board—admittedly by Mr. Stockman himself, numbers that they did not understand, numbers that we questioned from the very start.

On the Budget Committee we are still dealing with them today.

As my colleague from California said, if this side of the aisle will vote to sustain the President, we can balance the budget.

When does $2 billion account for a $90 billion deficit we are faced with next year? Let us be honest. Let us be honest with the American people and put the blame where it belongs.

FURTHER CONTINUING APPROPRIATIONS, 1982—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-115)

The SPEAKER laid before the House the following veto message from the President of the United States:

To the House of Representatives:

I am returning to the Congress without my signature H.J. Res. 357, the Continuing Resolution providing appropriations for Fiscal Year 1982.

This Resolution presented me with a difficult choice:

—Either to sign a budget-busting appropriations bill that would finance the entire Government at levels well above my recommendations, and thus set back our efforts to halt the excessive Government spending that has fueled inflation and high interest rates, and destroyed investments for new jobs;

—Or, to hold the line on spending with a veto, but risk interruption of Government activities and services.

I have chosen the latter. The failure to provide a reasonable Resolution means that some citizens may be in-

convenienced and that there is a possibility of some temporary hardship. Nevertheless, a far greater threat to all Americans is the sustained hardship they will suffer by continuing the past budget-busting policies of big spending and big deficits.

When reports came to us in September that spending and the deficit for Fiscal Year 1982 were rising, we took action to stem the tide.

On September 24, I asked for a reduction of 12 percent in the appropriations for nearly all non-defense discretionary programs and a modest reduction in our planned program to strengthen the national defense. The 12 percent cut would have saved $8.5 billion—a significant contribution to reducing the deficit, but a modest sum in a budget which will total more than $700 billion.

By refusing to make even this small saving to protect the American people against overspending, the Congress has paved the way for higher interest rates and inflation, and a continued loss of investment, jobs and economic growth. At the same time, the Continuing Resolution fails to provide sufficient security assistance to allow America to meet its obligations.

The practice of loading the budget with unnecessary spending—and then waiting until after the eleventh hour to pass a Continuing Resolution on the assumption that it was safe from a Presidential veto—has gone on much too long. It is one of the principal reasons why the growth of Government spending is still not under control.

For much of the past fiscal year, most of the domestic budget was funded in this manner—through a Continuing Resolution, without regular appropriations bills subject to Presidential approval or disapproval. These so-called stop-gap resolutions are actually budget-busters that can last for an entire year and create the kind of economic mess we inherited last year.

A few days ago I offered to meet the Congress half-way. But the Continuing Resolution the Congress has now passed provides less than one quarter of the savings I requested. This represents neither fair compromise nor responsible budget policy.

In the hours ahead the Congress has the opportunity to reconsider, and I urgently request that it do so. In the meantime, we are making every effort to avoid unnecessary dislocations and personal hardship. I can give assurance that:

—Social Security and most other benefit checks will be paid on schedule.

—The national security will be protected.

—Government activities essential to the protection of life and property, such as the treatment of patients in veterans hospitals, air traffic control and the functioning of the Nation's banks, will also continue.

But in order to prevent unnecessary inconvenience and hardship as Thanksgiving approaches, I must urge the Congress to act promptly and responsibly.

RONALD REAGAN.

THE WHITE HOUSE, *November 23, 1981.*

The SPEAKER. The objections of the President will be spread at large upon the Journal and the message and the joint resolution will be printed as a House document.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I move that the message, together with the accompanying joint resolution, be referred to the Committee on Appropriations.

The SPEAKER. The gentleman from Mississippi (Mr. WHITTEN) is recognized for 1 hour.

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in making this motion return to the Committee on Appropriations, the action of the President vetoing this continuing resolution which he exercised within the rights and powers of the executive branch.

I listened to the statement made by the President at the news conference this morning and it is evident to me that the facts on which he relies come from the Office of Budget and Management. I believe the Budget Office has been erroneous insofar as we know, this committee has relied on its professional staff that daily deal with the facts and figures.

By making this motion to send the veto message to the Appropriations Committee, we will have a forum in which any further presentation might be made and where we can bring together all the information on both sides.

Now, with regard to other matters, let me point out, as I have tried to in the last few days, we have a Government of three branches—the President has his obligations, he has his authorities and he has exercised them. I have no complaint about that. I do believe however that perhaps he maybe relying on erroneous information.

But by the same token, as I have tried to point out through the 2 days and nights of conferences, that while we could go along with the President in his request for the proposed cuts that we thought we had a deal. On the Senate side, presumably, that was reflected by the amendment of the Senator from Tennessee, the majority leader. They set out to have a 4-percent cut on some items and eliminate any cuts on others.

I set out to sell my House colleagues on the proposition to let us agree with his total dollar savings but let us try to reach it while reserving to the Congress our responsibility of the how, where, and when these cuts should be specified.

The proposal to us was to leave within the Office of Budget and Management the authority to cut particular things out or to exercise their judgment about what to keep and what not to keep.

The recommendation and in fact the amendment of the majority leader in the Senate, Senator BAKER, had the effect of exempting foreign aid. The Senate resolution provided for a $2 billion increase in foreign aid, and for the first time on history the bill was originated by the Senate and not the House, which is contrary to the Constitution.

So what was considered there was not holding foreign aid at the present level but actually was an increase of $2 billion in a bill that was cutting domestic programs.

So we set out to come up with the targeted figures, but to reserve to the Congress and to the House particularly, the right to meet our responsibilities and obligations, which is to determine where the funding should go and how they should be handled. We thought we reached such an agreement from our friends on the other side—and I do not know of any man in Congress for whom I have a higher regard than the gentleman from Indiana, Mr. JOHN MYERS, he is right about the facts as to whether everybody signed it.

But there was not a single objection made that I know.

Let us go back to this continuing resolution proposition.

As my colleagues know, I succeeded Mr. Mahon a little over 2 years ago.

Last year, we passed 12 of the 13 appropriations bills and the Senate had not taken up a single one.

I called the then leader of the Senate and said, "We are bogging down here. We have sent you these appropriations bills * * *"—this was last year, not the current year—"and you tell me you just cannot get to them."

I looked into the rules and found there was nothing to prohibit us putting all those bills in one package and sending them back over to the Senate in an omnibus bill. So at my suggestion our committee put them in a single package and sent them to the Senate and I called the majority leader and said, "sign our resolution."

□ 1100

We did that to bail out a bad situation where the House was not at fault in the least; this is not a new approach because of a change in the administration, we did it last year. This year again we find ourselves faced with the same situation. This continuing resolution was made necessary by reason of the fact that they still had not acted on the other side.

Now, I do not want to leave any impression that this situation is the fault of the Senate Appropriations Committee or the chairman, who has been very easy to work with and frankly speaking has been just as interested in bringing things to a conclusion over there.

So the continuing resolution has been made necessary by the fact that we could not get the appropriation through.

Let me say one other thing. Keep in mind that whatever the time or the date is in this resolution, any time that any bill is passed making appropriations and enacted into law, it comes out from under this resolution. This is a holding action. This means that if the President should veto every bill that goes to him, the Government would not quit, as we are doing today. We need the resolution, whether he vetoes those future bills or whether he does not, we need to have the Government operating.

So any condemnation of this procedure is a mistake, in my opinion, because it was made necessary because the other side did not perform in connection with a process.

Let me repeat again. Any time that a bill is enacted into law, out it comes. If the President wishes to veto it in carrying out his responsibility, at least the Government will not close down while we deal with his veto.

I think it is sound. I think it should be done this way.

Let me tell you what is in this resolution.

Mr. MICHEL. Mr. Speaker, would the chairman yield to me?

Mr. WHITTEN. I yield to the gentleman from Illinois.

Mr. MICHEL. I do so because the chairman made mention not only of the conditions that prevail this year, but also prevailed last year, so there is plenty of blame to go around.

I would suggest and have made the point any number of times here that before we get into the budget cycle and the appropriation cycle for the coming year that rather than the traditional practice of having every bill originate here in the House of Representatives, then leaving the other body at the latter part of the year in which really to get their bills in order, we ought to have a well-formulated plan of half the measures originating in the House, half in the other body, which could be evenly divided. Then you would have the kind of situation where in June you have got both bills originating in both the Senate and the House at the same time. Otherwise, I think we put them to a disadvantage by the length of time we give them or the shortness of time as distinguished from what we have in this body for deliberations on appropriation bills.

Mr. WHITTEN. I appreciate the gentleman's suggestion, but I for one, do not want to give a flat answer to a very important question. But I say that the House of Representatives is the people's branch. You cannot appoint one Member to succeed another one. The people have to vote and speak by sending us here. They can change every 2 years who is in the House. There is a reason for that.

This being the people's branch, I would not want to surrender to the 6-year term on the other side at least half the responsibility.

The gentleman realizes that what he suggests goes contrary to all history and all precedent. I do not want to surrender any more. If we give them half the bills, this may not change the scheduling problem because they still will not go ahead until they need to.

Mr. MICHEL. The condition the gentleman has referred to has to do with tax revenue raising measures and I am not about not to follow the Constitution on that score.

At one time we did have appropriations and ways and means all considered by the same committee. They determined in prior years to divide that responsibility and the only constitutional requirement is on the revenue side, not necessarily on the appropriation side.

Mr. WHITTEN. Well, may I say, it says money bills. Money bills might be taxes and they might be appropriations; but historically the opinions have supported the position that money bills originate in the House in the Committee on Appropriations.

Mr. ADDABBO. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to my colleague, the gentleman from New York.

Mr. ADDABBO. What confuses me, Mr. Speaker and my chairman, is that I sat along with the chairman and the other conferees over there on the Senate side for 2 days. Friday night we ended up everything agreed to, the subcommittees meeting in order, everything was agreed to except foreign aid and HHS.

We then sat through Saturday. Again, the conferees meeting separately and all subcommittees agreed.

Again, midnight Saturday night, HHS and Foreign Affairs, the only two that were in disagreement.

We were told that you have to cut HHS. We need more money in Foreign Affairs. They then came back to us and said, "We will have a plan for you. We will have our program."

We adjourned. It was supposed to be for 10 minutes. We adjourned for 2 hours. We met.

We then had this chart prepared showing all the various totals, what the House had appropriated, what the Senate had appropriated and what our final agreement was.

We returned to the Senate. We said, "This is our proposition. This is where we are. Where are your figures?"

"Give us your figures," the Senate told us, "and let us study them."

We said, "Fine. Study our figures, but where are yours?"

They had none. So finally when the chairman, the gentleman from Mississippi (Mr. WHITTEN) said, "Look, it appears that you have no figures. Let us just extend the date."

Then suddenly they said, "Well, let us look at your figures," and they looked at the figures, and finally in looking at your figures found that we were below them.

Now, am I correct, Mr. Chairman, when I state that the House totals, the bills we had passed, the bills totaled over $430 billion?

Mr. WHITTEN. That is correct.

Mr. ADDABBO. The Senate was $428 billion.

Mr. WHITTEN. That is correct

Mr. ADDABBO. When we finally met at 12 o'clock Friday night, at 12 o'clock Saturday night, after all the subcommittees had met, we came to an agreement of $427 billion more or less, $427 billion, $3 billion under the House figure.

The Senate figure was $428 billion. We were at $427 billion, $600 million under the Senate figure, and the President, from what I understood, when that $428 billion was passed over in the Senate said that that was acceptable to him.

We came to an agreement at 1:30 Sunday morning at $427 billion, $600 million under the Senate, which is also $900 million under the budget.

I do not understand, Mr. Speaker, where this $2 billion comes from. We have presented to the President and to the country a bill which is $600 million below the Senate, below the bill that the President sent to the Senate and he was ready to sign; so when he comes to us and says that we are budget busting, I do not know where they get the figures, unless it is a game that Mr. Stockman is playing around with on his computers.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Indiana.

Mr. MYERS. I only ask one question. Did I understand the gentleman from New York to say that at 1:30 yesterday morning that the President had accepted what we were agreeing to?

Mr. ADDABBO. No, no. I said that I understood the President had stated that when the Senate passed the $428 billion bill, that that would be acceptable to him.

Mr. MYERS. I would like to know if anyone on the conference had any message from the President that he would accept. To my knowledge, the President did not ever say this.

Mr. ALEXANDER. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Chairman, I appreciate very much the chairman trying to clear up the confusion.

I think that we should hang a sign over the White House which says, "If anyone can concentrate under these conditions, they just do not understand the situation."

Now, I have been hearing all these remarks by the President, by the Director of OMB, which is accusing the Congress of budget busting. I heard the President say this morning, and I listened to the veto message a minute ago, that the reason that he is veoting this bill is because of overspending by the Congress, which is causing higher interest rates and inflation.

Now, Mr. Chairman, I would like to ask a question. Based upon the data that we have available to us from the House Appropriations Committee, is it true or untrue that the President's budget requested about $428.7 billion; is that true or untrue?

Mr. WHITTEN. That is a fact, so far as I understand it.

Mr. ALEXANDER. All right, Mr. Chairman, is it true or untrue that the House-Senate conferees attempted to appropriate $427.8 billion is that true or untrue?

Mr. WHITTEN. That is correct.

Mr. ALEXANDER. Is it true or untrue that the House and the Senate conference is about $800 million less than the President has requested in his budget?

Mr. WHITTEN. That is approximately correct.

Mr. ALEXANDER. Well, I would like to congratulate the President for vetoing a bill which attempts to appropriate less money than he has requested.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Illinois.

Mr. MICHEL. With that Alfonse-Gaston Act here, let me propose a question then.

Mr. WHITTEN. I do not know that I like the description, but go ahead and ask the question.

Mr. MICHEL. Would the chairman guarantee us that there would be no supplemental request for those entitlement programs between now and the end of the fiscal year?

Mr. WHITTEN. I did not understand the question.

Mr. MICHEL. Would the chairman guarantee us that there would be no need for supplementals for just the entitlement programs for the balance of the fiscal year?

Mr. WHITTEN. The gentleman from Illinois knows that the gentleman from Mississippi is not strong on guaranteeing what may happen in the future. Anybody who estimates what outlays will be can take a guess as to future needs.

Mr. MICHEL. If my friend will yield for just one further moment, the gentleman from Arkansas might very well cite the figures he does, but that does not take into account the fact that the figures are below what are required to fulfill the entitlements.

Now, unless you are willing to also tackle the entitlement programs to reduce them, your appropriation levels are never going to coincide with those entitlement figures at the end of the fiscal year.

In medicaid alone, it was $900 million short.

Now, the gentleman from Arkansas, if he wants to shortchange his medicaid patients for that amount, I will wait when that supplemental appropriation comes up to see where we are then.

Mr. WHITTEN. I would like to continue with my own remarks. At the moment I do not yield to anyone.

Let me finish my statement.

Mr. Speaker, it is evident that we do not have the votes to override the President's veto.

Mr. Speaker, it should be evident that as a coequal branch, the President does not have any authority to make us do anything.

It being true that we cannot run his business and he cannot run ours, neither can the Supreme Court do anything unless the executive branch carries out its orders for it.

We have three branches of the Government and I, for one, think it is absolutely essential that we work together, one, two, three. If any one of them does not cooperate with the other two, we break down, any one of the three.

Now, the President has acted within his rights. We have acted within our rights by reviewing his request moneywise as the representatives in Congress.

The recommendations from downtown were to cut 4 percent on some things and leave others completely out. The recommendations downtown were for a $2 billion increase in foreign aid. Not only did they not cut, but there was an increase of $2 billion.

Now, presumably the cuts that we made would be helpful to come up to the figure and add the $2 billion for foreign aid.

Now, the point I make is that my motion here is to refer this back to the Committee on Appropriations where we will be open to presentations by the executive branch or by anyone else to get any facts.

I yield to my colleague, with whom I have enjoyed working all year, the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I want to thank the gentleman from Mississippi, my chairman, for yielding, and tell the gentleman how much I have enjoyed working with him and, of course, we are in accord; but the task before the House right now is either to refer this to the committee or to vote on sustaining or overriding the veto.

I do not see what good it is going to do to keep blaming somebody else, either our side blaming your side, your side blaming our side.

I think the task before us now is to get this thing over with. If you are going to refer it to the committee, let us refer it to the committee. Let us bring back a continuing resolution. Let us get down to the business of the day.

□ 1115

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Florida. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from New York.

Mr. STRATTON. I thank the chairman for yielding to me.

Mr. Speaker, I find it impossible to understand what the minority leader (Mr. MICHEL) has just been saying. He said this same thing yesterday on the floor when everybody else was talking about how we were $600 million under the Senate bill, as the gentleman from New York (Mr. ADDABBO) has already said. On that occasion the gentleman from Illinois (Mr. MICHEL), stood up and said, "Can you guarantee that there will not be any supplemental requests on these entitlement programs?" Well, now——

Mr. WHITTEN. May I interrupt?

Mr. STRATTON. Apparently the gentleman from Illinois (Mr. MICHEL), is saying that the conferees actually cut the budget too far in the figures that they came in with, because he is complaining that there will not be enough in there to cover the various operations. Now, he simply cannot have it both ways. The President says we have put $2 billion too much into the continuing resolution, and that is why he vetoed it. But the distinguished minority leader says we do not have enough money in the resolution. Why do they not get their act together?

Mr. WHITTEN. May I yield to the gentleman from Florida?

The SPEAKER. The gentleman from Mississippi has the floor.

Mr. WHITTEN. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. I thank the chairman for yielding.

Mr. Speaker, I just wanted to ask if the chairman intends to delegate any time to this side of the aisle so that we can have an organized debate, rather than jumping up and down shouting at each other to yield.

Mr. WHITTEN. I have no objection to recognizing anybody. I do have control of the time. If the gentleman from Massachusetts, my counterpart on that side, asks for time, I will certainly give thought to giving it.

May I say I am not trying to restrict anybody. Anybody can talk about what they want to. I am trying to carry out my assignment on the ground that the three branches of Government must work together. You have not heard me criticize anyone.

Mr. YOUNG of Florida. May I inquire as to how much time is left in the debate, and if you would be willing to delegate some of that time to this side?

Mr. WHITTEN. If somebody wants to speak, I will yield to them.

Mr. YOUNG of Florida. I ask the gentleman to yield.

Mr. WHITTEN. I have yielded to you.

Mr. YOUNG of Florida. I thank the gentleman very much.

Mr. Speaker, I would like to say, like the gentleman from Mississippi and the rest of the conferees, I spent those long nights and days waiting for things to happen.

Mr. WHITTEN. And stayed in good humor all the time.

Mr. YOUNG of Florida. I would also like to say we are all living through very high drama today. We are hearing now about closing down the Government of the United States. This is a serious situation. Rather than close down the Government, we should solve the immediate problem and then close down the Congress for a couple of weeks while we get our act together on how we are going to handle appropriations in the future.

Mr. Speaker, the gentleman and I have discussed this many times and I think we agree. We have gotten our budgetary and appropriations processes to such a state of confusion that we really find it nearly impossible to appropriate and get it down on time. We had to change the date of our fiscal year by extending it an additional 3 months, and we still cannot meet the deadlines.

As I said to the chairman of the Appropriations Committee, it is not our fault. The gentleman from Mississippi and the gentleman from Massachusetts (Mr. CONTE), have led our Appropriations Committee in a fine fashion, and we have basically done our job. It is the people at the other end of the Hall, and I do not care which political party is in control but down there they have not done their job.

We ought to be sending to the President appropriations bills, bills that we have discussed and debated and amended and then enacted, and sent to the President. We ought not to be trying to put everything under the umbrella of a continuing resolution.

I thank my chairman for yielding.

Mr. WHITTEN. May I say that we have been drafted into handling these matters in a continuing resolution. It is not the best way to run the Government. But right now it is the only way. This problem did not start this year. So I do say that we in the House have met our responsibilities in this regard. We did have a terrible time this year, with about five budgets, and possibly receiving new batches of requests. The dates figure into what we were able to do this year.

But I want to say the gentleman has just made a real good argument as to why we cannot solve this thing by giving the other side more authority, by having six bills over there. We might never see them.

Mr. WATKINS. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Oklahoma.

Mr. WATKINS. Mr. Speaker, I would say to the chairman, I think with all respect to the President and to some of the discussion, we should all grant the fact that the President was not over there about 2 o'clock Sunday morning in the wee hours. I am quite sure he was home asleep.

But let me say this: Dave Stockman was there, and he had been signing off on the agreements over there in that conference. Now the question is: Is Dave Stockman the spokesman or is he not the spokesman for this administration? That is the question.

Now, Mr. Chairman, I would like to take it one step further.

Mr. WHITTEN. I was asked to guarantee a while ago. I was flattered my guarantee would mean anything. I am not in a position to answer the gentleman's question.

Mr. WATKINS. Mr. Speaker, I think the gentleman from Florida (Mr. YOUNG), made a point we need to take into consideration, and that is the appropriations bill. I hope the Speaker and I hope the chairman will consider. I think we should give due consideration to just adjourning this body, because the House has done its job. We sent the appropriations bills to the Senate, all 12 of them. Only one, the foreign aid, is remaining. They have been over there for 3 months, many of them. They are ready to act. We can save the Government $3 billion if they will act on the appropriations bills that we have sent over to the Senate. So it would be a very workable solution if we could adjourn, consider adjourning, and get the bills passed out of the Senate, and down to the White House for signature.

Mr. WHITTEN. We cannot afford to let the Government fall down. We cannot afford to.

Mr. HEFNER. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from North Carolina.

Mr. HEFNER. I thank the chairman for yielding to me.

Mr. Speaker, I would like to make some observations.

I agree with the gentleman from Massachusetts (Mr. CONTE). From the very first start of this year—this is my first year on the budget—we have had confrontation. We have tried to work in a bipartisan way. The very first day the Budget Committee met we could not agree on assumptions because we had assumptions we believed and have been proven to be false, which has caused a lot of problems to this particular point. The Budget Committee debated right here on this floor, and we lost, and people that debated where the cuts should come and the committee should do their work, said, this administration, "We are not telling you the line items where to make these cuts; we are delegating that to the committees to make the appropriate cuts."

The committees went to work and made their recommendations, made their cuts. We came in here with a reconciliation. We got it at night, we passed that, delegated where the cuts were to be made. We have not dealt with the committee system in this body this year.

Now, the gentleman mentioned, "Can you guarantee us that on entitlements we will not come in for a supplemental?" If Members want to carry that argument a bit further, I sit on the Defense Subcommittee, we cannot guarantee that we will not be in with a joint defense budget supplemental. I support a strong defense, but let me tell you this: Over the next 3 years the Department of Defense has predicated their budget on a total cumulative inflation rate of 17 percent—over the next 3 years. And the way that we are embarking on the B-1, the Stealth, and the MX, God only knows how much this is going to cost. We cannot guarantee that we will not be in here for a massive supplemental in the military.

So when we are talking about guarantees, it is absolutely ridiculous to say what is going to happen out in the future. We do not know what the deficit is going to be next year. We may have to come in here for a lot of adjustments. We are going to have to use some realistic numbers.

One other point, Mr. Chairman. Now, the information that I have on this whole disarray we are in now, if the continuing resolution called for a billion and half dollars more in foreign aid, the President would sign it.

Am I correct, Mr. Chairman?

Mr. WHITTEN. Of course I cannot speak for the President I would say to my good friend.

Mr. HEFNER. Is that the understanding the gentleman from Mississippi had?

Mr. WHITTEN. I cannot answer that question. I do not believe anybody can answer the gentleman except the President.

May I yield to my colleague, the gentleman from Illinois (Mr. MICHEL), the minority leader?

Mr. MICHEL. Mr. Speaker, might I simply suggest we declare a truce for the moment? It is quite obvious from the gentleman's motion that it is intended to avoid a vote on either sustaining or overriding the President's veto. We know where the votes are.

Mr. WHITTEN. May I say to my colleague, it is to postpone any action like that so we will have a chance to pull the two branches together.

Mr. MICHEL. The longer we delay, the longer we take to get something over to the other body, the longer the final resolution. I am suggesting let us declare a momentary truce on the rhetoric. Let us refer it to committee. We are not going to force a rollcall on that. I think it is preordained what the results are. And then come up with the gentleman's resolution, or the majority leader's, and let us get on with it here.

Mr. WHITTEN. We have got to find a place for accommodation between the executive and the legislative branches, not just on this issue but on all issues. We are going to have to work together now and in the future. I am moving here to send this back to the committee. The effect may be as the gentleman from Illinois says. But my purpose is to give us a little time to clear the air and see if we can get together an accommodation from here on.

I think this is probably as good a chance as we will have.

The effect of the continuing resolution, if it is adopted is that if there is a veto, the Government will not come to a standstill. If the bill is ever agreed on, any bill, and signed, then it gets out from under the resolution automatically under the provisions of the resolutions.

So I have asked that we go back to the Appropriations Committee for such conferences and such information as might be available. As the gentleman says, it may have the effect of no immediate vote on this, but it easily can be brought back for consideration. But we should try to seek a means where we can work together, because certainly we cannot override the President's veto; certainly he cannot make us take affirmative action here. But that very fact means that we have got to find an accommodation.

Mr. Speaker, I move the previous question on the motion to refer.

The previous question was ordered.

The SPEAKER. The question is on the motion to refer.

The motion to refer was agreed to.

A motion to reconsider was laid on the table.

RECESS

The SPEAKER. Pursuant to the order of the House of November 19, 1981, the Chair declares a recess subject to the call of the Chair.

Accordingly (at 11 o'clock and 25 minutes a.m.), the House stood in recess, subject to the call of the Chair.

□ 1310

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 1 o'clock and 11 minutes p.m.

FURTHER CONTINUING APPROPRIATIONS, 1982

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent for the immediate consideration in the House of the joint resolution (H.J. Res. 368) making further continuing appropriations for the fiscal year 1982, and I ask that the previous question be considered as ordered thereon to final passage without intervening motion except for one motion to commit, and that the debate on the resolution be limited to 1 hour, the time to be equally divided and controlled by the gentleman from Massachusetts (Mr. CONTE) and myself.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. LOTT. Mr. Speaker, reserving the right to object, could I ask the distinguished chairman a couple of questions?

The gentleman is asking unanimous consent to bring up another continuing resolution. Did the gentleman specify in his unanimous consent request a date that he was asking for in this?

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Mississippi.

Mr. WHITTEN. I do not believe it is mentioned in my request but the resolution spells out the change which extends the old resolution from November 20, 1981, to February 3, 1982.

Mr. LOTT. So we would be proceeding under the old resolution?

Mr. WHITTEN. My resolution covers that by identifying it by number.

Mr. LOTT. We would be proceeding under the older existing continuing resolution level, not the one we voted on earlier this week or last night; is that correct?

Mr. WHITTEN. The gentleman is correct.

Mr. LOTT. And we will have 1 hour of debate equally divided; is that correct?

Mr. WHITTEN. That is correct. And the minority side would have the right under the request to offer one motion to commit.

Mr. LOTT. So one motion to recommit without instructions or with instructions would be in order?

Mr. WHITTEN. The gentleman is correct.

Mr. LOTT. I thank the distinguished chairman for that clarification.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 368

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That clauses (c) of sections 101 and 102 of the joint resolution of October 1, 1981 (Public Law 97-51), are hereby amended by striking out "November 20, 1981" and inserting in lieu thereof "February 3, 1982".

The SPEAKER. The gentleman from Mississippi (Mr. WHITTEN) is recognized for 30 minutes.

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, there is no need of reviewing what we have all been through the last few days and nights and no need of reviewing the position of the executive branch or the House or the Senate at this time. What I shall address myself to is what this present resolution does.

The rate of expenditures under this resolution is $400 billion a year. It is the same as the level which has been in place since October 1. The agreement in the continuing resolution just vetoed was $427 billion. So we will be saving money so far as spending money for such period as this exists because we will be operating at a level of $400 billion a year instead of $427 billion, approximately, which the other resolution contained.

My reasoning in setting this date, after consultation, is that we cannot act properly within a very limited period. The other resolution has been sent back to the Appropriations Committee where we will invite contributions from the executive or anybody else and be glad to consider those matters. I think we should do that. I think it is so important that we get along together, the executive and the legislative departments of Government.

Also may I say that if we did not do it in a few days, which we could not, we then have Christmas coming up and I know with all of the things we have had, we do not care to be tied up here through Christmas.

Then if we go beyond Christmas, how far should we go? The resolution which I introduced last night provides for February 25, I tried to take a number of matters into consideration. So I selected February 25.

But after being urged to shorten it, I put it ahead of that date to February 3. February 3 is a date which would give us a chance to know what the new budget recommendation will be. So I

think February 3 is as short as we reasonably can make it and still keep some order in our deliberations as we proceed with our work.

In order to be fair, and may I say they did not demand it, but in order to give the minority the same position that we take, we do provide in the unanimous consent request, which was accepted, that the minority have the right to make one motion, such as they may see fit to make. The two votes, on that and on final passage, would be all that would be required.

I repeat again, we have put the time date as short as we think we can afford to. We have not tried to make it drag out. But the longer it is, the more money we save because we are proceeding under that rate of $400 billion a year, whereas the resolution which had been sent back to our committee would be $427 billion a year.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am not going to take any time. Everything that has to be said has been said here in the last 3 or 4 days.

All I have to say is that we might as well vote on this. We will have a motion to recommit which I will exercise making the date December 15 rather than February 3. I think it is time to put the show on the road.

The only observation I think I ought to make here is that this resolution will be $27.3 billion below the resolution the President vetoed. That takes into account that Defense is spent at a lesser level of last year's level, and that accounts for $25 billion right there. So once the Defense bill is passed and signed into law, the savings over last night's bill will be $2.3 billion.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Does the gentleman agree that any new agreement that we have will be for a higher level of spending than is in this continuing resolution?

Mr. CONTE. Yes; the answer is "yes."

Mr. SMITH of Iowa. This continuing resolution is at the rate of about $400 billion a year. Any new proposal which replaces it at a later date will be at a higher rate from that?

Mr. CONTE. Could the gentleman give me an example of a new proposal?

Mr. SMITH of Iowa. Anything that we agree to on December 15 will be at a higher level than the $400 billion.

Mr. CONTE. The gentleman is absolutely right.

Mr. SMITH of Iowa. The only point is this, I think the gentleman will agree that the Whitten resolution provides for 50 additional days at a lower level of spending than we would have if we cut it off December 15?

Mr. CONTE. That is right. But we are told that we are going to get another veto if we go beyond the December 15 date, and I am willing to try anything here to see if we can get the Government greased, oiled up, and back to work.

□ 1320

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I thank the gentleman for yielding.

I took the well last week to try to get a March 31 date, and I was hoping to offer the amendment that was offered by our colleague, JOHN RHODES, on the Republican side, on the previous resolution, to March 31. There was sentiment last week by the minority leader and by the minority whip that the March 31 date in the last resolution would have been acceptable. I understand what is happening in this particular process.

I wonder if the gentleman could explain why the administration is so concerned about the December 15 deadline. The 12 appropriation bills are laying on the Senate's desk. They could move those at any time. It gives us just enough leeway, taking it to February 3, to make it a responsible length of time and not cloud us with another closing down of Government by Christmas.

Mr. CONTE. Let us get this straight: The President would have vetoed the bill with the March 31 date in it. There is no doubt about it. That is not an issue. If I had my way—and the conferees who sat there with me for 3 days know what my feelings are—my feeling is that we would go right to the end of the year, because you have got to be masochistic to go through another meeting with the Senate for another 3 days.

Why does the administration want the December date? I will tell you why: Because they do not want this thing to drag on after the first of the year. They want this Congress to handle this issue in regards to the money problem. That is what it is all about. And that is why they want the December 15 date.

Mr. EDGAR. If the gentleman will yield, I can understand the administration's interest in getting appropriation bills out. It is troubling to the gentleman from Pennsylvania that the administration has not shown the same aggressive attitude in getting the appropriations bills off of the desk in the Senate and to his desk for signature.

Mr. CONTE. Well, you know what the score is there. We all know what the score is there. Nobody is going to send those bills down because they are going to be vetoed.

Mr. WATKINS. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Oklahoma.

Mr. WATKINS. In all fairness to their side, talking about the time of trying to get the appropriations bills from the Senate, the President has mentioned it two or three times publicly that the Senate has not sent them down to him. If we could get a February 3 date, that would give the Senate time to get the Appropriations Committee bills to the President, and that is what the President has indicated he is concerned about. It is impossible on December 15 to get the appropriation bills out of the Senate and down to the President, all of them; but by February 13, the Senate could act, act in great haste, move forward and get those bills down there by February 3, and we would have it all behind us. It looks like this is what the President would want.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. YATES. Is it not particularly true, what the gentleman from Oklahoma says, in view of the fact that the Senate proposes to take up the Williams case for a period of a week and they will not be able to consider the appropriations matters during that period? So we are inevitably bound to look for another continuation on December 15.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from California.

Mr. ROUSSELOT. To answer my good colleague, the gentleman from Pennsylvania, several of these appropriation bills are in conference, and some have been completed.

Mr. CONTE. Right.

Mr. ROUSSELOT. Like agriculture.

Mr. CONTE. HUD.

Mr. ROUSSELOT. HUD.

Mr. CONTE. Transportation.

Mr. ROUSSELOT. So we are waiting for the leadership here to bring those up, and I am sure they will want to do it right away now.

Mr. PEYSER. Agriculture is not completed.

Mr. CONTE. The gentleman is talking about appropriations.

Mr. ROUSSELOT. The point is, the President wishes to encourage Congress to get the job done on appropriations. Even though we have acted on some, a lot of them are still in conference. We have got to get it done before the end of the year. Is that not the simple answer?

Mr. CONTE. That is right.

Mr. LONG of Maryland. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. The President and his advisers have been calling

various Members, asking them to vote more money for foreign aid, and this gives them the time in which to come before us with a real foreign aid bill and do it in the open, so that we can all get behind the foreign aid bill that the public has had a chance to know about, instead of doing it through the back door; is that not correct?

Mr. CONTE. No; it is not correct. The gentleman and I have had a running debate on this. He is the Chairman. Bring that bill out here, and let us act on it.

Mr. LONG of Maryland. The cheers are coming from those who intend to vote against it.

Mr. CONTE. Everybody knows the fact that we are waiting for Dr. LONG to give us that opportunity to debate the foreign aid bill. Let us bring it out here. For 3 years there has not been a bill. Three years. I want to help the gentleman. The gentleman knows that. Get that bill out here.

Mr. LONG of Maryland. I know that Otto Passman was the father of foreign aid and the gentleman from Massachusetts is the mother of foreign aid. But I just want to point out——

Mr. CONTE. I hate to claim I am the mother of anything around here. There are so many bastards walking around here. They need a mother to legitimatize them.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. MICHEL. I appreciate my colleague yielding.

Mr. Speaker and my colleagues, first, may I commend the gentleman from Massachusetts for bringing forth a resolution from which we can at least get off the dime here and get something started.

Now, having said that, I certainly intend to support the motion of the gentleman from Massachusetts (Mr. CONTE) to commit the resolution to the committee to change the date from February 3 to December 15.

Now, why do I favor that date as distinguished from the one proposed by my friend, the gentleman from Mississippi?

In the first place, when the President called me yesterday and said that he was compelled to look for the veto, he said, "I know you had planned to have this whole week off in the House for Thanksgiving and that there are Members who have made plans, and I understand that maybe you are not all that far away from an agreement. Could you request a time, say, 15 days?"

I said, "Well, that may be arguable because we have several Members, and maybe a significant number, who have made plans for trips of one kind or another during that week when it was announced that there would be very little business here, in the first week of December, and we may need some latitude to accommodate those particular Members."

I would emphasize again that I am not altogether sure we are all that far away from some kind of an agreement that could be arrived at. I recognize, as was the case this morning, passions get inflamed, tempers flare, and one thing and another. Much better, under this kind of situation, to even try to come to grips this afternoon—even though I would be willing to make that try—that there are those overriding feelings that Members have, it is just natural, it happens, so we take a week off for Thanksgiving, and a little bit more, and we have a little bit of wine and turkey, and all the rest, and back with the home folks, and come back here with a little fresher view. And those who have decided to make a trip abroad are also going to feel a little bit better. It will have a completely different flavor to it. December 15 is on a Tuesday, not a Friday. We had initially decided that we were going to get out of here on the 18th. And then the Speaker, in my colloquy a few days ago, made the determination we would like the 11th, if that is possible. And I say this is not all out of the ball park to set December 15, in the middle of the week. It also gives the gentleman from New York an opportunity to fulfill his earlier commitment with respect to a defense conference, and maybe that is still arguable. So it best appears to me that that gives us that opportunity to cool down a bit and then come at it again with a fresh approach. And why not February 3? Anything that gets over in that new year, if we are really going to be out of here until January 25 or 26, whatever the date is, we come into February, whether we do or do not have a week or so for the traditional Lincoln Day speeches—I am not sure—but consider this: We are coming into the new year then, again, after a delay, the normal January 3, and you are talking about the first concurrent resolution on the budget for 1983, you are considering a third concurrent budget resolution for 1982, the year that we are still in, we have got a supplemental that will be coming up for military pay and medicaid and student loans, and all of the rest which are not funded adequately in the appropriation bill, and then, on top of that, do you want to come to grips with a continuing resolution again?

□ 1330

Why there will be so many figures floating around here in budget authority and outlays this year and that year, and talk about confusion, that is what we will have.

Now we are going to have a lot better environment here within a couple of weeks if we only zero in on that one item, and it would be my druthers at that time that whatever we come to the conclusion on at that time, it is through the balance of the fiscal year. We have got that behind us. Then we do make that new approach in January when we do come back to deal with what has to be done at that time.

Mr. CONTE. I want to thank the minority leader, the gentleman from Illinois (Mr. MICHEL) for those remarks. Those were the exact same remarks that I made earlier, a couple of weeks ago, when I was looking for the September 30 date on the continuing resolution.

The gentleman is right. The platter is going to be so heavy around the middle of next year with rescissions deferrals, the 1983 bill, and supplementals we should not be acting on this date.

Mr. ADDABBO. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from New York.

Mr. ADDABBO. I thank the gentleman for yielding.

In answer to the statement of the gentleman from Illinois (Mr. MICHEL) the feel for a December 9 conference was based on the fact that the Senate would still have to pass the bill. We have already passed it and they have only passed the bill out of the full committee. It has not reached the floor. I understand it may reach the floor the week of November 30.

If we are bound by a December 15 date on this continuing resolution, there is no way I can go to conference on the defense bill because I will be locked into this conference for at least 1 week or 2 weeks. We spent one night to 12 o'clock and one night to 2 o'clock and we thought we had a conference. I would be a conferee on the continuing resolution. There would be no way I could go to a conference on a defense bill if the December 15 date lies.

If the February 3 date lies, I can go to conference on the 9th because I will be free to go to conference, spend a couple of days with Senator STEVENS and his conferees and work out a bill before the end of the sine die. The sine die agreement was in the old conference report which has been vetoed and that is not before us any more.

Mr. HIGHTOWER. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Texas.

Mr. HIGHTOWER. Did I understand the minority leader to say that when we come back, if we pass the December 15 date, that at that time then we would take up another continuing resolution for the balance of the fiscal year? Is that what the gentleman said a minute ago.

Mr. CONTE. I could answer that.

Mr. HIGHTOWER. I thought that was what the gentleman said.

Mr. CONTE. We have got to, certainly, because it expires on December 15.

Mr. HIGHTOWER. That is an assumption then that we are not going to get the business done between now and the 15th and we are just grinding into the process a determination that we are going to go through this same agony again.

Mr. MICHEL. If the gentleman will yield, no.

Taking the gentleman's logic, we are extending it to February 3. I am trying to shorten that process now.

Mr. HIGHTOWER. Could we not tell the Senate and the conferees, wherever the responsibility is, that they have got that much time to pass these appropriations bills, but we are going to say by doing it on December 15 that on that date we will take up one that will be for the balance of the year?

Mr. MICHEL. It may just have well been that the gentleman might find himself better off with a continuing resolution with set figures than having individual bills that exceed the President's budget, and on an individual basis would be vetoed, and he would have that kind of situation.

Mr. HIGHTOWER. I do not know. I do not think the country is going to find itself better off with a continuing resolution for the rest of the year. If we are going to take it in short bites, take it to December 15, then December 15 take another short bite, and get——

Mr. MICHEL. We will have to cross that bridge when we come to it. I think we are trying here to find some way of getting over the crisis that we got for this weekend and practically for this day.

Mr. HIGHTOWER. I want the gentleman to understand, I want us to get this done, and if a December 15 date will get a resolution signed by the President that will keep the Government in operation, fine, but I think we need to tell everybody that on December 15 we are going to either have all the bills passed that we possibly can or we are just going to go ahead and operate with a continuing resolution for the rest of the year.

Mr. WHITTEN. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, may I say to my colleagues that I disagree with the feeling many seem to have that there is little to this. I disagree greatly. Everything depends on what we do here. This is one of the major issues that has faced the country in a long time, with the President of one party and the majority of the House being of the other party. But that is not the important thing.

The important thing is whether we are going to have the executive branch call us and tell us what we have to do or else they will veto it, and our calling them back and saying, "Mr. President, we are not going to do so and so." We cannot have that condition exist here.

Now, there is no substantial difference, it is true, in the amount of money involved, because so help me in the resolution just vetoed we were about $600 billion below the Senate and we were below the request. We were about $3 billion below the House version of the resolution. So we have met every demand except we have not turned it over to the Office of Management and Budget to call the shots as to where it goes.

That is the issue, and today, if my colleagues will look in the Washington Post, and I quote only from that because he did not tell me that, Mr. BAKER, the majority leader in the Senate says that after everybody thought that we had agreed although nobody told me that we had. I quote the exact words that are quoted here:

> Majority Leader Howard H. Baker Jr. (R-Tenn.), had signed off on the conference report early yesterday morning, signaling that the White House would accept it. Baker was placed in the embarrassing position of urging members to buy something it turned out the president would not buy. Baker explained last night that the president had reached his contrary decision on the basis of morning-after Office of Management and Budget cost estimates that differed sharply from those that had been used in the conference.

We spent a whole day with our colleagues on the Senate side trying to get some firm figures.

We have recently read about how the Director of the Office of Management and Budget gets his figures to support his position. We have relied on the figures from the only professional group that I know of, which is the House group.

Now this is not to stir anything up. I want us to have sufficient time so we can deal with the executive branch, protect the rights and responsibilities of the Congress and the obligations of the Congress. That is, in the legislative field we must say how much and what for, instead of turning it over to anybody in the executive branch to call the shots on specific items.

So, it is a basic difference here. I respect the Presidency. I respect the President. But the figures that I heard this morning that he had given and the conclusions are based on figures in which I do not have complete confidence.

I think the other body and this body have to some extent lost confidence in the figures that might come from the Office of Management and Budget.

I think it is a basic hard line decision we face here. I will do my part to try to work with the executive branch. The issue involved here is whether we can do it in about 2 weeks. I do not think an adequate job can be done in this time. If we take the 2 weeks we will be here through Christmas. February 3 is reasonably soon. May I say again that under the present resolution and the one I would extend we are providing at a rate of $400 billion a year instead of $428 billion.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Indiana.

Mr. MYERS. The chairman and I generally agree and I have the highest respect for him and my remarks earlier today did not reflect that I did not support what the committee and the conference was trying to do.

What we are really talking about is a difference of 7 days, because we are going to leave here probably the 18th. If we had the 15th or the 3d, it is a difference of about 7 working days by Congress.

I would like to the 15th of December or the 7th or the 3d of February because we are not coming back until the 26th of January. If we are going back on the 3d of February, let us stay in December and get the work done, keep the pressure on the committees and the other body to send the bills down.

I do not think there is anything sacred about any of these dates, that one is more magic than the other. I believe what we are wanting to do is get the appropriations bills out. The earlier date will force the other body to send those bills down and get them signed into law.

It is going to be the same argument regardless of the time. There are only 7 working days difference.

Mr. WHITTEN. May I respond and say that we have not been able to get the bills out of the other body since we began to send them over in July, and it is pretty difficult to anticipate we will get them through in 2 weeks. I want everybody to know that I have not threatened anybody. It is my feeling that if we have until December 15, on December 15 we will be asking the Congress to continue until February 3 or some such date. Why create all this uncertainty and go through this ordeal every 2 weeks? That is my feeling. That is not a threat to anybody. It is my conclusion as to what we really may expect.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Speaker, it involves 50 days at a different spending level. The resolution by the gentleman from Mississippi provides for spending at a $400 billion level until February 3. That is 50 days beyond December 15. That assures us that we will spend $7 billion less than would have been in the bill that was approved by the President, by Senator BAKER, and the Senate.

□ 1340

Now, it is $7 billion less. That 50 days represents $3.977 billion. You are assured of saving $4 billion more under the resolution the gentleman from Mississippi has than you are under the one by the gentleman from Massachusetts (Mr. CONTE).

What that means is that you must know that you are not going to get a foreign aid bill by December 15, so what you want to do is get out from under this resolution faster so you can spend more for foreign aid for that fiscal year.

Mr. FITHIAN. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Indiana.

Mr. FITHIAN. I thank the gentleman for yielding. I have not taken part in this debate.

I want to commend the gentleman from Mississippi for his statesmanship on this.

There is only one point I wish to make. I think it must be clear that the December 15 date has yet a more hidden meaning than the gentleman from Illinois would either let us know or perhaps understand himself.

There is a certain media need in this administration, now that we are headed for an $80 to $100 billion deficit. I think that media need is to distract the country from what is at hand, the recession and $80 billion deficit.

It takes a veto about every 3 or 4 weeks with a sensational message to the American people to get that message there so that we can be distracted from the real problem. It is a media need.

Mr. WHITTEN. Mr Speaker, I yield to my colleague, the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. I thank my distinguished colleague, the gentleman from Mississippi, the chairman.

What worries me, though, the gentleman talks about the possibility if we go to the December 15 date we will be here to Christmas. I am worried about the crisis we are faced with right now and trying to find some way, without blaming anybody for how we got in this position, trying to find some way to work ourselves out.

If we do not go with the December 15 date, I am concerned that we are going to be here Thanksgiving Day.

I am worried right now about resolving the problem this week.

Mr. WHITTEN. My worry, may I say, is a little deeper than that of my colleague, the gentleman from Mississippi. My worry is that we are going to have a breakdown in the Government if we get at loggerheads between the executive branch and the legislative. I want to work it out. I think it will take a little time to do it.

Now, I want to say again, that is no threat. That is my worry about what will happen.

My worry, honestly, is that we may reach a stalemate between the executive and the legislative. There is no question that there are not the votes to override a veto, but there is no question that no President can tell the Congress what to do and make them do it.

We cannot take this kind of attitude. We have to reach some comity of understanding whether the two can work together. That is essential. I say that it will take a little longer than 2 weeks.

Mr. OBEY. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to my colleague, the gentleman from Wisconsin.

Mr. OBEY. I thank the gentleman.

I would like to repeat again, Mr. Speaker, what the gentleman from Iowa said. I have talked to at least 15 people on the floor in the last 10 minutes and I have been surprised at the point that escapes people, that if we follow the direction of the gentleman from Mississippi, if we follow the committee's resolution, we will be spending at a rate over an annual period which is $27 billion lower than the level we would be spending at in the resolution which was vetoed by the President this morning. That means that if we stick to the chairman's date, as the gentleman from Iowa has indicated, we will save at least $4 billion, because we call for a lower spending alternative, for a longer period of time, than any alternative around.

If you want to save money and guarantee the saving of money, you will stick with the committee, stick with the chairman's resolution.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Indiana.

Mr. MYERS. What the chairman, the gentleman from Iowa (Mr. SMITH) and what the gentleman from Wisconsin have said would be true if we did not pass anything else and in the short framework of the time of this continuing resolution, they are right; but I hope that we are going to pass an appropriation bill, or we are going to pass a vehicle later for the continuing resolution, which changes not just what is spent, but a stretchout of the time. We are going to spend about the same number of dollars at the end of the year. It is a matter of when you spend it; so do not be clouded up here that you are going to save money by passing it for the 3d of February versus December 15. It is just when you are going to spend the money.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me clarify one thing here.

This observation by my colleague, the gentleman from Iowa (Mr. SMITH) and the gentleman from Wisconsin (Mr. OBEY) that the continuing resolution we are extending will be $27.3 billion less than the one that was vetoed is exactly right, and $25 billion of that $27.3 billion is for defense. The minute that the defense bill is signed and agreed to in conference, which we hope will be sometime in December, or whenever it is, the $25 billion will drop off, so you will have $2.3 billion in savings.

Mr. STRATTON. Mr. Speaker, will the gentleman yield to me?

Mr. CONTE. Yes; I yield to my friend, the gentleman from New York.

Mr. STRATTON. Does that not mean then that since $25 of the $28 billion that the bill is under, that all the talk about saving that the gentleman from Wisconsin (Mr. OBEY) was referring to a moment ago is going to be coming out of the hide of the Defense Department.

Mr. CONTE. Yes, $25 billion.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. CONTE. Yes; I would be glad to yield.

Mr. SMITH of Iowa. That $2 billion, to be exact, $1.9 billion is foreign aid. Now, whenever the defense bill is passed, it will come out from under it, but the biggest difference the two resolutions will be whether you want to increase foreign aid sooner, rather than February 3.

Mr. CONTE. Well, we do not want to cloud the issue. It is a $27.3 billion saving for 12 months, $25 of that $27.3 billion is for defense.

Mr. Speaker, I yield 3 minutes to my good friend, the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Speaker, I will be brief, but I would like to take up again briefly the point I was discussing with the chairman just a moment ago.

If this December 15 date goes down, we are going to be here today, tomorrow, and maybe the rest of this week.

What is at stake is if we go with the February 3 date, and that should by some hook or crook get through the whole Congress, that would be vetoed and we would be back here again.

Now, the procedure we are working with here, this continuing resolution, without blaming anybody again, is certainly a bad one.

Let us do this thing on as short a basis as possible in the crisis we are dealing with, avoid the veto, give our appropriations conferees a chance to get back together now and before the 15th and try to come up with something that we can pass that the President will sign, that will take us to July 15.

The conferees are close now. They have done a lot of good work, but I am afraid if we just quit and let it go over

until February, it will be just like starting all over again.

So I would urge my colleagues, think about what is going to happen. We need to try to find a way to work ourselves out of this situation.

This resolution with the February 3 date is not going to do it. Let us try to come up with a short date that the President can sign and we can get our conferees back to the table.

I urge my colleagues to vote for the December 15 date.

Mr. WYLIE. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Ohio.

Mr. WYLIE. I thank the gentleman for yielding.

The President has vetoed the continuing appropriation bill, of course. I might say, this is within his prerogative. I support the President in his efforts to reduce Federal spending, and would have voted to sustain his veto. I was troubled by some of the 1-minute speeches this morning. I believe some of them were ill advised. We should put aside partisan differences and work together for the sake of the public good.

Now, I fear that we are in a posture of confrontation again. The President has indicated that he would sign a 15-day continuing appropriations bill.

I want to associate myself with the remarks of the gentleman from Mississippi (Mr. LOTT), and the gentleman from Massachusetts (Mr. CONTE). I think that we should pass the bill, send it down to the President, let him sign it, and during the 15 days we can go on about our business and the Government can go on with its business. We can work out departmental appropriations later on. Now, we need to do what is necessary to keep essential Government services going.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

Frankly, I am amazed that we are talking about a 2-week extension or even a February 3 extension with the situation as serious as it is today.

It seems to me we ought to be looking at what are specifically the problems with the White House in the conference report that came out and then deal directly with the objections in the conference report. Why postpone it until December 15? Why postpone it until February 3?

Mr. LOTT. Mr. Speaker, if I can reclaim my time, as the gentleman knows, we are working here with a lot of figures. There are a lot of people involved. They are working right now and have been working right up until the past few minutes trying to see what we can agree to, but we cannot do it at this moment with the attitude people have now. It is going to take a little time to get an agreement.

□ 1250

Mr. CONTE. I yield to my good friend, the gentleman from Ohio (Mr. MILLER), for a question.

Mr. MILLER of Ohio. I thank the gentleman for yielding.

Mr. Speaker, just to clear the record, I understood the chairman of the full committee read from the Washington Post newspaper that Senator BAKER signed off on the conference report; is that correct?

Mr. WHITTEN. I did not say he signed off.

Mr. MILLER of Ohio. That is what I understood.

Mr. WHITTEN. That is the gentleman's words. But I was quoting only from the article. The point of it is——

Mr. MILLER of Ohio. I wanted to make the point clear that Senator BAKER was not a conferee.

Mr. WHITTEN. May I say he was in the next room to the conferees.

Mr. CONTE. Senator BAKER was not on the conference.

Mr. WHITTEN. Mr. Speaker, I yield myself 2 minutes to clarify this.

The SPEAKER. The gentleman from Mississippi (Mr. WHITTEN) is recognized for 2 minutes.

Mr. WHITTEN. Mr. Speaker, I tried to avoid anything like that. I left the conference, as did my friend, the gentleman from Massachusetts (Mr. CONTE), the other night, and I would say all conferees left there with the feeling that the President would sign the resolution. Nobody told me such but I left there with the feeling that the resolution would be signed, since most of the Republican conferees signed it.

Be that as it may, the President, acting within his rights, vetoed the matter.

May I say I agree with my colleague, the gentleman from Mississippi, on the surface this is a rather minor problem. Underneath it is the basic problem of whether our system of government can work or not. I believe that is the basic question.

Without further adieu, I yield such time as he may require to the Speaker.

Mr. O'NEILL. Mr. Speaker, we all appreciate how serious these times are. There is no victory out there today for anybody, even though some people may think that there is.

The Government is technically stopped. People are sitting at their desks not doing any work, yet they are on a yearly salary. They are going to get paid for it, and it is wrong.

Now, let us get into the facts as to actually where we are.

Nobody likes a continuing resolution. I do not like a continuing resolution any worse or better than the President does. It has been the habit the last couple of years. For 3 years on foreign aid we have not been able to pass a piece of legislation. That is no secret. You had the authorization up here this year. What happened to it? What happened to the authorization?

I do not believe 100 people on that side of the aisle—even though the President wants it more than anyone else—would vote for the authorization. So let us put it where it is.

Mr. Haig called me and he said, "I desperately need the foreign aid in this bill." I think the figure was $1,600 million above the vetoed conference report level. He mentioned Turkey and other nations.

I said, "We would have brought this up, Mr. Secretary. We could not even pass it in the House, the authorizing bill, for the foreign aid budget, foreign assistance budget." I said, "Where do you think we can go?"

Well, he said, "I just desperately need it," and he said, "Anything you can give us, I would be delighted."

And you know the interesting fact about this? I am one who truly believes in a bipartisan foreign policy. There was a time when this Congress went along with a bipartisan policy. We had respect for the President; we had respect for his foreign policy. We had respect for the State Department. And whether you were a Democrat or a Republican, you debated, but you would go along.

That all changed in the last half dozen years. There are those who are set in cement and set in concrete that they are not going to give money even though it would advance peace around the world.

Now, the President maintains that he does not like the continuing resolutions. The House has demonstrated that we do not like continuing resolutions either. We have passed 12 of the 13 regular appropriation bills. We have not brought up the foreign aid for the reason that I have been talking about. For example, the HUD bill is almost ready to go down to the White House. All of a sudden it does not go down. Why? On several occasions Mr. BAKER told the subcommittee chairman, the President would sign it. But Stockman is apparently back on the deal now, and they changed their mind. Now they say no, do not sent it down; it will be vetoed. So they are holding the bill up there. You can multiply that by every one.

Why has the Senate not been acting? Because they have not been getting the figures from the White House. They have not been getting figures from whomever is making the decisions. I do not know whether it is Meese, whether it is BAKER. I do not know how Stockman is down there. Apparently in the last days he has made a bit of a comeback.

Let us look at the other evening. When I left here the other evening,

the gentleman from Massachusetts, the gentleman from Mississippi, and every Republican Member in the Senate had signed that conference committee report. On the House side, three Republicans did not sign it, but everybody else signed it. You did not sign it, JOHN MYERS, Brother MILLER did not sign it, and Brother YOUNG did not sign. But the rest of the conferees on your side signed it.

About 2 o'clock in the morning we had our problem solved. The feeling was there that the continuing resolution was going to be signed by the President of the United States. The problems were behind us. We would bring it up and it would sail.

Somewhere along the line something happened. Mr. Stockman said that the figures were wrong. And so we get back to where we are today.

Now, where are we today? We have offered a resolution. And I called the gentleman from Illinois, BOB MICHEL, on the telephone this morning, and I said, "BOB, we are going to come in with the resolution, an extension until February 1, February 2, or February 3."

Why do we come to that date? We come to that date because as true as we are sitting here today, if we go for a period of 15 days, or if we go to the 15th of December, you are going to be in exactly the same position on the 15th day of December, on the eve of Christmas, as you are on the eve of Thanksgiving.

I talked this over with the leadership or both sides of the aisle. We first talked about whether we would go with a March 30 date, and then we talked about a March 1 date. How did we arrive at a March 1 date? Because the majority leader in the Senate said to me, "I think we can get out of here December 11th." I said, "It appears to me it is going to be December 18th."

"Well, let us try to get out the 11th," he said. We agreed we would come back on the 25th of January. After we come back on the 25th of January comes Lincoln's vacation or week. During that period you people for years under the guise of honoring a great President go out and collect money for your campaigning. That is all right with me.

So we kind of looked at the calendar. Lincoln's birthday, I believe, is on a Sunday, and they want the week afterward off and then Monday is Washington's birthday, so you would come in on Tuesday. Let us see if we can settle a date beyond that for an extension.

Well, we talked this matter over. But there is no clearance from the White House. I am not the one to clear with the White House. I have to presume that when I am talking to the leadership of your party that they know what they are talking about, when we are talking about setting dates.

You have something to say, gentlemen? I will be happy to hear you. I am making a statement.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. Certainly I yield to the gentleman.

You distrust the statement I am making?

Mr. SOLOMON. No, sir, Mr. Speaker, but with all due respect to you, I do not think if we are talking about cooperation that we ought to stand here and degrade a man who is the President of the United States. Let me tell you——

Mr. O'NEILL. I am not degrading the President.

Mr. SOLOMON. Let me tell you something, Mr. Speaker. You know that the Appropriations Committee, the reason they do not want to meet this week and next week is because they plan to take a 2-week trip to Italy. Regardless of whether this trip is important or not, I think that it is more important for them, and for that matter, the entire Congress, to stay here and deal with this vital issue which affects every man, woman, and child in America.

I say let us all stay here as Mr. OBEY suggested. Let us get the work done. Let us put these people back to work. Let us make an effort at reducing inflation, lowering interest rates, and straightening out the American economy.

Thank you, Mr. Speaker.

Incidentally, I have asked the President, whom you do not think so much of, to ground all those planes leaving the country tomorrow.

Mr. O'NEILL. Wait a minute. You have got me wrong, believe me. You will never see a man who has higher respect for the President of the United States than I have, regardless of what party he comes from. You believe me. I am just trying to talk about the facts on this.

Mr. ADDABBO. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I do not want to get this off into who is going to Italy and who is not going to Italy. I know I am not going to Italy. I do not yield at this particular time. Just let me complete my remarks.

□ 1400

Mr. WYLIE. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I will be happy to yield.

Mr. WYLIE. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker you indicated that the President had not been talking to the leadership of the House and Senate about this. May I respectfully suggest, Mr. Speaker, that you might call the President and ask him if he would sit down with you and the leadership of the House and Senate to see if something can be worked out within the next 2 weeks.

Mr. O'NEILL. The gentleman brought this to me before. I told the gentleman that I had a couple of conversations with the President yesterday.

Mr. WYLIE. That was before the veto.

Mr. O'NEILL. Well, when he called me to tell me that he was going to veto and to ask me what date we could go with I proposed that we could go to some time in April; and after some hesitation, and my talking about going the rescission or deferral route, he said he could not go with the date at that particular time.

Mr. WYLIE. I just do not think this impasse does any of us any good.

Mr. O'NEILL. Let me go along a little bit further.

Mr. WYLIE. I appreciate the gentleman yielding to me.

Mr. O'NEILL. What have you got out there right now? You have one resolution against the other. I called BOB MICHEL this morning. I said, "BOB, bring in any kind of resolution you want."

Now, what was the downfall the other night? It was the foreign aid program. They want to transfer $1,600 million more, to foreign aid. They—I am talking about the administration, the White House—and I am for it. If they want to put $1,600 million in there, that is fine, but Mr. Stockman wants to transfer that $1,600 million from the HHS programs.

I do not know how many billions we have cut out of that area already. We have cut almost $6 billion. Here we are, on the eve of Thanksgiving, do you not think that we have cut the poor and the needy of this Nation enough? Maybe you do not, but he wants to have more of that money transferred, to foreign aid and I think it is wrong.

I am for giving $1,600 million if it is necessary to help our allies around the world, the poor of the world, to help cement peace and make more allies. Yes, I am for it, but I do not think it should be at the expense of the people at home who need it. If you have that money in the budget, put it in the budget in both places. But if you want to go that route, BOB MICHEL, offer that proposal. That was the responsibility of the President after vetoing a continuing resolution. Offer it, offer what the President seeks, let us have a vote in the House. If you want to go to the 15th, then say, "the 15th, and I offer the following amendment because I know it is the will of Mr. Stockman that we take $1,600 million out of HHS and add it to foreign aid," then let the chips fall where they may. If you do not like elements of the continuing resolution before us, why

do you not offer a new budget, say with defense at a higher figure?

The truth of the matter is, we are trying to act in a manner which is not, who has political victories. Has the President of the United States licked TIP O'NEILL again, or has he licked the Democratic Party? There are no victories out there on a thing of this nature. The Government, as I said, technically has stopped.

On the issue of one date against another, I would agree to take the resolution until the 15th if I thought that at that time we were going to be able to salvage something. But what other bills do you have in the meantime? You have got the social security bill coming up. You cannot get out of here—remember that—you cannot get out of here without passing the second budget resolution, and you know that is going to take some time and some days.

You have got so many conference bills out there. Is it practical to go to the 15th?

I am not going to say any more. If it is a practical time and you people think yes, vote yes. If you think it is in the best interests of the people, of the Congress, of the institution, of the Government, to go to the 3d day of February, and I think it is voted that way. I think it is because I think we are going to be right back where we are.

Gentlemen, I hope you vote for the 3d of February, and I would hope that the President would sign it. If you vote for the 15th of December, I am not going to shed any tears about it.

The SPEAKER pro tempore (Mr. FOLEY). The gentleman from Mississippi (Mr. WHITTEN) has 1 minute remaining, and the gentleman from Massachusetts (Mr. CONTE) has 8 minutes remaining.

Mr. CONTE. Mr. Speaker, I just want to clear one thing here, in all fairness. I know of no finer man in this House than JOE ADDABBO, and I have worked very closely with him. If JACK EDWARDS were here, he would bear me out. The gentleman from New York has been most cooperative with the administration in scheduling the defense bill. He has been on target. They wanted to move the defense bill out of the continuing resolution, and he had agreed that he would go to conference December 9.

In regard to the Italian trip, let us set the record straight about that, because if you want to fault anybody, Mr. SOLOMON, you fault me.

The State Department and the people who head the earthquake project in Italy asked me if I could get a bipartisan group together to go to southern Italy sometime in December to sign the papers and contracts with regard to the earthquake that hit those poor unfortunate people, and then move the delegation up to some small towns in the Friuli region in northern Italy to dedicate some nursing homes and some schools that were built with American funds that this Congress so graciously appropriated. I did ask a group to go. It is no bargain, no junket, believe me.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield.

Mr. SOLOMON. Mr. Speaker, I thank the gentleman. I have no objection to the gentleman going, and I hope he goes and I hope he is successful, but I think we ought to finish the business of the Government first. I think they are more important. I think we ought to stay here until we get this subject worked out the way it should be.

Mr. CONTE. I just want to say that if we go, I am head of that congressional delegation, and I am fighting for a December 15 date, so that should never have come up.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I am an honorary member of the Italian Caucus, and I can address my congregation in pure Italian if anybody wants to hear it, but I would like to say that many of us in this country have friends and family, and I have family of Italian origin, and I think we ought to concern ourselves with what we have done in Italy that was good. I think the codelegation is an excellent expression of the concern that this country feels for our Italian friends.

Mr. CONTE. I am going to yield to the gentleman from New York, but before I do, I want to say and have always said that the gentlewoman from New Jersey was molta simpatica.

Mr. MOLINARI. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. MOLINARI. I thank the gentleman very much. I would like to ask the gentleman from Mississippi a question, if I may.

Mr. CONTE. Just a minute. I will give the gentleman 1 minute to ask that question, because I know how the gentleman from Mississippi feels.

Mr. MOLINARI. This is very critical.

Mr. WHITTEN. May I say to my colleagues that if I do not know the answer, I will tell him.

Mr. MOLINARI. I will try to be brief, because this is very important to me and to a lot of others that are affected by it. The public health hospitals have only enough money for approximately 1 more week to run those hospitals.

□ 1410

Now, if we accept the gentleman from Mississippi's date, we are talking about roughly 10 weeks, and that means those four hospitals are going to close. If the gentleman means everything he talked about here today, I do not think he wants that to happen.

Mr. WHITTEN. Mr. Speaker, I certainly do not want that to happen, and I wish the gentleman had talked to the President about that before the veto.

Mr. MOLINARI. I would like to ask one more question.

Mr. WHITTEN. I did everything in my power. I took care of it. I brought it up, and we sent it down and it was vetoed.

Mr. MOLINARI. Mr. Speaker, I would like to ask the gentleman one more question, and maybe the Parliamentarian would have to answer this.

Is it possible to amend this resolution to permit the funds that are left over from fiscal year 1981, which is $8 million, to continue the operation of these hospitals?

Mr. WHITTEN. May I say to my colleague that we will be going to the Senate, and if I can find any way to bail us out, I certainly will be cooperative and make every effort to help.

Mr. MOLINARI. Mr. Speaker, I thank the gentleman very much.

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. MOLINARI. I yield to the Speaker of the House.

Mr. O'NEILL. I have a hospital in my area, too, and I know the concern of the gentleman. Maybe the minority leader would put it in his motion to commit. We have offered him the right to put other things in there.

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, I still want to implore my colleagues to support the motion to commit that will be offered by the gentleman from Massachusetts (Mr. CONTE).

The Speaker has expressed his preference for the date in February, but I think it is significant that he said he is not going to shed any crocodile tears if it is not that date, and that it is up to this body to make that decision.

Now, I would like to make one other argument. If we adopt this with the date of December 15, I am inclined to think, from what I have heard from the other body, that our Members will probably be free to leave for their Thanksgiving Day recess and we will not be tied down here beyond the day.

So far as the concern espoused by the gentleman from New York, I will say to the gentleman that the earlier date of December 15 will be much more preferable than the February date.

Mr. FITHIAN. Mr. Speaker, will the gentleman yield for a question?

Mr. MICHEL. I will be happy to yield, but first let me make one important point.

Some of the things that have been said here today, particularly by the gentleman from New York (Mr. ADDABBO) and several others, will not go unnoticed, and the record is also there for some others particularly in the executive branch to see. Maybe some of the things that have been aerated here will give this gentleman an opportunity to make a case that I might have otherwise not been able to handle.

So I plead with the Members again, give us that opportunity to come back in a calm, rational attitude 2 or 3 weeks hence and see if we can then come to some agreement.

Mr. FITHIAN. Mr. Speaker, will the gentleman yield for a question?

Mr. MICHEL. Yes, I yield to the gentleman from Indiana.

Mr. FITHIAN. Mr. Speaker, I thank the distinguished minority leader for yielding, and I know how hard he has worked and how responsible he has been.

Let me ask the gentleman from Illinois (Mr. MICHEL), would it be his judgment that when we get back, if we get out of here with the December 15 date should this motion carry and if it still continues that we have the two hangups, which are the foreign aid section out of HHS, we would then see a veto by the President on the December 15 date? If we have the same ingredients that we have now, does the gentleman expect a veto by the President?

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. MICHEL) has expired.

Mr. CONTE. Mr. Speaker, I yield 1 additional minute to the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, in answer to the gentleman from Indiana, my answer is obviously, no. That would not be my objective at all. It is one of striving always to come to an agreement, and I think we are so close except for this or that figure.

If I thought we could really get together this afternoon without a long dissertation about "you were wrong," "we were wrong," and "he was right," and go back and recap the last 2 days—and I have been through these things before—if I thought we could go back right now and make those few adjustments, I would say that this is just what I am looking for—a time when we could come to a meeting and say, "Boys, we have got it in place, and this is it. Let us agree to it and wrap it up."

Mr. FITHIAN. Mr. Speaker, as one Member I would say that if the gentleman from Illinois (Mr. MICHEL) would put in his continuing resolution precisely the numbers which the President would sign, I would be inclined as one Member who has not supported the administration to go along with the gentleman. But I do not know what we are buying other than another round of vetoes and another media exposition. If that is the case, then we are back to square one.

Mr. ADDABBO. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from New York.

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. MICHEL) has expired, and the time of the gentleman from Massachusetts (Mr. CONTE) has expired.

The gentleman from Mississippi (Mr. WHITTEN) has 1 minute remaining.

Does the gentleman from New York (Mr. ADDABBO) seek recognition?

POINT OF PERSONAL PRIVILEGE

Mr. ADDABBO. Yes, Mr. Speaker, I do.

I rise to a point of personal privilege. My name has been mentioned, and I would like an explanation from the gentleman from Illinois (Mr. MICHEL).

The SPEAKER pro tempore. The gentleman from New York does not rise to a point of personal provilege but without objection the gentleman from New York (Mr. ADDABBO) is recognized for 1 minute.

Mr. ADDABBO. Mr. Speaker, I would like an explanation from the gentleman from Illinois (Mr. MICHEL). He has mentioned my name along with some statement that was made that seems to be derogatory.

Mr. MICHEL. No. No, on the contrary.

I apologize if I said anything that the gentleman in his discretion believes is derogatory, and I have no such intention.

I just think that the administration knows of the position of the gentleman from New York, particularly in the defense matter, and I just think it is in a positive way that I brought it up, because it might very well influence the people who might not otherwise been influenced.

The gentleman from New York holds a very prestigious position on a committee here in the House, and he cannot be ignored in what he says. For that reason, I am happy that we have had this exchange.

Mr. ADDABBO. Mr. Speaker, I thank the gentleman for the kind remarks.

In answer to my colleague, the gentleman from New York, I would tell him exactly what I told the gentleman from Massachusetts about the trip, and that is that if this date is to be December 15, there is no way I could go on the trip because we would have to be here in conference on the continuing resolution and possibly on the Defense bill.

The SPEAKER pro tempore. As the Chair announced previously, the time of the gentleman from Massachusetts (Mr. CONTE) has expired, and the gentleman from Mississippi (Mr. WHITTEN) has 1 minute remaining.

Mr. WHITTEN. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, I rise to urge that the Members vote for the resolution as we have ordered it and vote against the motion to commit. I do so because we see here what we are faced with each and every time this issue comes up.

We must reach some accommodation with the executive branch so that the legislative branch can continue to discharge its functions and the executive branch can discharge its functions.

So, Mr. Speaker, I urge the Members to please vote for this February 3 date and give us time to reach an accommodation. I urge the Members to stay with the committee and vote for the resolution and vote against the motion to commit.

● Mr. McHUGH. Mr. Speaker, under the continuing resolution we are considering here today, there would be no reductions in the number of participants served in two important supplemental food programs for women, infants and children—the WIC program and the CSFP program.

The first continuing resolution required that these programs be continued at their fiscal year 1981 yearend caseload; for example, their September caseload. The conference report on that resolution stated that "the continuing resolution maintains the current levels of participation for the special supplemental food program know as WIC and the commodity supplemental food program. Any efforts to reduce funding allocations to the States, thereby affecting levels of participation, would be clearly contrary to the provisions of the joint resolution." These same requirements continue in effect for this second continuing resolution.

During the first continuing resolution, the administration submitted a deferral for a small portion of WIC and CSFP funds. However, the administration used unspent fiscal year 1981 funds to comply with the requirements of the resolution that the current caseload be maintained. If any deferral, or rescission, for these programs is submitted under the second resolution, the administration must nevertheless continue to maintain current participation.

It has been suggested by the administration that the first resolution may have provided funds for WIC only at a severely reduced rate of $720 million a year. It should be clear that there is no foundation for any such interpretation. The first and second continuing resolutions clearly provide sufficient funds to maintain current WIC and CSFP food packages for the current caseload.

I should also note that the administration is required under this resolution to move immediately to allocate funds to the States so that there is no interruption in WIC and CSFP funding leading to a shutdown or reduction in WIC operations. Many States will run out of WIC funds this week. The administration must allocate the funds provided under this resolution immediately. Otherwise, there will be reductions in participation and this is contrary to the resolution.

Finally, the resolution continues to maintain funding for current benefit levels in the food stamp program. The Secretary can have no cause under the resolution to find that any reduction in food stamp benefits is necessary. As we have noted on previous occasions, the Secretary cannot make such a finding until Congress is informed of a need for additional funding and takes action demonstrating that the funds will not be provided.●

● Mrs. SCHNEIDER. Mr. Speaker, I intend to cast my vote in favor of the joint resolution to extend spending authority at existing levels through December 15, 1981. I support this short deadline because I believe Congress and the administration have an obligation to the people of this country to complete action on the regular appropriations bill, rather than continue to rely on stopgap funding measures.

Furthermore, I agree with the President that this is no way to run a railroad and certainly no way to run a country. But I also believe the President must show more flexibility. While I strongly support his goal of reduced Government spending, I believe Congress already has cut spending for human services to the bone. The job before us is to apply the same kind of scrutiny to spending in other areas—including defense. There is no question in my mind that any program is better run and more effective when it is streamlined and trimmed of fat. Budget cutting should not be done with a cleaver, but with a scalpel. Equity is the bottom line. The best way for Congress to accomplish this is to act promptly on the pending appropriations bills.●

The SPEAKER pro tempore. Under an agreement of the House reached earlier today, the previous question is ordered on the joint resolution.

The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO COMMIT OFFERED BY MR. CONTE

Mr. CONTE. Mr. Speaker, I offer a motion to commit.

The SPEAKER pro tempore. Is the gentleman opposed to the joint resolution?

Mr. CONTE. In its present form, yes, Mr. Speaker.

Mr. SPEAKER pro tempore. The Clerk will report the motion to commit.

The Clerk read as follows:

Mr. CONTE moves to commit House Joint Resolution 368 to the Committee on Appropriations, with instructions to that committee to report the joint resolution back to the House forthwith, with the following amendment: In the last line, strike "February 3, 1982" and insert in lieu thereof "December 15, 1981".

And at the end of House Joint Resolution 368, add: The joint resolution of October 1, 1981 (Public Law 97-51), is amended by adding after section 141:

SEC. 142. Notwithstanding any other provision of this joint resolution, such sums as may be necessary, not in excess of, and under the conditions of the budget request transmitted on November 9, 1981, for operation, improvement, transfer, and closure of Public Health Service hospitals and clinics.

The SPEAKER pro tempore. Does the gentleman from Massachusetts desire time?

Mr. CONTE. Yes, I do, Mr. Speaker.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. CONTE) is recognized for 5 minutes in support of the motion to commit.

Mr. CONTE. Mr. Speaker, I will not take 5 minutes. I only have two things. I said everything I wanted to say on the floor.

I must make one clarification on what my good friend, the Speaker of the House, stated about the foreign aid bill. I think it was the State Department bill. This side voted it down, and I voted for it.

We have not been able to get the foreign aid bill up as yet, the gentleman is absolutely right, because the votes are not there. I just wanted to make that clear for the record.

This bill amends the Whitten resolution to make the expiration date December 15 instead of February 3, and it adds on that last clause to take care of the four public health hospitals until December 15. The gentleman from New York is absolutely right in saying the money for those hospitals will run out next week.

□ 1420

The Secretary of Health, Mr. Schweiker, asked me if I would offer that amendment.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. WHITTEN. Would it be agreeable with the gentleman for me to ask unanimous consent, and I will ask unanimous consent that the original resolution be amended to include the language the gentleman has relating to public health hospitals?

Mr. CONTE. I cannot do that, Mr. Speaker. I cannot do that. You know that. As much as I love you, JAMIE, I cannot go that far.

Mr. WHITTEN. May I say to my colleague you are likely to get credit for having a political motive in mind.

Mr. CONTE. It is just too bad you did not think of it, JAMIE.

Mr. WHITTEN. Mr. Speaker, I rise in opposition to the motion to commit.

I trust our colleagues will stay with the committee on this. I assure you in the event you turn this down I will ask unanimous consent to include the same provision in the resolution that I have. Vote this down and I will ask permission to include the provisions for the hospitals in the original resolution that I introduced.

Mr. CONTE. If I may, I just hope no one will take that chance. It is in here now.

Mr. WHITTEN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to commit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to commit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. CONTE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 221, nays 176, not voting 36, as follows:

[Roll No. 335]

The Clerk announced the following pairs:

On this vote:

Mr. Hughes for, with Mr. Mollohan against.

Mr. Roth for, with Mr. Biaggi against.

Mr. Winn for, with Mrs. Chisholm against.

Mr. Daniel B. Crane for, with Mr. Mattox against.

Mr. Brown of Ohio for, with Mr. Gray against.

Mr. Duncan for, with Mr. Schumer against.

Mr. Kramer for, with Mr. Lantos against.

Mr. GUARINI changed his vote from "yea" to "nay."

Mr. MARLENEE changed his vote from "nay" to "yea."

So the motion to commit was agreed to.

The result of the vote was announced as above recorded.

GENERAL LEAVE

Mr. WHITTEN Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on consideration of the joint resolution (H.J. Res. 368), and that I may include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WHITTEN. Mr. Speaker, I hope we may have a record vote on the final passage of the amendment I shall presently offer so that those who might have voted differently on the date may have a chance to vote, to show that we will cooperate and do our best.

Following that statement, Mr. Speaker, pursuant to the action just taken by the House, I report the joint resolution (H.J. Res. 368), back to the House with an amendment.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment: In the last line, strike "February 3, 1982," and insert in lieu thereof "December 15, 1981," and at the end of House Joint Resolution 368, add: "The joint resolution of October 1, 1981 (Public Law 97-51), is amended by adding after section 141:

"SEC. 142. Notwithstanding any other provision of this joint resolution, such sums as may be necessary, not in excess of, and under the conditions of the budget request transmitted on November 9, 1981, for operation, improvement, transfer, and closure of Public Health Service hospitals and clinics."

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on passage of the joint resolution, as amended.

Mr. WHITTEN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 367, nays 26, not voting 40, as follows:

[Roll No. 336]

□ 1450

Mr. DORGAN of North Dakota changed his vote from "nay" to "yea."

So the joint resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I rise for the purpose of inquiring of the distinguished majority leader where we go from here.

It is my understanding, and I might make the observation to the distinguished majority leader that I have advised the Senate majority leader that we were about to make this move and whether or not the other body would simply take our product and run with it, in which case there would be no conference and Members would be free to leave.

The majority leader responded, I might further observe, that he would take a quick check and get back to me, but that was going to be his recommendation over in the other body.

I would be happy to yield to my friend, the gentleman from Texas, the distinguished majority leader, to advise us on how then we would proceed for the balance of this day.

Mr. WRIGHT. If the gentleman yields, based upon the advice we have just received from our very distinguished minority leader, it would be anticipated that we would simply stand in recess awaiting the formalization of that anticipated action on the part of the other body. Once formally and officially notified that that has occurred, we would ring the bells and come back into session for the purpose of adjourning.

At the end of this colloquy, I would plan to offer a House concurrent resolution providing that when we adjourn today and the Senate adjourns tomorrow or Wednesday, that we shall stand adjourned until 12 o'clock meridian on Monday, November 30.

The purpose of coming back in on November 30 is simply to have pro forma sessions.

Then the following week, December 7, we would have legislation and Members should expect to be present for the week of December 7.

Mr. MICHEL. But would we be on pro forma sessions then during that first week in December?

Mr. WRIGHT. Yes, pro forma sessions only on November 30. Monday and Thursday there will be pro forma sessions. On other days, no sessions at all.

Mr. MICHEL. Might I further suggest to the gentleman from Texas (Mr. WRIGHT) that if we are about to recess in anticipation of what we might hear from the other body, that as soon as we get that word from the other body that we over our respective whip phones let the Members know that, frankly, we have no more business to transact, other than formally adjourning ourselves until the date the gentleman has described.

Mr. WRIGHT. I think that is just exactly right.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair is advised by the majority leader that in the event that there was no business to transact except the formal adjournment of the House that there would be 15 minutes' notice and if there were any additional votes anticipated, there would be a half an hour notice.

Mr. WRIGHT. I think that makes eminently good sense. We do not anticipate any votes, but I am relying on the good advice from the distinguished gentleman from Illinois. I have implicit confidence in his judgment.

Mr. MICHEL. Well, we are certainly hoping that will be the run of events.

Mr. WRIGHT. If I were a betting man, I would bet on it.

Mr. MICHEL. And I would run right to the phone to see if we could get an update on this.

ADJOURNMENT OF THE HOUSE FROM MONDAY, NOVEMBER 30, 1981, TO THURSDAY, DECEMBER 3, 1981, AND FROM THURSDAY, DECEMBER 3, 1981, TO MONDAY, DECEMBER 7, 1981

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns on Monday, November 30, it stand adjourned until 10 a.m. on Thursday, December 3, and that when the House adjourns on Thursday, December 3, it stand adjourned until noon on Monday, December 7.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

AUTHORIZING SPEAKER TO ACCEPT RESIGNATIONS AND TO APPOINT COMMISSIONS, BOARDS, AND COMMITTEES, NOTWITHSTANDING ANY ADJOURNMENT OF THE HOUSE UNTIL MONDAY, NOVEMBER 30, 1981

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that, notwithstanding any adjournment of the House until Monday, November 30, 1981, the Speaker be authorized to accept resignations, and to appoint commissions, boards, and committees authorized by law or by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

ADJOURNMENT OF THE HOUSE FROM MONDAY, NOVEMBER 23, 1981, TO MONDAY, NOVEMBER 30, 1981, AND ADJOURNMENT OF THE SENATE ON TUESDAY, NOVEMBER 24, 1981, OR ON WEDNESDAY, NOVEMBER 25, 1981, TO MONDAY, NOVEMBER 30, 1981

Mr. WRIGHT. Mr. Speaker, I send to the desk a concurrent resolution (H. Con. Res. 228) and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 228

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on Monday, Novembr 23, 1981, and that when the Senate adjourns on Tuesday, November 24, 1981, or on Wednesday, November 25, 1981, pursuant to a motion made by the majority leader in accordance with this resolution, they stand adjourned until 12 o'clock meridian on Monday, November 30, 1981.

□ 1500

The SPEAKER. Without objection, the Chair recognizes the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, I rise in support of the resolution.

There is nothing more to be said about it. This is the resolution that permits us to adjourn over the Thanksgiving period. The dates have been cleared with the majority leader in the Senate and it is my understanding that they meet approval all around.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

ELECTION OF HON. THOMAS S. FOLEY AS SPEAKER PRO TEMPORE DURING THE ABSENCE OF THE SPEAKER

Mr. WRIGHT. Mr. Speaker, I offer a privileged resolution (H. Res. 285) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 285

Resolved, That Hon. Thomas S. Foley, a Representative from the State of Washington, be, and he is hereby, elected Speaker pro tempore during the absence of the Speaker.

Resolved, That the President and the Senate be notified by the Clerk of the election of Hon. Thomas S. Foley as Speaker pro tempore during the absence of the Speaker.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SWEARING IN OF HON. THOMAS S. FOLEY AS SPEAKER PRO TEMPORE DURING ABSENCE OF THE SPEAKER

The SPEAKER pro tempore (Mr. FOLEY). The Chair requests the Speaker to administer the oath of office.

Mr. FOLEY assumed the chair and took the oath of office administered to him by the gentleman from Massachusetts (Mr. O'NEILL).

MILITARY SPENDING IS AT THE HEART OF THE BUDGET CRISIS, OUR ECONOMIC PROBLEMS, AND THE THREAT TO NATO.

(Mr. SEIBERLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, in the heat of this debate, let us not lose sight of the fact that the reason why we are undergoing these tensions and the reason for the pressures is the tremendous increase in the defense budget at the expense of civilian needs and humanitarian programs. That is starting to tear this society apart. That is what is causing the tension within NATO. And it is time that we recognize that we are going to have to get the military monster under control or we will never solve the problems of inflation and high interest rates and never solve the problem of balancing the budget.

In yesterday's Washington Post there was an absolutely brilliant, penetrating article by Richard J. Barnet concerning the crisis that is building up over nuclear arms both in Europe and in the world as a whole. Mr. Barnet points out that the heart of the problem is that both United States and European countries have seriously weakened their economies and the strength of their societies by the continued diversion of scarce resources to the military and away from investment in the productive system and social infrastructure.

As Mr. Barnet says:

Much of the so-called "pacifism" in Europe is based on a growing conviction that piling up military hardware that cannot be used without destroying the user does not add to national strength. A much greater danger to the West than the unlikely Soviet invasion is an internal political, economic and moral crisis. Such weakness could indeed play into the hands of the Soviet Union.

He also notes:

Unless the Soviets are prepared to invade Europe—and reduce to cinders the very assets they would hope to take—then the blackmail threat is not credible, provided the internal economic and social strength of the continent is maintained.

Mr. Barnet concludes that:

Now that, as a result of popular pressure, President Reagan has at least opened up the possibility of a "zero option," similar pressure should be put on Moscow to make some unilateral reduction in the SS-20s. Such a gesture could make more likely the moratorium on deployment which is indispensable to a real reversal of the arms race. But the United States will have to come forward with less one-sided proposals than the Reagan offer. Were we prepared to act boldly, the alliance might once again serve to unite European and Americans rather than to divide them.

The President's long overdue foreign policy speech of last week indicates that he, or somebody in his administration, finally understands the nature of the public's concern both here and in Europe. We can only hope that out of this understanding will come a conviction, both in the White House and the Kremlin, that we can no longer go on as we have been without a mounting risk of destroying all that both societies have created through generations of toil and sacrifice.

The full text of Mr. Barnet's article follows these remarks:

WHY ON EARTH WOULD THE SOVETS INVADE EUROPE?

(By Richard J. Barnet)

For over 30 years the Western alliance has been obsessed with combating an unlikely threat with an incredible defense.

At no time since the establishment of NATO have military or intelligence experts rated the prospect of a Soviet military invasion as anything but remote. Originally, the military buildup in Europe was designed to be a "modest shield," as George Kennan put it, behind which recovery could take place. At the hearings on the North Atlantic Treaty held in the spring of 1949 John Foster Dulles, then serving as senator from New York, summed up the prevailing view. "I do not know of any responsible high official, military or civilian . . . in this government or any other government who believe that the Soviet now plans conquest by open military aggression."

Today Soviet capabilities to mount an invasion of Europe are no doubt greater than in the past, as former secretary of defense Harold Brown stated in his final posture statement. But, he added, "I doubt that we would have to contend with such an assault as a bolt out of the blue." Even strong advocates of a buildup of U.S. military forces, such as Paul Nitze, rate a Soviet invasion as "unlikely" but worry that the Kremlin could use the theoretical capability of launching such an attack as blackmail, John M. Collins, a self-styled "conservative critic of defense" at the Library of Congress, says, "I believe the likelihood that the Soviet Union will attack Western Europe . . . in the short-term or even midterm future is extremely remote."

So for almost two generations the NATO alliance has been beset by schizophrenia. The actual military threat against which the allies continue to arm is rated low; yet military planning conventionally addresses capabilities, not intentions, which after all can change.

The military problem—the theoretical possibility that the Soviet Union with its large standing army could launch hundreds of divisions across the Elbe—has no satisfactory military solution, but the whole NATO panoply, including the U.S. divisions, the U.S. "guarantee" and the endless public dis-

cussions such as Secretary of State Alexander Haig's disclosure of NATO's "nuclear warning shot" strategy, are all designed as an elaborate insurance policy.

The trouble, however, is that the premiums have become much too costly—not only because the monthly payments threaten the economies of the members, but because the payoff looks increasingly dubious. Nuclear "defense" is a sham, since the use of the weapons, with or without neutron warheads, will destroy that which is to be defended, whether or not the United States and the Soviet Union hurl missiles at one another.

A conventional defense is certainly more rational than a suicidal nuclear defense, but the most a conventional defense can do, assuming the Soviets make an all-out attack, is to delay their progress and to establish the political environment for a settlement. Given the nature of modern weapons, a short conventional war—10 days, six weeks or whatever—would also devastate much of Europe. Why the combatants would be willing then to display the reasonableness that seems to elude them now in a time of peace is not clear.

For the Europeans and the Americans to have a big enough conventional force to raise the "nuclear threshold," the industrial states would have to be prepared for a sacrifice of social spending beyond anything they have yet instituted and to introduce permanent conscription on a massive scale.

While Ronald Reagan is pleased to proceed with the former, he is reluctant to institute the latter—for the very good reason that in the United States conscription amounts to a popular referendum on foreign policy. In Europe, cutting government benefits such as social security and health care benefits that have been offered since Bismarck's time is politically dangerous even for conservative governments. Europe's only sure defense is peace, and that is why there is a huge peace movement on the continent.

The fundamental contradictions in NATO strategy explain why for more than 20 years so many weapons issues—the Skybolt missile, the Multilateral Force, neutron bombs, cruise missiles—have been highly divisive.

There are no good security answers for Europe within the present conceptual framework. The allies have used weapons issues as metaphors, and in the process much of the discussion has the appearance of a charade. When Germans like the conservative Christian Democratic leader Franz Josef Strauss say to the Americans that the alliance must not weaken in its resolve to use nuclear weapons in Germany, it is not that they wish to turn their country into a radioactive wasteland. All they mean is that the fiercer the threat, the better the deterrent.

Whether that was ever a prudent defense policy is questionable, but it is manifestly imprudent now that the Soviet Union has the capacity to match whatever the West does with nuclear weapons. When the risk of war by miscalculation was less than it is now, irresponsible statements about nuclear weapons were less dangerous. The rise of antinuclear sentiment in Europe reflects a growing sense that with respect to defense strategy, the emperor has no clothes.

There are some fundamental problems with existing theories of strength through deterrence. The deterrence system rests on assumptions about human nature which are probably wrong: for example, that leaders with a finger on the button will act rationally under conditions of ever-increasing threat. Because of the creep of technology, a deterrence system based on an elusive "balance" is inherently unstable; every weapons laboratory development, real or imagined, has a potentially destabilizing effect on the relationship.

A security system is likely to be more stable if it is based on positive incentives to keep the peace rather than on threats, particularly since the threats are becoming less credible because of their suicidal implications. But we will be living under a security system based largely on deterrence for a long time to come, if only because the leading nations are so heavily invested in it and the smaller nations have aped the great powers in designing their own security arrangements.

But it is essential to build a deterrence system on strength, not weakness. A strategy based on nuclear weapons in which the public quite properly has little confidence divides the society and invites outside pressure.

Nor does a society become strong by sacrificing growth, innovation and the soundness of its economy to an endless arms race.

The failure of the United States to manage its economy has shaken confidence in American leadership around the world. If the richest society in the world cannot manage its own affairs, how can it defend others?

The Soviets pose a potential military threat which seems increasingly implausible. If the Kremlin cannot successfully control Eastern Europe with military force or pacify a wretchedly poor country like Afghanistan, why would they think that they could successfully occupy Western Europe?

But high interest rates in the United States, to take one important example, are threatening European economies now. Part of the premium we and the Europeans are paying for the military security system are the adverse economic consequences that affect both of us.

If there should develop a genuine fear of a Soviet invasion in Europe, then the only workable deterrent would be to create the impression in the minds of Soviet leaders that the invading or occupying troops face the same prospect which has kept them out of Yugoslavia and, so far at least, Poland: the prospect of permanent popular resistance. The stronger the society in real terms—in its ability to manage its economy, to build popular solidarity, to arrange a secure resource base—the more credible such a prospect becomes and the less inviting a target it makes.

Much of the so-called "pacifism" in Europe is based on a growing conviction that piling up military hardware that cannot be used without destroying the user does not add to national strength.

In the United States we have fallen into the trap of measuring increments of strength in dollars even though we have yet to have a serious debate inside the government or in public about the actual uses to which the new military hardware and military bureaucracies would be put. By diverting scarce resources to the military from investment in the productive system and social infrastructure, successive U.S. administrations have seriously weakened the American economy, which is the foundation of national strength, and damaged its educational system and resource base.

When Americans demand the Europeans increase their military expenditures by some arbitrary percentage, typically the call to sacrifice is defended not as a means of delivering a radically different military reality, but as one that will overcome the competitive advantage Europe and Japan have had by virtue of their relatively low military expenditures over the past two decades.

A much greater danger to the West than the unlikely Soviet invasion is an internal political, economic and moral crisis. Such weakness could indeed play into the hands of the Soviet Union.

If in a time of slow growth the European democracies are unable to deal with the historic structural problems they face, they run the risk of the same sort of social dissolution that caused the fall of France in 1940, when it boasted the largest army in Europe.

A dynamic Europe that is modernizing its institutions, managing its economy and establishing mutually advantageous relations with resource-producing countries, has little to fear from Soviet intimidation. In the test of nerves against which we are supposedly arming—Kremlin blackmail—economic and political strength are far more important weapons than more hardware.

If a society is not prepared to surrender, then it cannot be intimidated. If it looks strong internally and demonstrates high morale and vitality, it is less likely to be tested.

The whole "blackmail" theory needs a hard look. It is not clear why the Europeans—who have been living 10 minutes away from Soviet city-destroying weapons for 20 years—should suddenly cave because the Soviets have new weapons capable of making the rubble bounce. It is not clear what the Soviets could blackmail Europe into doing.

Leaving NATO? It is more credible that some European governments will leave NATO because we have scared them away than because of a stiff note or nasty phone call from Moscow.

Keeping Solzhenitsyn off the television? That's what one distinguished exponent of the Finlandization thesis once argued to me. Is the fate of Europe going to hang on a question like that? If we have fools or cowards as leaders, no number of missiles will make the difference.

Reducing the industrial states of Europe to economic vassals? West Europe's proposed increased dependence on the Soviet Union for natural gas constitutes far more leverage than does the SS-20s.

Unless the Soviets are prepared to invade Europe—and reduce to cinders the very assets they would hope to take—then the blackmail threat is not credible, provided the internal economic and social strength of the continent is maintained.

The greatest threat to the capacity of the West to solve its security dilemma is the crippling psychological mood of the moment, based on the growing apprehension that nuclear war is inevitable. In the United States a recent Gallup poll showed that 47 percent of the population believes that a nuclear war within 10 years is either "fairly likely" or "very likely" and the overwhelming majority believes that their chances of personal survival in such event are no better than 50-50. In Europe the apprehension of nuclear war is even greater.

A security system in which the people to be protected have so little faith represents a serious vulnerability. The gathering pessimism is a consequence of the breakdown of negotiations and the attempt by the Reagan administration to make the deterrent credible by dramatizing the prospect of actually fighting a limited nuclear war.

Because of the inherent insolubility of the military security problem, we now face increasing danger of a serious split between the United States and Europe and a breakup of the alliance at exactly the moment it is most needed.

The security options available to Europe in such a situation are both unsatisfactory. In the wake of a collapse of NATO, any accommodation with the Soviet Union would be on distinctly less advantageous terms than could be negotiated as a U.S. ally. A decision to build up European nuclear forces would neither end the arms race nor the growing popular revulsion against nuclear weapons which every Western government must now confront. All it would accomplish would be to insure an even greater Soviet nuclear threat against Europe under circumstances in which the Soviets might well be tempted to exert pressure on European governments.

The outlook and strategy of the Soviet Union can be tested by serious negotiations. It is now clear from eight years of SALT negotiations that agreements must be simpler, more comprehensive, and more quickly negotiated than in the past. A licensed arms race under which some systems are controlled while others leap ahead is not a practical policy.

It would be most welcome if the Kremlin were to accept President Reagan's offer to trade a promise not to deploy the Pershing II and cruise missiles in Europe for the dismantling of all the Soviet intermediate-range missiles in Europe. Everyone on both sides would be safer if such a deal could be struck. But shrimps will whistle, as Khrushchev used to say, when the tough bargainers in the Kremlin can be induced to trade over 600 missiles in place for a promise not to deploy weapons that, because of political opposition, may well be undeployable. The proposal was aimed more at European public opinion than at the Soviets, but it is unlikely to deflate the peace movement.

If the president wants significant reductions of nuclear weapons of all ranges, then a good starting point would be a freeze on the testing and deployment of all nuclear weapons delivery systems, which would include both strategic and European-theater nuclear weapons. The freeze, which could be for a specified period, say four years, could be verified by national intelligence means. The conventional argument that a freeze would preserve a Soviet advantage in Europe is not persuasive for two reasons.

First, there never has been a "balance" of land-based middle-range weapons, and the U.S. abandoned the efforts to create one 15 years ago when we removed the last of the old-style intermediate-range rockets. If the NATO-assigned Polaris submarines are included, not to mention the French and British nuclear forces, there are enough European-based nuclear weapons to create the near-certainty in the minds of the Soviet leaders than an attack on Europe would result in the devastation of their homeland. The only "balance" of any significance is whether the capacity for retaliation exists on both sides.

Second, a four-year freeze would benefit the West. After all, it is the Soviets who are putting in a new missile every few days, not the United States. Indeed, it now appears that for technical reasons it may be almost three years before the first U.S. missiles arrive. It may well be that for political reasons they will never arrive. Without a freeze, the Soviets will be further ahead than ever.

Sooner or later, the United States, if we are really interested in arms reduction, will have to demonstrate our commitment to Europe by trading some of the cards we hold, such as forward bases, for the elimination of the Soviet nuclear threat against Europe.

Now that, as a result of popular pressure, President Reagan has at least opened up the possibility of a "zero option," similar pressure should be put on Moscow to make some unilateral reduction in the SS-20s. Such a gesture could make more likely the moratorium on deployment which is indispensable to a real reversal of the arms race. But the United States will have to come forward with less one-sided proposals than the Reagan offer. Were we prepared to act boldly, the alliance might once again serve to unite Europeans and Americans rather than to divide them.

GENERAL LEAVE

Mr. HOYER. Mr. Speaker, I ask unanimous consent that all Members be permitted to extend their remarks and to include therein extraneous material on the subject of the special order speech today by the gentleman from California (Mr. EDWARDS).

SENATE CONFIRMATION OF MILAN BISH, GRAND ISLAND, NEBR., AS AMBASSADOR TO BARBADOS

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Nebraska (Mrs. SMITH) is recognized for 5 minutes.

● Mrs. SMITH of Nebraska. Mr. Speaker, I am delighted that the Senate on November 20, confirmed Milan Bish, of Grand Island, Nebr., as Ambassador to Barbados, and concurrently as Ambassador to Santa Lucia and to Saint Vincent and the Grenadines.

A graduate of Hastings College, Hastings, Nebr., Milan Bish brings to this position extensive experience in business, banking, and agriculture, as well as in civic activities. Founder and president of Mid-Continent Enterprises, Inc., a land development, residential construction, and property management firm, he previously served in the same capacities for Bish Machinery Co., a farm implement and equipment enterprise.

The significant business acumen he has demonstrated in these roles has been enhanced by his organization of the Five Points State Bank and his membership on the board of directors of the Commercial National Bank & Trust Co., both in Grand Island.

Moreover, Milan Bish is a Nebraska cattleman, proud owner of 140 head of purebred Angus cattle.

While following these pursuits with energy and enthusiasm, Milan Bish has also taken the time to serve his fellow Nebraskans, as a member of the Nebraska State Highway Commission, district governor of Rotary International, and president of the Grand Island Chamber of Commerce. He has also been active in church and Masonic activities.

As an Ambassador of the United States, Milan Bish will draw not only on his diverse experience in various fields but also on his background of understanding and helping others.

When I first heard of Milan Bish, many years ago, the word from one of our State leaders was "Milan Bish doesn't have an enemy in this world. Everybody who knows him respects him, and also loves him." I have found this to be true through our years of close relationships with Milan and Allene Bish. He has been a dedicated, forward looking, and effective leader for every worthy civic and religious advancement for our entire State. He has used his leadership in a broad spectrum of personal and organizational efforts to make our great State "the good place to live." In the cattle business, in banking, in the contracting business, in organizations like Rotary and the chamber of commerce, in the highway commission, everywhere he has risen to top posts for leadership.

All of us are going to miss him in Nebraska these next few years but we are proud and happy that the Reagan administration has chosen a man of rich experience, a man of rare perception and intelligence, and a man of total dedication along with superb diplomacy to serve as our Ambassador in this important post. We are doubly sure because Allene Bish is a most gracious, knowledgeable, and delightful person who will, along with Milan, build good will and strengthen our post in the Barbados area.

Congratulations Mr. and Mrs. Ambassador.●

WHAT IS REALLY HAPPENING IN THIS GOVERNMENT?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. GINGRICH) is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, I will be talking this afternoon on the need to focus on what really is happening in this city and in this Government, to focus on the long-term historical implications of the conflict we are now engaged in between those of us who would change the way we have been governed recently, and those of us in this body who would continue to do what has been going on in the last 30 years.

There has been a great deal of loose talk today about one-man dictatorships, about irresponsible behavior by the White House, about the value of $1 billion, more or less.

The debate is in some ways characterized by the distortion of the Washington Post headline this morning,

and I quote, "House Finds Its Pride, Says No." That particular story is a fairly accurate model of the liberal bias which has made it so difficult for many in the news media and many in Washington to understand what is really happening and where we are going in this country.

The fact is that there are fundamentally three issues involved in the current crisis.

First, does the President have the right to preside?

Second, is $1 billion or $2 billion worth fighting over?

Third, should we engage in real political fights involving the risk of closing the doors of the Government?

Let me take those issues one by one.

□ 1510

First of all, does the President have the right to preside? Despite all the hysteria on the part of our liberal friends, despite the strong language today, the simple fact is that the Founding Fathers deliberately put in the Constitution the right to veto any bill which, in the President's judgment, was bad for America. The Founding Fathers deliberately decided to give the President the ability to impose his will on the legislature so long as the legislature is unable to override his veto. They gave the legislature the escape valve of being able to override an unwise or bad President by simply passing the bill over the veto. It should be very instructive to every student of Government and politics that the liberal Democrat leadership moved to refer the veto message to committee because it knew that it did not have a two-thirds majority; because it knew that it was not able to override the veto, and that any effort would in fact have been pointless.

What the effort should mean for every American is that at the present time President Reagan has in fact a constitutional majority; that under the rules of the game as written by the Founding Fathers a President, and allied with one-third plus one in the House or in the other body, has in effect a working majority to block bills he regards as unwise, and if he is willing to run the risk of closing the Government he has the ability to bring the American peoples' attention to the issue at hand, and it is up to the people to decide. If the people, upon looking at the issues, decide the President is wrong, they can write or call their Congressman and say, "No, no, the President is not doing the right thing. Vote to override the veto." But if, on the other hand, the American people, upon looking at the issues, decide that the President is right, they can then write or call their Congressman and say, "Support the President, support his veto and pass the kind of bill he is willing to sign."

It is in that context that it is very clear that President Reagan has a constitutional majority and is in fact able to fight the issue on his terms. It is regrettable that the Speaker of the House has not yet been willing to acknowledge that for all practical purposes the President does have the ability to preside, and that we would do far better to govern with the President rather than to delay, procrastinate, and hide in the hopes of governing against the President.

Second, is $1 billion worth fighting over? Few things surprise me more than the willingness of our good friends on the liberal side of this issue to get up and say cavalierly, "I don't understand why he vetoed it, after all, it is only $1 or $2 billion."

I think it is essential to recognize what Washington does to people after a while, how large numbers become meaningless, massive expenditures become automatic, and huge increases become reasonable.

A billion dollars in 1980 was the entire income of 50,000 American families; or to put it differently, in 1980, $1 billion was the total taxes for 442,477 families. Think of it. Over that small amount which our liberal friends did not particularly think important, we could have stopped all taxes for every family below the median level in four congressional districts in this country. Not a single family would have paid a dime. That, I think, is worth fighting over.

A billion dollars is worth fighting over because it came out of every pocket, because it is a child who cannot go to school, or a family that cannot buy Christmas presents, a realtor who cannot sell a house, or a young couple that cannot buy a house. It is one more step toward high interest rates and inflation, toward crushing the American economy and killing jobs.

So, my answer is yes, a billion dollars is worth fighting over, and I would challenge any Member of this Congress to go home and attempt to explain with a straight face to his audience back home why they think a billion dollars is trivial.

Third, should we engage in real fights over political issues that involve the risk of closing the doors of the Government? My answer is yes, for three reasons.

First, in this economy, where the Federal Government borrows money to cover its deficit, where it forces up interest rates by competing with people back home, we are closing doors for homebuilders, for car dealers, for people who work in the housing industry, for literally thousands of Americans.

If it is right for a small business in Douglasville to go broke, if it is right to close the doors of a car dealer in Clayton County, Ga., why is it not all right to run the same risk for the Government and say, "Yes, by George, if the only way to get your attention is to bring everything to a halt, and in order to save jobs, in order to create a healthy economy, in order to improve things, certainly we are willing to run the risk of applying to the Government the same dangers that affect every American."

Second, ultimately the only real tool we have to bring about change is the willingness to quit spending money and a willingness to shift where we spend money. If all we do in this body is talk, orate, posture, gesture, then in the long run we do not govern.

Ultimately, we have to say to the liberals who still run the House and who in many ways still run the bureaucracy, "We are going to take whatever steps are necessary in order to bring this Government under control. We are going to move decisively to balance the budget. We are going to cut spending as much as needed. We are going to protect the American family's pocketbook rather than the Federal bureaucrat's pocketbook, and if this means when we collide in our values, when there really is a fundamental difference in this Chamber, when we must run the risk of closing down the Government in order to force change, then that is far better than to keep open the doors of that Government at the expense of having no change."

Third, the liberal Democratic leadership which has cried "foul" all day in fact brought us to this point. Let me use two examples of how we have stumbled into this situation. Back in the summer, when we brought up the reconciliation bill, we attempted to pass a genuine health care block grant program. We wanted to really send the money back home without strings, without redtape, without tightly controlled bureaucracy. We were blocked in this room by the liberal Democratic leadership that controls the Health Care Subcommittee, that controls the calendar, that controls the schedule. So, we end up with the result that folks back home who think they got a block grant are shocked to discover the same old redtape is there, the same old bureaucracy is there, the same old waste of money is there. Yet, we could have easily passed the block grant if only the leadership of this body had cooperated.

Yesterday, we added an amendment to the continuing resolution to provide pay raises for the air traffic controllers who obeyed the law and stayed on the job, for the two unions which stayed on the job and obeyed the law, for the people who helped America's airplanes move. Why do we have to bring that up in a special setting, in an unusual means? Because the Democratic leadership that controls the committee that would bring that bill

out does not want to do so except on their terms, on their schedule, to force the rehiring of people who broke the law.

In other words, it was a sheer test of will, and the question was: How could we legitimately use the rules of the House, legitimately use the Constitution as designed by our Founding Fathers, to achieve the American people's will instead of to go back and give in, to cave in to the policies of the past?

The question now is, Where should we go from here? We are probably today going to pass a resolution in both bodies which will go to the President to be signed, which will buy us 2 weeks. What, then, should we do? How, then, should we proceed? Let me offer two suggestions.

First, having taken these steps, having vetoed the resolution that was unacceptable, the President should now clearly and in writing outline a series of dramatic changes, changes comparable to the reconciliation Act. The time to move toward a balanced budget in the future is now, not the future. The time to pass the changes necessary is now, not the future. The next continuing resolution should include decisive changes that move us toward a healthy economy, lower interest rates, a more stable inflation rate, and the creation of real jobs that will last for the future. We are heading into a recession. We are heading into a period of continued unbalanced budgets, and I think the time to change both the recession and the unbalanced budget is right now.

□ 1520

So I would hope that President Reagan would greet the Congress, when it returns from the Thanksgiving holiday, with a decisive, clear message about just the kind of resolution he would sign next. It should have (a), (b), (c), and (d) spelled out, and they should be in bold strokes, boldly designed to achieve real change to meet the needs of the American people.

There is no need, at a time when every American family has to change its plans, for the Government not to also have to change its plans, and the people should not be told, "We can't move that quickly here," when we know that small businesses have to move that quickly and that families with members laid off have to move that quickly. There is no easy continuing resolution for an unemployed steelworker, there is no easy continuing resolution for an unemployed schoolteacher, and there is no easy continuing resolution for a small community hit hard when its factories close. If they have to change, is it not only fair for the Government to have to change with equal speed?

Finally, we need to move toward positive changes and toward developing the positive models for legislation for the future. It is vital that we get a commitment from the liberal leadership of this House that they will hold positive hearings and that they will give us fair opportunity. There is a road-show atmosphere being developed, as represented by recent committee hearings around the country that are brutally partisan, that are narrowly conceived, and that are stacked to insure that only the dedicated liberal welfare state gets its hearing.

We are in fact at a turning point of American history. We are moving toward a continuing opportunity state built with different principles and with different allies to achieve different goals. The leaders of this House have an opportunity to help in the transition from the dedicated liberal welfare state toward the emerging concerned opportunity state. To the extent it continues to stack the deck, whether it stacks that deck by unfairly setting up the Rules Committee, the Ways and Means Committee, and the Budget Committee, or whether it stacks that deck by unfairly setting up hearings that are clearly designed for the narrowest of partisan purposes, stacking the deck makes it harder for the American people, makes it harder for the Nation, and slows down the emergence of the opportunity state, and in the long run can be of interest only to those who place partisan advantage above the health of the Nation.

That, I believe, is a fair summary of where we are today, Mr. Speaker. We have a legitimate conflict over legitimate differences fought out in the best constitutional tradition and using precisely the tools that the Founding Fathers gave us.

INTRODUCTION OF BILL TO PROVIDE FOR PURCHASE OF OIL AND STRATEGIC MINERALS AND MATERIALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. PATMAN) is recognized for 5 minutes.

Mr. PATMAN. Mr. Speaker, last Friday I introduced a bill which will dedicate an estimated $3 billion a year for the purchase of oil and strategic minerals and materials. My purpose is to shore up our alarmingly deficient reserves, a deficiency that puts our Nation in grave peril.

The bill, H.R. 5063, would set aside Government revenues from oil leases on the Outer Continental Shelf for the purchase of oil for the Strategic Petroleum Reserve and for the purchase of nonfuel minerals and materials for the strategic materials stockpile.

A reliable and constant source of funds is needed quickly to assure that we will bring our reserves and stockpiles to adequate levels, levels necessary to avert national disaster should supplies be cut off.

To meet present stockpile goals for the eight minerals most vulnerable to disruption of supply will require $5.7 billion. These materials are considered absolutely indispensable to our industry and our national defense. Passage of H.R. 5063 will make funds available to begin these purchases.

We also face a serious shortage in the Strategic Petroleum Reserve. It is significantly behind schedule. It now contains about 200 million barrels of oil, only enough to cover a disruption in our supply of imported oil for approximately 50 days. We need to build this reserve to at least 750 million barrels.

The revenues from Outer Continental Shelf leases, as provided in H.R. 5063, would be distributed in the ratio of 80 percent to the petroleum reserve and 20 percent to the minerals and materials stockpile. These reserves will strengthen our national defense. They provide essential supplies to keep the Nation's industries operating in the event of an emergency.

This emergency could easily develop. The primary materials in our stockpile are extremely vulnerable to supply interruptions. The unstable nations of central and southern Africa control 64 percent of the world's vanadium, 95 percent of the world's chromium, 86 percent of the world's platinum, 53 percent of the world's manganese, and 52 percent of the world's cobalt. Persian Gulf countries produce 52 percent of the world's oil supply.

These are the parts of the world that Leonid Brezhnev was talking about when he said, "Our aim is to gain control of the two great treasure houses on which the West depends: the energy treasure house of the Persian Gulf and the mineral treasure house of central and southern Africa."

Our vulnerability is evident when we realize that one engine for an F-15 or F-16 aircraft requires 5,366 pounds of titanium, 1,656 pounds of chromium, 910 pounds of cobalt, and 171 pounds of columbium. And there are shortages of all these materials within our present reserves.

We must not allow our country to continue in this precarious situation. We must not leave our Nation in grave danger because we have failed to act. Other nations—for example, both Japan and Germany—are conscientious in filling their strategic reserves and stockpiles. Good stewardship and our national safety demand the same of us.

EXECUTIVE ORDER ON INTELLIGENCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. EDWARDS) is recognized for 60 minutes.

● Mr. EDWARDS of California. Mr. Speaker, it seems that in the next few days, the President will sign a new Executive order on intelligence. The new order will put the CIA into the domestic spying business in a manner inconsistent with, if not the letter at least the original spirit of the National Security Act. None of the possible changes which have been discussed in recent days alters that basic fact.

Newspapers around the country have been speaking out against the proposal. Indeed it is ironic, that newspapers have had more access to the document and more involvement in the process than most Members of Congress and that we have to look to them for our understanding of what the intelligence community has in store for us.

I refer our colleagues to the following editorials:

[From the Providence (R.I.) Journal, Oct. 10, 1981]

Once again, the rules may be changed for America's intelligence agents operating within this country. Restrictions may be relaxed, and such a change would be risky.

During the 1960s and 1970s, some intelligence operatives, mainly those from the Central Intelligence Agency, were found to have gone way out of bounds in their domestic activities. Following these disclosures, President Jimmy Carter ordered a halt to any CIA spying on Americans in this country. Now the Reagan administration is trying to ease the CIA back into surveillance and infiltration activities on U.S. soil. It's an unsound move.

Members of Congress and civil-liberties groups have already protested provisions of the proposed directive, arguing that they would put intelligence agencies back into the business of interfering with Americans, mostly political dissidents. Indeed, the latest version of the order would allow agents not only to infiltrate, but to disrupt any group they suspected of subversive action.

The House Intelligence Committee has begun to get cooperation from intelligence officials, who at first were reluctant to discuss some of the proposed rule changes. But some difficult questions, bearing on potential civil-liberties abuses, have not been adequately addressed.

Skeptics are properly concerned about letting intelligence agents back into covert domestic activities. They fear that such a move would risk the re-emergence of programs like Operation Chaos, run by the CIA counterespionage unit, which spied on hundreds of U.S. citizens opposed to the Vietnam War and others, and compiled dossiers by the thousand.

Intelligence agencies are rightly concerned about U.S. citizens and foreign nationals who may be engaged in illegal work to commit violence or undermine U.S. security. It is not always easy to distinguish necessary investigative work from actions that intrude upon constitutional rights, but the one clear dividing line set in the Carter order was to prevent the agencies engaged in foreign intelligence from encroaching on domestic areas—and this would be undercut by the Reagan proposal.

Civil-liberties defenders, including many congressmen, fear the exercise of surveillance and infiltration powers solely at the discretion of intelligence officials. They insist that such powers be authorized and circumscribed by law, to preclude any new abuses by over-zealous agents or their superiors. As one congressman put it, "History has taught us in the United States to trust in the rule of law and not of men."

Americans, and their nation, clearly must be protected against foreign agents bent on either espionage or sabotage, but a democratic government cannot afford to let its own agents operate outside the law and thus damage the fabric of constitutional protections. The intent of the existing order was to leave domestic intelligence work to agencies like the Federal Bureau of Investigation. This separation should be firmly maintained, lest some variant of Operation Chaos take root in the future.

[From the Rockford (Ill.) Register Star, Oct. 9, 1981]

In politics and government, the cure isn't always worse than the disease, but you can bet that it often is at least as bad.

They call it the pendulum effect: The worse the abuse, the more extreme the "cure."

Without question, the top American spy agency, the CIA, has been the victim of just that.

The abuses were bad—terribly bad. The CIA had abused its powers and its secrecy to carry out politically-inspired domestic surveillance operations against those whose only crime was political disagreement. It had launched overseas assassination attempts at great embarrassment to this naton—attempts so bizarre in their concept that even a James Bond would have been ashamed. It put itself above Congress, above the courts, above the constitution, above all law.

There were abuses completely unacceptable to anyone who believes in democracy.

So the CIA had its wings clipped, but clipped so badly that the agency has been virtually unable to function in its intended role as the intelligence gathering eyes and ears of the nation. The abuses were so bad that in seeking cures, the pendulum swung too far.

Now the Reagan White House has sent Congress a proposal to revise and possibly loosen some of the restrictions placed on the CIA.

Clearly reform is necessary. But, just as clearly, this represents another swing of that pendulum. And it must not be allowed to once again swing too far.

The White House would once again permit domestic surveillance (the job of police and the FBI, not the CIA). The attorney general or the CIA chief would be empowered to determine the legality—even the constitutionality—of each individual CIA action. That would give the CIA boss powers reserved for the Supreme Court.

How well would those powers be exercised? There's a clue in the fact that Justice Department officials refused, even in secret session, to discuss with congressmen how they woud interpret the law and the Constitution.

Clearly, the CIA wants once again to be free of all congressional or court controls—controls Congress must never again surrender. The American public must be protected from politically-inspired CIA actions. The agency must not ever again be given the right to make its own U.S. foreign policy. Cures are needed, but not cures which are worse than the disease.

[From the Sentinel Star, Orlando, Fla., Oct. 10, 1981]

Shortly after his inauguration last January, Ronald Reagan began to implement one of his key campaign promises: "to unleash" the Central Intelligence Agency. In addition to his suggestions that congressional restraint and review of overseas covert activities be severely reduced, Mr. Reagan also tried to get legal clearance for the CIA to re-enter the domestic spying arena.

The resulting storm of protest forced the new President to backtrack. He rescinded the proposal posthaste. But now, less than six months after that rather ignominious defeat, Mr. Reagan is trying again. This time, rather than softening some of the more objectionable sections of the proposal, he is lowering his saber and sounding the charge.

In addition to the clearance for CIA domestic spying contained in last March's proposal, Mr. Reagan is also seeking authorization for the CIA not only to infiltrate domestic groups but also to be able to "influence" those groups where the director sees fit. All of this presumably takes place out of the view of congressional oversight committees.

How ironic. This Neanderthal proposal comes from the same man who says he opposes the draft because of the unwarranted intrusion it represents on an individual's constitutional rights.

There is a lot of work needed to revise unwarranted restrictions slapped on the CIA intelligence-gathering activities after its Watergate abuses came to light. Still, the CIA's work lies outside American borders; the FBI is supposed to take care of what goes on here.

For either of those organizations, the idea of acting as government-agent provocateur should have been dispelled by the FBI's disastrous experiences with Gary Rowe. Mr. Rowe was an FBI informer successfully planted inside the Ku Klux Klan. But instead of being a gold mine of information, he turned into an FBI nightmare when he participated in the murder of a female civil rights worker.

In a nation founded on individual freedom, the government's role in spying on its people must be severely limited and based on the premise that it is the exception, not the rule. You don't defend America's unique structure of government by jumping all over the rights of individuals in the name of the greater good.

[From the St. Louis (Mo.) Post-Dispatch, Oct. 7, 1981]

The Reagan administration has drafted a presidential order broadening the authority of intelligence agencies that would clear the way for police state tactics in the United States. If put into effect as reported, the order, among other things, would: (1) grant the agencies, including the Central Intelligence Agency, "broad authority" to infiltrate American organizations and seek to influence their activities, (2) allow agents to review bank, medical, telephone and other private records, (3) permit CIA agents to follow and photograph Americans abroad, even if the Americans were not believed to

be agents of a foreign power or involved in terrorism or drug traffic.

All of these activities were curbed by an executive order issued by President Carter in 1978, an order that the Reagan draft is designed to replace. Despite assurances from administration sources that all intelligence activities would be conducted according to law and be approved by the CIA director or the attorney general, the draft order raises alarming possibilities for Orwellian intrusion into Americans' private lives by the government. Given the kind of snooping licenses proposed and the lack of accountability to independent authority, how could innocent citizens be sure that their personal records were not being secretly examined, that their organizations were not being manipulated by secret government agents, that they were not being shadowed abroad by suspicious sleuths?

The proposed order apparently would authorize by presidential fiat what was forbidden by a 1947 act of Congress which explicitly said the CIA "shall have no police, subpoena, law-enforcement powers, or internal-security functions." If congressional intelligence committees, where opposition has already arisen, do not seek to counteract this plan with more restrictive laws to curb intelligence abuses, they will be acceding to Soviet-style big brotherism.

[From the San Jose News, Nov. 5, 1981]

FREEDOM'S JUST ANOTHER WORD UNDER REAGAN ORDER ON CIA

When Sen. Barry Goldwater and Rep. Don Edwards agree on anything, it's significant. When they agree that a proposed new executive order governing CIA activities is a frightening threat to civil liberties, it's time to head for the tornado shelter and batten down the doors.

The conservative Republican from Arizona is chairman of the Senate Select Committee on Intelligence; the liberal Democrat from San Jose is chairman of the Subcommittee on Civil and Constitutional Rights of the House Judiciary Committee. Both are alarmed by the Reagan administration's proposed revision of Executive Order 12036, the document that defines the functions of the Central Intelligence Agency, the FBI and other components of the American intelligence machine. Goldwater and Edwards—and the rest of us—have a lot to be alarmed about.

The scariest part of the new order, and the once that has created the most controversy, is Section 2, Paragraph 9, which states: "No one acting on behalf of agencies within the Intelligence Community may join or otherwise participate in any organization in the United States on behalf of any agency within the Intelligence Community without disclosing their intelligence affiliation . . . except in accordance with procedures established by the head of the agency concerned and approved by the Attorney General."

Like a multiple warhead atop an ICBM, that paragraph, with its deceptively turgid wording and curiously inverted structure, contains a number of civil liberties bombshells.

In the first place, it would allow the CIA for the first time to infiltrate and engage in spying against organizations within this country. As a later passage makes clear, the CIA's sleuths would even be allowed to act as agents provocateurs. Under the existing executive order, signed by President Carter in January 1978, only the FBI can engage in such machinations.

Reagan's order also would give the CIA a much longer and looser leash. Under the present rules, acts of domestic counterintelligence must be approved in advance by the attorney general. The Reagan rules would require only that such activities conform to some general, as yet unspecified and inevitably secret "procedures" to be agreed upon by the CIA and FBI czars and the attorney general.

Invidious as it is, Section 2, Paragraph 9 is by no means the only frightening element of Reagan's proposal. The new order also would:

Remove the provision that Americans abroad can be subjected to continuing physical surveillance only if there is a reasonable belief that they are agents of a foreign power,

Make it possible for intelligence agencies to disseminate information they have collected about American citizens even if they are not the subjects of an investigation—"creating," as Edwards says, "serious privacy questions for Americans who are totally innocent of any wrongdoing";

Authorize the CIA to cooperate with state and local law enforcement agencies, a function currently limited to the FBI; and

Remove the requirement that the president receive a recommendation from the National Security Council before authorizing any covert actions overseas.

In drafting the National Security Act of 1947, the law that created the CIA, Congress took pains to bar the agency from any domestic spying role: "The agency shall have no police, subpoena (or) law enforcement powers or internal security functions." The consequences of ignoring that bit of legislative wisdom became chillingly clear a few years ago with the revelation that the CIA had spied on hundreds of thousands of Americans as part of "Operation Chaos," an elaborate—and unsuccessful—effort to prove that domestic dissenters were the puppets of sinister foreign powers.

Now the White House is about to give the CIA not merely a license but an official mandate to engage in precisely the same sort of police-state tactics again, with only the flimsiest procedural restraints. It's ironic that this administration, in the name of defending America and its institutions, is willing to endanger the very freedoms that distinguish this nation from its totalitarian enemies.

Congressman Edwards expressed the idea well in a different, but related, context: "If a free society is sacrificed for a better intelligence system, we have compromised our very goal."

Mr. Speaker, at the Subcommittee on Civil and Constitutional Rights' first hearing on the proposed executive order on intelligence activities, my distinguished colleague from Illinois, Congressman HAROLD WASHINGTON made a most eloquent opening statement about the dangers of permitting the CIA to become involved in domestic intelligence activities. He referred to his own experience as the target of domestic surveillance in Chicago in the 1960's and warned against any renewal of such illicit activities.

I urge my colleagues to read his statement. I think it raises important questions in the current debate over the direction of our intelligence policy.

OPENING STATEMENT OF CONGRESSMAN HAROLD WASHINGTON BEFORE THE SUBCOMMITTEE ON CIVIL AND CONSTITUTIONAL RIGHTS

Mr. Chairman, I commend you for holding these hearings.

I want to start by making it clear at the outset that I support the law enforcement and intelligence functions of the federal government. They are essential to the protection of our freedoms and of our social order. But the way to protect a free and open society against totalitarianism abroad is not to replicate the KGB at home. It has never been demonstrated to me that you can fight totalitarianism with totalitarianism, and history is replete with examples of what happens when you try to.

I do not want my remarks to be characterized as being against the Administration or against the intelligence community. This is not a football scrimmage. I am motivated by a sincere commitment to preserving the democratic ideals of this country, and also by a desire to protect the agencies themselves from political abuse.

The Administration has put forth a number of proposals which would significantly alter the ability of the Congress and of the public to guard against abuses. The Intelligence Agents Identities Act would make it a crime to disclose the identity of an intelligence agent, even absent malicious intent.

Proposed changes in the Freedom of Information Act would make it difficult for an individual to learn if he were a target of surveillance, and would deny a meaningful opportunity to correct misinformation which had been collected by government agencies.

Proposed changes in the exclusionary rule governing criminal prosecutions would remove many practical incentives for law enforcement agencies to stay within the bounds of permissible conduct.

Removal of the 19th century prohibition against military involvement in domestic law enforcement—a doctrine known as posse comitatas—has paved the way for a significant erosion of the separation between the armed forces and civilian law enforcement agencies. It is interesting to note that the same rationale—the need to strengthen enforcement of drug abuse laws—is being used here to extend the domestic jurisdiction of foreign intelligence agencies. While we don't approve the illegal use of controlled substances, it should be understood that this loosely stated rationale could extend the CIA's domestic intelligence and surveillance activities to cover the day-to-day affairs of many millions of Americans who, regardless of how we feel about it, make occasional use of marijuana or cocaine.

It is my understanding from newspaper accounts and the Committee's staff memo that the proposed Executive Order would also have a significant chilling effect which could undermine the functioning of other federal agencies. It provides for surveillance of U.S. officials, ostensibly to make sure that they are not under hostile surveillance.

It resolves a turf battle between the FBI and the CIA by giving virtually untrammeled powers to the CIA.

It orders heads of all executive departments and agencies to honor CIA requests for cover and support, and allows the CIA to dictate budgetary reprogrammings within other agencies, subject only to appeal directly to the President by the agency head involved.

It protects the CIA from embarrassment by providing for procedures to protect not only its sources, but its methods and analytical procedures, making it difficult to assess the validity of CIA conclusions and analyses of events. Any bureaucracy would love such a provision, but I doubt it contributes much to national security.

The proposed Executive Order allows the infiltration of domestic organizations and provides that this infiltration can also be used to influence the activities of the organization or its members if this is approved by the Attorney General. The Order would permit the collection and dissemination of information on U.S. citizens gained coincidentally through aerial reconnaissance flights over the United States—provided only that the purpose of such flights was not to target a specific individual. According to the Washington Post, these reconnaissance photographs can read a license plate.

The Order authorizes mail openings and other forms of domestic surveillance, subject only to procedures approved by the Attorney General.

It establishes no internal or external mechanisms for reporting or correcting or punishing violations. It provides only that the Attorney General shall report to the President violations of the Constitution or the laws of the United States—of which he somehow becomes aware. No other action is prescribed in the Order.

Finally, the proposed Order contains a catch-all phrase which effectively short-circuits what few protections it contains. In addition to its other overly-broad authorizations, the Order contains a catch-all authorization to permit such other intelligence activities as the President may direct from time to time.

Mr. Chairman, I submit that this proposal goes too far in creating the framework for precisely the sort of regime that we oppose abroad. There is little opportunity for review, and a very great likelihood for intimidating those who demand review.

Laws and regulations of this finality should not be passed for the moment. This is very likely to be abused over time.

The proposed Order would undermine the trust and confidence of our citizens in their government.

It would give rise to the worst sorts of political abuses, and force dedicated intelligence officers to spend time and resources tracking domestic political opponents of whoever occupied the oval office at the time. It would also bring chaos to the intelligence community every time there was a change of Administration.

Let me give you an example of the sorts of abuses that can occur. You are all aware of the FBI's attempted character assassination of Martin Luther King, and of the Bureau's infiltration of the Muslims and the Black Panthers, in a scheme to get these two groups to destroy each other. I was myself the target of surveillance by the Chicago Police during the Watergate era that most of us slept through.

Granted, this was not necessarily FBI or CIA surveillance. However, had it not been for the Freedom of Information Act, and a suit, I never would have obtained the information in my file. Before coming to the Congress, I was a member of the Illinois General Assembly for 16 years, including services on the Judiciary Committee of the State Senate. The only things I was engaged in were representing my District, politically opposing policies of the late Mayor of Chicago and his political machines, and combating crime and attempting to improve law enforcement in my community.

Because of this, I was subjected to surveillance. The records I obtained, which I am making available to the subcommittee, show that I participated in an annual children's parade, spoke to churches and made speeches before community organizations. In order to obtain these records, it was necessary for police agents to infiltrate religious and community groups. It was an enormous waste of time and public money. The police tactics caused distrust and resentments within the community which undermined respect and cooperation between citizens and the police. The fear and suspicion still lingers within many neighborhoods. Following the public outcry over the assassinations of Mark Clark and Fred Hampton, a request was made that 5 members of Congress investigate the shootings. This resulted in the police putting these Members of Congress under surveillance and opening files on them.

Mr. Chairman, I think you can understand that my concerns are genuine. I don't want to see a situation develop in which, for example, our students blame the CIA for everything that happens domestically, just as French or West German students now blame the CIA, rightly or wrongly, for everything that happens overseas. I don't want to see a situation develop where revelations of the sort of black-bag activities that have gone on overseas produce doubts and questioning among our own people about the activities of our government at home. I don't want to see a situation develop again in which our best thinkers and scholars and artists are afraid to express themselves publicly, or even privately to their friends, without fear of being caught up in some widely flung security apparatus, and having their thoughts and words misunderstood.

Finally, I don't want to see political expression and political activity driven underground, away from the light and exposure of public scrutiny, where it can become paranoid and warped. Where it will become paranoid and warped.

I think these are legitimate concerns. And I hope the Committee will continue these hearings until such issues are resolved.

I also wish to incorporate into the RECORD the following editorials:

[From the Chattanooga Times, Oct. 13, 1981]

MOVING TOWARD "1984"?

Coming from an administration pledged to "get government off the backs of people," a proposal that congressional sources say would strengthen the domestic activities of intelligence agencies, is strikingly paradoxical. Small wonder that the proposal, prepared by an interagency group headed by the Central Intelligence Agency, has stirred intense opposition from some members of the Senate Intelligence Committee. They are concerned, rightly, that the proposal would in effect license police state tactics in this country.

If the recommendations were implemented as reported, the proposal would, among other things:

Grant agencies, including the CIA, the right to infiltrate domestic organizations and try to influence their activities.

Delete current restrictions on the CIA's conduct of covert actions within the U.S.—if those actions were not intended to influence official policies or politics.

Allow the CIA to follow and photograph American citizens abroad—even if they were not suspected agents of another country or involved in illegal activities.

Free intelligence agents to review private citizens' personal bank, medical and other records.

President Carter prohibited these and other activities in an executive order signed in 1978 following revelations that the CIA had abused its authority in previous years. The Reagan administration claims that its recommendations would still ensure that any actions would be conducted legally, and would require prior approval by the attorney general or the CIA director. And it points out that the current draft of the proposal is much weaker than previous ones.

But that evades the real issue. Under the wide latitude permitted by the proposal, Americans would be vulnerable once again to an Orwellian abuse of power. We already know how widespread that abuse was when the CIA was explicitly forbidden to conduct domestic operations. How much more so would it become if the CIA were given broad new authority? In the absence of a requirement that the CIA be accountable to some independent authority, what recourse would an innocent citizen have if he suspected his personal records were being secretly reviewed, or an organization to which he belonged was being manipulated by intelligence agents?

When the CIA was created in 1947, Congress explicitly directed that it "shall have no police, subpoena, law enforcement powers, or internal security functions." Sen. Joseph Biden, D-Del., a member of the intelligence committee, has vowed to "spend the rest of my career in the Senate opposing this order." He deserves the support of his colleagues, including both Tennessee Senators. Otherwise, they, and their counterparts in the House, will be condoning ominous big-brotherism.

[From the Arkansas Gazette, Oct. 14, 1981]

UNLEASHING THE CIA

President Reagan has proposed a new framework for the Central Intelligence Agency that would give its agents broad authority to spy on Americans and to infiltrate domestic organizations with the intent of influencing their activities.

One may accept the protestations of administration officials that the proposed guidelines would be interpreted and implemented by the CIA and the Justice Department carefully, with due regard for civil liberties, and still be alarmed that the nation's intelligence agency can be clothed with such power. "History has taught us in the United States," Representative Albert Gore Jr. of Tennessee said of the administration's reassurances, "to trust in the rule of law and not of men."

History needs to be searched no further back than the '70s to show how national security can be used as a loose cover for infringing on the liberties of innocent Americans for purposes unrelated to the security of the country. It was owing to the involvement of CIA agents in Watergate-related activities and in such sordid work as mind-control experiments on unsuspecting Americans that President Jimmy Carter issued new rules, through an executive order in 1978, to circumscribe CIA work.

The longer tether that the intelligence community would receive under the guidelines proposed last week by an interagency group for the President is more worrisome because the administration also is moving in several ways to curtail oversight of domestic

intelligence activities. Taking advantage of a wave of revulsion over the mass identification of secret agents by former agent Philip Agee and Louis Wolf, who edits a counterspy magazine, the CIA wants to make it a crime for anyone to identify an intelligence agent, even if the purpose is to expose illegal activities by the agent. The bill might have blocked many of the Watergate disclosures if it had been in effect.

Mr. Carter's 1978 order prohibited the CIA from infiltrating domestic groups, but Mr. Reagan is proposing to lift that ban so that, with the approval of the attorney general, agents could penetrate organizations and try to direct their policies. The intention apparently is to influence groups promoting the interests of foreign countries—allies and enemies—but the authority is broader than that. The CIA could gather all kinds of personal records on Americans, regardless of whether they were breaking any laws.

The United States has never had a secret police and the President isn't proposing one.
* * *●

● Mr. KASTENMEIER. Mr. Speaker, last week the Subcommittee on Civil and Constitutional Rights of the House Judiciary Committee held a hearing on the proposed Executive order on intelligence activities. The order, soon to be promulgated, gives the CIA a new license for domestic spying. Despite the dramatic shift in intelligence policy this proposal represents, Chairman DON EDWARDS' hearing was the first time any public discussion of the order had taken place.

The witness was the distinguished former Senator from Idaho and chairman of the original Senate Select Committee on Intelligence, the Honorable Frank Church. Mr. Speaker, I believe Senator Church's concerns should be shared with all Members of the House; for that reason, I wish to insert in the RECORD portions of his prepared testimony:

STATEMENT OF HON. FRANK CHURCH BEFORE THE SUBCOMMITTEE ON CIVIL AND CONSTITUTIONAL RIGHTS OF THE HOUSE JUDICIARY COMMITTEE, NOVEMBER 12, 1981

In 1928, Justice Louis Brandeis wrote:

"Decency, security and liberty alike demand that government officials shall be subjected to the same rules of conduct that are commands to the citizens. In a government of laws, existence of the government will be imperiled if it fails to observe the law scrupulously. Our government is the potent, the omnipresent teacher. For good or ill, it teaches the whole people by its example."

Those words have lost none of their cogency with the passage of time. It remains true that there can be no preservation of democratic government or individual liberty outside the law.

Nevertheless, when judged by past performance, many engaged in our government's intelligence activities seem to view the law quite differently; they apparently resent its constraints, and regard it not merely as a nuisance, but as an impediment to national security. Due to the nature of their work, they have, at times, deemed themselves entitled to disobey the law.

Those who hold this belief will be pleased with the newly proposed Executive Order to govern our intelligence agencies, now in its third revision. This newest version is plainly designed to enlarge the role of the CIA inside the United States, with respect to spying on American citizens and conducting covert operations in our own country, while diluting the role of the Justice Department as a check on the legality of these activities.

Expanding the scope of the CIA's involvement inside the United States is, in my judgment, as unwise as it is unwarranted. In this regard, I agree with the assessment made a few months ago by Admiral Bobby Inman, Deputy Director of the Agency, when he declared that the "job of the CIA is abroad."

Whatever view one takes of covert action abroad, the need for the CIA to comply with the law in its treatment of American citizens here at home, should be less ambiguous. Yet, the Senate Select Committee on Intelligence, which investigated the intelligence agency during 1975 and 1976, found the CIA to have been deeply involved in blatantly illegal conduct designed to spy upon, injure and harass thousands of innocent Americans. The factuality of the Committee's findings has withstood the test of time, and to this very moment, remains unchallenged.

[For example,] between 1967 and 1974, the CIA conducted Operation CHAOS, which began as an investigation abroad of any possible connection between anti-American foreign elements, on the one hand, and the Peace Movement in the United States, on the other. Soon, however, the investigation was spread so large as to engulf the lawful domestic activities of Americans protesting the Vietnam War. Before it finally ended, CHAOS had amassed some 10,000 intelligence files on American citizens and groups and indexed 300,000 names of Americans in CIA computer records, all without establishing the foreign connection for which it presumably searched!

It is therefore prudent, in my view, to limit the CIA to the field of foreign intelligence, for which it was created, leaving domestic intelligence and counter-intelligence activities to the FBI. In this, I agree with the argument recently advanced by Stansfield Turner, former CIA Director, who wrote:

"CIA officers are not trained to operate in the domestic environment, where regard for the law is a primary consideration. The ethic of intelligence is to get the job done in spite of local laws. It is unwise and unfair to force CIA operations into the domestic arena. It isn't necessary either, for that is exactly where FBI officers are trained to operate. * * * They have over many years proved themselves to be professionals at both counterintelligence and the gathering of positive intelligence. With more emphasis on the latter, they could cover whatever tasks the Administration has in mind for the CIA."

If the newly proposed Executive Order on Intelligence Activities is not modified in such a way as to retain the present restraints on CIA involvement in our domestic affairs, not only will the old frictions between the CIA and the FBI be rekindled, but the door will be thrown open again to the compilation of CIA dossiers on hundreds of thousands of law-abiding American citizens.

Concerning this, the proposed order leaves little doubt. For example, the CIA may now collect only three types of information about U.S. persons inside the United States:

(1) Information regarding commercial organizations or activities;

(2) Information obtained from co-operative sources, and

(3) Information regarding individuals about whom there is reason to believe they were acting on behalf of a foreign power.

Under the proposed order, these limitations are removed. There is no requirement that the individual about whom information is being collected be "reasonably believed to be acting on behalf of a foreign power," as the current order provides.

Other provisions in the proposed draft describe the investigative and information gathering techniques which can be used for this purpose. They include: infiltration of domestic organizations, access to bank, medical, telephone and other private rec- ords, and recruitment and assignment of informants.

If we are capable of learning from experience, we should not expose the American people once again to such broad-based surveillance by an agency created for the purpose of spying on foreigners.●

● Mrs. SCHROEDER. Mr. Speaker, there has been a great deal of discussion in the press and here in Congress in recent weeks about the proposed Executive order on intelligence activities and the extent to which it will permit the CIA and other intelligence agencies to engage in domestic intelligence activities.

Some people seem to think that, with a deletion here and a little rewording there, all the problems in the draft order will be fixed. Hearings held by the Subcommittee on Civil and Constitutional Rights of the House Judiciary Committee last week made it clear that this is not the case.

Because not all our colleagues have had the same opportunity to analyze the draft that the subcommittee members have had, I would like to call their attention to the following analysis written by the subcommittee chairman, Congressman DON EDWARDS. The column appeared in the San Jose Mercury on November 5, 1981. The article follows:

[From the San Jose Mercury, Nov. 5, 1981]

REAGAN'S PROPOSED EXECUTIVE ORDER WILL UNLEASH THE CIA

(By DON EDWARDS)

The public seems to believe that recent statements by the Senate and House Intelligence committees have cured the enormous defects in President Reagan's proposed Executive Order on Intelligence Activities. This is an erroneous perception.

All that has happened for certain is that Sen. Barry Goldwater, R-Ariz., has recommended one change—that the new order not include CIA authority for undisclosed participation in and influencing of domestic organizations. Rep. Edward Boland, D-Mass., chairman of the House committee, has also made recommendations which, again, do not begin to deal with the numerous problems raised by this proposal.

There is no sign from the CIA or the White House that any of these suggestions made hat-in-hand by members of Congress will be considered. But, whether or not any of these suggestions are accepted, it is important to bear in mind that the draft contains many other unnecessary and dangerous changes.

Those provisions, if included in the final order, would transfer many domestic spying activities to the CIA from the FBI, without most of the regulatory, statutory and institutional restraints that have kept the FBI from abusing this authority for the past five years.

The proposed order transfers responsibilities to the CIA, eliminates key definitions (such as what constitutes "terrorism" and even "intelligence"), discards restraints on the use of mail openings, and waters down the authority of the nation's chief law enforcement officer—the attorney general. The net result is a presidentially endorsed blank check to the CIA to spy on Americans.

When the FBI and CIA operated with such a blank check in the past, the result was not only massive intrusions into individual and organizational rights, but also the failure to gain any useful information.

There are several historical reasons why we should view with skepticism any move to authorize CIA activities within the United States. When Congress created the CIA in 1947, it wanted to make sure that such a secret, international agency would not be engaged in spying on Americans. The authorizing legislation spelled out this prohibition. However, beginning in 1952, and operating secretly, the CIA violated this standard on a wholesale basis.

At LaGuardia Airport in 1952 and later at Kennedy Airport, the CIA began a massive letter-opening program. It opened the mail of private organizations such as the American Friends Service Committee. It opened overseas mail to congressmen including Sens. Edward Kennedy and Frank Church. By 1973, when the program was halted by the Post Office Department, the CIA had reviewed 28 million pieces of mail, had photographed 2 million envelopes, and had opened 215,000 letters. In addition, the CIA's Operation Chaos had a cross index of more than 300,000 names of Americans.

The disclosures of this shocking CIA misconduct by the Church Committee in the Senate and the Pike Committee in the House resulted in presidential orders which generally prohibited the CIA from operating within the United States. The FBI was responsible for counterintelligence and internal security, supervised by the attorney general. Presidents, both Democratic and Republican, agreed to these rules, and the CIA is today operating under Executive Order, 12036, signed by President Carter in January 1978.

The proposed order represents a dramatic departure from this scheme. Written in secret, discussed only behind closed doors, the order presumably will be signed soon by President Reagan. It then will be published in the Federal Register. Before it becomes final, however, I believe the public has a right to know what the CIA has in store for us.

Currently, the attorney general must approve CIA counterintelligence activities within the United States. Under the proposed order, the director of the Central Intelligence Agency has an equal role with the attorney general. Now, an American under surveillance must be "reasonably believed to be acting on behalf of a foreign power." The proposed order deletes this requirement—no foreign connection is necessary.

Currently, undisclosed CIA participation in domestic organizations is limited to certain carefully defined situations and requires the attorney general's approval. Influencing the organization, its members, policies, or activities is prohibited. The draft order permits CIA infiltration under much broader circumstances and, in some circumstances, influencing the organization is permitted as well.

The current order requires warrants based on probable cause before mail can be opened in the United States. That provision is deleted from the proposed order.

Now, CIA involvement in terrorist investigations in this country requires a showing that the terrorist conduct is reasonably believed to be on behalf of a foreign power. The draft order deletes the foreign power connection. Presumably the CIA could investigate purely domestic groups, now investigated by the FBI under attorney general guidelines. These guidelines would not apply to the CIA, so the only restrictions on CIA activity would be those in the proposed order.

Currently, the CIA is prohibited from conducting covert actions in this country. Under the proposed order, the CIA can conduct covert actions in this country in certain situations.

Currently, the CIA must report evidence of criminal violations by its employees to the attorney general. Under the proposed order, only those crimes agreed upon in advance in general procedures established by the attorney general and the CIA director must be reported in a manner consistent with protection of sources and methods. This may mean that the CIA could encourage its employees to act outside the law and then not report them.

These and other changes are of such a serious nature that they deserve to be aired in a public forum. The CIA has not come forward to explain why these changes are necessary or how they are to be squared with the long standing commitment of the Congress to keep the CIA out of the domestic spying business. At the very least, the American people deserve an explanation.●

● Mr. WASHINGTON. Mr. Speaker, I would like to join with my colleagues from the House Judiciary Committee in expressing concern about the proposed Executive order on intelligence.

Our intelligence agencies have a difficult and dangerous task. I certainly do not want to see unnecessary impediments put in their way.

But I also do not want to see the CIA exceed or stretch the bounds of the Constitution and laws of this country. I believe this draft order authorizes this kind of encroachment by giving the CIA license to operate in this country.

Mr. Speaker, I am not alone in this view. I would like to share with my colleagues several editorials from newspapers around the country expressing alarm at what may lie ahead if this order is promulgated.

[From the Chicago Tribune, Oct. 15, 1981]

THE SEPARATE REALMS OF ESPIONAGE

The assassination of Anwar Sadat is being used as evidence that U.S. intelligence agencies ought to have a freer hand in plying their secret trade. It is cited as an example of the kind of terrorist threat that faces the United States. And though nobody is quite sure who was behind the murder of the Egyptian president, the event does strike a chord of fear.

Within the Reagan administration there has been a good bit of enthusiasm for lifting restrictions on U.S. intelligence agencies and enacting new laws to protect American spies. A bill to make it a crime to reveal the identity of a clandestine U.S. intelligence agent, whether or not the information came from classified sources, has already passed the House of Representatives. Like its predecessors, the Reagan administration has declined to rule out using journalists, academicians, and clergymen as potential spies abroad. There are efforts to grant intelligence agencies a broad exemption from the provisions of the Freedom of Information Act. And now a new draft of a proposed executive order which would permit CIA covert operations within the United States has surfaced.

No one should doubt that the United States exists in a dangerous world, nor that it must engage in various secret intelligence activities in order to protect itself from the clandestine machinations of terrorist groups and adversary nations. It should also be beyond argument that the post-Watergate bloodletting by congressional committees did damage to the CIA, FBI, and other agencies.

The rules governing intelligence operations—whether in internal agency guidelines, executive orders, or statutes—should not be exempt from reassessment based upon the experience of several years in which they have been in place. But cautious, practical review has not been the approach. Changes are put forward upon the crudest arguments. Appeals to fear rather than to experience rule the debate. There has been insufficient attention paid to the insidious danger of unfettered domestic spying and to what is supposed to be gained by taking the fetters off.

What reason is there, for example, to permit the CIA to do secret investigations within the United States? It is not as if under existing rules no U.S. agency can track potential terrorists, espionage agents, and domestic dissidents, likely to commit political violence. The FBI has the authority to operate in these areas within the United States. And it has done a good job of it.

There is a good reason, on the other hand, to keep the CIA out of domestic clandestine operations. That agency operates mainly abroad, where the danger of infringing upon the rights of Americans is smaller and where the usual standards of conduct that Americans properly insist upon at home simply do not apply. The CIA has developed certain habits abroad that would not be appropriate here. But the FBI is essentially a law enforcement organization. Its habits accord with the standards of behavior the Constitution requires of the government in its interaction with Americans. To be sure, the rules are slightly different when the FBI engages in counter-intelligence and counter espionage investigations. But the habit of restraint is significant.

Unless the advocates of the proposed new executive order provide some other persuasive reasoning, it would seem that the only objection to the FBI's conduct has been this very sense of restraint. And that makes the proposal ominous. It is very important to the morale and liberty of Americans that the rules of the national security game at home and abroad be kept quite distinct and separate. The distinction should not be sacrificed simply because of a vague sense of fear and appeals to unspecified inchoate dangers.

At the same time, there should be no objection to some revision of the rules of intel-

ligence, so long as the case for it is persuasively made. Certainly the CIA and FBI have a tremendous practical problem simply keeping up with the paper work the Freedom of Information Act produces, and some modification to ease the bureaucratic burden might be appropriate. Legislation to protect the identity of secret U.S. intelligence operatives abroad is in itself a good idea. But the bill that passed the House goes so far in limiting what private citizens may say and write that it is probably unconstitutional. The FBI, which supports the rules that govern its conduct of intelligence investigations, has considered recommending some modest changes in the language to make them more precise and more practical. These deserve to be accorded some weight.

But the intelligence zealots within the Reagan administration must not be allowed to translate their appeals to fear into a sweeping repeal of all limitations on the activities of the FBI and CIA. The heyday of U.S. intelligence, it must be remembered, did not bring us comfort and security. It brought us fear and animosity and the inevitable public reaction that damaged the intelligence agencies in the first place.

[From the Kansas City Times, Oct. 9, 1981]

THE CIA AT HOME

Civil libertarians are concerned, and for good cause, about an administration proposal that is being interpreted by some members of Congress as greatly expanding the Central Intelligence Agency's authority to spy on Americans. The Justice Department has been asked to study the draft document to see how it would apply to the CIA's domestic activities.

Some members of the Senate Select Committee on Intelligence, which has oversight authority over intelligence operations, have concluded that the proposal would allow U.S. agents to inspect medical, telephone, bank and other private records and to surreptitiously invade organizations in this country. No longer would intelligence agency chiefs be required to report suspected federal violations by their workers.

That appears to ease provisions of Executive Order 12036, issued by Jimmy Carter, then president, in January of 1978. Both the Carter order and a Ford administration directive that it replaced put limitations on the CIA. That was grounded in need. Late in 1974 it was revealed that the CIA had spied on thousands of Americans. This and other revelations led to two investigations of the CIA. These probes found that the intelligence agency had conducted drug experiments on unsuspecting victims and had engaged in covert activities abroad far beyond the purview of its intelligence-gathering assignment.

Though there are protections in federal law it is disturbing to hear that the CIA wants authority for domestic investigations. Traditionally that has been the jurisdiction of the Federal Bureau of Investigation. Certainly the CIA has plenty to do—it has been faulted for failing to do an adequate job on its international mission—without turning its network against private citizens in this country. The days of CIA-FBI jealousy and bickering surely are over.

Police state tactics have no place in a free society. These practices can create a climate of fear and infringe on the rights of association, speech and democratic participation. Left to their own devices, many intelligence officials would have unrestricted rein to combat what they see as dangers to the Republic. They tend to overlook the fact that their tactics many pose a greater threat to liberty than the individuals they would investigate.

Let's leave domestic espionage to the FBI and insist on close cooperation between it and the CIA. The two agencies are supposed to be working for the American people, not against each other.

[From the Idaho Statesman, Oct. 9, 1981]

SPYING ON AMERICANS

President Reagan's unrelenting support of a proposed executive order giving the Central Intelligence Agency free reign to infiltrate American organizations and secretly influence their activities is almost beyond belief. It contradicts a principle of freedom upon which this country was founded, that American citizens have the absolute right to organize politically without fear of government interference.

Supposedy, the CIA would employ such tactics only to investigate dangerous terrorist groups bent on violent overthrow of the United States. History, however, proves that people in power are apt to use such infiltration to attack their political foes. Richard Nixon proved that when he used the CIA and the Federal Bureau of Investigation to disrupt anti-war activities in the Vietnam era.

What Reagan proposes is more dangerous than what Nixon did. During Nixon's administration, the infiltration of political groups was done on the sly and without legal sanction. A number of the culprits—Nixon among them—were eventually brought to judgment, their actions condemned.

Reagan proposes to give official approval of the same tactics—to encourage them. As Sen. Patrick Leahy of the Senate Intelligence Committee said, that amounts to the establishment of the CIA as an internal police agency.

Though the comparision may seem outlandish, the whole concept is reminiscent of the Soviet Union and Eastern Europe, where it is all but impossible to organize political dissidents because the true dissidents never know which one of their supposed allies is a government informer.

Furthermore, Reagan's new role for the CIA is not needed. The FBI already has ample authority to conduct counterintelligence activities within the country.

The CIA's mission is to gather foreign intelligence. To carry out that mission it sometimes must hide its activites behind the shield of national security. Such a shield is necessary if the CIA is to operate in secret abroad, but it is a danger at home. If Reagan's proposal is enacted, one can easily imagine the CIA investigating labor groups, anti-nuclear activities, environmentalists or non-establishment political organizations on the pretext that they pose some threat to national security.

The United States simply cannot allow the government to spy on its citizens in that manner. Those who oppose such surveillance should write the White House, members of Congress from Idaho and the Senate Intelligence Committee.●

THANKS FOR THE MEMORIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, in the November 22 issue of Parade magazine, Bob Hope, America's most popular and beloved citizen, has given us a humorous but moving Thanksgiving message which I am sure expresses the sentiments of all Americans as we approach our national day of Thanksgiving. I include Mr. Hope's beautiful tribute under the title "Thanks for the Memories" in full in the body of the RECORD.

[From Parade, Nov. 22, 1981]

THANKS FOR THE MEMORIES

(By Bob Hope)

Exactly 361 years ago, the Pilgrims landed in America. It was great timing. A year later and they wouldn't have had a place to park.

When Parade asked me to do an article about Thanksgiving Day, I had a sneaking suspicion it was because I was present at the first celebration held by the Pilgrims. Well, I wasn't. You can ask George Burns—he was.

The Pilgrims gave thanks for their survival in a hostile atmosphere. Their daily existence was fraught with peril. They had none of the services and comforts of our industrial age . . . freeways, smog, water pollution, inflation and television. And never did they dream that someday a turkey would cost more than the entire Mayflower.

Today, as I give thanks for all my blessings, I can't help but think back. Who could have imagined when, at the ripe old age of 3, I landed on these shores from England that this marvelous country would provide me the opportunity literally to fulfill my wildest dreams—that I would someday be given the chance to reach for the stars and because of you, grab a whole galaxy. Where else could a former two-a-day hoofer who grew up in Cleveland be privileged to play golf with Presidents, sell toothpaste on the radio, make movies and be invited into millions of your homes via television? Thanksgiving is always tough for me. I spend so much time counting my blessings, I don't have time to eat the turkey.

Of course, I have some fond memories of Thanksgiving Days past. When I was a boy in Cleveland, Mother would put all the food out on the table in front of me and my six brothers, all of whom had teeth with power steering. We'd devour every morsel, then stare at each other. One year, Father tried to take a picture of us eating, but to this day there hasn't been a camera invented that can take a picture at such high speeds.

Last year, I had Thanksgiving dinner at the home of my daughter-in-law. She had a frozen turkey, frozen stuffing, frozen potatoes and frozen pies. She didn't announce dinner was ready . . . she pointed to the food and said, "Mush!"

On Thanksgiving, we often visualize the Pilgrims as almost comic characters, with those hokey hats and ridiculous pants. But when we think seriously, we give fervent thanks for their courage, persistence and intelligence in coping with hardships that stagger the mind. Had they lacked these qualities, New England would still be the happy hunting grounds of some tribe of Indians and, as for the rest of the country, it would be Nowhere, America.

Instead, from sea to shining sea, we have a bountiful land populated by 230 million souls of every race, religion and political persuasion. For the most part, they do their work, pray to their God and serve their communities with good humor, secure in the knowledge that whatever their role in life, it

will continue on an even course for the foreseeable future. For 205 years, we have had continuity of government, continuity of social institutions that benefit the vast majority, a continuity of unity even in our darkest days of war and depression. There are very few countries in the world where this is true.

We must give thanks that in this dangerous world, we're strong enough to answer any challenge to our way of life; that our elected and appointed leaders, whether we agree with them or not, are trying every day to make things better for us; that, thanks to our abundant economy, the vast majority of Americans can enjoy their leisure any way their hearts desire; that this is still the land of opportunity, where every individual, through his own initiative, talents and brainpower, can reach his potential.

All this because those comic-opera Pilgrims clawed, fought and thought their way to a better life than they'd known before and set the foundations for the moral, democratic, religious society we have today.

Thanksgiving Day is a time when we share what we have with those less fortunate. I'm happy to see that in Washington there isn't a Republican who isn't taking a Democrat to dinner.

Personally, every day is Thanksgiving Day for a guy who's three score and 18 (a sneaky way to give your age), whose wife, children and grandchildren are thriving, who's doing what he loves best, who's still traveling around the world, and who's still getting laughs on television, in personal appearances and on the golf course.

Today, as Americans across the country gather with their families and loved ones to count their blessings, I'd like to add this Thanksgiving wish:

May every nation on this globe at long last achieve a permanent peace so that, someday soon, we may raise our voices as one, giving thanks to our Creator for a world united in mutual respect and brotherhood and in the fervent hope of a brighter future for all mankind.●

RECESS

The SPEAKER pro tempore. Pursuant to the order of the House of November 19, 1981, the Chair declares the House in recess subject to the call of the Chair.

Bells will be rung 15 minutes before the House reconvenes.

Accordingly (at 3 o'clock and 30 minutes p.m.), the House stood in recess subject to the call of the Chair.

□ 1740

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. FOLEY) at 5:45 p.m.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint and a concurrent resolution of the House of the following titles:

H.J. Res. 368. Joint resolution making further continuing appropriations for the fiscal year 1982; and

H. Con Res. 228. Concurrent resolution providing for an adjournment of the House from November 23 to November 30, 1981, and an adjournment of the Senate from November 24 or November 25, to November 30, 1981.

DEAUTHORIZING CERTAIN PROJECTS WITHIN JURISDICTION OF ARMY CORPS OF ENGINEERS

Mr. YOUNG of Missouri. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1493) to deauthorize several projects within the jurisdiction of the Army Corps of Engineers, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

Mr. VOLKMER. Mr. Speaker, reserving the right to object, I do not plan to object, but I would like to ask the gentleman from Missouri (Mr. YOUNG) if it is not true that included with this bill also is an amendment to change the name of Clarence Cannon Dam and Reservoir to Clarence Cannon Dam and Mark Twain Lake in my district.

Mr. YOUNG of Missouri. Mr. Speaker, if the gentleman will yield, let me state that the gentleman from Missouri (Mr. VOLKMER) is correct.

Mr. VOLKMER. Mr. Speaker, I want to congratulate the distinguished gentleman from Missouri for his efforts to bring this bill to the floor and for including the amendment changing the name of Clarence Cannon Dam and Reservoir to Clarence Cannon Dam and Mark Twain Lake.

By naming this reservoir the Clarence Cannon Dam and Mark Twain Lake we honor two of the most notable men of northeast Missouri. Clarence Cannon served with distinction in this body for 41 years. As chairman of the Appropriations Committee, Representative Cannon had a profound impact on the events of this Nation. He was an outstanding legislator, admired and respected by all. I am proud to follow in his footsteps by representing the same district.

We all know of Mark Twain. One of the truly great writers in our country. His stories are still widely read and enjoyed. Mark Twain was born and raised in Florida, Mo., which is at the site of this lake. He spent his entire life in Missouri and lived for many years in my hometown of Hannibal. He always enjoyed and cherished the natural beauty and elegance of the Missouri countryside and it is fitting that this new lake and recreation area be named in his memory.

Again, I thank the distinguished gentleman from Missouri for his efforts and withdraw my reservation.

Mr. VOLKMER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1493

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 204 of the Flood Control Act of 1965 (Public Law 89-298) is amended as follows: "The Dickey-Lincoln School Lakes project, Saint John River, Maine, is hereby modified to deauthorize that component of the project known and referred to as the Dickey Dam and its associated transmission facilities.".

(b) No Federal agency or department shall consider any license application relating to hydropower projects above the site of the Lincoln School Dam on the Saint John River and its tributaries, Maine, for a period of two years after the enactment of this Act.

SEC. 2. (a) The authorization for the Meramec Park Lake (hereinafter in this section referred to as the "project") contained in that portion of the general comprehensive plan for flood control and other purposes in the Upper Mississippi River Basin, which plan was authorized by section 4 of the Act entitled "An Act authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes", approved June 28, 1938 (52 Stat. 1218), as modified by section 203 of the Flood Control Act of 1966 (Public Law 89-789), is hereby terminated.

(b) The Secretary of the Army, acting through the Chief of Engineers (hereinafter in this section referred to as the "Secretary"), shall immediately undertake interim management and maintenance of works, structures, and interests in lands related to the project pending the implementation of the subsequent provisions of this section.

(c) The Secretary shall dispose of works, structures, and interests in lands related to the project as follows:

(1) To the State of Missouri, all right, title, and interest in and to—

(A) Meramec State Park extension, consisting of three thousand eight hundred and twenty-three acres.

(B) Onondaga Cave State Park extension, consisting of one hundred and twenty-four acres.

(C) Huzzah State Wildlife Management Area extension, consisting of nine hundred and forty-five acres.

(D) Endangered species sites, consisting of not more than two hundred acres.

(E) Campbell Bridge access, consisting of not more than ten acres.

(F) Sappington Bridge access, consisting of not more than ten acres.

(G) Liberty Road access, consisting of not more than ten acres.

(2) A perpetual easement sufficient to safeguard for the river user the natural, cultural, and visual resources of the Meramec River and Huzzah and Courtois Creeks shall be conveyed to the State of Missouri within nine months from the date of this Act. The Secretary is hereby directed to establish such easements in conjunction with the

State of Missouri. Said easements shall be not less than one hundred feet nor more than one-quarter mile as measured from the normal highwater mark of said river and creeks, taking into consideration the varying terrain of such lands and the best public interest.

(3) A perpetual easement sufficient to provide for and allow pedestrian use of a corridor of land connecting Meramec State Park with the Huzzah State Forest shall be conveyed to the State of Missouri within nine months from the date of this Act. The Secretary is hereby directed to establish such easement in conjunction with the State of Missouri. Said easement shall be not less than one hundred feet in width and shall be used for the development of the Ozark Trail, which will be constructed and maintained by the State of Missouri.

(4) The remainder of the works, structures, and interests in lands related to the project shall be offered, within a period of one year from the date of enactment of this Act, for sale to the previous owners at the current appraised value. Such former owners shall have a period of one year in which to enter a contract for the repurchase of such properties, and interests in lands shall be sold at a public auction, or a series of public auctions, to be conducted following reasonable public notice and advertising of the time and place of such auction or auctions, until such time as all remaining works, structures, and interests in lands have been disposed of.

(d) The Secretary is authorized either to comply with or to enter into a mutual agreement to cancel any executory contract the United States has entered for the purchase of lands for the project at the request of any landowner who is a party to such a contract, within six months after the date of enactment of this Act.

(e) Nothing in this section shall terminate the authority or responsibility of the United States to satisfy, pursuant to the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (49 U.S.C. 4601 et seq.) and any other applicable provision of law, all relocation assistance, and other obligations arising out of the acquisition, prior to the date of enactment of this Act, of any interest in real estate for the project.

(f) Funds authorized prior to enactment of this Act for the project specified in this section may be utilized by the Secretary, as necessary, to carry out the provisions of this section to deauthorize the project.

SEC. 3. The authorizations for the projects described in this section, at the locations described, are terminated upon the date of enactment of this Act:

(a) ILLINOIS: HELM RESERVOIR.—The project for Helm Reservoir, Skillet Fork of the Wabash River, Illinois, authorized by section 203 of the Flood Control Act of 1968 (Public Law 90-483), part of the Wabash River Basin comprehensive plan.

(b) ILLINOIS: LINCOLN DAM.—The project for Lincoln Dam and Reservoir, Wabash River, Illinois and Indiana, authorized by section 204 of the Flood Control Act of 1965 (Public Law 89-298).

(c) INDIANA: BIG BLUE DAM.—The project for Big Blue Dam, Big Blue River, Indiana, authorized by section 203 of the Flood Control Act of 1968 (Public Law 90-483).

(d) ILLINOIS: ILLINOIS RIVER DUPLICATE LOCKS.—The project for the Illinois Waterway, Illinois and Indiana, authorized by section 101 of the River and Harbor Act of 1962 (Public Law 87-874).

(e) INDIANA: LAFAYETTE DAMS.—The project for the Lafayette Dam and Reservoir, Wild Cat Creek of the Wabash River, Indiana, as authorized in section 204 of the Flood Control Act of 1965 (Public Law 89-298).

(f) VIRGINIA: NANSEMOND RIVER.—The portion of the project for the Nansemond River, Virginia, from the United States Highway 640 Bridge at Suffolk, Virginia, to the upstream project limits at river mile 18.66, a distance of approximately two thousand five hundred feet, authorized by the first section of the Act entitled "An Act making appropriations for the construction, repaired, and preservation of certain public works on rivers and harbors, and other purposes", approved August 11, 1888 (25 Stat. 410), and modified by the first section of the Act entitled "An Act authorizing the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved July 3, 1930 (46 Stat. 922).

(g) INDIANA: CLIFTY CREEK DAM.—The project for the Clifty Creek Dam, Clifty Creek, Indiana, authorized by section 204 of the Flood Control Act of 1965 (Public Law 89-298).

(h) DELAWARE-MARYLAND-VIRGINIA: INTRACOASTAL WATERWAY.—The project for the Delaware Bay, Delaware, to Cape Charles, Chesapeake Bay, Virginia, Intracoastal Waterway, authorized under the terms of section 201 of the Flood Control Act of 1965 (Public Law 89-298).

(i) MARYLAND: SIXES BRIDGE.—The project for Sixes Bridge Dam and Lake, Maryland, authorized by section 85 of the Water Resources Development Act of 1974 (Public Law 93-251).

SEC. 4. (a) The consent of Congress is hereby given to the City of Boston to construct, maintain, and operate a fixed-span bridge in and over the water of the Fort Point Channel, Boston, Massachusetts, lying between the northeasterly side of the existing Summer Street Bridge and the northeasterly side of the existing Northern Avenue Bridge.

(b) Work shall not be commenced on such bridge until the location and plans therefor are submitted to and approved by the Secretary of Transportation.

(c) Any project heretofore authorized by an Act of Congress, insofar as such project relates to the above described portions of Fort Point Channel, is hereby abandoned.

(d) In approving the location and plans of any bridge, the Secretary of Transportation may impose any specific conditions relating to the maintenance and operation of the structure which may be deemed necessary in the interest of public navigation.

SEC. 5. The plan for the project for Ellicott Creek, New York, authorized in section 201 of the Flood Control Act of 1970 (Public Law 91-611) is hereby modified in accordance with the recommendations of the Chief of Engineers in a report dated April 2, 1979: *Provided*, That local interests agree to meet local assurance requirements set forth in section 3 of Public Law 738 of the Seventy-fourth Congress (33 U.S.C. 701c).

SEC. 6. (a) The lock authorized by section 114 of the Water Resources Development Act of 1976 (Public Law 94-587), as a replacement for Vermilion Lock, Louisiana, shall hereafter be known as Leland Bowman Lock. Any law, regulation, map, document, or record of the United States which refers to such lock shall hereafter be held and considered to refer to such lock as "Leland Bowman Lock".

(b) The dam and reservoir on the Salt River, Missouri, known as the Clar- ence Cannon Dam and Reservoir, authorized by section 203 of the Flood Control Act of 1962 (Public Law 87-874) as the Joanna Reservoir, shall hereafter be known as the Clarence Cannon Dam and Mark Twain Lake. Any law, regulation, map, document, or record of the United States in which such dam and reservoir are referred to shall be held and considered to refer to such dam as the Clarence Cannon Dam and to such reservoir as the Mark Twain Lake, respectively.

● Mr. HOWARD. Mr. Speaker, I rise in support of this bill. It contains a provision passed by the House in H.R. 1855 last July which is necessary to allow vitally needed development in the city of Boston to progress. It grants the consent of Congress to the city of Boston to construct, maintain, and operate a fixed-span bridge over the Fort Point Channel. This will enable the city to replace a deteriorated drawbridge with a more efficient and less costly fixed-span bridge and provide a needed improvement in transportation access.

The bill also contains a provision terminating the authorization of the Meramec Lake project in Missouri. This provision also establishes procedures for the disposition of lands acquired for the project. Also, flood protection for St. Louis and Jefferson Counties which would be provided by the dam is preserved by a specific authorization provision.

I urge passage of the bill.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, I rise in strong support of S. 1493 as amended. This bill contains numerous provisions on projects which will be deauthorized. All of the Members in whose districts the projects are located agree with the deau- thorizations and the conditions for those deauthorizations in this bill. By not completing construction of these projects, well over $2 billion will be saved. In this time when fiscal restraint is most needed, this is an excellent statement on behalf of the Congress.

There are a few other provisions in the bill which make needed modifications in other water resources situations. I am especially pleased with the provision which prevents the Corps of Engineers from removing existing facilities at water resource areas under their jurisdiction. The Corps of Engineers has arbitarily determined that any houseboats, floating cabins, overnight facilities at marinas, cabins, and other facilities must be removed from Corps of Engineers property. The provision allows those structures which are maintained in useful conditions to remain.

It must be understood that this provision will not result in the proliferation of structures at Corps of Engineers projects. Only those which are in existence on the day of enactment

of this act are protected. There are situations throughout the country which this provision will protect. In Georgia and elsewhere, the Corps of Engineers is trying to remove cottages and cabins. Houseboats have been subject to the Corps of Engineers removal requirement in my own State of Arkansas and in Georgia. In Texas, Georgia, and elsewhere, beautiful marinas, which provide excellent recreational opportunities for many persons, are endangered by the arbitrary requirement to remove improvements, enclosures, and sleeping facilities. This provision will protect all of these situations and others.

Again, Mr. Speaker, I am most pleased with this bill, and urge my colleagues to join me in vigorously supporting its immediate passage.●

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. YOUNG OF MISSOURI

Mr. YOUNG of Missouri. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. Young of Missouri:

Strike out all after the enacting clause and insert in lieu thereof the following:

That (a) section 204 of the Flood Control Act of 1965 (Public Law 89-298) is amended as follows: "The Dickey-Lincoln School Lakes project, Saint John River, Maine, is hereby modified to deauthorize that component of the project known and referred to as the Dickey Dam and its associated transmission facilities.".

(b) No Federal agency or department shall consider any license application relating to hydropower projects above the site of the Lincoln School Dam on the Saint John River and its tributaries, Maine, for a period of two years after the enactment of this Act.

SEC. 2. (a) The authorization for the Meramec Park Lake (hereinafter in this section referred to as the "project") contained in that portion of the general comprehensive plan for flood control and other purposes in the Upper Mississippi River Basin, which plan was authorized by section 4 of the Act entitled "An Act authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes", approved June 28, 1938 (52 Stat. 1218), as modified by section 203 of the Flood Control Act of 1966 (Public Law 89-789), is hereby terminated.

(b) The Secretary of the Army, acting through the Chief of Engineers (hereinafter in this section referred to as the "Secretary"), shall immediately undertake interim management and maintenance of works, structures, and interests in lands related to the project pending the implementation of the subsequent provisions of this section.

(c) The Secretary shall dispose of works, structures, and interests in lands related to the project as follows:

(1) To the State of Missouri, all right, title, and interest in and to not less than 3,382 acres nor more than 5,122 acres, as determined by the Governor of the State of Missouri.

(2) A perpetual easement sufficient to safeguard for the river user the natural, cultural, and visual resources of the Meramec River and Huzzah and Courtois Creeks shall be conveyed to the State of Missouri. The Secretary is hereby directed to establish such easements in conjunction with the State of Missouri. Said easements shall be not less than one hundred feet nor more than one-quarter mile as measured from the normal highwater mark of said river and creeks, taking into consideration the varying terrain of such lands and the best public interest. Said easement shall be available for the development of the Ozark Trail, which will be constructed and maintained by the State of Missouri.

The Secretary shall submit to the State of Missouri before January 6, 1982, an offer to convey the lands authorized by this section. If the State, by statute, disapproves such conveyance on or before April 30, 1982, the Secretary shall immediately offer all the works, structures, and interests in lands for sale to the previous owners in accordance with paragraph (2) of subsection (d) of this section. If the State fails to disapprove such conveyance on or after April 30, 1982, solely because of a veto by the Governor, the offer to convey by the Secretary shall remain valid until such time as the veto is sustained or overridden in accordance with State law.

(d)(1) Within 90 days of the date a conveyance is made to the State of Missouri in accordance with subsection (c) of this section, the Secretary shall offer the remainder of the works, structures, and interests in lands related to the project for sale to the previous owners at the current appraised value. Such previous owners shall have a period of one year in which to enter into a contract for the repurchase of such properties, after which any remaining works, structures, and interests in lands shall be sold at a public auction, or a series of public auctions, to be conducted following reasonable public notice and advertising of the time and place of such auction or auctions, until such time as all remaining works, structures, and interests in lands have been disposed of.

(2) If the State of Missouri disapproves such conveyance in accordance with subsection (c) of this section, the Secretary shall offer all the works, structures, and interests in lands related to the project for sale to the previous owners at the current appraised value. Such previous owners shall have a period of one year in which to enter into a contract for the repurchase of such properties, after which any remaining works, structures, and interests in lands shall be sold at a public auction, or a series of public auctions, to be conducted following reasonable public notice and advertising of the time and place of such auction or auctions, until such time as all remaining works, structures, and interests in lands have been disposed of.

(3) For purposes of this subsection, in any case in which the previous owner of any interest in land is dead, the surviving spouse or, if there is no surviving spouse, the heirs at law of such previous owner shall be deemed to be the previous owner of such interest.

(e) The Secretary is authorized either to comply with or to enter into a mutual agreement to cancel any executory contract the United States has entered for the purchase of lands for the project at the request of any landowner who is a party to such a contract, within six months after the date of enactment of this Act.

(f) Nothing in this section shall terminate the authority or responsibility of the United States to satisfy, pursuant to the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (49 U.S.C. 4601 et seq.) and any other applicable provision of law, all relocation assistance, and other obligations arising out of the acquisition, prior to the date of enactment of this Act, of any interest in real estate for the project.

(g) Funds authorized prior to enactment of this Act for the project specified in this section may be utilized by the Secretary, as necessary, to carry out the provisions of this section to deauthorize the project.

(h) The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to undertake such structural and nonstructural measures as he determines to be economically and engineeringly feasible to prevent flood damage to communities along the route of the Meramec River in St. Louis and Jefferson Counties, Missouri. Such structural measures shall not include the construction of any dams or reservoirs. There is authorized to be appropriated for those fiscal years which begin on or after October 1, 1982 not to exceed $20 million to carry out the provisions of this subsection.

(i) The Secretary of the Army, acting through the Chief of Engineers, and in consultation with the Governor shall conduct a cooperative water supply study with the State of Missouri for the Meramec River Basin, Missouri, with particular emphasis on St. Louis and Jefferson counties, Missouri. In preparing such study, the Secretary of the Army, acting through the Chief of Engineers, and the State of Missouri shall coordinate with appropriate units of local government and shall consult with other individuals and organizations having a direct interest in water supply problems in such river basin. The report required by this section shall be submitted to Congress not later than January 1, 1983. The views of the Governor shall accompany the report of the Secretary of the Army.

SEC. 3. The authorizations for the projects described in this section, at the locations described, are terminated upon the date of enactment of this Act:

(a) ILLINOIS: HELM RESERVOIR.—The project for Helm Reservoir, Skillet Fork of the Wabash River, Illinois, authorized by section 203 of the Flood Control Act of 1968 (Public Law 90-483, as part of the Wabash River Basin comprehensive plan.

(b) ILLINOIS: LINCOLN DAM.—The project for Lincoln Dam and Reservoir, Wabash River, Illinois and Indiana, authorized by section 204 of the Flood Control Act of 1965 (Public Law 89-298).

(c) INDIANA: BIG BLUE DAM.—The project of Big Blue Dam, Big Blue River, Indiana, authorized by section 203 of the Flood Control Act of 1968 (Public Law 90-483).

(d) ILLINOIS: ILLINOIS RIVER DUPLICATE LOCKS.—The project for the Illinois Waterway, Illinois and Indiana, authorized by section 101 of the River and Harbor Act of 1962 (Public Law 87-874).

(e) VIRGINIA: NANSEMOND RIVER.—The portion of the project for the Nansemond River, Virginia, from the United States Highway 640 Bridge at Suffolk, Virginia, to the upstream project limits at river mile 18.66, a distance of approximately two thousand five hundred feet, authorized by the first section of the Act entitled "An Act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and other purposes", approved August 11, 1888 (25 Stat. 410), and modified by the first section of the Act entitled "An Act authorizing the con-

struction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved July 3, 1930 (46 Stat. 922).

(f) INDIANA: CLIFTY CREEK DAM.—The project for the Clifty Creek Dam, Clifty Creek, Indiana, authorized by section 204 of the Flood Control Act of 1965 (Public Law 89-298).

(g) DELAWARE-MARYLAND-VIRGINIA: INTRACOASTAL WATERWAY.—The project for the Delaware Bay, Delaware, to Cape Charles, Chesapeake Bay, Virginia, Intracoastal Waterway, authorized under the terms of section 201 of the Flood Control Act of 1965 (Public Law 89-298).

(h) MARYLAND: SIXES BRIDGE.—The project for Sixes Bridge Dam and Lake, Maryland, authorized by section 85 of the Water Resources Development Act of 1974 (Public Law 93-251).

SEC. 4. (a) The consent of Congress is hereby given to the City of Boston to construct, maintain, and operate a fixed-span bridge in and over the water of the Fort Point Channel, Boston, Massachusetts, lying between the northeasterly side of the existing Summer Street Bridge and the northeasterly side of the existing Northern Avenue Bridge.

(b) Work shall not be commenced on such bridge until the location and plans therefor are submitted to and approved by the Secretary of Transportation.

(c) Any project heretofore authorized by an Act of Congress, insofar as such project relates to the above described portions of Fort Point Channel, is hereby abandoned.

(d) In approving the location and plans of any bridge, the Secretary of Transportation may impose any specific conditions relating to the maintenance and operation of the structure which may be deemed necessary in the interest of public navigation.

SEC. 5. The project for the Sandridge Dam and Reservoir, Ellicott Creek, New York, for flood protection and other purposes as authorized in section 201 of the Flood Control Act of 1970 is hereby modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to construct a combination of channel enlargement work and diversion channels along Ellicott Creek mostly in the town of Amherst in accordance with the report of the Chief of Engineers dated April 2, 1979, except that cost sharing for such project shall be as provided in the report of the Board of Engineers for Rivers and Harbors dated July 20, 1978, at an estimated cost of $13,200,000.

SEC. 6. (a) The lock authorized by section 114 of the Water Resources Development Act of 1976 (Public Law 94-587), as a replacement for Vermilion Lock, Louisiana, shall hereafter be known as Leland Bowman Lock. Any law, regulation, map, document, or record of the United States which refers to such lock shall hereafter be held and considered to refer to such lock as "Leland Bowman Lock".

(b) The dam and reservoir on the Salt River, Missouri, known as the Clarence Cannon Dam and Reservoir, authorized by section 203 of the Flood Control Act of 1962 (Public Law 87-874) as the Joanna Reservoir, shall hereafter be known as the Clarence Cannon Dam and Mark Twain Lake. Any law, regulation, map, document, or record of the United States in which such dam and reservoir are referred to shall be held and considered to refer to such dam as the Clarence Cannon Dam and to such reservoir as the Mark Twain Lake, respectively.

SEC. 7. (a) The consent of Congress is hereby given to the city of Tampa, Florida or its designee, to construct and maintain two fixed-span bridges in and over the waters of the Garrison Channel, Tampa, Florida; one bridge to be at or adjacent to the site of the existing bascule railroad bridge and the other bridge to be at the site of the southerly extension of Franklin Street. Work shall not be commenced on such bridges until the location and plans therefor are submitted to and approved by the Secretary of Transportation.

(b) In the case of any project authorized before the date of enactment of this Act which relates to that portion of Garrison Channel from the point of intersection of the easterly right-of-way line of the existing railroad bridge with the existing pierhead and bulkhead line on the north side of Garrison Channel, westward to, but not to include the turning basin at the junction of Garrison and Seddon Channels, the authorization relating to such portion of Garrison Channel shall be terminated upon approval by the Secretary of Transportation of the location and plans for the first of the bridges refered to in subsection (a) of this section.

(c) Any project authorized before the date of enactment of this Act as it relates to the construction and maintenance of Seddon Channel, is hereby modified to provide for a channel 200 feet wide by 12 deep from the junction of Sparkman and Seddon Channels northwesterly to its intersection with the Federal navigation project for the Hillsborough River.

(d) In approving the location and plans of any bridge under this section, the Secretary of Transportation may impose any specific conditions relating to the maintenance and operation of the structure which the Secretary deems necessary in the interest of public navigation.

SEC. 8. No houseboat, floating cabin, marina (including any with sleeping facilities), dock, cabin, or other structure of a permanent nature shall be required to be removed before December 31, 1989, from any Federal water resources reservoir or lake project administered by the Secretary of the Army, acting through the Chief of Engineers, on which it was located on the date of enactment of this Act, if such property is maintained in usable condition.

Mr. YOUNG of Missouri (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The amendment in the nature of a substitute was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. YOUNG of Missouri. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks in the RECORD in support of the Senate bill, S. 1493, just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF HOUSE CONCURRENT RESOLUTION 178

Mr. OBERSTAR. Mr. Speaker, I ask unanimous consent to remove my name from cosponsorship of House Concurrent Resolution 178.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CARMAN (at the request of Mr. MICHEL), for today, on account of a death in the family.

Mr. MADIGAN (at the request of Mr. MICHEL), for today and the balance of the week, on account of illness in the family.

Mr. MONTGOMERY (at the request of Mr. WRIGHT), for today (legislative day of November 20), on account of medical reasons.

Mr. SILJANDER (at the request of Mr. MICHEL), for today, on account of a death in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HOYER) to revise and extend their remarks and include extraneous material:)

Mr. EDWARDS of California, for 60 minutes, today.

Mr. PEPPER, for 5 minutes, today.

Mr. PATMAN, for 5 minutes, today.

Mr. BINGHAM, for 10 minutes, today.

(The following Members (at the request of Mr. HARTNETT) and to include extraneous matter:)

Mrs. SMITH of Nebraska, for 5 minutes, today.

Mr. GINGRICH, for 60 minutes, today.

(The following Member (at the request of Mr. PATMAN) to revise and extend his remarks and include extraneous material:)

Mr. COELHO, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DICKS, prior to the vote on the motion to commit House Joint Resolution 368.

Mr. OBERSTAR and to include extraneous matter notwithstanding the fact

that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,320.

(The following Members (at the request of Mr. HARTNETT) and to include extraneous material:)

Mr. WHITEHURST.
Mr. NAPIER.
Mr. LEWIS.
Mr. HANSEN in four instances.
Mr. SMITH of New Jersey.
Mr. GILMAN in two instances.
Mr. MCEWEN.
Mr. PARRIS.
Mr. GOODLING.
Mr. FINDLEY in three instances.
Mr. DANNEMEYER.
Mr. HYDE.
Mr. FRENZEL in six instances.
Mr. SNYDER.
Mr. SAWYER.
Mr. EMERSON.
Mr. JEFFORDS.
Mr. NELLIGAN.
Mr. PHILIP M. CRANE.

(The following Members (at the request of Mr. HOYER) and to include extraneous matter:)

Mr. ALBOSTA.
Mr. EDWARDS of California in two instances.
Mr. WASHINGTON.
Mrs. SCHROEDER.
Mr. KASTENMEIER.
Mr. FAUNTROY in two instances.
Mr. LELAND.
Mr. BENJAMIN.
Mr. SOLARZ.
Mr. FORD of Tennessee.
Mr. JOHN L. BURTON in two instances.
Mr. MCDONALD in five instances.
Ms. OAKAR.
Mr. PEPPER.
Mr. LUNDINE.
Mr. NOWAK.
Mr. EDGAR in two instances.
Mr. SWIFT.
Mr. FORD of Michigan.
Mr. DORGAN of North Dakota.
Mr. LAFALCE in two instances.
Mr. PEASE.
Mr. WEISS.
Mr. GAYDOS.

(The following Members (at the request of Mr. YOUNG of Missouri) and to include extraneous matter:)

Mr. MINISH.
Mr. FORD of Michigan.
Mr. FRANK.
Mr. GAYDOS.
Mr. GEPHARDT.
Mr. JOHN L. BURTON.
Mr. MCDONALD in five instances.
Mr. OBERSTAR.

ENROLLED JOINT RESOLUTIONS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

H.J. Res. 357. Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes; and

By the SPEAKER pro tempore:

H.J. Res. 368. Joint resolution making further continuing appropriations for the fiscal year 1982.

BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills and a joint resolution of the House of the following titles:

H.R. 3413. An act to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes;

H.R. 3454. An act to authorize appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the U.S. Government, for the Intelligence Community Staff, and for the Central Intelligence Agency retirement and disability system, to authorize supplemental appropriations for fiscal year 1981 for the intelligence and intelligence-related activities of the U.S. Government, and for other purposes;

H.R. 4144. An act making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes;

H.R. 4522. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes; and

H.J. Res. 357. Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes.

ADJOURNMENT

Mr. YOUNG of Missouri. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

The SPEAKER pro tempore. Pursuant to the provisions of House Concurrent Resolution 228, 97th Congress, the Chair declares the House adjourned until 12 o'clock noon, November 30, 1981.

Thereupon (at 5 o'clock and 50 minutes p.m.), pursuant to House Concurrent Resolution 228, the House adjourned until Monday, November 30, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2568. A letter from the Comptroller General of the United States, transmitting his review of the deferrals of budget authority contained in the message from the President dated October 20, 1981 (House Document No. 97-102), pursuant to section 1014(b) of Public Law 93-344 (H. Doc. No. 97-116); to the Committee on Appropriations and ordered to be printed.

2569. A letter from the Secretary of the Army, transmitting the annual report of the U.S. Soldiers' and Airmens' Home for fiscal year 1980, together with the report of the annual general inspection of the home, 1981, by the Inspector General of the Army, pursuant to sections 1 and 2 of the act of March 3, 1883; to the Committee on Armed Services.

2570. A letter from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

2571. A letter from the Secretary of the Interior, transmitting a report by the National Academy of Sciences on surface coal mining in Alaska, pursuant to section 708 of Public Law 95-87; to the Committee on Interior and Insular Affairs.

2572. A letter from the Clerk, U.S. Court of Claims, transmitting a copy of the court's judgment order in Docket No. 87-C, *The Pyramid Lake Tribe of the Pyramid Lake Reservation* v. *The United States*; to the Committee on Interior and Insular Affairs.

2573. A letter from the Administrator of Veterans Affairs, transmitting a report covering fiscal year 1981 on the nature and disposition of all cases in which an institution, approved for veterans benefits, utilizes advertising, sales or enrollment practices which are erroneous, deceptive or misleading, pursuant to 38 U.S.C. 1796(d); to the Committee on Veterans' Affairs.

2574. A letter from the Secretary of Health and Human Services, transmitting a summary report on the assessment of current State practices in day care programs funded under title XX of the Social Security Act, pursuant to section 1001(c) of Public Law 96-499; to the Committee on Ways and Means.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. PICKLE (for himself and Mr. CONABLE):

H.R. 5102. A bill to require a two-thirds vote of each House of Congress (except in a state of emergency) to pass a joint resolution to continue appropriations for departments, agencies, and other entities of the Federal Government pending the passage of appropriation acts for such departments, agencies, and other entities; to the Committee on Rules.

By Mr. MINETA (for himself and Mr. HOWARD, Mr. CLAUSEN, and Mr. SNYDER):

H.R. 5103. A bill to terminate functions of the Civil Aeronautics Board and to transfer certain functions of the Board to the Secretary of Transportation, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. RAILSBACK:

H.R. 5104. A bill to amend title 28, United States Code, to authorize the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing children and other specified individuals; to the Committee on the Judiciary.

By Mr. RITTER:

H.R. 5105. A bill to require all nationals of Communist countries to register with the Attorney General before engaging in certain activities involving Members of Congress and congressional employees; to the Committee on the Judiciary.

By Mr. WHITTEN:

H.J. Res. 368. Joint resolution making further continuing appropriations for the fiscal year 1982; considered, amended, and passed.

By Mr. WRIGHT:

H. Con. Res. 228. Concurrent resolution providing for an adjournment of the House from November 23 to November 30, 1981, and an adjournment of the Senate from November 24 or November 25 to November 30, 1981; considered and agreed to.

By Mr. MINISH:

H. Con. Res. 229. Concurrent resolution calling upon the Union of Soviet Socialist Republics to end the current policies of Jewish emigration discrimination and anti-Semitism and expressing the sense of the Congress that the dramatic decline of Jewish emigration from the Union of Soviet Socialist Republics is morally reprehensible; to the Committee on Foreign Affairs.

By Mr. WRIGHT:

H. Res. 285. Resolution electing the Honorable Thomas S. Foley as Speaker pro tempore during the absence of the Speaker; considered and agreed to.

MEMORIALS

Under clause 4 of rule XXII,

225. The SPEAKER presented a memorial of the Legislature of the Territory of Guam, relative to national tuition tax credit legislation; to the Committee on Ways and Means.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 25: Mr. CAMPBELL and Mr. DREIER.

H.R. 316: Mr. EMERSON, Mr. SMITH of Pennsylvania, Mr. OXLEY, Mr. MCCLORY, Mr. ROBERTS of South Dakota, Mr. SMITH, of Oregon and Mr. LEBOUTILLIER.

H.R. 756: Mr. PARRIS.

H.R. 1564: Mrs. SCHNEIDER.

H.R. 1603: Mr. PHILIP M. CRANE and Mr. MCCLOSKEY.

H.R. 1776: Mr. ANTHONY and Mr. DECKARD.

H.R. 1813: Mr. KOGOVSEK, Mr. MURPHY, Mr. PEPPER, Mr. CORRADA, Mr. OTTINGER, Mr. WON PAT, Mr. CONYERS, Mr. MCDADE, Mr. GEPHARDT, Mr. SIMON, Mr. MARKEY, Mr. SAVAGE, and Mr. FITHIAN.

H.R. 2102: Mr. SMITH of New Jersey, Mr. DERWINSKI, Mr. CORRADA, Mr. BLILEY, Mr. GINGRICH, Mr. KINDNESS, Mr. PORTER, Mr. SAWYER, Mr. WORTLEY, Mr. HUGHES, Mr. JEFFORDS, Mr. MITCHELL of New York, and Mr. FORSYTHE.

H.R. 2414: Mr. COATS, Mr. RAILSBACK, Mr. FISH, and Mr. BENEDICT.

H.R. 2488: Mr. MOLLOHAN and Mr. ENGLISH.

H.R. 3008: Mr. EDWARDS of California and Mr. GRAY.

H.R. 3117: Mr. BROOKS, Mr. SMITH of New Jersey, Mr. SCHUMER, Mr. MATSUI, Mr. FORSYTHE, Mr. LELAND, Mr. SUNIA, Mr. MILLER of California, Mr. GUARINI, Mr. HUGHES, Mr. BINGHAM, Mr. WHITEHURST, Mr. PORTER, Mr. DWYER, Mr. BEVILL, and Mr. PEPPER.

H.R. 3252: Mr. JACOBS, Mrs. BYRON, Mr. AKAKA, Mrs. HECKLER, Mr. BEREUTER, Mr. LOWERY of California, Mr. WIRTH, Mr. EDGAR, Mr. DENARDIS, Mr. MILLER of Ohio, Mrs. FENWICK, Mr. SMITH of Alabama, Mr. CHENEY, Mr. BRODHEAD, Mr. DANIEL B. CRANE, Mr. WEBER of Ohio, Mrs. SNOWE, AND Mr. RUDD.

H.R. 3671: Mr. EDWARDS of Alabama.

H.R. 3781: Mr. ADDABBO, Mr. ARCHER, Mr. BENJAMIN, Mr. BINGHAM, Mr. BONIOR of Michigan, Mr. CHAPPELL, Mr. CORCORAN, Mr. COUGHLIN, Mr. JAMES K. COYNE, Mr. DANIEL B. CRANE, Mr. D'AMOURS, Mr. DENARDIS, Mr. DICKS, Mr. DOWNEY, Mr. DUNN, Mr. DWYER, Mr. EDGAR, Mr. ENGLISH, Mr. FASCELL, Mr. FAZIO, MS. FERRARO, Mr. FOGLIETTA, Mr. FRANK, Mr. GEJDENSON, Mr. GIBBONS, Mr. GINN, Mr. GRADISON, Mr. GRISHAM, Mr. GUARINI, Mr. HOPKINS, Mr. HOWARD, Mr. HUBBARD, Mr. HUTTO, Mr. JACOBS, Mr. KOGOVSEK, Mr. LAFALCE, Mr. LEACH of Iowa, Mr. LEHMAN, Mr. LUJAN, Mr. MCKINNEY, Mr. MADIGAN, Mr. MATSUI, Mr. MAVROULES, Mr. MAZZOLI, Mr. MICA, Mr. MILLER of California, Mr. MINISH, Mr. MITCHELL of New York, Mr. MOTTL, Mr. MURPHY, Mr. NEAL, Mr. PEPPER, Mr. PEYSER, Mr. RICHMOND, Mr. RINALDO, Mr. ROE, Mr. ROSENTHAL, Mrs. ROUKEMA, Mr. SCHEUER, Mr. SEIBERLING, Mr. SHAW, Mr. SKEEN, Mr. SMITH of Alabama, Mr. SMITH of New Jersey, Mr. STENHOLM, Mr. STUDDS, Mr. WEAVER, Mr. WOLPE, Mr. YATES, Mr. YOUNG of Missouri, Mr. ZEFERETTI, Mr. YATRON, Mr. MARKEY, Mr. PURSELL, Mrs. MARTIN of Illinois, Mrs. SNOWE, Mr. YOUNG of Florida, and Mr. IRELAND.

H.R. 3861: Mr. PAUL.

H.R. 4004: Mr. PATTERSON.

H.R. 4313: Mr. HAMILTON, Mr. PATTERSON, and Mr. ROBINSON.

H.R. 4326: Mr. MITCHELL of New York, Mr. DYSON, Mr. STOKES, Mr. MYERS, Mr. COATS, Mr. FORSYTHE, Mrs. BOUQUARD, Mr. CONYERS, Mr. HAGEDORN, Mr. MCEWEN, Mr. OTTINGER, and Mr. GREGG.

H.R. 4362: Mr. JEFFRIES.

H.R. 4382: Mr. LEBOUTILLIER.

H.R. 4398: Mr. HAMILTON.

H.R. 4418: Mr. PHILIP M. CRANE.

H.R. 4443: Mr. GEJDENSON.

H.R. 4449: Mr. MILLER of Ohio, Mr. JAMES K. COYNE, and Mr. NAPIER.

H.R. 4454: Mr. BAILEY of Missouri, Mr. BARNARD, Mr. BEARD, MR. BLILEY, Mr. BRODHEAD, Mr. COATS, Mr. COURTER, Mr. JAMES K. COYNE, Mr. DAVIS, Mr. DICKS, Mr. DUNN, Mr. EVANS of Georgia, Mr. FISH, Mr. GINGRICH, Mr. GRAMM, Mr. RALPH M. HALL, Mr. SAM B. HALL, Jr., Mr. HANCE, Mr. HIGHTOWER, Mr. HUNTER, Mr. MOLINARI, and Mr. STATON of West Virginia.

H.R. 4467: Mr. RUSSO and Mr. FOGLIETTA.

H.R. 4545: Mr. PERKINS, Mr. MOFFETT, Mr. RAHALL, Mr. BARNARD, and Mr. DASCHLE.

H.R. 4554: Mr. FRENZEL and Mr. ROSE.

H.R. 4555: Mr. GUNDERSON and Mr. MCDADE.

EXTENSIONS OF REMARKS

CRITICAL VIEW OF FEDERAL SOIL CONSERVATION POLICY

HON. GEORGE E. BROWN, JR.
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. BROWN of California. Mr. Speaker, I had an opportunity November 9 to address the Sixth Annual Midwestern Conference of Food, Agriculture, and Public Policy in South Sioux City, Nebr.

This excellent conference included panels on a number of issues of great concern to me, including one on Federal soil conservation policy. A particularly provocative presentation was made by Dr. Arnold Miller, formerly of the U.S. Department of Agriculture's Office of Budget and Planning Evaluation.

The remarks of Dr. Miller raise a number of serious questions about the soundness of the recently released Resources Conservation Act (RCA) soil and water resources conservation program. While the views of Dr. Miller on this matter may appear to some of my colleagues as extreme, they nonetheless deserve congressional attention because of Dr. Miller's extensive experience as a conservation program analyst in USDA throughout the 3-year period during which the RCA program was developed.

The text of Dr. Miller's speech follows:

Approaching Soil Conservation as Though Resources Mattered

(By Arnold Miller)

Federal programs for the conservation of soil and water resources used in agriculture have spanned nearly five decades. They have cost the Federal Treasury at least $60 billion at current prices. Outlays by farmers and local and state programs add additional billions to this figure. Yet the erosion problem continues. We are told it is likely to get worse. We are also told that solving the problem would be "prohibitively expensive," that the cost would be "horrendous." The facts of the matter, however, do not support this conclusion.

Very significant progress can be made in reducing erosion within one year. Solutions are available now. Solutions that cost no more than current programs, and probably less. These conclusions are based on three key elements of conservation policy:

1. The nature and extent of the erosion problem;
2. Our technical ability to solve it; and
3. Past and prospective tools and objectives of conservation policy.

THE EROSION PROBLEM

No one denies that we have an erosion problem; but the manner in which the problem is described can make a great difference, particularly if we intend to solve it. Quoting national average erosion rates or certain other aggregate figures can be an inadequate, if not deceptive, approach. Understanding the erosion problem requires taking a broad view, evaluating each piece of the land base to determine what things are like now and what erosion might be if things were different.

In 1977, the Soil Conservation Service did one of the best things it has ever done. It surveyed the erosion problem using techniques far superior to those used in earlier inventories of conservation needs. The 1977 National Resource Inventory gives policymakers virtually the same information by which to set national policy as is used by SCS to make conservation plans for individual farms.

Erosion on cultivated land is by far the most serious problem if our concern is with food and fiber production. On most cultivated land, sheet and rill erosion is much more serious than wind erosion. This is because most of the country gets enough rain that soil is too wet and well-protected to blow.

Looking at the sheet and rill erosion recorded in the SCS erosion inventories can be revealing. It can be very revealing if one groups soil into sets that are uniform with respect to the combined impacts of rainfall, erosivity, slope length and slope gradient. Grouping soil in this manner allows comparison of erosion rates on soils that have the same potential for erosion. Once this is done, one can compare erosion rates on soils with the same erosion potential but which have been treated with one or more conservation practices, or none at all.

As a starting point, it is useful to know what the erosion situation would be if no conservation practices were used by farmers on land used to grow row crops and small grains. If all readily available cropland was cultivated using straight rows running directly up and down slopes and without practices to improve crop cover conditions, gross sheet and rill erosion would exceed 3.2 billion tons, considerably more than today. The majority of the cropland, however, would not suffer from significant erosion. Some 66 percent of the cultivated land would erode at rates below the conventional standard of 5 tons per acre, and 81 percent would suffer erosion rates under 10 tons per acre. Even if all cropland were cultivated using no conservation practices, the majority would not suffer significant erosion.

Erosion problems would be very severe, however, on the 5 percent of the land that eroded at rates over 25 percent per acre. They would be severe on the 8 percent of the cropland that eroded of between 15 and 25 tons per acre and they would be moderate on the 6 percent of the cropland that eroded at rates between 10 and 15 tons per acre.

Largely is a concentrated problem; it does not threaten every acre of every farm. Actual and potential erosion problems are and will be concentrated on a relatively small fraction of the cropland base. Fortunately, the vast majority of this Nation's cropland is blessed with gentle slopes and other factors that eliminate erosion as a threat to its productive capacity. The first task of soil conservation policy is to address the erosion problem where it is, rather than where it is not now and will not be in the future.

ABILITY TO CONTROL EROSION

If we know the extent and severity of erosion problems, can we solve them? Do conservation practices act on the physical forces that cause erosion with sufficient power that erosion can be controlled to predetermined levels? Again, the National Resource Inventory gives us answers.

As part of the resource inventory, SCS personnel recorded the number of conservation practices being used on each survey area. Sorting through this information tells us how effective erosion control practices are under actual farm conditions. For example, cultivated land that would erode at 10 tons per acre without treatment was reported as eroding at 8 tons per acre when minimum tillage was used; 6 tons per acre when farmed on the contour; and 5 tons per acre when farmed using terraces and supporting practices.

Those familiar with current policy will note that only one of the erosion rates just quoted was at the so-called maximum tolerable erosion rate. All others were above that rate even though the land had been treated with one or more conservation practices. The rates quoted apply to land that erodes at only 10 tons per acre when not treated for erosion control, far from the most erosive. They suggest that our power to control erosion is strictly limited so long as fragile land is used to grow row crops or small grains.

Of the 337.5 million acres that were cultivated in 1977, 85.9 million had potential for sheet and rill erosion at rates higher than 5 tons per acre when farmed using no conservation practices. A full 70 percent of this land is treated with at least one erosion control practice.

The evidence strongly suggests that it is not possible to cultivate inherently erosive land and hold erosion to predetermined levels using even multiple erosion control practices. Yet this land is responsible for the lion's share of the erosion problem. Unfortunately, current programs attempt to reduce erosion to 5 tons per acre while land remains in cultivation—an unrealistic objective that is used to justify bureaucratic programs that consume far too many resources for the amount of soil they save.

INCENTIVE MECHANISMS

Conservation policy must recognize who gets things done in American agriculture. It is not the bureaucrat, regardless of the level of Government he represents. Clearly, the most powerful productive force in agriculture is the farmer.

I submit that the solution to the erosion problem lies with the strength and initiative of the American farmer. It is futile to attempt to solve the erosion problem by building bureaucratic empires, as the current USDA proposal would do. If the public wants erosion control, we should decide how much we are willing to pay for it and then offer that price to the farmer. If soil can be conserved at that price, it will be done. If it can't, then society would be worse off for insisting on erosion control; it would consume

resources of greater value than those it preserves.

The primary role of the bureaucrat in soil conservation is to ensure that the public gets its money's worth out of the conservation bargain. Properly compensating farmers for reducing soil loss would make the rewards of conservation compete with the rewards of production. Such an approach could make erosion control as abundant as corn production, and at a very reasonable cost.

Rewarding famers for reducing erosion is a radical departure from present policy. In effect, current conservation programs are tantamount to asking farmers to grow a crop for which there is no market. Under the present scheme of things, there may be little economic benefit to farmers or landowners in reducing erosion. The total value of a ton of erosive soil in perpetual corn production is about 73 cents at current prices, but assuming 1.5 percent annual growth in yields. This benefit accrues in small annual increments. It is subject to enormous risk and uncertainty. Moreover, the traditional approach to soil conservation often entails costs that far exceed the long-term public benefits of erosion control. Too often the resources consumed in reducing erosion have greater productive power than the soil they preserve.

Current conservation policy offers free labor services and cost-sharing to do something that yields little, if any, economic benefit to the farmer. That farmers have responded by applying conservation practices to 214.5 million acres of cultivated land is a credit to them. Where existing conservation programs are concerned, however, this figure is a public disgrace Some 70 percent of the practices have been applied to land that has little if any potential for significant erosion. There is reason to believe that too much of the 600 million acres of conservation farm plans that have been prepared over the years amounts to little more than wasteful bureaucratic meddling in farm operations.

COMMENT ON CURRENT PROPOSAL

There is little room for optimism in USDA's recently proposed conservative program. The proposal cuts cost-share incentives to farmers by 41 percent. While these incentives focus farmer attention on using conservation practices rather than actually saving soil, at least they are of the right form.

In contrast, USDA would increase funds for labor intensive conservation bureaucracies by some 60 percent. The department estimates that erosion would be reduced by 126 million tons per year, but entail annual costs in excess of $400 million. If these funds were paid to farmers as compensation for placing acutely erosive land in a soil reserve, a full 58 percent of all excess sheet and rill erosion could be eliminated. Rather than reducing erosion by 126 million tons per year, a reduction in excess of 500 million tons could be achieved. Still greater savings could be obtained if set-asides and acreage-diversion efforts aimed at production adjustment were also targeted at acutely erosive land.●

LATVIAN INDEPENDENCE DAY

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. NELLIGAN. Mr. Speaker, 63 years ago on November 18, 1918, the modern Republic of Latvia was established as a free country. Yet it was not until February 1922, that the Latvian Constitution was adopted. The United States granted full recognition to Latvia as an independent country on July 28, 1922.

This independence lasted slightly more that 20 years. In 1940, the country was invaded by—and incorporated into—the Soviet Union, and a puppet government was established. When the Germans invaded in 1941, the Baltic countries of Latvia, Lithuania, and Estonia were combined with Byelorussia into a province known as "Ostland." This arrangement lasted 3 years. Then the Russians retook Latvia. Today, Latvia is an occupied territory of the Soviet Union. In response to this, the United States and other Western powers have maintained a policy of nonrecognition toward forced Latvian annexation into the Soviet Union.

The people of Latvia have much of the free world supporting them, and it is important that we restate our support for the continuing struggle of the Latvian people toward independence. It is important on this day to stress our support, because it is in hope that we will no longer have to mark this day for the celebration of short-lived Latvian independence earlier in this century—but rather a new day, celebrating the final independence of the country.

As a member of the ad hoc committee on the Baltic States and Ukraine, I join with Americans of Latvian descent in the 11th District of Pennsylvania, which I am honored to represent, in reiterating our support for the Latvian people and the determination to suppress unchecked Soviet aggression in the world today.●

CAB SUNSET ACT OF 1981

HON. GENE SNYDER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. SNYDER. Mr. Speaker, today we are introducing legislation which would sunset the Civil Aeronautics Board 5 months after the bill is signed into law. Most of the functions of the CAB which are now scheduled to terminate on December 31, 1982, would do so 60 days after enactment with the remaining functions being transferred 90 days later.

As my colleagues are aware, the Airline Deregulation Act of 1978 (ADA) adopted a phased timetable for the termination of various CAB functions with a final sunset date of January 1, 1985.

This landmark legislation adopted a rather conservative timetable for the sunset of the CAB because the Congress wanted to assure that the transition to deregulation would proceed smoothly. While the process has not been without its problems, I think most would agree that the aviation community and the traveling public have adjusted quite well to the changes which have accompanied deregulation and that we are ready to accelerate the process.

I want to stress, however, that in doing so we fully realize that there will still be a legitimate Federal role in assuring that the next phase of airline deregulation can proceed as successfully as the first.

Accordingly, we believe it is important to continue a Federal presence in many aspects of domestic air transportation although the statutory responsibility will be exercised, in most cases, by the Department of Transportation. For the most part, the Board's existing regulatory authority as it relates to foreign air transportation will merely be transferred to the Secretary of Transportation.

The legislation which we are introducing today will not affect the first phase-out of the Board's authority as mandated by the ADA other than to extend its provisions to cargo operations. Accordingly, with the exception of the essential air service program, the CAB will no longer have any authority over the regulation of domestic routes effective January 1, 1982.

The bill will, however, make some substantial changes to the sunset provisions regarding the CAB's authority over domestic fares. While the ADA called for this authority to terminate at the close of 1982, this legislation will accelerate the process so that most types of domestic fare regulation will terminate 60 days after the bill is enacted. In light of the substantial fare flexibility which now exists domestically, we see no reason to retain the Board's regulatory authority in this area substantially beyond the date of enactment.

Once the board loses its authority to regulate domestic routes and rates, we believe that sunset should follow as quickly as possible. Most would agree, now that we have had the opportunity to observe how the domestic air transportation system responds in a deregulated environment, that there is little reason to keep the CAB in existence beyond the time when it loses its authority to regulate routes and fares. Accordingly, our bill calls for the

Board to go out of existence 90 days after the termination of domestic rate authority, or 150 days after enactment of this legislation.

Other major provisions in the bill would: First, impose a 2-year period of mandatory price posting which would assist the industry in transitioning from a tariff filing regime; second, retain mandatory joint fares and divisions for 6 years after date of enactment, with the first 3-year period to require that divisions be based on costs; third, transfer to the Secretary of Transportation all authority to approve and immunize intercarrier agreements affecting domestic and foreign air transportation, with authority over domestic intercarrier agreements to expire on January 1, 1986; fourth, retain the Federal Government's general consumer protection authority as well as its authority over unfair and deceptive practices; and fifth, codify existing CAB orders which set fare flexibility zones for foreign air transportation of passengers while allowing the Board (for 5 months)—and subsequently the Secretary of DOT some discretion to change the zones in the future.

In the area of labor protection, the legislation would make substantial changes to the provisions enacted in 1978. First, it would modify the duty to hire provisions of the ADA by making it clear that the airlines' duty to hire is applicable only when an employee loses his job on account of a qualifying dislocation. Second, it would exempt flight deck crewmembers from the right of recall provisions so that if a crewmember is hired by another air carrier, he would not retain his seniority rights or rights of recall with the carrier that furloughed or terminated him. Third, we have extended the applicability of the duty to hire provisions to include all carriers operating aircraft having a passenger capacity in excess of 60 seats and cargo carriers engaging in foreign air transportation operating aircraft with a maximum payload capacity in excess of 18,000 pounds, regardless of when they began operations.

Another related provision dealing with labor protection is also included in the introduced bill. It would require certain carriers, before they could merge, to work out labor protective provisions as good or better than those contained in the so-called Allegheny-Mohawk orders of the CAB, which have been the governing standard in the industry concerning the integration of employee seniority lists, compensation and other related matters. Because these provisons have served the industry well in years past, we believe they should be codified since the CAB would no longer have the authority to approve air carrier mergers under section 408 of the Federal Aviation Act.

Obviously, the issues we have addressed in this legislation are complex and will significantly affect the ways in which the air transportation industry will function in the years ahead. I believe that the bill recognizes the importance of continuing the procompetitive policies of the past few years which have, on balance, worked quite well. It does, however, slow down the process in some cases and makes some refinements to the 1978 law based on the prevailing conditions in the industry today.

I want to emphasize that in introducing this legislation, we have thoroughly evaluated the testimony taken during the hearings held by the Aviation Subcommittee as well as other materials submitted by interested parties. The input we have received has been most helpful and constructive and I hope that it will continue in the months ahead.

While I believe the bill strikes a balance between the desirability of continued deregulation and the need to maintain a Federal presence in many significant areas, we will continue to welcome suggestions from interested parties on ways it might be improved.●

TELEVISION NEWS PROJECTIONS SHOWN TO HURT VOTER TURNOUT

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. SWIFT. Mr. Speaker, Westerners got a double whammy in November 1980. Jimmy Carter conceded defeat and NBC projected Ronald Reagan the winner—both before our polls had even closed.

Then this month a New York TV station called the New Jersey Governor's race—wrong, incidently—before polls closed there, demonstrating that this is not just a west coast problem.

Television news executives have testified before two committees of this House that such projections have not been shown to hurt voter turnout. There is now substantial evidence to the contrary. Further, the network news executives cloak themselves in journalistic professionalism and, speaking ex-cathedra, calling that the traditions of their profession require them to report projections.

It is very encouraging that other professionals in the field are not buffaloed by this poppycock. I would like to insert in the RECORD an excellent editorial from my hometown newspaper, the Bellingham Herald, which addresses this issue thoughtfully. Further, this editorial's suggestion is entirely consonant with the thinking of those of us who are studying this problem here in Congress. Ideally, Congress should do nothing but let the Network News organization's sense of responsibility lead them to rethink where their election result projection policies are leading them and this Nation's most fundamental democratic process—voting.

TV SHOULD HOLD BACK

Research has confirmed what many of us on the West Coast felt last November—that announcement of the winner in the presidential election hours before the polls closed out here changed the election outcome.

The University of Michigan Center for Political Studies found that about a fourth of those who planned to vote in the 1980 presidential election later in the day decided not to if they heard the networks' projections or Jimmy Carter's subsequent concession.

The study concludes that it was Carter and the Democrats who were disadvantaged by the announcement. Democrats lost some key races by close margins, notably in Oregon.

A number of suggestions have been made to avoid the situation in the future, and several bills are pending in Congress. Some would require that polls open and close at the same time across the country. Others would change the national election day to Sunday. One would prohibit election results or projections from being broadcast before the polls close. There are objections to all of the proposals.

It would be better if the networks would police themselves. In the news business there is a tradition that to be first is to be best. Such competition is fine, but the networks have gone beyond news gathering. For elections, they have taken to news forecasting. By means of sample exit interviews at key polling places, they have developed sophisticated methods for predicting how an election will turn out hours before voting stops.

If each network would independently decide to report only actual vote counts on election day, there would be no need for passing laws and regulations. Three hours before polls close on the West Coast, a few scattered returns from the East Coast would be available, but there would be enough doubt to make it worthwhile for us to want to vote.

Reporting what has actually happened, as against guessing at what is likely to happen, would not only be more honest news coverage, but the added suspense would assure the networks of keeping larger audiences longer.

If nothing else, self-interest should push the TV networks toward a more responsible treatment of election news.●

STEEL

HON. HAROLD WASHINGTON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 18, 1981

● Mr. WASHINGTON. Mr. Speaker, I join my colleagues and the Steel Caucus in calling the attention of the Congress and of the administration to the plight of the domestic steel industry. Steel is a basic industry, employing many people in skilled and semi-

skilled jobs of the sort which are not being generated by other segments of the economy. It is essential that these employment opportunities be preserved.

It is equally important that U.S. productive capacity be maintained. It is incredible to me that some still encourage policies which favor imports at the expense of domestic production, while our own people are unemployed and American manufacturing is threatened with extinction.

While we consider the serious strategic implications of this trend, I hope you will also reflect upon what it means in human terms, to our own men and women and to the families they support, when a major steel producer is allowed to die.

I am including for the RECORD an excellent article from the May 1981 Chicago Reporter, a very fine publication edited by John McDermott. The article makes clear the enormous consequences of a major steel plant closure.

For example, the closure of Wisconsin Steel, located in Chicago adjacent to my district, resulted in revenue losses to local, State, and Federal Governments of $40 million annually. Another $30 million in employee benefits and some $70 million in annual payroll were lost by individuals. While many younger workers were crushed, the average steelworker at the plant was 42 years old and had 22 years experience. The prospects for older workers are especially bleak.

I hope each of you will read this article very closely with your own district or other parts of your State in mind. Preserving jobs in basic manufacturing ought to be one of our most fundamental priorities.

WISCONSIN STEELWORKERS DENIED $13 MILLION IN BENEFITS

(By John F. Wasik)

The shutdown of Wisconsin Steel Company in March 1980 has hit its former employees hard and has put a big dent in the tax base.

Employees are still owed some $13 million in contractual benefits and about another $16.2 million in supplements to their pension benefits. These figures do not even take into account the workers' loss of salary. Wisconsin Steel had an annual payroll of about $70 million.

The tax rolls have lost at least $40 million in the past year, according to estimates based on the 1978 tax contributions by Wisconsin Steel and its employees (see chart, this page).

The plant, located on the Calumet River at 106th Street and Torrence Avenue, ceased operation after its mortgage was foreclosed. The closing sent more than 3,500 employees, most of them minority, to the unemployment lines without warning.

The tax rolls will probably never recoup the loss, and workers face a long wait while a bankruptcy court determines who is responsible for paying their contractual benefits.

Wisconsin Steel's millworkers, most of whom live within 10 miles of the plant, became hardship cases overnight. The job market in the steel and other heavy industries is poor, and state unemployment benefits for the workers have expired. Many of them have had to apply for food stamps and public aid.

Company records show the average steelworker at the plant was 42 years old, had 22 years of experience and earned $22,260 a year. The workforce was one-third black, one-third Latino and one-third white.

The workers received no warning of the shutdown. On March 28, 1980, International Harvester Corp. foreclosed without notice on the $64 million mortgage it arranged when it sold the plant in 1977 to EDC Holding Corp., a subsidiary of Envirodyne Industries Corp. of California.

When Harvester foreclosed, the Chase Manhattan Bank withdrew support on a $15 million working cash loan it made to Envirodyne at the time of the sale. Chase's move froze raw material shipments to the company and the mill could not operate. Two days after the shutdown, Wisconsin Steel filed for protection under Chapter XI of the bankruptcy laws.

Currently, the Economic Development Administration, a branch of the Commerce Department, owns the mill as a result of its guarantee of a $90 million loan package for plant improvements in November 1979.

Wisconsin Steel's employees were stuck with $1,787,000 in bad paychecks when Chase Manhattan seized the payroll account funds. The bank did this under a law called "right of offset" which allows a potential creditor to seize all available debtor funds in the event of a bankruptcy.

Although the workers won back $1,339,000 of their last paychecks from Chase Manhattan in a September 1980 court settlement, they are still owed $448,000 in back wages, according to court records.

Additionally, four benefits under a contractual agreement between the 3,200-member Progressive Steelworkers union and Wisconsin Steel were never paid: severance pay, vacation pay, extended vacation pay and supplementary unemployment benefits.

The largest employee loss is the lack of severance pay, a lump sum based on years of service to be paid laid-off workers, which amounted to $7.3 million.

The other benefits denied the workers are $3.5 million in accrued vacation pay, $966,000 in extended vacation pay based on seniority and $800,000 in supplementary unemployment benefits to be paid for up to 13 weeks during layoffs.

Another blow to workers was the loss of pension supplements, totaling about $16.2 million. These benefits would have paid retirees $300 a month until they reach age 62, qualifying them for federal social security benefits. Most millworkers qualifying for pension at Wisconsin Steel retired at age 55, company records show.

Retirees are still getting their basic pensions, guaranteed by the Pension Benefit Guaranty Corp., a federal agency which insures pension plans.

The loss in insurance and hospital coverage is incalculable.

According to a November 1979 study by Wisconsin Steel to support its application for the EDA loan guarantee, the plant and its employees paid $28.8 million in federal, state, county and local taxes in 1978.

Based on the 1978 taxes, the cost of the plant closing to the tax rolls includes: $12.5 million in federal income taxes, $8.2 million in social security payments, $1.9 million in state income taxes, $1.6 million in state sales and use taxes on the mill's production and $2.4 million in Cook County property taxes.

State and federal coffers also were deprived of substantial unemployment insurance premiums; Wisconsin Steel contributed more than $1 million in premiums in 1978.

The actual cost of unemployment benefits to the laid off workers over the past year has not been published. But the 1979 report estimated that closing the plant would result in $8.9 million in unemployment payments.

The report also predicted that as much as $20.6 million would be added to the mill's tax contributions five years after the improvement loan was granted.●

SMALL BUSINESS INNOVATION BILL COSPONSORS

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. LAFALCE. Mr. Speaker, yesterday I placed in the RECORD a list of the 117 Members who are cosponsors of H.R. 4326, the Small Business Innovation Development Act of 1981.

I would like today to place in the RECORD a list of those Members who have endorsed the principle of small business innovation legislation by cosponsoring one of the other small business innovation bills introduced in this Congress:

MARTIN FROST, Texas;
HAROLD HOLLENBECK, New Jersey;
CLAIR BURGENER, California;
ANTHONY MOFFETT, Connecticut;
MARGARET HECKLER, Massachusetts;
GEORGE MILLER, California;
THOMAS TAUKE, Iowa;
LAWRENCE COUGHLIN, Pennsylvania;
ALBERT GORE JR., Tennessee;
KEN KRAMER, Colorado; and
CLAUDINE SCHNEIDER, Rhode Island.●

CAB SUNSET ACT OF 1981

HON. DON H. CLAUSEN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. CLAUSEN. Mr. Speaker, as my colleagues are aware, our air transportation industry has undergone considerable change as a result of legislation which has removed much of the regulatory structure which characterized the industry since its inception. It is a process which began domestically with the cargo deregulation amendments of 1977, continued with the passage of the Airline Deregulation Act of 1978, and broadened to include certain aspects of foreign air transportation with the adoption of the International Air Transportation Competition Act of 1979.

Now, as we evaluate the country's experience under these laws, we are taking another signficiant step in the process by introducing a bill to sunset

the CAB 150 days after this legislation is enacted. Under existing law, the Board would sunset on January 1, 1985, in accordance with the provisions of the Airline Deregulation Act.

I want to emphasize that this legislation does not terminate outright all of the functions of the CAB. Some Federal involvement will still be necessary and, in those areas, we have provided for the orderly transfer of the Board's existing authority to the Department of Transportation where consistent with the public interest. Examples of this are: First, the essential air service program, one of the most important features of the Airline Deregulation Act, which was designed to guarantee service to small communities; second, the authority to determine financial fitness of air carriers as it relates to the FAA's safety responsibilities; and third, the authority to prescribe mandatory joint fares and divisions.

In introducing this legislation, we have considered the effect that deregulation has had on the aviation industry and the traveling public and determined that our experience justifies an earlier termination of the Board. I think it is fair to say that deregulation has generally been successful, although there are cities which have experienced declines in air service from prederegulation levels. On balance, however, the pluses and minuses associated with deregulation have generally been the result of competitive market forces at work. Since it was certainly the intent of Congress to make the industry more competitive, I think we can safely say that this has already been accomplished and that competition will increase in the years ahead.

Among the major provisions in the legislation are: First, the retention of the section 406 subsidy program at reduced levels through fiscal year 1985 for points enplaning less than 80 passengers per day; second, the transfer of CAB's rate-setting function for foreign air transportation of mail to the Secretary of Transportation, with the Board's domestic authority to be transferred to the Postal Service to be exercised through negotiations and competitive bidding; third, the repeal of the Board's authority to approve mergers between air carriers, but reserving to the Government a right to intervene in antitrust litigation arising out of proposed airline mergers; fourth, a requirement that all temporary certificates issued in limited designation international markets be issued for an initial period of 5 years with a rebuttable presumption that such certificates shall be renewed, and fifth, a separate section which grants antitrust immunity to air carriers which comply with DOT rules concerning price notification.

In addition to the provisions affecting the Civil Aeronautics Board, the bill also amends some of the title VI safety authority of the Federal Aviation Administration.

Under existing law, the duties of the FAA, as well as its exemption authority, in the areas of passenger screening, law enforcement support, and airport certification in general are tied to whether or not a carrier is certificated by the CAB. Since the Board will no longer issue certificates to domestic air carriers, a new distinction is needed.

After careful consideration, and because of the agency's fine record in this area, we have given the FAA the discretion to determine whether or not a particular carrier or airport can be exempted from its security regulations. In addition, we have broadened the coverage of section 612 so that the agency will now have the authority to require airport operating certificates for airports serving commuter air carriers. This modification is necessary given the increasing importance of commuter carriers and the need to assure the highest level of safety for those operations. Moreover, it will insure that the FAA has the necessary tools to move toward a fully integrated national airport system.

Mr. Speaker, this legislation will continue the trend toward deregulation which has been firmly established in recent years while retaining a Federal role in some necessary areas. It will assure that the transition to a fully deregulated environment will continue to proceed expeditiously and as smoothly as possible in the years ahead.

I believe the bill which we are introducing today will accomplish these objectives and that our air transportation industry and the traveling public will reap substantial benefits from its enactment.

It is also my hope that the considerable input which we have received from the aviation community, Members of Congress and the traveling public will continue as the legislation moves through the Congress. It is only with the cooperation and dedication of all those interested in airline deregulation that we in the Congress can fashion legislation which is truly responsive to the needs of all concerned.●

THE FUTURE OF TOBACCO SUPPORTS

HON. GENE SNYDER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. SNYDER. Mr. Speaker, tobacco was recently the subject of some contention in this body and during the debate on the future of the Federal tobacco price support program, I realized that a good many of my colleagues have probably never had the opportunity to relish for themselves the joy of working a field of tobacco.

To rectify that situation and provide my colleagues a brief glimpse at a tobacco farmer's life, I would like to share with you "Raisin' Burley", a poem written by the Honorable Clyde E. (Jack) Greenwood, judge executive of Trimble County, Ky.

RAISIN' BURLEY

(By Clyde E. "Jack" Greenwood)

Work all year long
Raisin' burley
Goin' to bed late
An' gettin' up early;
Burnin' the beds,
Plantin' th' seeds
An' frettin' 'bout keepin'
Down th' weeds;
Lay on a sack
Stretchin' out prone
Till th' feelin's all gone
In one hip bone;
Then you roll over
On th' other side,
Hit a canvas nail
An rake off some hide;
But ye pay no mind
'Cause tis surplus fat,
An' ye just cuss a little
An' let it go at that.
Plants turn yellow,
Th' flea bugs are bad,
Then blue mold sets in
An' things look bad
So ye call th' county agent
Fer him t' come an' look,
An' he buzzes in with
An experiment book,
He takes a sample
An' ye all talk it o'ver;
Then he leaves a pamphlet
An' says he'll send more.
You do what he says
Then the plants begin to grow,
Turnin' right green
An' lookin' good fer sho'
Set it in th' field
An' watch it die;
See th' wireworms
An' cutworms ply;
Then you set it again
An' maybe it'll stay,
But if it don't
It's too late anyway.
Get th' plow
Tear up th' middle
Get a hoe
An' piddle an' piddle.
Plow some more
Then lay it by,
Pinch out th' button
When it gets so high.
Pick off th' worms
As big as snakes,
An' pray fer rain
While it makes.
Git on th' suckers,
Jerk 'em out
An' make way
Fer others t' sprout.
Grab up a spear
An' put it on a stick—
Use a tomahawk
Accurate an' quick.
Get it in th' barn
'Fore th' frost
So none of its quality

Will be lost.
When it has cured
Start strippin' fast
T' hit th' market first
'Stead of last.
Take it t' town,
Put it on th' floor
At your favorite house
Where ye been before;
Watch th' grade,
Wish it was higher,
Then trust a raise
Will come from a buyer.
Some of it goes
Over is a rule,
But th' one ye wanted raised
Goes to the pool.
Go back home
A little bit ahead
An' get ready
T' make a plant bed.●

A PERSONAL EXPLANATION

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. DORGAN of North Dakota. Mr. Speaker, on Wednesday, November 18, 1981, during consideration of H.R. 4995, Department of Defense appropriations, I was necessarily absent on official business. Had I been present, I would have voted as follows:

Yes, on rollcall No. 315—to delete $1.79 billion for Air Force procurement of the B-1 bomber;

Yes, on rollcall No. 316—to delete $1.8 billion for the B-1 bomber;

Yes, on rollcall No. 317—to delete $1.9 billion for the MX missile and its basing mode;

No, on rollcall No. 318—to reduce by 2 percent funding for military procurement and research and development, except spare parts;

No, on rollcall No. 319—to reduce by 2 percent funding for military procurement and research and development, except spare parts, repair parts, and ammunition; and

Yes, on rollcall No. 320—on final passage of the bill H.R. 4995.

My support for final passage of the bill reflects my belief that we need to strengthen our national defense. My objection to funding for the B-1 bomber arises because I doubt this aircraft will really improve our strategic deterrent and because we can make a more cost-effective investment in the advanced technology, or Stealth, bomber. I oppose the MX system in the bill because military experts have raised grave doubts about its survivability; it therefore amounts to a waste of the taxpayers' money. We need a defense system that works and not one that wastes.●

THE TOUGHLOVE SOLUTION

HON. CLAIR W. BURGENER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. BURGENER. Mr. Speaker, I have for many years been an admirer of Dr. Garrett Hardin. He is professor emeritus of human ecology at the University of California at Santa Barbara, and chairman of the board of the Environmental Fund in Washington. His writings on the subject of illegal immigration into the United States have provided, in my opinion, a beacon light of reason in an otherwise murky and troublesome area.

Recently Newsweek published an essay of Dr. Hardin's on the subject of the United States' relationship with poor or underdeveloped nations. I believe it to be so thought provoking it should be shared with readers of the CONGRESSIONAL RECORD. Dr. Hardin's article follows:

[From Newsweek, Oct. 26, 1981]

THE TOUGHLOVE SOLUTION

(By Garrett Hardin)

Why should the United States be concerned with the suffering of poor countries? Two sorts of reasons are given, one moral and the other prudential.

The prudential reasons are plausible, but basically unsound. We are told that if we don't take care of a poor nation it might attack us. Nonsense. Modern warfare is so expensive that even rich nations cannot afford it. If a poor country can't afford bread, it certainly can't afford guns. International terrorism comes cheaper, of course. So long as there is envy in the world—which is forever—terrorism will be a tempting option. The answer to terrorism is police action: this is not a perfect answer, but it is the best there is.

What about this: "If we don't take care of poor people in their own countries, won't they migrate into ours?" Unfortunately, there are 2.5 billion poor people in the world, and they are increasing by 40 million per year. We cannot possibly keep up with this need. Our responsibility is to keep our country from being overwhelmed by immigrants. The responsibility of each poor country is to keep the excess population from being produced.

LESSON

What remains are the moral reasons for helping other countries, and these are weighty. But we must remember what we have learned from domestic experiences: we can't solve social problems by blindly throwing money at them. We've had a salutary lesson in the development of India and China during the past three decades. Since 1950 India has received massive foreign aid from many countries, but China from only one country (the Soviet Union) and that only until 1957. At the outset the two countries were equally miserable and had equally poor prospects. Today? Without question the people of China are far better off. Foreign aid did not rescue India from poverty; lack of aid did not handicap China. In fact, it may be that China did so well precisely because she was not "helped" by "aid."

Back in 1945 Mao Tse-tung committed China to a policy of "regeneration through our own efforts." Fertilizers and factories are splendid things, but far more important than technology is what is inside the heads of men and women. Foreign aid can supply technology: the people must be willing to make the social changes that will make technology work.

It is essential that we distinguish between crisis and crunch. When an earthquake killed 23,000 people in Guatemala in 1976, that has a crisis. The world responded generously, and it should have. But when thousands—or millions—of people die of starvation in an overpopulated country like Bangladesh, what we are confronted with is not a crisis but a crunch. Ninety-four million Bangladeshi live in an area the size of Iowa—which has only 3 million people. Bangladesh, with its fertile soil and a climate that permits three crops a year, is a rich country, but not rich enough to add three-quarters of an Iowa every year to a population already 30 times as large. Direct food aid to such a country merely subsidizes further destructive population growth.

Sensing that gifts are bad, we generate euphemisms to hide our tracks. "Concessionary rates of interest" is a euphemism; anyone who can borrow money at 3 percent when the going rate is 8 percent is getting a gift. A loan forgiven is certainly a gift. Poor countries ask for, and get, loan after loan. As their debt mounts, the burden of "servicing the debt"—paying the interest—becomes unbearable. Finally, since foreclosure is out of the question, the lender has no choice but to forgive the debt.

DRUGS

Way back in 1953 John Foster Dulles saw the direction foreign aid was taking. "You know," he said to a friend, "aid is like opium. There are withdrawal pains when you remove it." I think we have now reached the stage when foreign-aid addicts should be subjected to the "cold turkey" treatment. Most of the world's wretchedness is caused by the crunch of overpopulation, which will only be made worse by the drug called "aid." That this drug is addictive is shown in a statement made by the President of Kenya in 1980: "No country can maintain its economic independence without assistance from the outside." What a long way from Mao, and what a curious definition it implies of "independence"!

Now that rich countries are catching on to the corruption of the word "loan," poor countries are taking a different tack: they are demanding concessions in foreign trade. They want to be paid more than market prices for their exports and to buy at less than the market—gifts under another name.

Times are changing. Notice what is happening to parenting. We are relearning what has been known for thousands of years: love must be combined with discipline. Recently, a group of American parents, driven to distraction by their children's drug taking and rampant hedonism, joined forces to lay down the law to their children—with love. These parents meet to exchange ideas, and they meet with their children to say, "Shape up or ship out." Significantly, the parents called their organization Toughlove.

COURAGE

Toughlove parenting is perilous, but it has at least the possibility of solving problems permissiveness has created. Toughlove takes courage. Some of the children clear out. This is hard on parents, but they accept the risk because the alternative of continuing to support irresponsible behavior is worse.

Relations among nations must be guided by Toughlove, too. Spokesmen for poor nations now threaten us with the loss of their love if we do not give them everything they demand. We must be prepared to lose their love out of genuine concern for the long-term interests of their people. Most of the poor countries are, in fact, rich—rich in natural resources. It is their governments, usually, that are poor.

To realize a country's inherent richness, a government must see to it that population matches the carrying capacity of the land. China has shown how to use incentives and disincentives to work toward this goal. China's methods may not be acceptable everywhere, but the goal should be universal. Each country must choose the means that meshes with its culture. Outsiders can furnish the technology of birth control, but population control must grow out of the will of the people, expressed through their political decisions.

There is no survival without self-reliance, which cannot be donated from the outside. Self-reliance must be generated inside each nation, by the people themselves. There is no other way.●

ENERGY BLOCK GRANT LEGISLATION

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. EDGAR. Mr. Speaker, I would like to call to the attention of the House a statement prepared by the Northeast-Midwest Congressional Coalition regarding the future of Federal energy assistance and conservation programs.

In testimony submitted to the Senate Energy and Natural Resources Committee the NMCC attempts to assess the regional impact of proposed legislation which would convert current weatherization and low-income fuel assistance programs into block grants for the States. The coalition foresees several significant problems with this legislation. First, the allocation of money to the States would be based on population rather than need, ignoring the special fuel and conservation needs of the colder States in the Northeast and Midwest. Second, the proposed authorization level would be drastically lower than current levels for energy assistance programs. Third, the repeal of existing Federal conservation programs would move the Federal Government further away from its legitimate role in guiding national energy policy. Lastly, a large State match requirement would effectively prevent many of the States in our region from taking advantage of the block grant. Many of the States in our region are already facing severe fiscal constraints, unlike many energy-producing states in the South and West which find themselves in more comfortable circumstances.

I hope the members of the House will consider the coalitions observations when dealing with important energy legislation over the coming months.

The testimony follows:

On behalf of the Northeast-Midwest Congressional and Senate Coalitions, we would like to thank Senator James A. McClure and the other members of the Senate Energy and Natural Resources Committee for the opportunity to submit our comments on "The State and Local Energy Block Grant Act of 1981." As members of the Executive Committee of the 2 organizations, we represent the House and Senate members from the 18 states in the Northeastern and Midwestern United States. The Coalitions seek to inform members about the regional implications of national policies and proposals, and to influence those issues of greatest importance to Northeastern and Midwestern states. Few issues are as important to the Northeast-Midwest region as energy. Our disproportionate dependence on imported oil, the preponderence of an older, energy inefficient housing stock, the lack of oil and gas reserves, and inordinately high energy prices have combined to make our region most vulnerable to energy price rises and supply interruptions. The Northeast-Midwest region, aptly labeled the "Frostbelt", must grapple with the problems common to energy consuming states on a daily basis—particularly during the coming winter months when cold weather and high energy prices threaten the health and well-being of much of our low income and elderly population.

In an effort to develop a unified approach to solving our energy problems, the Northeast-Midwest Congressional Coalition conducted an energy agenda setting process during April, May and June of this year. Field hearings, chaired by Coalition members, were held in Stamford, Boston, Sioux City, St. Paul, and Pittsburgh, and covered the future of coal; co-generation, district heating and cooling, and municipal waste to energy systems; rural and urban perspectives on the use of conservation and renewable resources; and the effect of rising energy costs on the elderly and poor. The hearings culminated in a national conference in Washington on June 4. Over 350 public- and private-sector leaders, scholars, and others participated in the energy agenda setting process. The product of the 3 month exercise was an energy agenda that put the Coalition on record in support of energy conservation, renewable energy technologies and the increased use of coal.

In addition, during the same time, research conducted for the Coalition by the Northeast-Midwest Institute showed that America's energy bill in 1980 was $387 billion—a massive increase over the $83 billion Americans paid for energy in 1970. After adjustment for the dollar's decline in value, this represents an increase in energy spending in 1980 of 141 percent over the amount spent in 1970. This increase outstripped the decade's inflation rate of 94 percent and the small 37 percent increase in real personal income. The Northeast-Midwest region felt the impact of this increase particularly hard—where the costs of residential and industrial energy were the highest in the nation.

It is within this context that Coalition members have continually supported energy conservation programs. The reconciliation bill, for example, maintains the authority for the energy conservation programs most important to the Northeast-Midwest region. And the importance of energy conservation and renewable energy technologies was reiterated recently when over 120 House Coalition members cosponsored a resolution putting the House on record in support of existing conservation and energy supply tax credits. Our region's support and dependence on conservation and renewable energy programs should not be underestimated.

S. 1544

The "State and Local Energy Block Grant Act of 1981" would repeal a number of existing conservation programs, require a state match, authorize $200 million for an energy block grant to states and distribute funds based primarily upon a state's population. While the block grant approach to funding conservation efforts may be worthwhile, we feel that the provisions of this bill are not in the best interest of either the Northeastern and Midwestern states or the entire nation.

We have 4 major concerns:

ALLOCATION FORMULA

75 percent of the block grant funds would be allocated on the basis of state's population and 25 percent would be distributed equally among all states. The proposed formula would significantly reduce the proportion of energy conservation funds allocated in Northeastern and Midwestern states.

Specifically, our primary concern with the formula is the reliance on population as the sole factor for allocating funds. We believe that it is necessary to incorporate a measure of need into the allocation formula. The low income weatherization program, for example, uses heating and cooling degree days to approximate need. This has the effect of targeting funds to those states where energy costs are highest and the potential to save energy and reduce our dependence upon imported oil is greatest.

AUTHORIZATION LEVEL

The proposed legislation would authorize a $200 million funding level for each of the fiscal years 1982, 1983 and 1984. We feel that this is inadequate. The low income weatherization program alone was funded at $182 million in fiscal 1981 and the reconciliation bill proposes $336 million (with $175 million earmarked for weatherization) for these programs.

A funding level of $200 million would require states to substantially reduce or eliminate many of their energy conservation activities. We are particularly concerned about the future of the low income weatherization program. The program has proven to be an effective method of reducing energy costs and saving scarce energy sources. With the intense competition for funds among a number of very desirable energy saving programs, the needs of our low income residents may not be adequately addressed.

STATE MATCH

The proposed legislation would require a 30 percent state match in fiscal 1982 and a 50 percent match in 1983 and 1984. We believe that this is excessive and would discriminate against energy consuming states—many of whom are already experiencing serious fiscal problems. At least 87 percent of the states' surplus in fiscal 1982 is projected to be in the South and West.

We fear that these match requirements may force some of the states most in need of assistance to forego federal block grant funds.

REPEAL OF CATEGORICAL PROGRAMS

The legislation would repeal many existing energy conservation programs. While we

would agree that regulatory changes could be made in some of the programs, we are concerned about outright repeal. The federal government would be removing itself from energy conservation activities—leaving the states with no direction as to how to use the block grant funds most effectively. In addition, we fear that combining all of the programs into a single block grant increases the likelihood of total elimination or substantially reduced funding for future energy conservation efforts.

In summary, we urge the Committee to incorporate a measure of need for energy conservation in the block grant allocation formula, authorize a funding level adequate to conduct a comprehensive conservation program, and reduce the state match so that all states will be able to qualify for assistance.

Again, we thank the Committee for the opportunity to submit our comments.●

DISARRAY AT INS

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. HYDE. Mr. Speaker, the disarray in the Immigration and Naturalization Service is highlighted in an excellent article appearing in the New York Times of November 23, 1981.

We in Congress must share the blame for our failure to commit adequate resources or to oversee the operations of this important agency.

I hope my colleagues will read this UPI article carefully and become as upset as I am at the facts alleged therein. Then, let us do something about it.

BACKLOG MOUNTING ON FILES OF ALIENS—30 MILLION FORMS ON FOREIGN VISITORS ARE UNPROCESSED, AGENCY'S STUDY SHOWS

WASHINGTON, Nov. 22 (UPI)—Bureaucratic problems have left the Immigration and Naturalization Service unable to keep track of 30 million forms filed by foreign visitors, and it may be 1983 before it is known who entered or left the country in the last two years.

Disclosure of the backlog was made in a study conducted for the agency and by immigration officials in interviews.

The forms have not been processed so that they can be fed into the agency's computer system. Meanwhile, the millions of forms have simply been put on microfilm and left stacking up in cartons at agency facilities here.

Only a year ago, top immigration aides pledged to Congress that the agency would soon upgrade its computer system so it could better monitor the mounting flow of aliens in the country, including 10 million visitors a year. The Reagan Administration has also submitted proposals to Congress calling for stricter controls on illegal immigration.

A THREAT TO CREDIBILITY

Robert Kane, the agency's Associate Commissioner for operations support, said the backlog in processing of visitor forms "puts the whole credibility of the system into question—it puts the credibility of the I.N.S. into question."

He said the agency would soon present Congress with a 10-year plan for a sophisticated computer system to handle nearly every aspect of its mission. He said the current computer that stores visitors' data was "outmoded."

Irvin Klavan, the Associate Commissioner for information services, said the backlog of I-94 forms, which are filed when visitors enter and leave the country, totaled more than 30 million on Sept. 30, when the last official count was taken. He said it was now probably 32 million, covering 20 million visitors who each had an arrival and departure I-94.

He also said 664,000 visitors' applications for extensions of their temporary visas had not been put into the agency's computer because they could not be matched to the original arrival forms.

LONG WAIT IS FORESEEN

Immigration officials are working to eliminate the backlog, but they say it will be at least January 1983 before agency files are brought up to date.

Mr. Klavan and Mr. Kane conceded that the agency was better able to monitor foreign visits in 1976, before such files were put into the computer system.

Price Waterhouse & Company, a private consulting firm that conducted a six-month, $100,000 study of agency's nonimmigrant control system, termed the I-94 backlogs "very troublesome."

Agency officials, who typically blame shortages of funds for failures to keep track of aliens, this time blamed a private contractor, Milmark Services Inc. of Crofton, Md. They said Milmark failed to perform acceptably on a contract calling for it to enter the data into the agency's computer system.

The task of key-punching is complicated because the visitors' forms are often written in foreign languages.

Agency officials said Milmark was not paid for any of its work in a two-month period in the summer of 1980 because none of the work was acceptable.

COMPANY OFFICIAL RESPONDS

Thomas Ruger, Milmark's treasurer, said from his home in Wilmington, Del., that his company was being unfairly portrayed as a "goat" and that the agency had a backlog of 10 million forms before the company got the contract.

Mr. Ruger said the agency postponed the start of work under the contract six times while Milmark's previous owners frantically built up and reduced their staff in anticipation of doing the work. He said the company finally got only a week's notice, and "you just don't put 100 people together in a week." Mr. Ruger said Milmark had been a successful Government contractor for 14 years and that the immigration episode had threatened its future.

Mr. Klavan declined to comment on the charges, referring all questions to Jack Keller, the project manager for the Milmark contract, whose home telephone number could not be obtained.

On Sept. 30, the agency awarded $2 million in contracts providing for processing of the forms, this time assigning three private companies to do the job.●

CHAMPIONSHIP FOOTBALL—NEW YORK VERSION

HON. STAN LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. LUNDINE. Mr. Speaker, a proud moment in Chautauqua and Cattaraugus Counties' high school football fortunes was achieved this year as an unprecedented five schools in my district earned berths in the Western New York Football Federation's championship games played in Rich Stadium, the home of the Buffalo Bills.

The Western New York Federation is unique in format for postseason championships. There are 10 divisions with a total of 72 schools. The federation was founded in 1970 by the late Louis Foy, of Salamanca, as the guiding light. As a member of Section Six High School Athletics Council, which included five western New York counties, Foy was entrusted to draw plans guaranteeing southern tier high schools with competitive football schedules.

Three years ago, the federation advanced its progress to postseason championships played in the Buffalo Bills' Rich Stadium. So successful have these championship games been that other sections in the State are following our lead. The long-sought New York State football championships could be scheduled for Syracuse University's Carrier Dome.

Three of the schools are from Chautauqua County and two from Cattaraugus County—the 5 comprised one-half of the 10 schools in the Saturday, November 14, championship round.

Jamestown High School, my alma mater, went 9-0, Frewsburg went 8-0 with Panama going 6-2 as the Chautauqua County representatives, Olean High School holds a record of 9-0 and West Valley 7-1 as the two Cattaraugus County champions.

Although my alma mater lost 20-14 in a very spirited game with West Seneca, two teams from Cattaraugus won their games. It was a glorious day for the Olean High School Huskies just as I knew it would be. Olean High School trounced Springville 13-7 to complete an exciting underfeated season—10-0. The game between West Valley and Panama was a difficult one to predict. Panama prevailed after a difficult struggle, therefore bringing joy to many in Chautauqua County and pride to the fans of West Valley.

I am delighted that the outstanding efforts of a very dedicated Louis Foy created the Western New York Federation. The federation provides our local athletes the opportunity for competition and recognition they deserve.●

REAGAN BUDGET CUTBACKS

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. PEASE. Mr. Speaker, last week the House Ways and Means Committee conducted hearings in Baltimore to gain an understanding of how the Reagan budget cutbacks are interacting with one another. That is the topic I addressed in my weekly column, Washington Report. It follows:

WASHINGTON REPORT

(By DON J. PEASE)

When President Reagan induced Congress last spring to cut $35 billion in spending for social programs, the cuts were generally considered separately from one another—a cutback in one program, the trimming of another, etc.

How the cutbacks interact with one another was the subject of a hearing which the House Ways and Means Committee held in Baltimore last week. We heard from a wide range of witnesses from city, county and state government and from private organizations.

As witness after witness testified on various social program reductions, I picked out the impact on one particular problem—that of mental retardation in children.

We were told that Baltimore's Maternal and Infant Care Program, largely federally funded, will have to severely cut back its efforts to find high risk poor patients early in their pregnancies and to provide them with continuing care through birth and infancy. Nearly 50 percent of the women in this program are pregnant teenagers.

Inadequate care and nutrition during pregnancy greatly increases the chances for both premature birth and mental retardation.

We were told of the case of a child born two and a half months early to such a mother. The baby, weighing one and a half pounds, suffered through two months of life-threatening crises. Discharged after three months, the baby had run up a hospital bill of $54,513. Federal-state limitations held Medicaid payments to $13,322. The local Mercy Hospital got stuck with the balance of $41,191.

We visited Baltimore's Kennedy Institute (affiliated with Johns Hopkins University Hospital), which combines research with training of children with mental retardation, cerebral palsy, brain damage, etc. Largely on an outpatient basis, the institute trains children, their parents, community health workers and university students to deal with the children's handicaps. The institute faces loss of half of the federal funds which make up about 60 percent of its total budget.

So the poor parents who are now more likely to bear retarded children are less likely to find help at the Kennedy Institute.

We were told by Maryland education officials that cutbacks in federal education funding will mean few special education classes available when a mentally handicapped child reaches school age.

But with the federal government withdrawing from social programs, can't the gap be filled by state, local government and private sources?

Governor Harry Hughes said the state will try, but success will be limited. The Reagan block grant approach transfers important social responsibilities to the states. The states get all of the responsibility but only 65 to 80 percent of the money which the federal government had been spending. And federal revenue sharing funds for the states have been eliminated.

Local governments? Baltimore Mayor Donald Schaefer testified that local taxes are already twice as high for Baltimore, an aging industrial city with a high proportion of poor people, as for any other Maryland community.

Local charitable organizations? Put down Mercy Hospital for $41,191 for one baby. And a bright spot—the local United Fund increased its receipts from $19 million to $22 million, a healthy increase.

Local industry also gets high marks for pledging $500,000 to fund programs once provided by federal funds.

But as Mayor Schaefer emphasized, the extra $3.5 million from United Fund and industry won't quite cover Baltimore's $80 million loss of federal funds. Some of the truly needy are going to get hurt.●

RESEARCH IN BUFFALO AIDS BATTLE AGAINST MULTIPLE SCLEROSIS

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. NOWAK. Mr. Speaker, the media recently has reported on a 2-year "pioneering study" by a team of researchers in my hometown of Buffalo, N.Y., whose findings indicate the positive effect of treating multiple sclerosis patients with the substance interferon.

According to a copyrighted article in the Buffalo Evening News the findings by the researchers at the Dent Neurologic Institute of Millard Fillmore Hospital and at Roswell Park Memorial Institute "may lead to a major breakthrough in the treatment of the disease." The team was headed by Dr. Lawrence Jacobs, a neurologist at the Dent Neurologic Institute.

I would like to congratulate Dr. Jacobs and the other members of the team who contributed to this significant project, which further enhances the Buffalo area's reputation for excellence in medical research.

Mr. Speaker, at this point in the RECORD, I would like to bring to my colleagues' attention the following article on this study which appeared in the Buffalo Evening News on November 19, 1981:

"PIONEERING STUDY" HERE SHOWS INTERFERON IS EFFECTIVE IN TREATING MULTIPLE SCLEROSIS

(By Arthur Page)

A two-year study by a team of Buffalo researchers has shown that the substance interferon appears to be an effective treatment for multiple sclerosis—a disease for which there has been no successful treatment to date.

The majority of the Buffalo area patients receiving interferon, which has been tested primarily in cancer patients up to now, appear to have had the progression of their multiple sclerosis slowed down—if not stopped—for periods of up to two years.

The findings, which may lead to a major breakthrough in the treatment of the disease, were the result of studies by researchers at the Dent Neurologic Institute of Millard Fillmore Hospital and at Roswell Park Memorial Institute.

The most common crippling disease of young adults, multiple sclerosis is estimated to affect 123,000 persons in the continental United States.

Eight of the 10 patients with multiple sclerosis who received injections of interferon into their spinal fluid over a six-month period at the beginning of the study, experienced no exacerbations, or disease progression, during the period up to this August.

While two experienced exacerbations, they have fewer than would be expected based on the medical history of their multiple sclerosis.

A group of 10 multiple sclerosis patients, who received no treatment and acted as a control, experienced exacerbations at a rate slightly higher than would be predicted based on their disease history.

Dr. Lawrence Jacobs, neurologist at the Dent Neurologic Institute and principal investigator for the study, said the results in the patients receiving interferon are considered "very significant" from a scientific point of view. Statistical analysis supports the fact they occurred because the patients received interferon and were not due to chance, he added.

Dr. Jacobs said the use of interferon could not be considered a "cure" for the patients. While some experienced less physical disability after the study than before, there were others among the eight with no exacerbations who were just as disabled and some still confined to wheelchairs.

The study indicates, he added, that in cases where multiple sclerosis is diagnosed early, use of interferon may prevent disability and deterioration of the individual's nervous system.

Dr. Jacobs said it appears that in the eight patients, interferon either knocked out the triggering agent which causes multiple sclerosis, or bolstered the patient's natural defense system to fight it.

Since interferon is active against viruses, he said the work lends credence to theories that multiple sclerosis is caused by a virus.

Working with Dr. Jacobs on the study has been Dr. Judith O'Malley, senior cancer research scientist at Roswell Park; Dr. Arnold Freeman, chief of Roswell Park's Pediatric Oncology Department; and Roslyn Ekes, a medical technician at Dent. The human fibroblast interferon used in the study was prepared at Roswell Park in the laboratory of Dr. Julius Horoszewicz.

The results up to this past August will be published in an article in the Nov. 27 issue of "Science," the prestigious publication of the American Association for the Advancement of Science. Updated results will appear in an article in "Archives of Neurology" next spring.

Calling the Buffalo researchers work a "pioneering study," one of the reviewers who Science asked to evaluate the study said their effort "appears to have paid off handsomely."

While noting that some of their conclusions may be open to question, he added: "At the very least, this study has shed new light on the probable role of interferons in

the pathogenesis of multiple sclerosis; at best it may have opened a new era in its managment."

Dr. Jacobs said the previously unpublished work was "very well received" when he presented it in September at the 12th World Congress of Neurology in Kyoto, Japan, and in early October at the Second International Conference for Interferon Research in San Francisco.

He and Dr. O'Malley are consulting with researchers in Switzerland, planning to duplicate the study.

The study was entirely locally funded by the James H. Cummings Foundation, Baird Foundation, Josephine Goodyear Foundation, Harry M. Dent Foundation, Margaret H. Wendt Foundation, Delaware North Companies and the Losasso and Slepian families of Niagara Falls.

Dr. Jacobs said the study was based on the hypothesis that if multiple sclerosis is caused by a virus, which is a popular yet unproven theory held by many in the field, administration of interferon may be effective as a treatment.

Interferon is a protein which is among the most biologically active known substances. A component of the body's immune system, it normally is produced by all human cells when they are invaded by a virus and protects cells not yet affected by the virus.

Dr. Jacobs explained that a previous study showed multiple sclerosis patients "do not make a normal amount of interferon in response to a challenge by a virus."

The local study involved two groups of multiple sclerosis patients: 10 who received interferon and 10 who received no treatment but whose conditions were monitored in the same precise ways as those receiving interferon. Those receiving interferon agreed to forgo any treatments for the symptoms of their disease for the first year of the study.

Dr. Jacobs said the human fibroblast interferon was administered by lumbar punctures into the cerebrospinal fluid.

Interferon injected systematically, he added, does not get into the central nervous system, the area directly affected by multiple sclerosis, because of a "blood-brain barrier." The "only practical way" to get it there is through a lumbar puncture, he added.

While the participants were distributed randomly, the study was not a "blind" one in which one group received treatment while the other received placebo treatments with no medication and the researchers did not know which group individual patients were in. The researchers felt, he added, that lumbar punctures to administer placebo treatments to the controls could not be justified.

Patients receiving interferon were given lumbar punctures twice a week for the first four weeks and then once monthly for five months.

They were observed in the hospital during the first week of the study to monitor any reactions to the interferon. Dr. Jacobs said the most common side effect of the treatment was headache, which in some cases was severe, and in some cases there was fever, weakness and muscle aches.

"Some were very mildly ill," he added. "Some were so sick they had to go to bed for up to 10 days to two weeks."

The effects of the interferon on the multiple sclerosis of those receiving it were measured in terms of exacerbations in their condition and monitoring of their degree of disability.

Multiple sclerosis usually is characterized by periods of active disease alternating with rest periods. For a period of active disease to be considered an exacerbation for the study, Dr. Jacobs said it has to be "a separate episode or period of development of new symptoms or group of symptoms when the clinical course had been stationary or improving during the previous month.

The bout had to last longer than 24 hours and there had to be objective neurologic changes confirming the deterioration examination."

Careful histories were done on the multiple sclerosis of each patient to document the number of exacerbations they had experienced prior to the study and their annual rate. By multiplying the amount of time on the study by the rate of exacerbations before the study, the researchers determined the number of exacerbations which would be expected to occur in each participant during that time.

Analysis of data from those receiving interferon and those in the control group, comparing the numbers of exacerbations which occurred with those that would be expected, showed significantly fewer exacerbations among the former and a very slight, insignificant increase among the controls.

While the 10 patients receiving interferon would be expected to have a total of 27.3 exacerbations during the period of the study, they experienced only 4 and those four occurred among only two patients. Dr. Jacobs said.

Eight of the patients, who would be expected to have from .6 to 6.0 exacerbations during their time in the study, had none.

Of the two receiving interferon who had exacerbations, both had less than would be predicted. The one who experienced 3 would have been expected to have 5.3, and the one who had 1 would have been predicted to have 4.6.

The controls, on the other hand, had slightly more exacerbations than would be expected, experiencing a total of 10 when the researchers expected 8.1. Four of the patients in the control group, none of whom was expected to have more than one during the period, had no exacerbations.

Ironically, while the two groups were determined by a flip of a coin, Dr. Jacobs said the group receiving interferon as a whole had a history of more exacerbations annually than the controls and would have been expected to have more than three times as many of them during the study than the control expected group.

The annual exacerbation rate for the interferon recipients took what Dr. Jacobs called a "highly significant" drop, with the rate during the study being .25 exacerbations per year, compared to 1.8 annually before the study. The rate for the controls increased slightly, from .69 to .83, but not significantly, he added.

The exacerbation-free intervals experienced during the study by three of those receiving interferon were the longest such intervals they had experienced since their multiple sclerosis began, he noted.

Comparing "clinical disability status scores" for patients in both groups, Dr. Jacobs said the researchers labeled 5 who received interferon and 1 in the control group as being "better" at the end to two years. In 4 recipients and 4 controls the score was "unchanged" and in on 1 recipient and 5 controls it was "worse."

Analysis of data on those who were judged to be "better," he added, showed they tended to "have had their disease for a shorter time, have had less exacerbations and to have been less severely disabled before the study."

The researchers, Dr. Jacobs said, are still collecting data on and monitoring conditions of the 10 patients in each group.●

HOW DO WE JUSTIFY PASSAGE OF HOUSE JOINT RESOLUTION 349?

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. PAUL. Mr. Speaker, House Joint Resolution 349 authorizes the participation of the United States in a "multinational force and observers" to implement the treaty of peace between Egypt and Israel.

In authorizing this participation, I realize that the intentions of this body were entirely honorable. The desire for peace in this most troubled and sensitive area of the world is something we all share. Nevertheless, the commitment of American combat forces and civilians to a peacekeeping force, without a security pact, for an unlimited period of time, is an act of great import, an act unprecedented in the history of this Nation, an act taken in haste, and an act we may soon regret.

Twelve hundred members of the Armed Forces will take part in the MFO, and will make up about half of the total. Along with soldiers from Fiji, Colombia, and perhaps several other countries, our boys will be equipped for combat.

We have also undertaken the bulk of the financial commitments needed to sustain this force. The initial cost to the taxpayers prior to September 1982 will be $135 million, or 60 percent of the startup costs. Thereafter, tentative initial estimates call for American contributions of $35 million per year, or one-third of the continuing costs.

Relative to the outrageously large military and economic subsidies to Israel and Egypt, the sums involved may seem modest. But at a time of alleged budget austerity, when our Government considers canceling the minimum social security benefit to save money, how on earth can we justify this sort of expenditure?

Some will argue that the cost of war is far greater than the cost of peace. But the threat of war would be significantly lessened if the United States, once and for all, stopped subsidizing both sides of every conflict that arises. Not only have we armed both sides in the Middle East—Israel, Saudi Arabia, Jordan, Egypt, and perhaps even Iraq—but now we are committing our own combat forces to stand in the midst of this torrid chaos of armed might to try and keep these peoples

from one another's throats. The Camp David accords have already cost the taxpayers over $5 billion. We have no right committing additional millions, little less all those hundreds of American lives, to a conflict in which we have no part.

The Soviet Union succeeded in thwarting a U.N. peacekeeping force, and we can be sure that they will do their best to create mischief for this new American commitment. As my colleague, PAUL FINDLEY, has pointed out, they will also exploit this situation as an example of American imperialism.

The fact is that the Middle East is not the responsibility of this Government; the only responsibility of this Government is the security of American territory and American citizens. We have not the moral warrant, the constitutional authority, nor the economic wherewithal to police the world.

I say this not out of meanness or a lack of concern with world peace. In the first case, we are not spending our money but the people's money, and it is high time that we observed the constitutional limits imposed on our activities. In the second case, it is clear to me that the history of American interventionism is not a happy one.

Since America abandoned her tradition of principled neutrality to intervene in a European war, half a million of our young people have given their lives in absurd foreign adventures. We must face the facts: We have not made the world safer for democracy or anything else; we have not advanced the cause of peace or American interests; we have not adhered to the principles that made this country great.

What have we done? We have sacrificed the life and liberty of millions of our citizens in immoral conscriptions, we have violated the professed principles of antipaternalism which should apply to Government policies equally at home and abroad, we have unwittingly contributed credibility to the Soviet Union's propagandistic claim that we are an "imperialistic" people, and we have also contributed to bloodshed and horror on a ghastly scale.

We already have forces stationed all over the world. But now, along with the stationing of support personnel in Saudi Arabia as part of the AWACS deal, we send American combat personnel to take up positions in the Sinai peninsula.

It is this sort of activity which allows us to spend hundreds of billions on "defense" without providing for the security of our own country. Why? Because we are bent on supplying everyone in the world with arms, we insist on intervening in conflicts we do not understand, and we refuse to learn from past experience. The world will have no relief from our fine intentions until we correct the fundamental mistake of thinking that it is weapons that sustain a government. We should have learned in Vietnam and Iran that it is not weapons, but ideas.

I would like to remind my colleagues that noninterventionism has not always meant pacificism or anti-Americanism or leftwing naivete about the need to defend our freedom. From the days of our founding as a Nation until William McKinley led us into a war with Spain, this country largely adhered to a policy of "no entangling alliances." Grover Cleveland iterated the principle as eloquently as any President:

> The genius of our institutions, the needs of our people in their home life, and the attention which is demanded for ... our vast territory, dictate this scrupulous avoidance of any departure from that foreign policy commended by the history, the traditions and prosperity of our republic. It is the policy of independence favored by our position and defended by our known love of justice and by our power. It is the policy of peace suitable to our interest. It is the policy of neutrality, rejecting any share in foreign brawls, and ambitions upon other continents, and repelling their intrusion here. It is the policy of Monroe and Washington and that of Jefferson: peace, commerce, and honest friendship with all nations; entangling alliances with none.

It was Woodrow Wilson who radically departed from a neutral, noninterventionist policy. He sought "to make the world safe for democracy." "America's duty," he said, is

> To stand shoulder-to-shoulder, to lift the burdens of mankind in the future, and to show the path to freedom to all the world ... The American flag is henceforth to stand for ... the assertion of the right of one nation to serve other nations of the world ... America is now rich enough and free enough to look abroad for great tasks to perform ... Our duty is to serve the world.

Lovely sentiments; foolhardy policy, with consequences too tragic to be considered merely quixotic.

In place of military intervention, I would have our foreign policy based on free trade. Voluntary aid from the American people to other people overseas should not be restricted; and American boys should never be coerced into taking up arms to fight and die for Arab sheiks or anyone else. The American Revolution was fought without a conscripted army, and was won against great odds. However, with all our firepower, and a conscripted army, we couldn't defeat the wretched butchers of North Vietnam.

I will close with an unavoidable conclusion, first noted by a great American nearly 30 years ago. Robert Taft's observations remain to the point:

> The freedom of the people of the United States is in serious danger from the foreign policy of the present Administration. . .the danger to liberty at home from the constant increase in the activity, the spending, and the power of the Federal Government, but today the threat from foreign policy is even greater. . .We are embarked on a voyage at this moment in which a continued failure of understanding and judgement may wreck the greatest adventure in freedom the human race has ever known . . .
>
> We cannot adopt a foreign policy which gives away all of our people's earnings or imposes such a tremendous burden on the individual American as, in effect, to destroy his incentive and his ability to increase his production and productivity and his standard of living. We cannot assume a financial burden in our foreign policy so great that it threatens our liberty at home.

Mr. Speaker, I very much want this administration to succeed in its bold attempt to restore fiscal responsibility and limits on the power of Government. We must not allow entangling foreign alliances, which do no good for those we seek to serve, to stand in our way. This is why I oppose the passage of House Joint Resolution 349.●

TRANSPORTATION FOR THE RURAL ELDERLY

HON. BILL EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. EMERSON. Mr. Speaker, on Friday, November 20, the House of Representatives passed H.R. 3046, reauthorizing the Older Americans Act for 3 years. During consideration of this legislation, my distinguished colleague from the State of Missouri (Mr. COLEMAN) offered an amendment which will add improved transportation systems for the rural elderly to the list of eligible demonstrations projects funded under title IV of the act.

Of all the problems faced by the senior citizens of my own congressional district, one of the most serious is the problem of transportation.

In southeast Missouri we have two types of public transportation available to the elderly: That provided by the Southeast Missouri Transportation System and the county bus service made possible in part by the Southeast Missouri Area Agency on Aging.

The Southeast Missouri Transportation System has experienced a cut in its funding by 63 percent, while the system providing service in St. Louis received a 118-percent increase over its prior year's funding.

As a result of this drastic decrease in funding for the rural transportation system, the Southeast Missouri Area Agencies on Aging have attempted to fill in the gaps left by the reduction in public transportation service. Needless to say, the area aging agencies have been working hard in cooperation with the various counties in my district so that the elderly will be assured a reliable source of transportation. Individual communities have contributed to this cause. For example, the senior citizens in one community have held a singing contest to raise money for the

system and the seniors in another community recently raffled a quilt.

However, there still remains a substantial gap in the public transportation system serving the elderly in the 10th Congressional District.

Senior citizens feel that this service is an essential one to their well-being. In many cases elderly persons do not have an automobile or are simply not able to drive anymore. Therefore, they must rely on someone else to get to the bank, the grocery store, the doctor, or to visit friends, and participate in other senior citizen activities.

Needless to say, the kinds of transportation services offered in urban areas simply are not there for our rural elderly.

It is for these reasons, Mr. Speaker, that I strongly supported the amendment offered by Mr. COLEMAN and accepted by the full House of Representatives on November 20.

The purpose of Mr. COLEMAN's amendment is to strongly encourage the Commissioner on Aging to fund demonstration projects which can be replicated by local transportation projects serving the elderly.

As transportation is indeed a serious concern, not only for our rural elderly, but for all senior citizens, I believe that it should be one of the highest priorities under the Older Americans Act.

Reliable transportation is essential to the mental, emotional, and physical well-being of our senior citizens. It is a need that we cannot allow to go unfulfilled.●

AMERICAN NUNS MISSING IN GUATEMALA

HON. HAROLD S. SAWYER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. SAWYER. Mr. Speaker, I would like to call to my colleagues' attention the disappearance of two American nuns in the troubled country of Guatemala. It is with much concern that I present to you the information which I have been able to gather about the Dominican Sisters, who have been missing since Friday, according to the Dominican Sisters of Grand Rapids.

In speaking with the State Department, I have found that Sisters Jean Reimer and Helen Lavalley did not return to their home in the village of Acatenango after a church meeting in another village. As my colleagues will recall, several priests and other nuns have been abducted in Guatemala previously, and as recently as September 13 a Mennonite missionary was murdered in the same province where the two American nuns live. Therefore, I have urged the State Department to make every effort to locate Sisters Reimer and Lavalley immediately, by continually pushing for the cooperation of local Guatemalan officials. I have been told that thus far the local authorities have been very helpful, and have pledged their continuing efforts. Our Embassy is making every attempt to question everyone who might have information about the whereabouts of the missing nuns.

According to sister Thersa Houlihan, superior of the Dominican Sisters in my hometown of Grand Rapids, the two missing nuns had not been involved in any political activities. Sister Reimer has been working in Guatemala for 11 years, while sister Lavalley has only been in Guatemala for 1 year. Both nuns were reportedly involved in religious education work and distributed food donated by Caritas.●

PROGRESS BEING MADE ON H.R. 2203, FCC VOLUNTEERS

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. DANNEMEYER. Mr. Speaker, on February 26, 1981, I introduced H.R. 2203, a bill to permit the use of volunteers by the Federal Communications Commission in the amateur radio and citizens band services. Since that time, a bipartisan coalition of 14 Members of the House have cosponsored the measure. In addition, H.R. 2203's provisions were incorporated into S. 929, which unanimously passed the Senate.

On Thursday, November 19, 1981, the gentleman from Colorado (Mr. WIRTH), the chairman of the House Energy and Commerce Subcommittee on Telecommunications, Consumer Protection and Finance, held a hearing on H.R. 5008, the chairman's so-called Track I amendments to the Communications Act of 1934. The proposed Communications Technical Amendments Act of 1981 addresses many of the issues raised by H.R. 2203. The chairman of the subcommittee is to be commended for his leadership and cooperation in this effort.

I testified before the subcommittee at its hearing. Due to the interest in this subject generated by inquiries from across the country to Members' offices, I ask permission to insert a copy of my prepared remarks at this point in the RECORD:

STATEMENT OF HON. WILLIAM E. DANNEMEYER

Mr. Chairman and members of the Subcommittee on Telecommunications, Consumer Protection and Finance: Thank you for allowing me to appear before you today as you commence your hearings on the "Communications Technical Amendments Act of 1981." The proposed Act addresses a number of issues concerning the Amateur Radio and Citizens Band services in which I have been interested since meeting with a group of constituents in 1980. The residents of my area who are active amateur radio and CB enthusiasts expressed their frustration over not being able to assist the FCC in its monitoring activities despite a willingness to volunteer their services.

Accordingly, on December 8, 1980—after considerable study—I introduced H.R. 8445 to permit the use of volunteers in the amateur radio service. On February 26, 1981, I reintroduced an expanded and modified bill, H.R. 2203, in the 97th Congress. As introduced this legislation would:

First, authorize the use of volunteers by the FCC in the monitoring of amateur and CB radio;

Second, clarify the legal status of the FCC's practice of using volunteers to administer the novice class license, a practice dating back to 1938; and

Third, exempt volunteer monitoring activities from the provisions of the secrecy provisions (Section 605) of the Communications Act of 1934, as that section has been interpreted in the Reston court decision.

The essential reason for the volunteer authority is to tap a resource of manpower that is ready, willing and able to assist the FCC in its enforcement of rules and regulations designed to facilitate the proper use of the airwaves. Written rules, however, are mere paper tigers if they are not enforced. In the case of the FCC, it is clear that the Field Operations Bureau does not have the resources to adequately monitor the entire country. In the current budgetary climate, it is not feasible to spend additional sums on enforcement activities. Furthermore, it is not clear that expanding the FCC's own efforts alone would solve the problems of noncompliance.

While the FCC lacks the structure to monitor the airwaves alone, the thousands of amateur radio operators and the millions of CB operators form an infrastructure that could improve monitoring effectiveness, and hence enforcement. The use of volunteers will save the FCC time and money as well.

As you may know, in at least two instances, current federal statutes prohibit or impeded the use of volunteers by the federal government. (see 5 U.S.C. 3111 and 31 U.S.C. 665(b)). There are precedents, however, for waiving the general rule against volunteers in specific circumstances. Examples relate to the Coast Guard Auxiliary, the National Park Service, the Office of Drug Abuse Policy, the Teachers Corps, Civil Defense, firefighters, and the Federal Aviation Adminstration.

Subsequent to the introduction of the bill in February, the concept of permitting the use of volunteers in the exam and monitoring areas has met with general approval. Fourteen members of the House, on a bipartisan basis, have co-sponsored H.R. 2203 to date. The chairman of the Federal Communications Commission voiced his support, subject to several recommended changes, in a letter to me on June 1, 1981. The Senate, is unanimously adopting S. 929, authorized the use of volunteers by the FCC as well.

Mr. Chairman, you are to be commended for including volunteer provisions in the pending "Communications Technical Amendments Act of 1981." I would like to turn to the specific provisions of the pending legislation:

First, one of the few concerns that has been raised about the use of volunteers is the possibility that a few individuals might exceed the bounds of propriety and legality in the conduct of their volunteer duties. While I believe that the chances of abuse are small, it is nonetheless a prudent step

for Congress to include safeguards in the authorizing legislation for a volunteer program. Accordingly, I support the language in the bill that specifies the functions of volunteers and the limitations on their responsibility and authority.

Second, while my bill (H.R. 2203) only authorizes the use of volunteers in the preparation and administration of the Novice class amateur license, I am pleased that the proposed Act takes the volunteer concept one step further by authorizing the use of volunteers to prepare and administer any class of amateur license.

Third, the proposed Act does not address the use of volunteers by the FCC in the case of CB radio. As I indicated earlier, H.R. 2203 also contains provisions for a CB volunteer program. In my discussions with members of the subcommittee, some expressed concern about a volunteer program for CB. In additon, in his letter of June 1, 1981, FCC Chairman Fowler presented the view that a volunteer program should first be tried in the Amateur Radio service. He pointed out that while 90 percent of the active amateurs are members of the American Radio Relay League (ARRL) and hence an organization is in place to help implement the program by identifying possible volunteers, the largest CB group (REACT) has 35,000 members out of a total of 14 million CB licensees.

While I agree that the volunteer concept should first be the subject of an experiment in the amateur service, I would urge the subcommittee to consider amending the proposed Act to either: (a) permit the FCC to expand the volunteer program by rule to CB and other personal radio services; or (b) require the FCC to report to Congress on the results of amateur experimentation with a volunteer program and a recommendation on possible expansion. The report should be filed one year after enactment.

Fourth, I would like to discuss the proposed section 4(F) of the Act, which seeks to prevent anyone with a financial conflict-of-interest from participating in either the preparation of exams or the administration of exams. Specifically, the section is a well-intentioned effort to prevent anyone associated with an entity that publishes exam study materials from enjoying a competitive advantage by reason of that entity also being associated with the preparation or administration of the exam itself. It is my understanding that this section would most likely apply to the American Radio Relay League (ARRL). As I noted earlier, the ARRL represents 90 percent of the active amateurs and thus would be a likely source of the individual volunteers who would administer the exams. My concern, Mr. Chairman, is that the language of the proposed section 4(F) might inadvertently impair the use of volunteers in the administration of exams if the language were to be so broadly interpreted as to preclude the ARRL's members from serving as volunteers. It seems to me that the conflict arises only when the ARRL itself is associated with the administration of the exam, as opposed to merely helping the FCC recruit individual volunteers to administer the exam without the auspices of the ARRL. Accordingly, I would urge the subcommittee to a) allow the FCC to work with amateur radio groups in the recruiting of exam volunteers just as these groups are allowed to assist in the recruitment of monitoring volunteers; and b) that the conflict-of-interest language be refined so that it only applies to the administration of exams.

Mr. Chairman, in conclusion, again let me express my thanks for your consideration of my bill, H.R. 2203, and the inclusion of many of its provisions in your proposed "Communications Technical Amendments Act of 1981." I respectfully urge the subcommittee to approve the Act with the volunteer provisions together with any changes along the lines I have mentioned that the subcommittee might deem appropriate.

I look forward to favorable Congressional action before the adjournment of the first session of the 97th Congress so that the FCC and radio volunteers might benefit from the program during the balance of fiscal year 1982, and beyond.●

AGAINST THE BUDGET CUTS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. WEISS. Mr. Speaker, the voices of many in the private sector have been loud and persistent in their support of the President's economic program. But some business executives have been more cautious in endorsing the budget reductions, especially those which cause the young, the old, and the poor much hardship. J. Richard Munro, the president of Time, Inc., expressed his sober views against many of these budget cuts in an article "Against the Budget Cuts" in the New York Times on November 15, 1981.

Mr. Munro understands the value of social stability that is threatened by wholesale budget cutting. In this article, he notes that cuts in education at all levels, jobs and training programs, medicaid, housing aid, food stamps, school nutrition, support for poor families with children, energy assistance, unemployment insurance and numerous other social services would leave serious and immediate human needs unmet. Munro concludes, "As business executives, I do not think we should stand by and let this happen."

Mr. Munro also emphasizes the economic value of social spending that is actually an important investment in human capital. He observes:

Out of economic necessity, we can't afford to let the productive potential of any of today's children languish because of our neglect. More than ever, they are vital to our future, and we should help them get the best possible start in life. That means good schools, good nutrition, health care, housing, stable homes.

Mr. Speaker, I ask permission to have this important article from the November 15, 1981, New York Times, by Mr. Munro printed in full following these remarks and commend it to attention of my colleagues:

AGAINST THE BUDGET CUTS

(By J. Richard Munro)

I know that business executives are not supposed to disapprove of the Administration's spending program. Polls show support among us hovering around 90 percent. That's a phenomenal vote of confidence. I support the new policies that promote growth, new investment and greater productivity.

Yet, in the rush to fight inflation and stimulate investment, I fear that we have cut too deeply, that we have put too high a burden on the poor and elderly, and that we are jeopardizing the long-term goals of this program and the interests of business.

I am especially concerned about the cuts in social spending. They have gone too far, too fast. And too few of us understand their impact.

Most of us probably have found comfort in the notion that the cuts were marginal and that the cuts fall equally on everyone. The cuts are anything but evenhanded, and the effects are far from marginal as the numbers show. About 70 percent of the 1982 cuts now in place come from programs affecting the poor.

You can go down the line—education at all levels, jobs and training programs, Medicaid, housing aid, food stamps, school nutrition, support for poor families with children, energy assistance, unemployment insurance, and numerous other social services. Every one of these received major spending cuts adding up to $25 billion of the $35 billion total cut from the budget this summer.

That doesn't include $13 billion in more cuts just proposed, and the $100 billion in cuts projected for 1984. Although those cuts are mostly unspecified, programs for the poor will again be on the chopping block.

Combined with tax cuts that benefit mostly higher-income people, this program adds up to a major redistribution of money in our society, from the lower end to the upper end of the scale.

Despite Administration assurances, the truly needy will have to cut back family budgets that simply can't be stretched any more.

The truly needy include the elderly and disabled poor. But the group that concerns me most is children, in families headed by a woman.

One out of 6 of all American children, about 10 million, lives in poverty today. One out of 4 of all children will need welfare support at some time before growing up. About one out of 6 of all children has no regular source of medical care. One out of 3 has never seen a dentist. Among black children, 2 our of 5 are poor.

Under the new budget, they are losing a little here and there, not too much taken one by one. But when the losses total several hundred dollars this year per family with even greater losses next year and the next, that will have a great impact.

We should also be concerned about the many social services, Government and privately run, being cut severely under this budget.

In Fairfield County, my wife and I are active in the Juvenile Diabetes Foundation. It's just been hit by Federal budget cuts that sharply reduce its research program. Actually, I think we can probably raise money locally to replace some of the loss. Buy what about similar organizations with no access to corporate contributions or well-funded local governments?

Let me sum up. The budget cuts are leaving serious and immediate human needs unmet. And if the budget cuts continue as scheduled, the problems of the poor will worsen intolerably. As business executives, I don't think we should stand by and let this happen.

On a practical level, let's consider the opportunity cost of letting the cuts go through. This year, we have the chance to

restore business incentives for greater investment. The President, the Congress, and, most important, the public are behind us. Yet, this public support will vanish if the burdens of this program remain so uneven, and if the promised surge of prosperity pays off only for those already well off.

While we can talk about the need for patience until the long-term benefits arrive, the next election is a year away—close to the bottom of what appears to be a deep recession—at the very time the budget cuts put more holes in the "safety net" for people.

Also, while the economy declines, safety, health, consumer and environmental protections are weakening; civil rights enforcement is taking a giant step backward, and the share of taxes paid by corporations drops significantly.

That's not a scenario designed to build confidence in the current program. Consequently, in the next election, people may decide that they're not getting the changes they really wanted. And it'll be another generation before we get a similar chance to enact business incentives.

George Will wrote in a recent column that programs like Social Security spring from Americans' acceptance of "the ethic of common provisions." He went on to say that President Reagan "must convince Americans that his conservatism is compatible with that ethic."

Let's consider the economic effects. Remember that in a few years, the children of today will be our employees, adding, we hope, to our bottom line. Because of the end of the baby boom, there will be far fewer of them available. And we can already read projections of labor shortages later in this decade, especially in skilled labor. Budget cuts in training and education will worsen that problem.

Consider also Social Security: There are three workers today for every beneficiary. In 30 years, there will be two, when the children of today should be in their prime working years.

Out of economic necessity, we can't afford to let the productive potential of any of today's children languish because of our neglect.

More than ever, they are vital to our future, and we should help them get the best possible start in life. That means good schools, good nutrition, health care, housing, stable homes.

Yet, we're moving in the opposite direction now and in the foreseeable future. That disturbs me, and I think it should disturb you.●

AN IMPORTANT SPEECH BY GOV. JERRY BROWN

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. BROWN of California. Mr. Speaker, Gov. Edmund G. Brown, Jr., of California is a political figure who tends to stimulate widely varying emotions among those impacted by his words and actions. The extent of this emotion is evidenced by the fact his detractors describe him with words like "flaky" and "Governor Moonbeam," yet Governor Brown is also grudgingly conceded to be a figure with marvelous powers of political recuperation. However, even friends and sympathizers, and I generally count myself in that camp, are on occasion puzzled and appalled by his treatment of politics and political issues. It is difficult to discern whether he is playing the role of philosopher or saint, delivering the prophetic gospel to the masses, or the role of playboy humorist, manipulating the levers of power for his own amusement. It appears that only rarely does he project the image of a pragmatic and effective leader of a great State, the role which those who represent that State in the U.S. Congress would most like to see.

Governor Brown is currently the leading unannounced candidate for the Democratic nomination for U.S. Senator from California in next year's elections. There are some political soothsayers who would not be surprised if the Governor still retains an interest in even higher office, as he has evidenced in prior years. It is doubtful that he will be successful in this aspiration, if he really holds it, unless he can appeal to truly significant and deeply felt needs of the American people.

Last month, October 27, 1981, the Governor made a speech to the Annual Convention of the American Association of Port Authorities which seemed designed to make that appeal. We should all be interested in making our own objective analysis of what he said, and how the public reacts to what he said. This speech contains the themes which the Governor believes, as far as I can tell from my years of contact, hold the key to American progress. Since we can expect to hear them again, we shoud get acquainted with words such as:

Our most fundamental challenge is to achieve economic growth in a new "era of limits" on energy, on resources, on skilled people.

Expensive and scarce energy and resources are now producing * * * a turning point in our history * * *

This new turning point is often called "the information revolution" in which information is replacing energy as the key to productivity growth.

To grow in the new era of limits, we must accumulate capital and carefully direct it into modernizing our economy.

We will need, in short, a national investment strategy to encourage new information technologies, efficient resource use through careful stewardship of our environment, skilled labor, expanded world markets and public infrastructure.

Our top political priority in this decade must be to foster a new spirit of cooperation in which we come to see that the benefit of each depends on protecting the public trust.

I consider this speech to be significant and worthy of review by each of my colleagues. Accordingly, I am including the full text of Governor Brown's remarks below.

America today is in search of a vision for this transitional period in which we now find ourselves.

We are the strongest power on earth. So too were Spain, France, and England in the final season of their greatness. Like them, we are a rich, aging minority in a world undergoing fundamental change. We must change as well or face our own season of decline. Our most fundamental challenge is to achieve economic growth in a new "era of limits" on energy, on resources, on skilled people.

America, unique among the nations, lives on an ethic of growth.

Expansion has been critical to our economy, but as Frederick Jackson Turner noted in his classic, "the Frontier in American History," growth has also been critical to our social cohesion. It is difficult to imagine America at peace with itself or with the world if it does not produce rising incomes for all of its people.

But, though grow we must, we cannot grow as we have. The cheap energy and resources powering our past expansion have become increasingly expensive and hazardous commodities in the late twentieth century.

Expensive and scarce energy and resources are now producing as profound a turning point in our history as the nineteenth century shift from agriculture to industry, or our own twentieth century turn from domestic to international markets.

This new turning point is often called "the information revolution" in which information is replacing energy as the key to productivity growth.

In this new era, the building blocks of our economy are undergoing basic change. First, information technologies have replaced heavy industry as our new growth sectors. Second, using less energy and resources, not more, has become a key to increased productivity. Third, labor shortages pose a major obstacle to growth for the first time in our history. And fourth, expanding markets lie principally in the Third World rather than in Europe.

These four historic shifts in the world economy require corresponding shifts in our own economic policy.

Too much of our current investment policy is geared to maintaining obsolete equipment, energy sources, labor practices, and international trading relationships.

To grow in the new era of limits we must accumulate capital and carefully direct it into modernizing our ecomony.

This means wisely renewing and expanding our physical capital—roads, bridges, ports, space facilities, trains and transit of all kinds, water and waste disposal and recycling projects, and radically improving our investment in human capital through education, training and retraining, and research and development.

We will need, in short, a national investment strategy to encourage new information technologies, efficient resource use through careful stewardship of our environment, skilled labor, expanded world markets and public infrastructure.

Let me suggest today a five-point program for such a national investment strategy, which I believe we badly need if we are to meet the challenge of the sophisticated economics of Asia and Europe and at the same time meet our domestic need for meaningful work, economic prosperity and a sustainable environment.

1. INVESTMENT IN NEW TECHNOLOGIES

Our top economic imperative is to invest in the information technologies which have become our major growth sector: semi-conductors and software, personal and business computers, biosciences and the new telecommunications, robotics, and the new space industries of the 90's. These new technologies, often thought of as distant possibilities, are in fact now driving our economy today. The new industries built around them are already among our leading growth sectors.

In California, semi-conductors and electronics have supplied 25 percent of all manufacturing jobs over the past decade. More importantly, the information technologies are key to saving our existing industries—from textiles, where computer aided design is spreading, to the auto industry which is introducing robots on the production lines. And these technologies are driving growth in the service sector as well, as anyone can testify, who has dealt with an airlines clerk, done computer aided research, or banked through an electronic teller.

But information technologies will not insure economic growth without a radical shift from excessive consumption to long term investment. We need to invest billions in research, improvement of new technologies, and retooling our aging plant and infrastructure. The decade-long trend, which has seen us lag behind other nations in research growth, must be turned around.

The times demand joint efforts between industry and government, and substantially increased spending for basic research through the National Science Foundation, the National Institutes of Health, the Environmental Protection Agency, the National Institute of Occupational Safety and Health, and the National Aeronautics and Space Administration.

This year we have created a state-financed micro-project at the University of California to do basic research on microelectronic and computer sciences. The research projects will be jointly financed by state government and private industry on a matching dollar basis.

The key emphasis must be on capital formation in both the public and private sectors to spur modernization. Our tax code has to be geared to encouraging innovative investment and discouraging consumption. Recently in California, for example, we took such a step. We eliminated completely the capital gains tax for businesses with less than 500 employees, the traditional source of technological innovation, and made up the revenue loss by increasing the capital gains tax on antiques, paintings, gold, silver and other collectibles. This is a concept that some call targeting. In the future we are going to do more of that. It is by directing or targeting our incentives to new growth-producing technologies that we will find a new economic path for the 80's. Neither across-the-board reduction in depreciation schedules nor government bailouts are adequate to insure a steady flow of capital to modernization.

2. INVESTMENT IN RESOURCE EFFICIENCY THROUGH STEWARDSHIP OF OUR ENVIRONMENT

As energy and resources costs continue to climb we must develop cogeneration, photovoltaic, wind, and other renewable technologies that can generate electricity safely and at a reasonable cost.

We should also develop new and more efficient industrial processes as well as create substitutes to reduce the spread of toxic chemicals and pesticides.

We need research for new, clean transportation fuels that can be developed out of agricultural wastes, biomass, and coal. Tremendous possibilities exist for methanol development if we just first make the commitment.

And more immediately, we need new incentives to commercialize existing least-cost energy strategies. The California Public Utilities Commission has already ordered our utilities to offer conservation and solar loans because it has found that giving people a low or a zero-interest loan for conservation retrofit and solar devices is actually more cost effective than centralized power plants.

Finally, we need to pay more attention to restoring and protecting our fish, our forests, our soil, and our water. This is true foundation of our national wealth. You may have read recently about the severe danger of soil erosion. It is not a topic that we hear about every day. Nevertheless, the food that we eat and which also provides so many export dollars derives from the soil and the water. These are resources which must be protected and wisely managed. Yet, today more soil is shipped down the Mississippi River than corn, and it won't be too many years before that top soil is gone unless we change our ways.

To create one-inch of topsoil takes at least 1,000 years. In ancient times, Mesopotamia was every bit as proud as our own middle west. Today the soil of that area is long gone with only barren desert blowing in the wind because of inadquate understanding and the mismanagement of salt buildup, mineralization and erosion.

We look at North Africa and can hardly believe it once was covered with rich forests. But mighty Rome needed wood for aqueducts, ships of war and maybe even for hot tubs. God help us if we fall into the same trap when we have the capacity to increase the productivity of our own timberland by 50 percent. In California, we have already embarked upon a major program of reforestation through funds derived from geothermal, oil and gas revenues. Our philosophy is to tax our nonrenewable resources, the depletable resources, and redirect the funding into the renewable resources.

With respect to fisheries, we face more than a 50 percent decline from historic levels. We can reverse this but only by clearing thousands of miles of streams throughout our state. And that is precisely what we are now doing through our California Conservation Corps. As for water, we intend to recycle at least 400,000 acre feet and even more if our desalting plants perform as well as expected.

Environment and growth are not opposed—they are inextricably linked. Wise, careful, caring use of our natural resources produces the wealth that is at the foundation of our civilization.

3. INVESTMENT IN HUMAN CAPITAL AND A NEW WORK FORCE

The third great shift we are experiencing is the increase in the shortage of skilled workers and this demands entirely new policies. The baby boom of the fifties is moving into middle age. Americans between the ages of 16-24 will decline in the 80's, not surge by 40 percent as in the last decade.

The new growth industries are creating highly sophisticated jobs and that demands more trained workers than are currently available. Skilled jobs are going begging side by side with rising unemployment. And that is the paradox; we have a shortage of nurses, a shortage of electronics people, computer specialists, engineers and we have to do something about it. Automation will compound the problem by displacing 45 million existing jobs in the next two decades. Growth in the 80's therefore demands a major investment in education and job retraining going far beyond anything we have done before.

Our elementary and high schools need to return to a new emphasis on fundamental communication, calculating, and scientific skills. We have to upgrade our teaching and provide more sophisticated equipment such as personal computers which can allow students to take a more active role in their education. Our universities need a sputnik-like push to turn out more scientists and engineers. Already, Japan, with half our population, is turning out 2,000 more electrical engineers every year than we are. The gap is growing. If we do not shift our priorities, it is only a matter of time before what happened in autos, TVs, calculators, and cameras is repeated in the electronics field. Then there will be very few industries left in which America leads. Such an outcome is totally unnecessary if we make the kind of shift that I am suggesting today.

Vocational education and job retraining programs also have to be upgraded and retooled. We need employment-based job training and retraining.

What we need to recognize is that wealth derives from people—from human intelligence—and that we have to nurture that intelligence through education, research and manpower training in the private sector and in the public sector. And we have a model on how to do that. It's called the California Worksite and Educational Training Act. It is a $25 million effort that we started three years ago. It has had a remarkable success by targeting job training at the lower end of the scale but including a career ladder for those who participate. Several thousand people and dozens of industries have worked very well with the community colleges to bring this about, particularly in electronics and nursing.

Finally, we need a training program targeted to areas of special need, from youth to minorities to welfare clients to those who are displaced by plant closings.

Beyond training, we also need to invest in strategies designed to involve working people in their own production, and in the quality of their work. The quality circle is an idea which was developed in America, transferred to Japan, and now brought home again. We have at the California Department of Motor Vehicles an experiment in quality circles where workers meet on a regular basis to discuss their work and share insights from the bottom up to improve productivity and their working lives. We are involved in international competition. We have to work better with greater insight and caring if we are going to secure our economic prosperity.

4. INVESTMENT IN NEW MARKETS

Our economy in the post-World War II era has depended on new markets created in Europe and Japan, made possible through the Marshall Plan. We've seen the Third World primarily as a source of cheap raw materials during the same period. Now, Japan and Europe are our more vigorous competitors in more slowly growing domestic and international markets. And the Third World is no longer merely a source of cheap materials.

To develop in the 1980s, we can no longer look just to the developed countries of

Europe and Japan. We have to turn our attention to the Third World, and help foster an economic framework there, so that the developing nations can become partners in global economic prosperity. The key is expanding the buying capacity in the Third World. Many of the markets, particularly in steel and autos, in the developed world are simply stagnant. Unless we can transfer technology to the countries of the Third World and help stimulate their buying power, we are going to find that our present period of economic stagnation will continue for the rest of this century. We may need to create something like a Marshall Plan for the Third World which would involve a cooperative undertaking among the rich nations.

5. INVESTMENT IN THE PUBLIC INFRASTRUCTURE

The explosive growth and development of the United States and other advanced nations in the last century was made possible only through a combination of private and public investment.

Waterways, canals, ports, and roads first opened up the country. Then came the railroads, followed by super-highways and, finally, the network of airports.

We have invested trillions of dollars in our public infrastructure of ports, highways and other public works vital to industry and private citizens.

And now, following many years of neglect, we face a financial crisis of alarming proportions because of aging facilities and the huge expenditures needed for replacement and expansion of our public structures.

A study this year by the National Council of State Planning Agencies asserts that:

The nation's 42,000 mile interstate highway system is deteriorating at a rate requiring repair of 2,000 miles of road per year. Over 8,000 miles of the system are substandard, along with 13 percent of the bridges. Estimated cost: $700 billion.

Bridge rehabilitation and construction will require $33 billion.

To maintain and renew city water systems will require between $75 and $100 billion in new investment.

More than $25 billion will be needed for water pollution control and treatment facilities.

Tens of billions of dollars will be needed to expand and upgrade our ports to meet the needs of a doubling of foreign trade by the year 2000.

Upgrading the nation's rail systems will require many more tens of billions of dollars.

As we continue to expand coal exports through our nation' ports, the need for improved rail service and connections with ports is even more vital.

The total public investment this nation now requires staggers the mind. The Urban Institute estimates that maintenance alone—just keeping existing public infrastructure in repair—will cost over $660 billion in the next 15 years.

In the face of this crying need for repair, reconstruction, and expansion of the public infrastructure, investments have been steadily declining in real dollars since 1965 from $33.7 billion to less than $25 billion in 1979, a 28 percent drop.

As a percent of the Gross National Product, public works investment has declined 53 percent.

You men and women connected with our nation's ports know full well the need for and the value of capital investment.

Our ports are essential to this nation's economic prosperity as we expand foreign trade to the Third World. The Los Angeles-Long Beach harbors alone expect to see an increase in trade of 350 percent by the year 2000.

With all of these unmet needs, what do we find coming out of Washington? New budget slashes across the board, shutting down public works projects, slashing education and training budgets and reducing research and scientific development. The administration is proposing to cut transportation alone by $31 billion in the next five years.

The revenue cupboards are bare in California and in other states.

Cities and counties have no money.

And unprecedented double-digit interest rates have crippled the bond markets, undermining the ability of state and local governments to make needed public investments.

A federal budget out of balance by at least $50 billion and headed for $75 billion.

A trillion dollar federal debt requiring nearly $100 billion a year for interest alone.

A proposed $1.5 trillion defense budget over the next five years.

And in the face of all those enormous needs and expenditures a tax cut of $750 billion.

I say to you ladies and gentlemen, something is out of whack.

With bridges falling down from rust and highways collapsing from erosion and ports needing dredging and new loading and unloading facilities; with 6,500 trains derailed in 1980 because of track deterioration; with water and sewer systems in collapse and prisons filled beyond capacity.

With all of that and much, much more, I say to you this country must look into its own soul and find a new, positive vision that will allow us to build for the future and not steal from it.

What I am really addressing myself to is the development of a new national consensus—a shared vision of what America is and what it can become.

To grow in this era of limits, we must put aside facile economic nostrums. Neither conservative calls for less spending nor liberal calls for more spending really address our central economic dilemma, insuring that our spending, whatever it is, is directed toward modernizing our economy. What is needed is basic agreement among leaders, business and labor, university and government, representatives of different regions and ethnic groups on a new strategy. This will demand a political shift as profound as any we have ever encountered. For years our nation has thrived despite adversary relationships between managers and labor, between different regions of the country, and more recently, between environmentalists and developers. Such a division we can no longer afford. Our top political priority in this decade must be to foster a new spirit of cooperation in which we come to see that the benefit of each depends on protecting the public trust. Corporation managers will have to place a new emphasis on risk-taking and long-term investment rather than just short-term profits and immediate gain.

Creating this new spirit of cooperation and national focus will not be easy. It will be as challenging as anything we have seen in our history in time of peace or war. But we have no choice. We have to proceed and proceed we must—confident in the knowledge that our best days are yet to come.●

THE TAX BILL: SMALL BUSINESS'S LOSS

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. LaFALCE. Mr. Speaker, the deep recession into which our economy is sliding is seriously hurting the small business community. Interest rates remain at high levels, orders and sales are slowing down, unemployment is shooting up, and business bankruptcies are at record levels.

As you recall, all of this was not suppose to happen. Last summer, we were told that prosperity without inflation was just around the corner. All we had to do was enact the administration's tax and budget programs. The tax-cut bill was especially important, we were told. It would infuse new money into the economy that would be used for new savings and investment. Business would no longer suffer from a crushing tax burden and would be unleashed. Small business would particularly benefit. And small businessmen lined up in strong support of the administration bill even though there were lone voices who warned that small business was being seriously shortchanged by the legislation.

I was one of those who was concerned that small business was not receiving the special consideration it merited under the administration's tax-cut plan. That plan was too heavily tilted toward the large, capital intensive industries and did not include items that small business needed.

Now, an article that appeared in a recent issue of Inc., the highly respected and widely read magazine of small business, lays out just how much small business had been shortchanged under the administration tax bill.

By one estimate, according to the article, the tax cut proposed by the House Democrats targeted nearly $27 billion in tax cuts to small businesses over the next 5 years. The administration bill, on the other hand, targeted only $6 billion over the same period.

The extent to which small business does not benefit from the biggest tax cut passed in out Nation's history worries me. Small business is the most vital sector of our economy. It is where the new jobs will be created that will put our citizens back to work; it is where the new tax revenues will be generated, it is where the new technological breakthroughs will come that will make our economy productive and competitive. But these things will not happen if small business continues to be ignored at best and discriminated against at worst by the current administration.

I would like to include the following article in the RECORD because it sets

forth in an objective, straightforward manner how much small business lost under the Economic Recovery Tax Act of 1981. Moreover, it demonstrates how little the small business community has received from the administration in return for its support.

WHY SMALL BUSINESS LOST ON THE TAX BILL

(By Tom Richmond)

Looking back on the tax fight that occupied Congress and the Administration throughout the summer, lobbyists and even some legislators contend that small business could have wrangled many more concessions out of the Administration—deeper corporate rate cuts and more depreciation—if they had used the same political tactics employed by other interest groups.

Instead, many small business constituents decided to be good patriots and support the Reagan Administration tax bill, even though the Democratic version was far more favorable to their interests.

"Corporate robber barons picked up billions of dollars in relief from the windfall profits tax," said Allen Neece, a lobbyist working with Small Business United, a coalition of 14 regional, state, and metropolitan small business associations. "But small business didn't want to be greedy. They wanted to do 'the right thing.' "

House Democrats had, in fact, put together a tax package that gave small business almost everything it ever dreamed of in tax reform, including two whoppers:

Substantial reductions in the corporate income tax rates and further graduation of those rates for net incomes up to $200,000 (see box);

Immediate expensing of the first $25,000 in capital investments each year and, after a 10-year phase-in, the ultimate in simplified and accelerated depreciation—immediate expensing of all capital expenditures.

By one estimate, the Democrats' bill targeted nearly $27 billion in tax cuts to small companies over the next five years, compared with just $6 billion in the Reagan-backed bill.

Unfortunately for the Democrats, many small businessmen rejected the bait. Vernon Raymer, the owner of a dry-wall contracting firm based in Denver, was one. Raymer attended a White House meeting on July 15 with President Reagan, top administration officials, and about three dozen small business executives, and came away firmly believing that the President should have the chance to make good On his economic promises. As for the Democrats' tax bill, Raymer wasn't interested. "If the opposition had wanted to help us," he said, "they had already had the opportunity."

Richard Johnston, chief executive officer of a Belle Chasse, La., company working in oil field fabrication, also attended the cabinet meeting. Afterwards, he said he too was skeptical of Democratic efforts to attract business interest to their rival tax cut measure. The Democrats, said Johnston, never had a plan of their own. "They were just trying to win a battle; Reagan was trying to win a war."

The views of Raymer and Johnston apparently typified the attitude of most small business owners and excutives. The Main Street business preferred to stick with Reagan. "they could trust him," said John Fitch, a lobbyist for the National Association of Wholesaler-Distributors. Fitch said his members seemed to have an almost "spiritual" bond with the President.

But small business may have played a cruel joke on itself. In viewing Reagan as a "knight on a white horse," said Neece, small business people were naive. "The most shocking thing is that they stopped thinking. People did not want to be bothered with the facts."

Being team players also limited the effectiveness of some members of Congress, who might otherwise have pushed a bit harder for tax revisions for small business.

TAX REDUCTION PROPOSALS VARY WIDELY

To appreciate what small business *didn't* get in the 1981 tax reform act, take a look at the differences between the corporate tax reductions offered by Democrats in the House Ways and Means Committee bill and the corporate rate reductions accepted by the Administration and eventually adopted by Congress.

MARGINAL TAX RATES

[Dollars in thousands]

Net income	In percent		
	Old tax law	New tax law[1]	Ways and Means[2]
$0 to $25	17	15	15
$25 to $50	20	18	15
$50 to $75	20	30	20
$75 to $100	40	40	20
$100 to $150	46	46	25
$150 to $200	46	46	30
Over $200	46	46	34

[1] When fully effective in 1983.
[2] When fully effective in 1987.

As an example, assume that a corporation has $250,000 in net income.

	Tax liability	Effective tax rate (percent)
Old tax law	$95,750	38.3
New tax law	94,750	37.9
Ways and Means proposal	62,000	24.8

Sen. Dave Durenberger (R-Minn.), for example, headed the Finance Committee's "small business task force," named by chairman Robert Dole (R-Kans.) Its job was "to work on some small business things that could be done inexpensively," according to a Senate staffer. The task force did successfully recommend the addition of two relatively inexpensive provisions to the committee's bill: incentive stock options—much sought after by high-tech companies competing for scarce management personnel—and an increase in the value of used equipment eligible for investment tax credits. "But when we needed someone with clout [to push for corporate rate reduction]," said Lewis Shattuck, executive vice-president of the Smaller Business Association of New England, "Durenberger was out sharpening his pencil."

To assess the small business gains and losses in the Economic Recovery Tax Act of 1981, as the legislation is officially known, you must ask: Compared to what?

If you accept as sufficient the Administration's criterion that, as articulated by Assistant Treasury Secretary Paul Craig Roberts, "anytime the general economy rises, small business automatically benefits," then the small business sector did well—provided, of course, the Reagan economic plan does give the economy a rise.

If, on the other hand, you take the position that a healthy economy, while necessary, is not by itself sufficient to insure accelerated growth in a declining small business sector—and it is declining as a proportion of the gross national product—then small business didn't fare very well.

"The bias against small business compared to large corporate interest," said Rep. Ed Jenkins (D-Ga.), "has not been narrowed by this bill." But while small business didn't gain much, it didn't lose much, either, Jenkins said. "We forced the Administration to at least keep them halfway even."

P.S. Remember the "second" tax bill that Reagan promised if the Congress would keep the first one clean? "You will have [another] tax bill next year," insisted special presidential assistant Wayne Valis a few days before Reagan signed the first one. What's to be in it? "We don't know yet," Valis said. "We have to get social security out of the way first."●

THE SAUDI PEACE PLAN, FULL TEXT

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. ROSENTHAL. Mr. Speaker, the ideas and opinions which Crown Prince Fahd of Saudi Arabia has advanced as a peace plan for resolving the Arab-Israeli conflict have provoked widespread commentary.

In the interest of informed debate, I wish to share the text of Prince Fahd's remarks as distributed by the Riyadh Domestic Service in Arabic and translated by the Federal Broadcast Information Service.

Tomorrow I will offer two recent commentaries on the Saudi plan which help to place it in the context of Middle East politics.

[Dated Aug. 7, 1981]

[Interview with Saudi Arabia's Prince Fahd ibn 'Abd al-'Aziz, heir apparent and deputy prime minister of the Council of Ministers; in Jidda, date not given—questions and answers read by announcer.]

[Text] Question: News agencies have extensively reported that Saudi Arabia played a part in bringing about the cease-fire in Lebanon? What is the truth about the Saudi role?

Answer: I will not be revealing a secret if I say that Saudi Arabia played a part in the cease-fire which came into effect in Lebanon recently. Ever since the situation began to dangerously deteriorate following the savage Israeli raid in Beirut, the king directed that there was a need to make moves on various levels in order to protect the lives of innocent civilians—old people, women and children who were falling victim to the Israeli military machine, which deliberately bombed, killing and wreaking destruction both in Beirut and in southern Lebanon.

This was the principal reason why his majesty the king and Saudi Arabia made a move. In addition, we believe that any aggression on an Arab country is an attack on us. On the orders of his majesty the king, we contacted Washington and expressed our extreme concern at the deterioration in the situation. We asked Washington to put pressure on Israel before the situation exploded.

The cease-fire agreement was concluded after intensive, urgent efforts. We notified all Arab parties directly involved in the dispute of what had taken place. In this connection I wish to affirm that the cease-fire had been dictated by certain humanitarian circumstances at a given, crucial moment in time, bearing in mind that this does not mean that the Palestinian people should cease their march toward gaining their rights and that our national commitment to the issue of Palestine and our organic relation with the struggle of its people imposed on us to move to save the innocent souls which were harvested by the Israel aircraft. And I take the opportunity to praise the rare heroism shown by Palestinian and Lebanese fighters over those 15 days with their limited capabilities and their unlimited faith, they opposed the aircraft and missiles of the Israeli enemy. To Yasir 'Arafat I send in the name of the kingdom, king, people and government, greetings of appreciation and admiration, to him and to the Palestinian and Lebanese people, for their steadfastness and determination to confront and fight Israeli barbarism.

Question: Does this mean that you are satisfied with the U.S. response to the kingdom's efforts?

Answer: The U.S. Government responded to us quickly and effectively, and we appreciate this. But here we rightly talk about one aspect of our relations with the U.S., which concerns a certain circumstance. We continue to be dissatisfied with the overall U.S. policy in the Middle East, especially as concerns the Palestine problem and the rights of its peoples. And I confirmed to the U.S. that there was no dispute between us and any U.S. administration other than that which concerns the national rights of the Palestinian people. This dispute is not to be scorned, because it is connected with the security of our region and its stability; and subsequently it is related to U.S. interests. I do not understand how successive U.S. administrations continue to expose their relations, and subsequently their interests with the Arab nation, to danger by supporting Israel politically, financially and militarily while the latter continues to occupy the whole of Palestine—in addition to other Arab lands—to build settlements, expropriate land and kill the innocent with American weapons it had agreed not to use for aggression. The U.S. should halt this support in order to safeguard world peace, which threatens to explode. What increases our sorrow is that the U.S. Government continues to adhere to the Camp David accords, whose failure has been proven. We continue to hope that the Reagan administration will accept the uselessness of the Camp David agreements as a framework for just and comprehensive peace in the Middle East and will initiate a drastic change in U.S. policy which would lead to the withdrawal of Israel from the Arab territories occupied in 1967 and the establishment of an independent Palestinian state. Any attempt which does not seek to force Israel to withdraw and does not seek the establishment of a Palestinian state shall lead to more unrest, killing and destruction, as is happening in Lebanon today.

Now we fear that time will pass without the current American administration embarking on a new serious move that is drastically different from Camp David. Then we shall hear the enduring excuse that Congressional elections are nearing, which will be followed 2 years later by the presidential elections, and subsequently there is a need to await the results, and so on for 30 years. Following the recent events in Lebanon, the international and Western press, especially the Americans, expressed the opinion that the U.S. Government should recognize the PLO. It is a fact that any comprehensive peace in the region should be based on reality and fact and not illusions that lead to unfavorable consequences, as happened in Angola, Ethiopia and Afghanistan. The time has come for the U.S. Government to be less biased toward Israel and more equitable toward the Arabs.

Question: It appears from the analysis made by Your Highness that the setting up of an independent Palestinian state is the basic condition for any comprehensive, settlement in the Middle East. Does Your Highness have a practical vision of such a settlement or the way in which it could be reached?

Answer: Naturally I cannot go into detail now, but there are a number of principles which may be taken as guidelines toward a just settlement; they are principles which the United Nations has taken and reiterated many times in the last few years. They are:

First, that Israel should withdraw from all Arab territory occupied in 1967, including Arab Jerusalem.

Second, that Israeli settlements built on Arab land after 1967 should be dismantled.

Third, a guarantee of freedom of worship for all religions in the holy places.

Fourth, an affirmation of the right of the Palestinian people to return to their homes and to compensate those who do not wish to return.

Fifth, that the West Bank and the Gaza Strip should have a transitional period, under the auspices of the United Nations, for a period not exceeding several months.

Sixth, that an independent Palestinian state should be set up with Jerusalem as its capital.

Seven, that all states in the region should be able to live in peace.

Eight, that the United Nations or member states of the United Nations should guarantee to execute these principles.

As I have said, the principles I have mentioned are not of my own making; I did not invent them—they are General Assembly decision. They may be summed up in one principle, to emanate from the Security Council, and to provide a framework for a comprehensive and just settlement.

I wish to reaffirm that the principles of a just comprehensive solution have become familiar and do not require great effort:

1. An end to unlimited American support for Israel.

2. An end to Israeli arrogance, whose ugliest facet is embodied in Begin's government. This condition will be automatically fulfilled if the first condition is fulfilled.

3. A recognition that, as Yasir 'Arafat says, the Palestinian figure is the basic figure in the Middle Eastern equation.

Talking about the responsibility of the U.S. in the Arab-Israeli dispute does not absolve the countries of Western Europe from their responsibilities. This applies particularly to Britain, which is now chairman of the EEC, and which bears a great responsibility for what happened to the Palestinians during its mandate. The interests of Western Europe in the Arab region is no less important or vital than those of the U.S. We have heard a great deal about European moves and a European initiative, but so far we have not seen anything definite. In my view a European move should be in two directions: Toward the Middle East on the one hand and toward the United States on the other, as the United States is the main partner in NATO and the leader of the free world.●

WALL STREET STORY ON BUDGET CUTS IMPACT IS MUST READING FOR PRESIDENT

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. FAUNTROY. Mr. Speaker, on Friday, November 20, 1981, the Wall Street Journal, which is one of the Nation's most respected newspapers and the principal voice of business activities in the country carried as its lead story the impact of the budget decisions of the Reagan administration.

These decisions which the administration has foisted upon the American people as being necessary to control inflation, and reduce Government expenditures are not actions which one can point to as being productive of social good. Instead, the reductions cause people to lose hope, to mistrust the Government, and break up family ties because that becomes the only way to obtain needed assistance. Surely, that cannot be the goal of government and I am sure—I hope—that is not the goal of the administration. Yet, diminution of hope, the possible loss of a business, of a home, of a family are all the possibilities that come from these budget cuts.

The administration must remember that cuts in the social programs are not events that can be accomplished in a sterile atmosphere. They are accomplished by putting people out of work as was demonstrated in the Wall Street Journal of the young boy who had a CETA job that gave him pride and hope. These cuts are accomplished by making it more profitable to quit work and rely only upon public aid. They prevent the erection of low- and moderate-income housing which means that the owners of property fear to raise rents to cover their own costs for they know that the poor will have no place to live. Those whose rents are raised can look to living in the streets this winter for there is no affordable housing, no new assisted housing, and no possible rises in welfare benefits that would allow them to live elsewhere.

The story is clear and straightforward. It should be read by every administration official who has anything to do with cutting the budget for those who are the least among us. Before the President sends another message to this Congress seeking more budget cuts, before he vetoes another bill, I would hope that he and his advisers read this story and then tell

us in truthfulness that they believe that these kinds of human tragedies will restore the Nation to economic vitality, health, and trust of government.

[From the Wall Street Journal, Nov. 20, 1981]

BUDGET CASUALTIES: IN HARTFORD, THE POOR ALREADY FEEL EFFECTS OF THE REAGAN BUDGET

BOY LOSES JOB, AND MOTHER WAITS LONGER FOR HOME; THE WORST IS YET TO COME: PRESIDENT ATTACKED, PRAISED

(By Timothy D. Schellhardt and Burt Schorr)

HARTFORD, CONN.—Nationwide, President Reagan's budget cuts add up to a great deal of money—$1 billion less for welfare, $1.3 billion less for food stamps, $6 billion less for job training, and so on. They also add up to a great deal of difficulty for countless individuals.

In and around this capital city, budget cutting in Washington means that—

Fifteen-year-old Danny Salb has lost his $3.37-an-hour job feeding homeless dogs at the pound.

Cynthia Huff and her two children, living for the past four years with her sister's family in a cramped cottage, will have to wait three more years, at least, before they can get a government-subsidized apartment.

College junior Holly Koch must work five hours more a week to earn the extra money needed to stay in school.

Fifty-nine-year-old Evangie Bernal, practically crippled from a bone disease and living on a low income, can't get free legal aid to try to avoid eviction from her apartment.

Former welfare recipients Sixto Moreles, Jessie Arrington and Arsula Little face unemployment again because the furniture-manufacturing company where they work has lost its federal funds and will close at the end of this month.

EASY TO FORGET

"Sometimes it's easy to forget that the budget-cut casualties are people, not simply programs," says Flora Parisky, an urban-policy consultant here. It has been only seven weeks since Mr. Reagan's fiscal-1982 budget ax began falling, but the casulaties already are piling up here.

There aren't any firm estimates of how many of Hartford's 136,400 residents—30% of whom get some kind of federal assistance, including Social Security benefits—are being hurt by budget reductions—But local and state officials believe they number in the thousands. Miss Parisky estimates, for example, that more than 10,000 youngsters under age 18 have been affected by cuts in child-assistance, job-training and other programs.

For most of this city's middle-class families, which make up the majority, the effects of the federal budget reductions aren't yet easily discernible. Gone, to be sure, is the 12:01 a.m. Amtrak to New Haven, forcing night travelers to catch the 8:41 p.m. train or wait until 3:52 a.m. Nine other trains also stop here no longer. And those who pay for school lunch are being charged a nickel more for it by the public schools as officials try to make up for a cut in federal funds. But the main budget casualties are the poor.

SOFTENING THE BLOW

Even for them, local and state authorities say, the full effect won't be felt in Greater Hartford for several months. Officials have been able to make up for some of the cutbacks—somewhat softening, for instance, the blow to programs for expectant low-income mothers. At Martin Luther King Jr. Elementary School, principal Harold Barrow used $131.20 from his school's activity fund to pay for lunches of youngsters who have been removed from the free-lunch list or required to pay more for reduced-price meal tickets under the Reagan program.

But those resources are drying up fast. "People are going to get less service, and less people are going to be eligible for help," says Stephen Heintz, a state planning official. Echoing him is Marlene Berg, an official of the local United Way organization, which finances 65 Hartford-area agencies. She says: "There's going to be a cold, cold time for social-services agencies."

For many, the cold times are already here, and many of those who have been hurt are bitter, upset with President Reagan for slashing programs that aid them.

AN ANGRY MOTHER

"There are other things he should be doing instead of cutting able-bodied people who want to work," says Cynthia Huff. The 30-year-old Mrs. Huff, a welfare mother until she took a job as a school-bus attendant, finds her food-stamp allotment has been pared by $22 a month and other federal benefits cut by $54 a month because of new higher federal-aid standards.

But not all the budget victims blame the President. Some say the efforts to balance the federal budget are essential to the nation's economic vitality.

"It's got to be done. If Reagan had continued to go along the same old path, the result would have been disastrous," says J. James Asbeck, the President of Maverick Corp., a furniture producer that serves primarily as a job-training employer." Since 1975, Maverick has found other jobs in the area for 650 ex-convicts, welfare mothers and workers financed under the Comprehensive Employment and Training Act, or CETA. A $1.7 million cutback in its job-training and other federal funds is forcing Maverick to close Nov. 30, even though its sturdy pine bunk beds and accessories "are selling like hot cakes," grossing more than $525,000 in the first nine months of this year.

Whether cutbacks are necessary is beside the point to those—such as Maverick's Sixto Moreles, Jessie Arrington, and Arsula Little—who are ultimately hurt by them. A $150,000 cutback in federal housing funds in Hartford, theoretically justified or not, means that fewer rent-subsidized apartments will be built here. The waiting list for such apartments already exceeds 5,000.

Ineffie Sargent, a Hartford caseworker, says that the federal cuts, or the fear of reductions, have increased "stress and depression" among her low-income clients. The number of mothers asking to have their children placed in foster homes has risen sharply, she says. Turning the pages of her notebook, she counts 23 children whom she herself placed in the past three months. A year ago, she says, her placements averaged only one a month. Reported cases of child abuse in Connecticut, which dropped to a three-year low last April, have climbed in recent months.

The federal cutbacks, says Marlene Berg of United Way, have trimmed the staffs at many social agencies, reducing Hartford's ability to measure "internal domestic violence that could become street violence." For example, there is no one to answer the telephone anymore between midnight and 8:30 a.m. for people who call North Central Infoline, the special state and United Way emergency number serving Hartford and surrounding communities. Infoline's callers have numbered 31,000 a year and latenight callers often are potential suicides, runaway teen-agers, people who have overdosed on drugs and those needing emergency shelter. "We don't know how they're getting help," says Cheryl Berger, Infoline's assistant director.

Many Hartford residents no longer are getting the help they once counted on. Here is how the federal budget cuts have affected some of them.

THE JOBLESS TEEN-AGER

Danny Salb wants to be a veterinarian. That may be more fantasy than reality for a ninth-grade youngster from a welfare home, but when the soft-spoken, bantam-sized boy says it, you believe him.

Danny's favorite school subjects these days are algebra and earth sciences, and he is doing well in them. Last fall, in the eighth grade, it was different story. "I was flunking everything," Danny remembers.

One person who worried about Danny's future was his mother, who with her four children lives in an uninsulated rented house where the furnace remains off this chilly Connecticut autumn for lack of oil money. Danny's poor schoolwork, she believes, reflected his "frustration and anger" at being unable to earn money for his family. He was stymied by his inability to find work on his own.

It was Uncle Sam who offered Danny his first paying job. A local community-service agency, with a $32,000 Labor Department CETA grant, created a "work experience" program for low-income or handicapped people ages 14 to 21. Danny worked two hours a day after school, five hours a day during summer vacation, at the Town of Vernon dog pound.

John Cagianello, a high-school teacher hired to run the project, noted after a few weeks that "Danny felt better about himself." It spilled over to his schoolwork. He saved $320 from his earnings, giving money to his mother for groceries and using the rest to buy clothes for himself.

Danny knew from watching television news and talking with his mother that President Reagan intended to cut the federal budget. But he didn't connect that with his own life until a few weeks ago when Mr. Cagianello confirmed school rumors that the CETA jobs had been axed. "I was pretty upset," Danny recalls. His mother says he had counted on the income to buy the shoes he needs for this winter.

THE BUSINESSMAN

Teofilio Babun Jr. seems just the sort of voter President Reagan expected to please when he pushed his budget cutbacks through Congress. And the Cuban-born electrical engineer, at 33 well up the American business ladder, indeed thinks that the cuts were a swell idea—except for their effect on his life. That, he says, "was something I needed like a hole in the head."

When Mr. Reagan took office last January, Mr. Babun was pulling down over $40,000 a year as a marketing manager for Crouse-Hinds Co.'s Arrow Hart division here, which makes electrical switches. But he had bigger plans. Together with two partners, he was negotiating to buy a small electrical relay plant owned by a local unit of Western Pacific Industries Inc.

All he needed was a 90% guarantee from the Economic Development Administration

for an $850,000 loan that a Hartford bank had agreed to make to finance the purchase. The federal agency appeared interested. It sent Mr. Babun the first draft of a proposed loan-guarantee pact and followed up with oral assurances of the application's ultimate success. In February, with the closing only weeks off, Mr. Babun gave notice at Arrow Hart.

Then came the bad news: Under White House orders, the EDA had frozen its business-aid programs, including loan guarantees. After unsuccessful appeals to Washington, Mr. Babun's only chance to save the deal was to line up his own financing, which he did—but at a price.

Instead of a single bank, he had four separate lenders to deal with and a variable interest rate that has ranged above 22%. (An interest rate on the single-bank loan hadn't been set but undoubtedly, with the federal guarantee, would have been far lower.) Things are working out okay, for now, with sales running about 250% higher than a year earlier. But the four separate loans, which require quarterly reports to each lender, "are expensive and confusing," said, Mr. Babun. Looking ahead, he sees complex negotiations with the lenders over additional financing. Looking back, he wonders, "Can you trust your own government?"

THE TENANT

Evangie Bernal, the disabled former practical nurse, has been told she must vacate her two-bedroom $180-a-month apartment by Dec. 1. A new owner has purchased the house in which Mrs. Bernal lives and wants to raise the rent to $350 a month, which Mrs. Bernal is unable to pay. The owner says that her own $891 monthly mortgage and tax payment on the house requires the higher rental income.

Mrs. Bernal asked Neighborhood Legal Services for help, but a 30 percent reduction in the agency's $600,000-a-year federal funds forced it to stop handling tenant-eviction cases, effective Oct. 15. Mrs. Bernal applied after the cutoff date. She has submitted her case to Hartford's Fair Rent Commission, but the eviction threat remains. A neighborhood Legai Services attorney doubts that Mrs. Bernal, who is somewhat confused by her rent problem, would be able to represent herself effectively in court. Meanwhile, Mrs. Bernal has stopped going out of her apartment for fear that her landlord, who lives upstairs, "might lock me out."

THE WELFARE MOTHER

Bernice Roberts says that these days "all I do is cry." Seated at her dining-room table, the 37-year-old mother of eight sons fingers the letter she received recently from the state welfare agency. "You have been informed," the letter begins, that her public-assistance check this month will be slashed to $291.12 from $499.63 because her outside earnings have risen somewhat, thus reducing her federal benefits, and because federal eligibility standards have been raised to cut welfare costs.

Since April, Mrs. Roberts has worked as a home health aide, helping an invalid four hours a day, seven days a week. For that, she earns about $300 a month. Her welfare check and her salary barely cover her $220-a-month rent and heat bill, her grocery bill and the cost of her other essentials. "I have $14 in the bank," she says. The reduced welfare benefits, she says, will mean "there might not be any Christmas." She pauses, then adds: "There might not be a Thanksgiving, either."

THE COLLEGE STUDENT

"Thank God my parents got divorced," exclaims Holly Koch, a junior at the University of Hartford. Miss Koch, a business major, thinks that if her father's income had been considered in weighing her financial-aid request, she wouldn't have gotten the assistance she needs.

Because of federal cuts, Miss Koch's annual basic-aid grant has declined by $50, to $996, and her work-study grant has been chopped in half, to $500 from $1,000, even though her university costs have increased by $1,530 this year. As a result, she works 15 hours a week in the university's financial-aid office this year instead of the 10 hours or so she averaged last year. "That increase doesn't sound like much," she says, "but it is when you're carrying a full load of courses."

Of the federal budget cuts, Miss Koch says President Reagan "has good intentions. I don't know what else he could have done." She adds, "We're all willing to scrimp a little around here, but if there's any more, forget it." If she could plan her college career over again, she says, "I'd go two years to community college" because it's cheaper.●

DEREGULATION OF CIVIL AERONAUTICS BOARD

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. MINETA. Mr. Speaker, today we are introducing legislation which will accelerate both the transition of the airline industry toward economic deregulation and the sunset of the Civil Aeronautics Board.

In 1978 the Congress passed landmark legislation setting the airline industry, previously one of the most regulated in the country, on a course toward economic deregulation. We provided for a transition for specified periods up to 10 years, extending protection to various activities and interests, including small communities and airline employees. We also believed that by 1985 this transition would have progressed far enough so that too few economic regulatory functions would remain at the CAB to justify its continuation as a separate and independent agency.

We have carefully monitored the performance of the industry under this transition-to-deregulation regime through numerous hearings and through periodic studies by the General Accounting Office. We believe, as do many others, that the introduction of mangerial discretion, free enterprise, and marketplace competition, in place of economic decisionmaking by Government bureaucracy, has generally been beneficial both to airlines and to consumers. Any transition, especially one so fundamental as this one, is bound to have its rough spots and difficult moments, but the data thus far indicate that the efficiencies offered by less economic regulation have been significant. This is all the more remarkable in light of the fact that external economic conditions, mainly drastic increases in fuel costs, an economic recession which depressed demand for travel, and high interest costs which drastically increased the burden of equipment and credit costs, would have made the period since late 1979 a painful one for airlines whether they were regulated or not. Just to cite one of these factors as an example, in March 1979 the average jet fuel price in this country was 40 cents per gallon. In the following 12 months it doubled, and by April 1981 it hit $1.07 per gallon.

Looking at this industry's total costs over the first 3 years of deregulation (1978 through 1980), GAO found that the above factors pushed total airline costs up an incredible 60 percent, yet under the beginnings of deregulation air fares were held to an average increase of only 37 percent. Deregulation has permitted new entry by low-cost carriers and price competition by both new and old carriers. As a result, passengers in many markets have been given the opportunity to fly at fares 50 percent or more below the regulated fare level.

The 1978 act has also protected small communities against termination of air service. Before 1978, airlines could terminate all service to a small city with CAB permission, and between 1968 and 1978, CAB granted permission for termination of certificated air service at 137 cities. The 1978 act requires CAB to insure that there is adequate replacement service at any city at which certificated service is terminated. If necessary, replacement service will be subsidized. Since the Deregulation Act no certificated city has totally lost service and a GAO study has shown that small cities received more aircraft departures in 1980 than they did in 1977.

There are, of course, those who believe that the 1978 decision to begin a transition to deregulation was a mistake, and they often try to blame every problem in the industry since 1978 on deregulation. Yet we find that a general consensus has formed among both those in favor of deregulation and those opposed to it that the transition has proceeded rapidly enough so that we are better off accelerating that transition, rather than leaving this beast somewhere in the middle, neither fish nor fowl.

We find that some of our original provisions for transition need adjustment in light of experience; we find that in many respects our basic transition timetable can be accelerated; and we find that given the accelerated termination of many of the economic regulatory functions, including all of the major ones, it is now appropriate and

advisable to sunset the CAB substantially sooner than called for in our original legislation. In all these findings we have the concurrence and support both of the administration and of the CAB, both of which have previously submitted comprehensive legislative proposals similar to the legislation we introduce today.

The introduced bill is designed as a vehicle to begin markup on this important legislation. We consider the bill as a starting point for a dialog on the issues, and we welcome suggestions for improving the bill.

In the near future, I will place in the record a detailed section-by-section analysis of the bill. At this time, several general observations may be made.

The bill's basic schedule for sunset is that all CAB functions which are not being transferred will terminate 60 days after enactment.[1] 150 days after enactment the CAB, itself, will be sunset and its remaining functions will be transferred to other agencies, generally to the Department of Transportation.

The basic philosophy of the bill is to terminate economic regulations of interstate air transportation and to leave decisions on prices and service to the marketplace.

However, there are some areas in which we believe that a further transition period of regulation is required to insure that the impact of deregulation does not fall too heavily on particular groups, and to insure that all groups have a reasonable opportunity to adjust to the new economic environment.

The Deregulation Act of 1978 included a transition period, with protective provisions, for small communities and airline employees. The introduced bill continues these programs. As in the 1978 Act, communities which were receiving certificated air service when that law was enacted are guaranteed essential air service till 1988. Where necessary, subsidy will be available to support this service.

The 1978 Act also protected airline employees, who had begun their employment when air transportation was a regulated industry. These employees were protected against displacement caused by the 1978 Act's change in the rules of the game. The introduced bill retains this program. There have been suggestions from management, labor and the administration on improvements to the labor protection provisions and the introduced bill adopts several of these suggestions. It should be emphasized that we recognize that this is a complex and controversial area, and that we remain open to further suggestions.

[1] The bill makes no basic change in the provisions in existing law which terminate CAB route regulation of interstate transportation on Dec. 31, 1981.

The introduced bill makes no changes in the 1978 act's compensation program for displaced employees. The bill continues the provisions in the 1978 act giving displaced employees a right of first hire when positions become available on other airlines. The bill makes several modifications in this program. The program is made subject to the same trigger as the compensation program: Specifically a 7½-percent reduction in employment by an airline in a 12-month period and a finding that deregulation was a major cause of this contraction in employment. In addition, the introduced bill extends the obligation to hire displaced employees to all airlines operating large aircraft and provides that flight deck crew members who exercise their right to a position with another airline, do not keep their right to be recalled by their original employer.

A further employee protection provision in the bill provides that when airlines operating large aircraft merge, employees must be protected by arrangements at least as favorable as the Allegheny-Mohawk conditions developed by the CAB.

The Deregulation Act of 1978 provided for a complete termination of any regulation of airline fares, including any requirements that airline fares be filed with the Government. For the most part, we are adhering to this concept. However, we are providing that during a transitional period some limited aspects of fare regulation will be retained, to give airlines, travel agents, small communities and commuter carriers a fair opportunity to adopt to total deregulation.

The introduced bill provides that during a 2-year period after enactment, airlines will be required to continue to file their fares and changes in the rules governing the construction and availability of particular fares. This transition period will enable airlines and travel agents to develop new methods of providing fare information to consumers and sellers of air transportation.

The bill also continues some regulation of joint fares for a transitional period. Joint fares are of particular value to the small communities which are guaranteed essential air service. To insure that joint fares will continue to be available, the bill provides that during the 3 years after enactment, CAB and DOT must continue to prescribe a uniform, cost-based formula for establishing joint fares and dividing the revenues therefrom. For 3 additional years DOT will be required to prescribe a uniform formula, but DOT will have discretion over the concept on which this formula is based. The bill permits carriers which do not interline with any other carriers to continue to operate without interlining.

Travel agents have expressed concern about a possible premature termination of the antitrust immunity under which they now operate. To provide adequate time for consideration of whether antitrust immunity continues to be in the public interest the introduced bill provides that the Department of Transportation will have authority to grant antitrust immunity to agreements such as the travel agent agreement through January 1, 1986.

The bill gives commuter carriers an opportunity to play a greater role in furnishing essential air service to small communities. As has been discussed the bill insures that the commuters will continue to be able to offer joint fares at small communities. In addition, the bill places limits on the section 406 subsidy program, which has been the basis for subsidizing certificated airlines operating large aircraft to serve small communities. The bill provides that the section 406 program will be limited to cities with under 80 enplanements a day and that the program will be subject to annual ceilings, which will decrease through fiscal year 1985. A commuter will be able to replace a section 406 carrier if the commuter establishes that it can provide equivalent or better service at a lower cost in subsidy.

Other provisions of the bill are designed to help U.S. carriers compete more effectively against foreign air carriers, particularly those foreign carriers which have an unfair competitive advantage as a result of direct or indirect government subsidy, and/or as a result of foreign government rules and practices which discriminate against U.S. carriers. Foreign air transportation has not been fully deregulated by the United States, and although we are working in this direction, deregulation requires the agreement of other governments, some of which continue to favor protective regulation.

The bill requires the U.S. Government to negotiate bilateral agreements which eliminate rules and practices which discriminate against our carriers. To facilitate the ability of U.S. carriers to develop international routes, the bill provides that initial international certificates must be issued for a term for at least 5 years, and that in cases on renewal of these certificates there will be a presumption in favor of renewal of the incumbent carrier's authority.

To insure that U.S. carriers will have an opportunity to change their fares promptly when costs increase, the bill increases the zone of upward fare flexibility. Initially, this zone will be 10 percent or any higher zone currently established by CAB. CAB may adjust a zone if the competitive situation changes, but the zone may not be reduced below 10 percent. Finally, to

insure that U.S. international carrier will continue to receive fair compensation when they carry mail for the U.S. Postal Service on international routes, the bill continues Government regulation of international mail rates, to be exercised by the Department of Transportation after sunset of CAB.

As I mentioned, I intend to place a more complete summary of the bill in the RECORD in the near future. We hope to move this legislation quickly over the next few months, and to conclude the historic transition to deregulation which we began a few years ago.●

WHY THE FEDERAL BUDGET HAS NOT BEEN CUT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. McDONALD. Mr. Speaker, all through the debate on the budget this year, the press has failed to inform the American people that the small cuts enacted in the budget are really only decreases of projected increases in the Carter budget. We are not really much closer to balancing the budget than we were before. President Reagan is struggling to hold down the increases, and these are daily rising due to the so-called entitlement parts of the budget. Thus, while today's veto over a difference of $2 billion may seem small, the stakes are very high and each dollar counts. The future of the Nation's economy and the future of the United States is at issue. The lead story in Human Events for November 28, 1981, by M. Stanton Evans explains this situation in detail. I commend it to the attention of my colleagues.

"ENTITLEMENTS" OUT OF CONTROL—WHY THE FEDERAL BUDGET HAS NOT BEEN CUT

(By M. Stanton Evans)

For Ronald Reagan and others who want some real economy in government, the battle cry these days should be, "We have not yet begun to fight!"

Contrary to popular impression, generated by the struggle over the continuing resolution last week, the gigantic federal budget continues to surge wildly out of control, with spending estimates climbing higher on a monthly basis. And while few in the Capital talk as if they understand the process, the President himself, in a wide-ranging interview with columnist Donald Lambro, indicated full awareness of the problem and the steps required to handle it.

Despite constant media and interest group clamor about "more budget cuts," and the stringent economies demanded by Reagan, the total federal budget has not been cut at all. As previously noted in this journal (October 24, 1981 issue), the spending estimates for fiscal 1982 are already $100 billion higher than the original Jimmy Carter budget for 1981, and $65 billion higher than the final numbers in that budget.

As the accompanying chart indicates, what Reagan has been attempting to do is to slow the rate of increase of federal spending below that proposed by Carter. The budget would continue to grow, but not at so rapid a pace. Unfortunately, even this limited objective is endangered by the freight-train momentum of the federal spending process.

Indicative of the problem is what has happened to Reagan's own budget, quite apart from any comparison with Carter's. When Reagan offered his budget revisions in March, total spending for fiscal 1982 was estimated at $695 billion. By the time of the mid-session review in July, this had been boosted upward to $705 billion. By September, the total had increased again to $722 billion—and was heading higher still.

Thus, the Reagan budget itself went up by $27 billion in five months' time, and pressures in Congress to jack up appropriations have added to the total. It was this process and the yawning deficit that it implies which prompted Reagan's September call for $13 billion in new cuts, and his threat last week to veto the budget-busting appropriations resolution.

While the conventional wisdom has it that Reagan's suggested $13 billion in September went much too far, it is noteworthy that even if he got all of these economies, spending for the year would still be higher than the total estimated in July ($709 billion vs. $705 billion). Some budget cut!

All of which, of course, is directly contrary to what the American people have been told in many of the media and by many of their elected representatives. While there is massive outcry about hardships, cutbacks, and the tight-fistedness of the Administration, almost never is there any mention of what the budget total for 1982 is, the fact that it is $100 billion higher than the budget for 1981, or that it has leaped upward by roughly $30 billion in the past six months.

As a result, congressional debate and public consideration of budget issues have taken place in a rhetorical vacuum—readily filled by wailing interest groups and politicians who want to continue spending money in their accustomed manner. In the circumstances, there is little chance for the President to get even modest economies through Congress, and zero prospect that the mandate he was given to reverse the trend of federal growth can be fulfilled.

How is it possible that the federal budget keeps right on growing, despite the efforts of an economy-minded President, highly advertised economy moves, and repeated clamor about the hardships inflicted on the suffering and the needy? The answer lies in the way the federal budget is constructed, and the ground rules established for attempting to reduce its rate of increase.

The major villain in the piece, as Reagan noted in his interview with Lambro, is the machinery of "entitlement" programs, geared to external economic indicators such as the Consumer Price Index, unemployment levels, income status, age, disability, etc. As the CPI goes up, or unemployment rises, people entitled to such benefits get more of them, or new people are added to the roster.

Some three-quarters of the federal budget, by one estimate, consists of "relatively uncontrollable" payouts—Social Security, disability, Medicare and Medicaid, food stamps, unemployment compensation, AFDC welfare, and the like. As economic factors affecting such programs change, billions gush forth from the federal treasury, on an automatic basis. It is the dynamism of this process that has pushed the budget ever higher, and makes mincemeat of the official forecasts.

The inexorable power of entitlements has played havoc with Reagan's own budget estimates. The common assumption is that outlays for 1982 have had to be revised because of rising interest rates, which are indeed a factor. Most of that ($10 billion) was accounted for, however, in the mid-session review. In the $17-billion jump occurring between July and September, the principal problem was not interest payments, but the upward push of the entitlements.

Of that figure, $3.8 billion was for Social Security (because proposed savings were not enacted), $2.8 billion for other "entitlements and uncontrollables" (ditto), $2.4 billion for farm price supports, $800 million for Medicaid, and $700 million for food stamps. These and other budgetary odds and ends amounted to almost $12 billion in projected spending hikes, compared to $5.6 billion for additional interest.

As long as the entitlement process keeps running in this manner, adopting piecemeal budget cuts in individual programs is like trying to sweep back the tide with a whisk broom. Dollar "caps" and percentage cutbacks on food stamps or Medicaid look good on paper, but are futile in practice. As fast as such efforts are made to curtail outlays, the entitlement process can—and usually does—increase them, making all the numbers meaningless.

A good example is the fate of savings sought by the Administration for a cluster of entitlement programs including welfare, Medicaid and food stamps. In March, the Administration estimated 1982 outlays for these programs at $45 billion, and proposed savings of $6.5 billion to bring the total down to roughly $38 billion. By October, actions by Congress and the power of entitlements had pushed it right back up again, so that we faced a potential outlay of $44.8 billion—virtually what it had been before the projected economies.

While marginal efforts have been made to slow the entitlement process, the ground rules of the budget battle have compounded the problem. Many of these programs are defined as part of the "safety net" exempt from budget-cutting—Social Security with its highly indexed benefits providing the prime example. This means the entitlement machinery keeps running merrily along, driving budget totals ever higher.

It also means that non-entitlement areas—federal staffing, revenue sharing, other discretionary grants in aid—must be cut back even more severely to get anywhere near the desired budget objectives. This in turn generates more outcries about the hard-hearted Reagan Administration and feeds the public image of severe economy while total outlays soar ever higher.

Obviously, if the growth of the federal budget is ever to be curtailed, the Administration and the Congress must come to grips with the entitlements. Reagan has outlined this as a major objective, and the Administration was supposed to come up with a plan to reform the process in October. Now the plan has been deferred until the first of the year—which, considering the current disarray of the budget totals and the battering the Reagan program is taking on the Hill, is none too soon.

Suffice it to say that federal spending will continue to expand at dizzying velocity as long as entitlements are not reformed. Until

they are, don't let anybody tell you the federal budget has been cut.●

AN UNHAPPY ANNIVERSARY

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. MINISH. Mr. Speaker, I rise today so we in this Chamber may pause for a few moments and commemorate an unhappy anniversary. This month marks the 64th anniversary of the Bolshevik revolution in Russia. The civil war in that country lasted for 3 years. At the end of that time, the Union of Soviet Socialist Republics was formed and the domination of those courageous people began. On this anniversary, I believe it important that we in the free world reiterate our concern for all who are forced to live under Communist rule.

The violations of human rights in the Soviet Union are well known. For instance, November not only marks the anniversary of the Bolshevik revolution, but it also marks the fifth anniversary of the founding of the Ukrainian Public Group to Promote the Implementation of the Helsinki Accords. That group was established to monitor the U.S.S.R.'s compliance with the provisions of the final act of the Conference on Security and Cooperation in Europe. Unfortunately however, the overwhelming majority of the brave members have either been imprisoned, sent to labor camps, or forced into exile. One member of the group committed suicide after it was reported that he was continually harassed. Many of us in Congress sent a letter to Ambassador Dobrynin expressing our distress at this situation and urgently requesting that the imprisoned members be released.

Mr. Speaker, as was pointed out to me by the Congress of Russian-Americans, Inc., the words "Russian" and "Soviet" are not synonymous and the Russian immigrants in the United States warn us of the dangers of totalitarian regimes. It is my earnest hope that one day we will not have to call for human rights for individuals, because that goal will have been attained. Sadly, history presents no reason for optimism. Until that day, our commitment toward insuring human rights for all people of the world must remain ever vigilant.●

REAUTHORIZATION OF THE NATIONAL ADVISORY COMMITTEE ON OCEANS AND ATMOSPHERE

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mrs. SCHNEIDER. Mr. Speaker, on November 17, 1981, the House of Representatives passed S. 1133 which provides for the reauthorization of the National Advisory Committee on Oceans and Atmosphere—NACOA. This Presidentially appointed body, including representatives of industry, the scientific community, and academia, advises the Congress and the President on policy issues relating to marine and atmospheric affairs. I am pleased that, as a result of the passage of this bill, the Congress will continue to receive the information and recommendations of this committee.

A recent example of NACOA's contributions to ocean policy debate is their report on "The Role of the Ocean in a Waste Management Strategy." This report provides an analysis and recommendations regarding current ocean waste disposal policies which have stimulated discussion and a reexamination of the issues by both scientists and policymakers. In the past year, under the direction of acting chairman John Knauss, dean of the Graduate School of Oceanography of the University of Rhode Island, this committee has provided timely reports and position statements to several congressional committees on topics including barrier island legislation, ocean dumping policy, and Coast Guard aids to navigation, among others.

S. 1133 provides for a reauthorization for NACOA at a level of $555,000 for fiscal year 1982 and reflects the administration request for funding of this committee. With increasing capabilities and interest in developing the living and nonliving resources of the oceans and increasing utilization of our understanding of atmospheric processes, both the administration and the Congress will have a growing need for the advice and recommendations NACOA is mandated to provide. This committee has demonstrated that they are capable of fulfilling this mandate. I fully support this bill and am pleased that it was passed by both the House and the Senate.●

ELIMINATION OF BATF WILL HURT EFFORTS TO COMBAT CRIME

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. FRANK. Mr. Speaker, I and many others have been deeply disappointed by the failure of the Reagan administration to conform the reality of its actions to the strength of its rhetoric against crime. The President and the Attorney General have spoken out vigorously against crime. But crime is not deterred by official speeches. Unfortunately, the administration's anticrime rhetoric has not been accompanied by any serious anticrime action. In fact, several actions of this administration have undercut the Federal Government's ability to provide needed aid to the State and local forces who serve as our frontline troops in the fight against crime.

The most blatant example of this is the administration's decision to dismantle the Bureau of Alcohol, Tobacco and Firearms. I have been struck, in my conversations with police officers in Massachusetts, by their highly favorable attitude toward the work of the BATF. From police chiefs to patrol officers, I have been told by working police officers that the BATF has been among the most helpful of Federal agencies in the fight against violent and dangerous crime.

Further testimony of the important role the BATF has played in the effort to protect our citizens comes from the Anti-Defamation League of B'nai B'rith. The ADL cooperates closely with law enforcement agencies all across this country in combating violent acts against members of minority groups. Leonard Zakim, the very able civil rights director of the New England regional office of ADL and Massachusetts civil rights leader, recently brought to my attention a resolution adopted by the ADL National Executive Committee violence against minorities. As the ADL says in its letter, "The alertness and skill of BATF personnel in thwarting * * * terrorist schemes, surely saved the lives of many innocent Americans."

Mr. Speaker, it is distressing, indeed, that an administration which professes to be supportive of a vigorous Federal anticrime effort launches its program in this area by abolishing one of the Federal agencies which has been most effective in helping law enforcement agencies. Nothing threatens law enforcement personnel more thoroughly than illegal weapons and explosives in the hands of criminals. It is sad that the administration has taken a step backward in protecting our law enforcement personnel against the

proliferation of weapons in the hands of criminals. Mr. Speaker, I insert the letter from the Anti-Defamation League National Executive Committee about the important role of the BATF at this point in the RECORD.

NOVEMBER 6, 1981.

Hon. DONALD T. REGAN,
Secretary of the Treasury,
Treasury Building, Washington, D.C.

DEAR MR. SECRETARY: At its recently concluded National Executive Committee meeting in San Francisco, the Anti-Defamation League of B'nai B'rith adopted a resolution relating to reported plans to eliminate the Bureau of Alcohol, Tobacco and Firearms (BATF). The ADL opposes the dismantling of BATF and having its various functions distributed to other federal agencies.

Our concern is for the security and safety of Americans who are potential targets of violence at the hands of extremists and bigots. The record is clear that BATF has performed in exemplary fashion its responsibility of monitoring illegal weaponry and explosives. For example, its agents were responsible for uncovering the information which led to the successful prosecution of Klan members or neo-Nazis in such recent cases as the Greensboro bombing conspiracy, the Dominica invasion scheme, the planned assassination of an NAACP leader in Maryland, and the attempt to bomb a synagogue in Nashville, Tennessee. The alertness and skill of BATF personnel in thwarting these terrorist schemes surely saved the lives of many innocent Americans.

In light of the fact that there has been an increase in the extremist activities of hate and terrorist organizations and radical groups, we are troubled by the reported dismantling of so successful an operation as the BATF. What is required is not the elimination but the reinforcement and strengthening of a law enforcement agency with such an outstanding record and under such growing need for its activity.

It is for this reason that the National Executive Committee of the Anti-Defamation League unanimously adopted a resolution urging the Administration to reverse its apparent intention to abolish the Bureau of Alcohol, Tobacco and Firearms.

It is our hope that you will give your active sympathy and consideration to this urgent matter.

With every good wish.

Sincerely,

KENNETH J. BIALKIN,
Chairman,
National Executive Committee.●

NOTICE OF HEARINGS

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. FORD of Michigan. Mr. Speaker, I would like to announce that the Post Office and Civil Service Committee will hold hearings at 10 a.m. on December 2 on the administration's proposal to raise pay and benefits for Federal Aviation Administration employees.

We have asked Transportation Secretary Drew Lewis to be the first witness.

The administration's package, according to Mr. Lewis, provides an average 6.6 percent increase in pay and benefits for FAA employees, in addition to the 4.8 percent provided for all Federal employees.

In addition, the administration's proposal would waive the premium pay cap for FAA employees, allowing them to exceed the $50,112.50 pay limit on other Federal employees with premium pay.

The proposal was added as an amendment to the continuing resolution passed November 22, but died when the President vetoed that piece of legislation.

These hearings reflect the committee's continuing interest in this matter.

I hope the Senate will begin hearings soon to guarantee full and speedy examination of this proposal.

The hearings are being held at this time because of the urgency of this matter, clearly demonstrated during lengthy debate on the House floor during deliberations on the continuing resolution.●

VALOR REWARDED 37 YEARS LATER FOR LYLE BOUCK, ST. LOUISAN

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. GEPHARDT. Mr. Speaker, on October 26, 1981, I had occasion to witness a most moving and remarkable event at Fort Myer, Va.—the Valor Awards ceremony honoring the Intelligence and Reconnaissance Platoon of the 394th Infantry Regiment, 99th Infantry Division. The ceremony was conducted in recognition of the extraordinary acts of heroism of I. & R. members—18 in all—who, though grossly outnumbered, repeatedly repelled an elite German battalion for almost an entire day in the area of Lanzareth, Belgium, thus enabling the 99th Infantry Division to regroup and hold on against this last German offensive until the allied armies could react and win the 1944 "Battle of the Bulge."

Unfortunately, the I. & R. members were finally overrun and taken prisoner, and the platoon's efforts, because of the great confusion of the day, went unnoticed until the writings of Gen. John Eisenhower brought them to light in his account, "The Bitter Woods." Through the efforts of St. Louisan Lyle Bouck, the platoon leader, sufficient information was developed to bring to the platoon members four Distinguished Service Crosses, five Silver Stars, nine Bronze Stars with a Valor Device, and the prestigious Presidential Unit Citation, which reads as follows:

THE PRESIDENTIAL UNIT CITATION (ARMY) FOR EXTRAORDINARY HEROISM TO THE INTELLIGENCE AND RECONNAISSANCE PLATOON, 394TH INFANTRY REGIMENT, 99TH INFANTRY DIVISION

The Intelligence and Reconnaissance Platoon, 394th Infantry Regiment, 99th infantry Division, distinguished itself by extraordinary heroism in action against enemy forces on 16 December 1944 near Lanzerath, Belgium. The German Ardennes Offensive which began the Battle of the Bulge was directed initially against a small sector defended by the Intelligence and Reconnaissance platoon. Following a two-hour artillery barrage, enemy forces of at least battalion strength launched three separate frontal attacks against the small Intelligence and Reconnaissance Platoon of 18 men. Each attack was successfully repelled by the platoon. The platoon position was becoming untenable as casualties mounted and ammunition was nearly exhausted. Plans were made to break contact with the enemy and withdraw under cover of darkness. Before this could be accomplished a fourth enemy attack finally overran the position and the platoon was captured at bayonet point. Although greatly outnumbered, through numerous feats of valor and an aggressive and deceptive defense of their position, the platoon inflicted heavy casualties on the enemy forces and successfully delayed for nearly 24 hours a major spreadhead of the attacking German forces. Their valorous actions provided crucial time for other American forces to prepare to defend against the massive German offensive. The extraordinary gallantry, determination and esprit de corps of the Intelligence and Reconnaissance Platoon in close combat against a numerically superior enemy force are in keeping with the highest traditions of the United States Army and reflect great credit upon the Unit and the Armed Forces of the United States.

Mr. Speaker, in my opinion the heartfelt thanks of the Congress should be added to that of the President and the American people for these heroic men.●

A PLAN FOR COMPREHENSIVE RETIREMENT REFORM

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. JEFFORDS. Mr. Speaker, America's future retirees may be substantially less well off than today's retirees. In a series of statements in the CONGRESSIONAL RECORD, I have tried to alert the House to this possibility and to offer suggestions and recommendations on how to improve the retirement outlook for America's workers.

There are two critical prerequisites for meaningful reform. First, we must not cut the basic social security benefits of those who have either already retired or who are near retirement age. This breach of faith would undermine the greatest strength of the social security system: the confidence that both retirees and workers have

that the Nation will honor its retirement income pledge to them.

The second prerequisite for improving retirement security is that the reforms undertaken be truly comprehensive. No amount of tinkering with the social security system can provide American citizens with a reasonable retirement income in the 21st century. Improved work incentives and opportunities, better private pension programs, and more individual savings incentives need to be established now, if we are to be able to respond to a reduced role for social security in the future.

With these considerations in mind, I would like to outline a plan that I believe would constitute a reasonable reform of U.S. retirement policy. This is a complex area of the law, so I have not attempted to write independently legislation nor to describe my proposals with a high degree of precision. Also, I do not have adequate actuarial data to make definitive statements about the budgetary impact of all of the proposals contained in this outline. Nevertheless, I consider it imperative that the Congress begin to view the retirement issue in a broader context.

AN OUTLINE FOR FUTURE RETIREMENT SECURITY

The legislation outlined below contains four major reforms. These are: First, reform of the national social insurance program; second, reform to improve employment opportunities for older workers; third, reform of private pension requirements; and fourth, reform of individual retirement savings incentives. I believe that these reforms can provide our future retirees with a better retirement future than they can reasonably expect today.

REFORM OF THE NATIONAL SOCIAL INSURANCE PROGRAM

Reform or replacement of the current social security system is a top priority. Increasing life expectancies coupled with declining birth rates and relatively stable and slow economic growth have set the system on an inexorable course toward steady decline. For those now retired, social security has been a good investment. For those now entering the work force, social security will be a burden with an unsatisfactory long-term payoff. Continuing on our present course is not a satisfactory or desirable option. At the same time, we need to make changes in an orderly and well-advertised fashion so that current retirees or near retirees are not denied the benefits that they have been promised and so that the public's confidence in the Government is not shattered.

There are several other considerations that we need to keep in mind as well. We need to be careful that we do not raise the retirement age so high that members of minority groups or citizens working in physically or emotionally wearying occupations—because of their lower than average life expectancies—are effectively denied any opportunity to retire. We need to make sure that service breaks—common in women's careers due to child rearing—are not unfairly penalized. We need to make sure that the Government's promise for retirement income is greater for those who work than for those who do not work and greater for those who work longer and pay higher taxes than for those who work less. And, finally, we need to construct a system that does not discourage the productive employment of those older workers who desire to continue in the work force. I believe that these goals can be best achieved through a social insurance system designed along the following lines.

ENACT CHANGES INTO LAW IN 1981 AND MAKE THEM EFFECTIVE IN 2001

This would allow many workers currently in the work force to retire under the current system and would give at least 20 years notice to workers 42 and under that their retirement savings and pension investment plans will have to be adjusted to meet a new retirement income expectation.

Establish minimum and maximum social insurance benefit levels and relate these to the maximum welfare benefit for the aged. All of those who have contributed a specified minimum amount of work to our society ought to be promised a minimum level of old age retirement income (say 150 percent of the elderly poverty level). Likewise, there should be a maximum level of social insurance income for those who have worked longer than the minimum level of work and have contributed more to the social insurance fund (say 200 percent of the elderly poverty level). All of those who do not meet minimum work requirements would not be paid out of the social insurance fund, but out of general revenues. For these individuals, adjustments would be made in the current Supplemental Security Income program so that when all cash or in-kind income (including SSI, food stamps, section 8 housing, other Federal, State or local programs, earnings, etc.) are considered, they would not have incomes over 100 percent of the poverty level. In other words, SSI would only provide such dollars as would be necessary to bring the total benefit amount up to the minimum level.

This change would redirect the social insurance program from a basic elderly income program to a program with the social objective of eliminating old age poverty. At the same time, it would recognize differentials between those who contributed a lifetime of work to the society and those who did not and between those who met a minimum work and income standard and those who exceeded this standard (although not to the full extent of the differential).

STREAMLINE BENEFIT FORMULAS AND QUALIFICATION TESTS

One of the most confusing and least useful characteristics of the current social security system is its complex benefit formulas with "bend points," "averaged indexed monthly earnings" and other esoteric concepts. These could be replaced with a simple formula that compared the contributions of an employee with the minimum and maximum level of contributions during the period of his worklife and awarded him an annuity at the fixed percentage of the elderly poverty level corresponding to his level of contributions.

ESTABLISH A NEW, MORE RELEVANT, ADJUSTMENT RATE FOR INFLATION OR DEFLATION

By linking social security payment levels to the "elderly poverty level," there would be an automatic adjustment when prices in the general economy rise and fall. This index can be determined by the Bureau of Labor Statistics and should make adjustments for differences in the spending needs of the elderly—that is, housing costs would be less heavily weighted than they are in the CPI and medical costs would be more heavily weighted in the elderly index than they are in the CPI. This should result in an adjustment that more nearly reflects the CPI increase adjustment. Also, this index would deflate as well as inflate earnings when this became appropriate.

PHASE IN BENEFIT PAYMENTS

The current social security system is based on the premise that at some magic date, a worker moves from a life of full-time work to a life of full-time leisure. Thus, retirement benefits begin in full at a certain date and any earnings are offset against these benefits. This is neither realistic nor productive.

A much more characteristic situation is that a worker's earning capacity declines with advancing age. I would propose a system that recognizes this by beginning payments at 75 percent of the earned level at age 65 and starts to pay 100 percent of the earned benefit level at age 68. For those workers who are disabled or incapable of maintaining reasonable wage levels prior to these ages, 75 percent of a discounted level of benefits could be obtained at age 62 and 100 percent at age 65.

ELIMINATE THE RETIREMENT TEST

Since the goal of this new policy would be to establish a poverty floor for the aged, there is no reason that those who exceed this floor and continue in productive employment should be penalized. Therefore, I would propose that there be no offset of earnings. Those who continue to work should get the same earned benefits as those who do not continue to work.

ELIMINATE TESTS FOR CONTINUITY OF WORK

The new social insurance system would not be based on requirements for recency or continuity of work. These provisions often work against women who leave the work force periodically for child rearing responsibilities. I would propose a single requirement of 15 to 20 years of system contributions whether continuous or discontinuous in order to qualify for the minimum social insurance benefit.

MAKE THE NEW SOCIAL INSURANCE PROGRAM UNIVERSAL

By changing the orientation of the social insurance program, we will eliminate any rationale for exclusion of public employees or nonprofit organization employees. Indeed, if we change social insurance and fail to require national participation, it is likely that many public organizations currently covered by social security might withdraw from the system. The coverage of the employees in these organizations might be less unattractive to them than it now seems to be, because the new system ought to be able to be financed by lower employee contributions than is now the case.

REFORM TO IMPROVE EMPLOYMENT OPPORTUNITIES FOR OLDER WORKERS

The announcement of this new social insurance program can establish a much better environment for those who wish to continue in the work force. They will have superior return from their work and they will not forego opportunities for retirement income. For instance, they could be covered by medicare and they would have no income offset. I would additionally suggest that the following steps be considered.

RELAX OR REPEAL MANDATORY RETIREMENT RULES

Congress has moved to reduce the opportunities for private companies to impose mandatory retirement on their employees. This type of restriction on employment has tremendous symbolic impact on all older Americans seeking work. I believe that the Congress should consider outlawing the practice altogether.

ENCOURAGE ALTERNATIVE WORK SCHEMES

As I have already stated, the reduction in work capacity, rather than its loss is characteristic of the aging. The Congress should remove all legal barriers to alternative work arrangements for the elderly. These arrangements would include part-time employment, flexible working hours, etc. To the extent, possible, private employers and unions ought to be encouraged to exempt older workers from contracts that they negotiate if these contracts prohibit flexible work practices.

REFORM OF PRIVATE PENSION REQUIREMENTS

Having removed the likelihood that social insurance will provide a fully adequate retirement income for most individuals, it becomes very important to increase the availability of pension programs and to increase the likelihood that employees covered by these programs will receive meaningful benefits. Since employees of small businesses make up about 79 percent of those who are not currently covered by company pension plans, reforms need to be targeted to these types of firms. Several actions should be taken by the Congress.

PROVIDE TARGETED TAX CREDITS TO SMALL BUSINESSES THAT ESTABLISH PENSION PROGRAMS

Tax deductions for pension expenditures are of substantially more value to large companies (with their higher effective corporate tax rate) than they are to small businesses. The President's Commission on Pension Policy recommended that small businesses be offered the opportunity to take a tax credit of 46 percent—the corporate rate-up to 3 percent of their total payroll. I think that this is a concept worth trying.

REDUCE PENSION PAPERWORK REQUIREMENTS

By allowing financial intermediaries—like banks and insurance companies—to assume an added share of the ERISA documentation, certification and reporting burdens, pension plan establishment and maintenance can be made more attractive to the small businessman. Also, because organizations managing pension programs are most often from heavily regulated industries, it might be appropriate for ERISA or the applicable regulations to be amended to allow financial pension fund intermediaries to substitute other (non-ERISA) reports required of them to demonstrate their soundness and reasonable funds management policies.

REDUCE PENSION VESTING REQUIREMENTS

"Cliff vesting"—full vesting rights after 10 years—is the most common form of pension vesting. This type of vesting formula, however, is out of touch with the work patterns of most Americans. By mandating that mature pension plans provide for some reduced level of employee vesting—40 percent to 50 percent—after 5 years of service, the Congress can go a long way toward insuring that those who are covered by pension plans earn at least some benefits from these plans. Full vesting could still be earned after 10 years. Although the benefits earned under such a system would not be great, I believe that pension plans would generate a great deal more support from the public than they do today if they adopted such a system. Also, pension plans should not operate in such a way that they stall or unnecessarily discourage movement within the workforce. Newly established plans might have difficulty meeting the more rapid vesting schedules proposed. There should be some authority for the Department of Labor to exempt these plans from any faster mandated vesting schedule until the plans have been in operation for 5 to 10 years.

REDUCE PENSION INTEGRATION WITH SOCIAL SECURITY

IRS guidelines should be modified so that less integration of pension and social security benefits is allowed. By reorienting the social insurance benefit toward the eradication of old age poverty and keeping benefits low, it is unlikely that lower income workers would have the same overcompensation effect in retirement that could now occur without integration of benefits. For pension programs to be meaningful to these workers, a lower offset—say 50 percent maximum—should be allowed than is currently the case—now 83½ percent.

ENCOURAGE INCREASED EMPLOYEE PARTICIPATION IN PENSION MANAGEMENT AND PENSION PROFITS

One of the major debates of the future may well be over who owns and controls pension funds. Good public policy would suggest that the government encourage—through tax incentives or reduced regulation—employee oversight and advice in the management of pension funds. Also, the Congress should consider withholding tax incentives from pension programs that fail to give employees the opportunity to share in the outcome of pension investments and limits their participants to fixed annuity payments.

REQUIRE THAT ANY LIQUIDATED PENSION RIGHTS BE PAID INTO AN INDIVIDUAL RETIREMENT ACCOUNT (IRA)

From a public policy perspective, it makes little sense to provide major tax incentives for pension programs designed to enhance the retirement of older Americans and to then have these pension earnings returned to employees before their retirement in a lump sum. Most frequently, the money is turned toward current consumption and does not fulfill the public purpose that justified the creation and public subsidization of the pension program. At the same time, it would be unreasonable to require pension funds to maintain very small inactive accounts until an individual's retirement and then to provide a miniscule payment. Such a strategy would only serve to create substantial additional administrative expense for the fund while providing little additional benefit for the former employee.

I propose that the money be clearly earmarked for retirement, but that it be returned to the employee. This twin objective can best be realized by requiring that any pension plan "cashing out" employee benefits must pay these benefits to a qualified IRA program for the employee. This would have two important effects. First, it would introduce many workers who do not currently take advantage of it to the IRA program. Second, it would make it more likely that short term

savings could be translated into substantially longer term savings. This would only be the case, however, if the employee maintained the IRA account after it was established, rather than immediately cashing it in. To create better IRA retention requires that we make the IRA more attractive to the middle and lower income wage earner. This should be an integral part of our retirement reform package.

REFORM OF INDIVIDUAL RETIREMENT SAVINGS INCENTIVES

The individual retirement account is the best mechanism for establishing incentives for personal retirement savings. However, this program could be dramatically improved by improving the incentives to save and by eliminating the penalties for closing the account. The program should be made more like the Canadian Registered Retirement Savings Plan (RRSP) after which it was originally modeled.

This year, the Economic Recovery Tax Act of 1981 made some important improvements in the IRA program. Maximum contribution levels were raised and employees who had previously been excluded from the IRA program because of their coverage by an employee pension plan were allowed to establish IRA's. Despite these gains, IRA's can be made substantially more attractive through the following actions.

ELIMINATE THE 10 PERCENT IRA TAX PENALTY

Currently, the IRS assesses a 10 percent penalty on withdrawals from an IRA before age 59½. I believe that this penalty may be a large reason for the lower use of IRA's in the United States among low and middle wage earners compared to the Canadian experience. For a young worker aged 25, the prospect of a 10-percent penalty on his savings must be a substantially greater disincentive to establish an IRA than the incentive that if he holds the account for another 34½ years, he will be taxed at a lower post-retirement marginal tax rate. This is especially true if the worker is a lower wage earner and already has a low marignal tax rate. The only worker for whom the IRA penalties may not outweight their benefits is the higher income worker who can easily forego the consumption of $2,000 per year and who is relatively certain that his post-retirement income will be substantially lower than his pre-retirement income. The IRA would definitely be improved by better incentives toward saving; it might be improved by eliminating the penalty for closing the account. For this reason we should study the effects of an elimination of the penalty, and then consider the possibility of implementing the elimination.

PROVIDE INCENTIVES FOR THE MAINTENANCE OF AN IRA

In economic terms, the current IRA program says to the 25-year-old worker that if he uses an IRA to save for 10 years he has made a mistake and should be penalized; if he saves for 20 years he has made a mistake and should be penalized; only if he saves for 34½ years has he made a good economic decision. For all but the wealthiest, worker, this is ridiculous.

Both from the point of view of the individual worker and from the point of view of a society that needs increased savings to produce additional capital investment, these incentives are counterproductive. The IRA should be more attractive after 5 years, still more attractive after 10 years, and even more attractive after 20 years and so forth until its maximum return is realized after retirement. Tax incentives can be established to promote this saving. For instance, the marginal tax rate on a 5-year old IRA could be set at 3 percent below the marginal tax rate that would otherwise apply for an individual. The tax rate on a 10-year-old IRA could be 5 percent below the tax rate that would otherwise apply to the individual, and so forth. This would put the incentive on saving and make it attractive to the individual worker at all income levels. This program could do more for our economy than any incentive in the 1981 Economic Recovery Tax Act and would have the additional effect of helping individuals prepare for their retirement.

ESTABLISH AN IRA CAP AND ELIMINATE ANNUAL IRA LIMITS

A final incentive for IRA savings which would make these accounts more accessible for the average worker would be to eliminate the restrictions on annual IRA contributions—$2,000 per year—and substitute a lifetime cap on contributions for all workers—say $40,000 to $60,000. This would have little impact on wealthy workers who could as easily contribute $40,000 one time as $2,000 per year over 20 or 30 years. However, the average and below average wage earner may often find years in which he is so strapped that he cannot make any contributions to his IRA and, instead, must withdraw from it. The elimination of annual caps would allow him to "catch up" his contributions in his later working years as he neared retirement and was able to save additional income. Or course, this assumes that there is adequate protection against using the withdrawals as tax loopholes.

One major objection that this proposal would face is the fact that it might lose substantial short term tax revenues. For this reason, I would propose that it be enacted prospectively, to become effective in 1985 when we will, hopefully, be nearer to a balanced Federal budget. In any event, over the long run, this proposal should not result in any greater loss to the Treasury than would be the case with regular annual IRA deductions. If there were additional revenue losses, they would have resulted from increased retirement savings from those who would not otherwise have saved and this loss would be substantially offset by the impact of this new investment in the economy. Also, these new investors will have helped fulfill a social goal by becoming better prepared for their retirement.

CONCLUSION

The plan that I have outlined, if enacted, could represent a successful long term, comprehensive retirement program for America's workers. It blends comprehensive reform of our social insurance program with new incentives for work, savings and investment (both by private pensions and by individuals). This proposal contains several elements that are missing in other reform proposals.

First, this proposal is comprehensive. Without changes in our social insurance program, lower income workers will have no incentive to seek IRA's or other savings instruments.

Second, this proposal guarantees that current retirees and near retirees will not face reduced benefits. Unless we keep our current retirement promises, there is no reason for the next generation to believe that we will keep our promises to them.

Third, our social insurance program will be clearly directed to do what it has done best—eradicate old age poverty. At the same time, it will recognize a difference between welfare and the award of benefits to those who have contributed a lifetime of work to the country.

Fourth, work disincentives will be removed for those who wish to continue in the work force. As the general population ages, it is important to keep more older workers in the work force if we are to maintain a stable level of national economic growth.

Finally, tax and other incentives will be brought to bear to give more individuals an opportunity for a good retirement life. My proposal is directed at the groups that currently have inadequate coverage: employees of small businesses and individuals who do not spend a lifetime with a single employer.

We need to make short-term adjustments in the social security system, but we should not end our efforts there. I urge the Congress and the administration to be bold and to take a more comprehensive view of our national retirement future. We must seek solutions to our long-term problems as well as to those that confront us in the short term. I hope that my proposal can signal the start of a search for a broader, more permanent solution to our retirement crisis. I invite others to join this debate.●

MON VALLEY "MON-STER" TO PREY ON POLLUTION

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. GAYDOS. Mr. Speaker, on November 14, Allegheny County and the Mon Valley of southwest Pennsylvania unleashed a new weapon against the twin problems of pollution and unemployment which plague that area and other sections of the country. They unveiled the Mon Valley "Mon-ster," a green, fuzzy beast with bulging eyes atop its head, the adopted symbol of the task force for the clean air and stable economy (CASE) program.

The "Mon-ster" will be used to emphasize the fact that air pollution not only is detrimental to the health of humans but is also capable of causing economic illness as well. The CASE program was launched by Allegheny County to rid 34 communities in the Mon Valley, which stretches from McKeesport to Pittsburgh, of the pollution coming from nontraditional sources.

A few years ago Allegheny County and the Mon Valley were cited by Federal and State officials for their pollution-laden environment. Restrictions were imposed on additional industrial development in the valley until the environment was improved. This was a blow to an area dependent upon heavy industry for its economic base.

On the heels of that edict, the area sustained another shock. An economic downturn forced the temporary closing of a large steel mill in the valley. Workers were laid off. The gloom over the valley thickened. Suddenly, through the clouds came a ray of light, a startling discovery that lifted the hopes of citizens and communities alike.

Pollution monitors were surprised to find the continued presence of pollutants in the air which should not have been there with the closing of the mill. Further studies revealed industry contributed on 13 percent of the particulate emissions in the Mon Valley. Most of it, as much as 48 percent, came from nontraditional sources: that is dirt and debris kicked up from the streets and sewer catch basins by passing vehicles, dust rising from vacant lots and construction sites. The balance was blown into the county and area from other locations, the experts said.

The problem was further compounded by the geography of the area. According to the monitors, complex wind factors in the valley whipped tiny particulates into the air and then held them in a kind of bowl. Some particles are so small that once airborne they never come down, it was reported.

Thomas J. Foerster, chairman of the county commissioners, reacted to this information by ordering the establishment of a clean air task force to attack the area's soot, dust, fumes ash, et cetera. CASE was organized under the direction of Robert M. Cox, a McKeesport businessman with a strong belief in the future of the valley.

Mr. Cox, in turn, worked with representative organizations from the communities in the valley. These organizations, known as councils of government are volunteer groups bound together in a common cause—community improvement. The 34 communities in the valley are represented by three councils. The Turtle Creek Valley Council, John Mores, executive director; the Twin Rivers Council, Edith Scheiner, executive director; and the Steel Valley Council, Robert Callan, executive director.

Equipment was purchased and personnel trained for the all-out push to clean up the offending streets and sewer basins. Each of the councils were assigned two sweepers and a vacuum truck and their mission will go into full swing in the spring.

Officials at all levels express the hope that once CASE brings pollution readings into line with Federal and State requirements, industries in the area will begin expanding or replacing their facilities, preserving jobs, and strengthening the economies of the valley communities.

"We are not only trying to clean up the environment," said one, "We are trying to fulfill the second mandate of the task force: Providing a stable economy."

Mr. Speaker, as the representative from the Mon Valley, nothing could please me more than to see the Mon Valley "Mon-ster" flex its muscles, dust off its opponents and, as soon as possible, accomplish its objectives.●

PERSONAL EXPLANATION

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. ROTH. Mr. Speaker, I would like to record my intention to have voted for the Conte amendment to House Joint Resolution 368 and in support of final passage of the resolution as amended had I been in the Chamber at the time of the recorded vote. Please note that my support for the motion to recommit is reflected in the RECORD as a pair vote.●

AMERICANS ARE GOING BACK TO RURAL AMERICA

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. OBERSTAR. Mr. Speaker, this week the House Public Works and Transportation Subcommittee on Economic Development held 2 days of hearings on economic development policy, focusing on projected changes in the economy, population, labor market, and work force, and their implications for future policy and legislation.

These hearings will set the framework for future legislative action in the area of economic development. Because they are crucially important, I want to share with my colleagues the testimony presented at the hearing, by Calvin L. Beale, U.S. Department of Agriculture.

Dr. Beale is one of the Nation's foremost specialists on rural population trends. He speaks with vast knowledge, gained from analysis of national statistics but, more important, from personal travel to countless communities across rural America over many years.

His statement documents a startling trend of population movement back to rural areas, back to small towns—the first such trend in 120 years.

Because this movement is quite unexpected and was unpredicted, I encourage my colleagues to read Dr. Beale's full statement.

POPULATION CHANGE IN RURAL AMERICA AND IMPLICATIONS FOR ECONOMIC DEVELOPMENT

(By Calvin L. Beale)

There were a number of demographic surprises in the United States during the 1970's—the low level of the birth rate, a decline in the death rate, the extent of decline in average household size, and the degree of the shift of people to the South and West. But nothing was less anticipated in academic circles or in the literature of public debate than the population turnaround in most rural and small town (nonmetropolitan) areas. There had been some sense of urbanization slowing down, but no hint that the outflow of people from rural America that had characterized the whole century would rather suddenly be reversed.

The counties that were nonmetropolitan in 1970 had about 2.8 million more people move out than in during the 1960's. However, in the 1970's, it can be conservatively estimated that at least 3.5 million more people moved into these counties than out of them. As a result, population in the nonmetropolitan part of the Nation grew at a faster rate than that in metropolitan areas for the first time since the early decades of the Republic.

The renewal of rural and small town growth during the 1970's was very widespread. Forty-eight of the 50 States either increased their nonmetropolitan growth or

at least reduced their previous loss.[1] Slow metropolitan growth, however, was not national in character. There was a virtual collapse of population growth in most of the metropolitan areas of the North (especially in some of the largest ones) and an increase in growth in most of those in the South and West. If one considers the South and West as a unit, there was equally rapid growth of urban/suburban and rural/small town population—each increased more than 21 percent. However, in the North there was essentially no growth in metropolitan centers, but a 9 percent increase in nonmetropolitan areas.

Why did rural and small town losses shift to growth or, at least, taper off nearly everywhere? I think several forces have come into play that have produced an economically fostered but socially motivated change.

1. The decades-old displacement from farming is now so small that it can no longer dominate rural trends. Farm losses only result in overall population loss in a diminishing number of counties that do not have alternative sources of employment and income, such as thinly settled farm counties in the Great Plains.

2. There has been a significant revival of employment in mining, whereas the opposite was true earlier.

3. All other types of employment expanded faster in rural and small town communities than in metropolitan areas during the 1970's—such as trade, services, and manufacturing.

Thus job opportunities have improved greatly, whether for local residents with no desire to move to the city, or for city and suburban residents who wanted to live in a smaller community. Nevertheless, the importance of social motivations is still evident.

1. Every survey of newcomers to nonmetropolitan areas has shown that the great majority give social reasons for their move rather than economic reasons.

2. One of the leading sources of growth is retired people who, given a sufficient retirement income to be mobile, choose to move to a smaller community.

Several other features of the nonmetropolitan trend deserve notice. One is the fact that there is now almost no relationship between the income level of nonmetropolitan counties and their rate of population change. In the 1950's and 1960's, the population growth in rural and small town counties was strongly associated with income levels. At that time, poor counties lost population heavily, while more affluent ones attracted people. Since 1970, however, the extent of population turnaround has been greatest in low income counties, and, with the exception of those that are predominantly Black racially, low income areas are increasing in population just as fast as higher income areas. Black counties have also had improved population retention, although not as great as that in predominantly White counties, and the level of rural Black population has stabilized considerably. Generally, the relative income gap between rural counties and the Nation as a whole has narrowed somewhat, but only a handful of the counties of 1970 have now risen to the national average income. Despite this fact, these areas are now evaluated as much more attractive places to live than they were before.

A second point of interest is that the new growth has occurred disproportionately in low density and open country districts. Although small towns and cities have participated in the nonmetropolitan growth trend, the same tendencies toward decentralization and sprawl are evident around these small towns as they are around metropolitan cities. The pattern appears to reflect what people want, but it does pose potential problems for provision of public facilities and services and for preservation of farm land. The rural (open country and village) population grew by 5.6 million from 1970-80, even after reclassification of growing towns as urban and some liberalization of urban definitions. Only the decade from 1850-60 saw previous rural growth of this amount.

Proximity to metropolitan areas favors settlement somewhat, but it is the spread of growth to more distant areas that is more remarkable. In one vast region of the West, embracing portions of Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, and California, the nonmetropolitan population grew by more than 50 percent in the decade of the seventies. Although local density is still very low in this region, the collective numbers of people involved are beginning to mount. None of this is to imply that America is on its way to becoming a nonmetropolitan nation again. Three-fourths of the people still live in metropolitan areas, and small new metropolitan areas continue to be created by growth around the largest nonmetropolitan cities. Furthermore, small and medium sized metropolitan areas up to about three-fourths of a million people have accelerated in population growth as a class (with some notable Northern exceptions). We are experiencing a drop in the average size of communities in which people live, but with the overall character of the system still very much metropolitan.

The people who have moved into rural and small town areas during recent years represent a wide range of backgrounds. The full spectrum of education, age, income, and occupational categories is present. It can be said, however, that they are disproportionately White, and more likely than longer-term residents to go into white collar jobs (see table 2). Many are of earlier rural or small town background, but others are urban natives. It should be stressed, too, that the change in the flow of net migration is partly caused by a reduction in outmigration from rural areas. The same forces that impel people to leave cities also persuade others not to move to them in the first place.

Within the metropolitan areas, there has been a major loss in the dominant demographic role of the central cities, especially in their relative importance. Forty-five percent of our central cities declined in population during the 1970's, typically from a combination of narrow and inflexible city limits, the decay and abandonment of many core areas, the reduced density at which cities are inhabited these days, and the reduction in the average number of people per housing unit. As late as 1960, a slight majority of metropolitan residents lived in the central cities. Today, only 40 percent do so.

In many of our major metropolitan areas the central city population is now less than a third of the area total, even though we continue to think of the area in terms of the name of the central city. This is true, for example, in cities as widely scattered as Boston, Washington, Cleveland, Detroit, Miami, Atlanta, Minneapolis-St. Paul, St. Louis, Seattle, and San Francisco-Oakland. It occurs least in the South and Southwest where annexations have been more attainable. Thus, the cities themselves have less of a leadership function and political and commercial dominance than used to be the case.

RAPID GROWTH AREAS

Some of the most rapidly growing counties have been mining areas. As a group, counties with a heavy mining dependence (20 percent or more of all employment) grew in population at a rate about double that of the U.S. as a whole in the 1970's. All but a few of them are in the South and West, and the revival of mining employment contributed to the more rapid growth of these regions. Among the mining counties are some genuine boom areas—defined here as those having a population increase of at least 50 percent during the decade. Although energy development dominates these cases, mining of metallic ores and trona have also created mining boom growth.

However, if one considers all rapid growth areas, mining is the major cause of growth in only a minority of cases—media attention on these cases notwithstanding. (Figure 2 shows the location of all rapid growth counties.) More of them result from resort and retirement developments (which often occur together) or from suburbanization or urban flight.

As an illustrative example, three energy mining boom areas in the West that have probably had the most public attention (the counties containing Gillette and Rock Springs, Wyoming, and Colstrip, Montana) has less absolute and relative growth combined than did two small contiguous counties in Florida growing largely from recreation and retirement (Citrus and Hernando counties).

There appears to be much more anxiety about the impacts of population growth in Western communities than elsewhere. I suspect it is partly cultural, and partly the product of a sense of fragility about the Western environment, especially concern over water supply, the open nature of the landscape, the nearly pollution-free air, and the impermanance of some mining projects. Whatever the reasons, I make the point because of what I believe to be an inaccurate public perception of the factors producing most instances of boom population growth today. Many and perhaps all rapid growth communities need planning and could use assistance in coping with their change. I doubt, however, that the mining communities need much more help than other similarly affected areas, or that the energy mining towns need more than other mining towns.

POPULATION GROWTH AND PUBLIC SERVICES

The population turnaround has already affected the level and scope of public services provided in small towns and rural areas. Not only must the local governments extend existing services to a growing population, but new residents often demand public services at levels more similar to those provided in urban areas. As a result, in the mid-1970's local government expenditures per capita were increasing at a faster rate in nonmetropolitan areas than in metropolitan areas.

If expenditures are any indication of service levels, the greatest change in nonmetropolitan services took place in water, sewer and other public utilities, health care, and police and fire protection. For those communities that experienced gradual growth, increased demand for public services was

[1] The two exceptions were Connecticut and Rhode Island—overwhelmingly metropolitan States whose three nonmetropolitan counties are quasi-metropolitan in character.

generally matched with increasing revenue bases with which higher expenditure levels could be financed. However, for communities undergoing boom-level growth, serious fiscal problems can result as growth in local government revenues lags behind the need for expanded public services.

As population grows in the years ahead, local governments in rural America will continue to face increased demands for water and sewer facilities, health care facilities, and police and fire protection. In addition, major expenditures may be needed for roads, schools, and public buildings in general as existing facilities become overcrowded and deteriorate with age. Whether rural officials will be able to finance higher service levels and the construction of new facilities remains to be seen. At present, rural governments are heavily dependent on intergovernmental aid. In 1977, more than 47 percent of the general revenues of local governments in nonmetropolitan areas came from the State and Federal governments.

In adjusting to cuts in intergovernmental aid, local governments will have to cope with such problems as high borrowing costs, State imposed restrictions on revenue sources, and water resistance to tax increases. Most rural communities still have only low-to-moderate population growth, but those with faster growth will naturally have pressing needs for new infrastructure, if the quality of their public services is not to deteriorate.

IMPLICATIONS

If asked to make a judgement about the merits of the improved retention of people in rural and small town areas and the shift of the flow of net migration toward them, I would say that on balance it is beneficial.

It is clearly in accord with the policy objectives of Congress designed to obtain a better balance of population growth, and economic opportunity, as expressed, for instance, in the Rural Development Act of 1972.

The new trend is more in accord with the residential preferences stated by people. In effect, we now have more people living where they want to live rather than merely where they feel economic circumstances dictate.

The trend reflects the fact that basic material conditions of life in rural areas at long last approximate those in urban areas sufficiently to make rural living attractive. I refer to such things as electricity, water supply, central heating, telephone service and other communications, paved roads, secondary education, and some choice of occupations.

The growth of rural communities also communities also serves to stabilize the age composition (except in retirement areas) and to end the decades-long atmosphere of economic community decline and decay that overhung so many communities. Like most social trends there are costs.

There sprawling nature of population growh in rural areas increases the loss of farmland to other uses, and has the potential of restricting farmers in their traditional farming practices where these are objectionable to newcomers.

The decline of population in large cities creates social and economic problems even though it provides relief from earlier impacts of growth.

As noted earlier, there has been a major increase and diversification of jobs available in nonmetropolitan areas. Much of the increased employment has been of rural women, who in the past had much lower formal participation in the labor force than did urban women. Their employment has substantially increased the number of nonmetropolitan families with two incomes, and has helped to narrow the gap between average metropolitan and nonmetropolitan incomes. Now, however, there is no longer as much potential for increasing rural family incomes to urban levels through this means. Nonmetropolitan family incomes are 80 percent of metropolitan incomes today, and the gap has not narrowed since 1974.

Aside from unemployment rates, which are now slightly higher among rural and small town people than in the metropolitan areas, the nonmetropolitan areas also show chronically higher percentages of involuntary part-time workers (who would like full-time work) and "discouraged workers" who do not report themselves as in the labor force but indicate they would like to have work. It may be that rural areas by their very nature (low density settlement and limited job mix) will never be able to achieve full parity with urban/suburban areas in income and in the rate and fulltime nature of employment. If further improvements in nonmetropolitan income are to be attained, there will have to be further upgrading, diversification, and expansion of employment.

FUTURE PROSPECTS

Mr. Chairman, although you have asked that I discuss projections and prospects for the next five to ten years, I have a strong sense of diffidence in doing so. There is an understandable and, indeed, insatiable demand for projections, but the record has not been good. The government has put out embarrassingly bad projections of demographic and related economic trends.

We have not demonstrated ability to forecast inflections in population trends—much less outright reversals. So many of our trend changes have resulted basically from changes in social behavior rather than from readily foreseeable responses to objectively measured conditions. Nowhere was this more true than in regard to rural and small town population growth.

With this heavy caveat, I will express some views about the next decade in qualitative terms. I think it likely that the renewed growth in nonmetropolitan areas will continue, because of the diversity of forces producing it. It should be noted, though, that in the last two years of the 1970's the rate of job growth in the nonmetropolitan areas no longer exceeded that in metropolitan America as it did in the other years of the decade. Furthermore, in the last 4 years we have seen the nonmetropolitan unemployment rate catch up to and slightly surpass that in metropolitan areas. These more recent trends could indicate that the bloom is off of the nonmetropolitan economic surge, even though a return to preturn-around conditions is highly unlikely. The social motivation for more people to move out of the metropolitan areas than into them will probably last until the popular perception of the conditions and terms of life in large urban areas improves, and/or until the philosophic underpinning of the shift to smaller communities weakens (environmentalism, anti-materialism, homesteading, and the like). Whatever the complex of reasons inducing people to leave the Northern metropolitan areas for other regions or to rural hinterlands, the process has to be regarded as a transition. Just as the earlier exodus from rural areas eventually exhausted the factors that had produced it, so too the Northern areas will reach a level of population more consistent with their revised role in the national economy. How quickly this will occur and how much further demographic change it will involve is, I think, unknowable. Personally, I do not have an apocalyptic view of the future of the urban North, but I think substantial outmovement is yet to come. Most of this will probably go to other regions. Some will go to Northern rural and small town areas.

In closing, I should like to emphasize that even though most rural and small town counties have improved their population retention over earlier years, many hundreds of them still have net outmigration, especially where dependence on agriculture is high and nonfarm work is scarce. There is great diversity in rural and small town conditions, just as there is between metropolitan areas. From a public policy standpoint we have to deal simultaneously with problems created by very rapid growth in many places and decline in many others.

TABLE 1.—POPULATION CHANGE BY METROPOLITAN STATUS AND SIZE OF LARGEST CITY

Characteristic	Population				
	Number in thousands			Percentage change	
	1980	1970	1960	1970–80	1960–70
Metropolitan [1]	163,503	148,877	127,191	9.8	17.0
Nonmetropolitan	63,002	54,424	52,132	15.8	4.4
Total	226,505	203,301	179,323	11.4	13.4
Nonmetropolitan:					
Adjacent counties [2]	32,901	28,031	26,113	17.4	7.3
Nonadjacent counties	30,01	26,394	26,019	14.0	1.4
Nonadjacent counties:					
With city of 10,000 or more [3]	13,642	11,910	11,132	14.5	7.0
With no city of 10,000	16,458	14,484	14,887	13.6	−2.7

[1] Metropolitan status as of 1974.
[2] Nonmetropolitan counties adjacent to Standard Metropolitan Statistical Areas.
[3] Counties with a city of 10,000 or more population in 1970.

MOTOROLA, INC., SHOWS HOW AMERICAN PRODUCTIVITY CAN PREVAIL

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. PHILIP M. CRANE. Mr. Speaker, I would like to pay tribute to a major corporation within my district responsible for taking a leadership position on an issue of critical importance to all Americans: the challenge posed to U.S. industry by Japan's manufacturing success.

Throughout its 53-year history, Motorola, Inc. has been responsible for saving lives, offering protection, and promoting the general welfare in the noblest traditions of our incentive society through development of high quality electrical and electronic products sold around the world.

There is a much broader story being written by Motorola today, one that has far reaching implications within the competitive system of the international marketplace.

We have heard repeatedly that one of the most important challenges facing American business is competing successfully with Japanese firms. American business has fought a difficult battle in supporting our national balance of payments. Critics point to how U.S. manufacturers are losing market share in world markets to Japanese products offering technological advances, high quality, and low prices. Indeed, we have lost markets within our own boundaries to the Japanese.

Critics of American business spread the notion that the Japanese are inherently superior to us for reasons of history, culture, or philosophy. Critics of American labor assert that the U.S. worker is too unconcerned or too highly paid to any longer turn out good products at reasonable prices. And some critics of the U.S. Federal Government maintain that we here in the Congress have been remiss in not establishing tariff, quota, and other barriers against a flood of imports created by a so-called cartel of interlocking industial giants, banks, and Government agencies which is known to some observers as "Japan, Inc."

But none of this prescribes a cure for our national economic problems. During the past three decades, Japan has become the world's second-largest economic power in part by concentrating its national efforts upon manufacturing and exporting high-quality goods produced through efficient use of scarce or expensive raw materials and energy. It is true that the Japanese can reach a special kind of national consensus to further these efforts that American business and legal philosophy forbids us to duplicate. But like much of the rest of the world, Japan relies upon a strong, confident America as trading partner and ally.

We know that it is possible for an American company, paying American workers in American plants to compete successfully with Japanese companies. This success has been demonstrated by Motorola, a worldwide corporation with headquarters at Schaumburg, Ill., in the State's 12th Congressional District.

Motorola is known throughout the world for introducing the first economically manufactured car radio more than 50 years ago and, today, for its sophisticated communications and data equipment, and its state-of-the-art semiconductor technology. When the first woman climbed Mount Everest in 1976, she carried a Motorola portable FM two-way radio to help guide her to the top. That was not a Japanese radio, although the climber was a Japanese schoolteacher, Junko Tabei.

This incident underscores an important principle that can lead American industry into the kind of competitive posture which will restore our national economic health. Robert W. Galvin, Motorola's board chairman and chief executive officer, sums up that principle succinctly:

If you make a better quality product than your competition, your competition's customer will buy it.

Within that terse statement lies the key to answering the question all of us hear so often from our constituents: "What are you doing about Japan?" I believe we in the Congress have begun to answer that question. And when American industry begins to answer it in the way that one Illinois-based firm has, the reply will be good not only for the United States but also for Japan.

There are many things that American companies do extraordinarily well today. There are things that American labor does extraordinarily well. The men and women of Motorola have shown that by harnessing these skills of management and labor, by freeing them up from self-imposed strictures, by directing a total effort toward enhanced quality and productivity, we can meet and outscore the competition.

Motorola and other progressive American companies have evolved a successful response to Japanese competition years before that competition was widely reported. These actions need not take years to duplicate at other U.S. companies. There are five steps that American business management, American workers, and the Federal Government can take to meet Japan's challenge.

First, American corporations must give constant attention to improving productivity. Productivity enhancement is not merely speeding up the assembly line. Instead, it involves capital spending on new technology, on the latest tools and machines to help workers work smarter, not harder. Continuing training and retraining programs improve employee skills and upgrade them for more complex tasks while sharpening workers' awareness of ways total company productivity can be increased.

Second, steady quality improvement is essential to long-term success. Improved quality means that a product or service performs in excess of the customer's accepted standard, and it applies to design, sales, and service as fully as to production.

Third, employee participation in management is vital. Over the years of our Nation's industrial history, this has been one of the great sources of new and better products and ways to make them. Motorola already has more than 11,000 of its 45,000 U.S. employees involved in a comprehensive participative management program wherein the workers themselves help diagnose problems, recommend solutions, and are rewarded for their success.

Fourth, American business must continue to concentrate on technology management. It must harness and manage new technology to serve its customers effectively and anticipate its customers'—and its foreign competitors'—needs 5, 10, and 20 years in the future. It must create strategic business plans to meet those needs. The United States has unequaled professional skills for this.

Finally, companies and Government must cooperate to increase U.S. exports. The rules must be fair for all, and companies can best defend fair trade principles by aggressively attacking unfair trade practices, bringing them to the attention of the administration and of the Congress when appropriate. We here in the Congress

must remain aware of the impact of unfair trade barriers upon our national balance of payments, and we must do our part to promote fair access to the home markets of Japan and other nations for U.S. products.

Today, a number of companies are speaking out on the need for American business and American workers to compete on even terms with their Japanese counterparts, and we in Congress must commend this. As more companies apply the lessons which have been learned, and as we in the Congress remain involved in the real issues involved in international trade, our Nation as well as much of the world will share in the benefits.●

NEW BELIEVERS ON THE COAST

HON. JOHN L. BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. JOHN L. BURTON. Mr. Speaker, I am pleased to share this article from Time magazine with my colleagues which illustrates the tremendous contribution Coach Bill Walsh has made to the success of the San Francisco Forty Niners this season.

A fine human being, with a keen understanding of people as individuals, Bill Walsh is finally receiving the recognition he deserves.

In addition to other qualities, Bill is the last disciple of Jock Southerland, and is the only NFL coach considering a return to the single and double wing offense complete with the buck lateral series.

The article follows:

[From Time, Nov. 23, 1981]

NEW BELIEVERS ON THE COAST

(By Tom Callahan)

These days O.J. Simpson, who grew up and grew old with the San Francisco 49ers (unfortunately, U.S.C. and the Buffalo Bills came in for all the good stuff in between), is sounding like the boy who cheered the 49ers in the '50s, not the man who left the ruins of his team for retirement two years ago. "I don't know about depth," says O.J., "but the 49ers have championship-quality frontline players. I mean it. I'm saying the first 25, 26 guys are the best in football. Can you believe it? My team."

On both sides of the bay, San Francisco is "my team" again, and nobody around the National Football League can believe it. After winning six games and losing ten last season (two and 14 for the two years before that), the 49ers suddenly are running away with the Western Division of the National Conference. Rather, they are passing, and defending against the pass.

A team completely without logic or losses for two months, San Francisco is a defensive power under an offensive coach, a sensitive inventor named Bill Walsh. The defense is founded on two known mercenaries (ex-Charger Fred Dean and ex-Ram Jack Reynolds), who argued their way out of other towns over money and who now "lecture" on motivation in San Francisco, and three unknown rookies (Cornermen Ronnie Lott and Eric Wright, and Safety Carlton Williamson). When was the last time anyone heard of an all-rookie secondary in the N.F.L.?

Or a Notre Dame quarterback who was winning as a pro (Joe Montana)? Or a play in which the quarterback dashes off the field at the last instant and leaves the wide receiver to take the snap from center? Montana and Freddie Solomon pulled that one. Solomon rolled out for seven yards, and the 49ers rolled on to a 17-14 victory over the Atlanta Falcons, the seventh straight 49ers victory, pushing their division lead to three games with only a third of the season left.

"There isn't anything flippant about our offense," says Walsh, although four nonquarterbacks have passed or threatened to pass this year. "We don't have a gifted all-around offense: our longest run is 23 yards on the last play of a half. We have to be resourceful and fully dimensional." And what does fully dimensional mean? "There is basic, rock-solid, block-and-tackle football. Then there is crazy, circus-play, flea-flicker football. We fit somewhere in between."

Where Walsh, 49 fits among coaches is not easy to tell, either. His pedigree is complicated. Walsh is not just a pup out of Paul Brown, as people say. He is by Brown out of Al Davis with a touch of Sid Gillman (since Davis is really Gillman taken to the *n*th degree). "Al gave me the taste for offense," Walsh says of the year (1966) he assisted the evil genius of the Oakland Raiders. "He opened vistas."

Then for eight seasons after that, Walsh sketched vistas and drew plans for Brown's Cincinnati Bengals. "The coaching atmosphere under Paul was almost clincial. Let's say, you were assured of the players' absolute attention." Brown put more than a chill in the players. He put the classroom into pro football. Still, his best students (Don Shula, Chuck Noll, Walsh), all have been different. No great coach is like any other, really.

After the Bengals, continues Walsh, "I coordinated the offense in San Diego one year for Tommy Prothro, with even more freedom to express myself." Then he turned around, and he was middle-aged. Whether or not it blew in from Brown, sore at losing his *X*s-and-*O*s man, Walsh felt a definite coolness in the marketplace. "I was 45 before I even had an interview for a head coaching job in the NFL." He could hear teams thinking: "Why hasn't he been a head coach before now? What's the flaw?" And whispering: "A good technician, not a head coach." To be somebody's head coach, not to mention his own man, Walsh went back to college football, to Stanford, where he had assisted John Ralston in the mid-'60s.

His way with quarterbacks had always been his most obvious gift. In Walsh's time with the Bengals, Ken Anderson was the top-rated passer in the league twice, and Greg Cook once. At San Diego he made Dan Fouts one of the best passers in the league. All of his quarterbacks speak warmly and a little wondrously of Walsh. At Stanford, he touched Guy Benjamin and Steve Dils. They moved to the head of the N.C.A.A. passing charts, and Stanford won bowl games, and Walsh won coaching awards, and he was happy, except . . .

"Why do I need the N.F.L.?" he asked himself when the 49ers called two years ago. "Stanford is the ideal atmosphere for coaching football—the most brilliant people, one of the honest, legitimate programs. There is dignity to it, playing against machines and beating them." All the same, Walsh did need to be a head coach in the N.F.L.

"We're going to tactically approach offense while building defense," proclaimed the new coach and general manager. Probably nobody understood. But that is exactly what Walsh has been doing.

It is advisable in pro football to sneak new men into the secondary one at a time, not to change three of the four spots in one year. But Walsh has been in a hurry. "The moment we drafted the three, we released our veteran starters," he says. "That's Paul Brown too: don't vacillate."

At 34, Veteran Linebacker Reynolds (a.k.a. "Hacksaw") has not allowed the younger players to get carried away. "Play with emotion, but don't show it outwardly," he lectured in the clubhouse after the Falcon game. "Stay reserved." This from a man who, when he was in college at Tennessee, reacted to a loss to Mississippi by hacksawing a 1953 Chevy in half.

Fred Dean dissects quarterbacks instead. "He has set a whole new standard here," says Chuck Studley, the defensive coordinator. "If you don't hurry to the quarterback now, Dean will be there waiting for you." Not since Alan Page's M.V.P. year for Minnesota in 1971 has one lineman's impact on the league seemed so profound. Dean is a seven-year veteran, merely 230 lbs., but brutally strong, and quick. He arrived in San Francisco in the season's sixth week, when the 49ers dispatched Dallas (45-14) and then in quick order, two other Super Bowl teams, Los Angles (20-17) and Pittsburgh (17-14).

"It's going to get harder on us, but we're going to get better," Walsh says. The thought of teams gunning for the 49ers still seems a bit strange, but it does not worry Walsh. How far does he think they can go this year? Walsh smiles and offers the most unlikely answer. "I haven't allowed myself to think."●

THE GREEN BERETS DO NOT FORGET

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 23, 1981

● Mr. McDONALD. Mr. Speaker, yesterday, was November 22, and the anniversary of the death of President John Fitzgerald Kennedy. It was also the occasion that as many Green Berets that can make it, come back to say "Thank You" President Kennedy for visiting Fort Bragg, N.C., in the fall of 1961, where as Commander-in-Chief, he authorized the wearing of the Green Beret to America's highest trained and most dedicated elite fighting force. In his own words, President Kennedy called that Green Beret: "A symbol of excellence, a badge of courage, and a mark of distinction in the fight for freedom."

It was a cold blustering day, and approximately 100 Green Berets came back to not only honor President Kennedy, but their own fellow comrades in arms at Arlington National Cemetery. Special Forces Association President

Bill C. "Pappy" Greer led off the first part of the ceremony by presenting a Special Forces Memorial Plaque for permanent display in the memorial display room adjacent to the Tomb of the Unknown Soldier. The plaque simply stated: "In memory of all American heroes known but to God. Special Forces Association—November 21, 1981."

The plaque will indeed be a permanent and fitting memento. Most moving however, were the words of "Pappy" Greer expressed for all present, and those who gave that last full measure of devotion—their lives. So that all may know what was said I share first with my colleagues those remarks of "Pappy":

One of the precepts for the founding of the Special Forces Association is to commemorate the memory of Special Forces troops who have given their lives in defense of the Free World. Today, we wish to expand that precept to all Americans through the course of our country's history who have done no less. Mr. Costanzo (Superintendent of Arlington Cemetery), we the members of the Special Forces Association, assembled here today, place this plaque in your custody, to protect and display in this memorable hall.

"Pappy" Greer then concluded his remarks with this very moving and memorable sentence: "We dedicate this tribute to all American soldiers who have given their tomorrows so that we might have our todays."

Then came Brig. Gen. James E. Moore, Director of Operations, Readiness and Mobilization, DESOPS, U.S. Army, with an invocation no one present will ever forget:

O Eternal Father, our strength and refuge in this and every time of need, we gather today to lift our prayers of thanksgiving for your servant President John Fitzgerald Kennedy. Through his life of service to mankind, you have truly blessed the lives of countless millions of people throughout our world. His deeds of personal courage, still stand as a torchlight of inspiration and challenge to us all. Continue to fulfill his dreams within our world, we pray, and grant his soul your eternal peace and freedom. We also honor, O Father, the fallen soldiers of our land whom President Kennedy so gallantly inspired—especially those men of the Special Forces to whom he gave the Green Beret as a "symbol of excellence, a badge of courage, and a mark of distinction in the fight for freedom." May these our departed comrades have the eternal mercy and joy which you alone can give. For their families and friends, we ask the consolation and comfort of your Holy Spirit.

For those of us who still have the blessings of life on Earth, O Lord, we pray that the sacrifices of these whom we honor today will always challenge us. May we, like those before us, be led to give of ourselves unselfishly for the causes of justice, freedom, and peace throughout the world. Grant us your wisdom and courage for the living of these days, that Your Kingdom may come and Your Will might be done on Earth as it is in Heaven. We offer ourselves and our prayers in your Holy name. Amen.

I feel very privileged and honored to be a member of this Special Forces Association. I know of the sacrifices that these men have made. I know also that had they had their way in Southeast Asia, those lands and those people would be free today. The total mission and dedication to "Free the Oppressed," would have been fulfilled. It was not to be.

I would conclude these remarks today in honor of all the Green Berets worldwide with a quote from a realistic novel, soon to be published, about another group the Green Berets will never forget, the Missing In Action (MIA). The title of the book: "Mission M.I.A.," by J. C. Pollock. And the quote:

Every man who wears the Green Beret today owes a measure of his pride to those who went before him. Heroic in spirit as well as deed, they fought and they died; they served with honor and integrity, and in the end were denied and denigrated by lesser men. But the final victory is theirs—they know what they are: a special breed of men.

To that can only be added: For those who died, Rest In Peace; for those who live: Carry On.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, November 24, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

NOVEMBER 25

9:30 a.m.
Foreign Relations
African Affairs Subcommittee
To hold a closed briefing to discuss the situation in Africa, and to discuss an internationally recognized settlement in Namibia.
Room S-116, Capitol

Veterans' Affairs
To hold hearings on the nomination of Charles T. Hagel, of the District of Columbia, to be Deputy Administrator of Veterans' Affairs, Veterans' Administration.
412 Russell Building

10:00 a.m.
Judiciary
Security and Terrorism Subcommittee
To hold hearings to examine the presence of Cuban intelligence operations within the United States.
2228 Dirksen Building

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building

NOVEMBER 30

9:30 a.m.
Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on certain provisions of the Immigration and Nationality Act (Public Law 94-571), relating to the H-2 temporary worker programs and nonimmigrant programs.
2228 Dirksen Building

2:00 p.m.
Judiciary
To hold hearings on S. 1758, providing an exemption from the copyright law for certain types of video-recording for noncommercial purposes.
6226 Dirksen Building

2:30 p.m.
Banking, Housing and Urban Affairs
To hold hearings on S. Res. 209, S. 1859, S. Con. Res. 40, S. 971, S. 1609, and S. 1691, measures revising certain provisions of the Federal Reserve Act relating to the structure and membership of the Federal Reserve Board.
5302 Dirksen Building

DECEMBER 1

9:30 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To resume oversight hearings on America's role in the world coal export market.
3110 Dirksen Building

Finance
International Trade Subcommittee
To hold hearings to review recent developments in the U.S. automobile industry and the U.S. market for automobiles.
2221 Dirksen Building

Small Business
Productivity and Competition Subcommittee
To hold hearings on Federal antitrust policies, focusing on recent small business mergers.
424 Russell Building

10:00 a.m.
Commerce, Science, and Transportation
Consumer Subcommittee
To hold oversight hearings on the activities of the Consumer Product Safety Commission.
235 Russell Building

2:00 p.m.
Armed Services
Preparedness Subcommittee
To hold open and closed hearings on the status of the National Guard and Reserves.
212 Russell Building

DECEMBER 2

10:00 a.m.
Energy and Natural Resources
Business meeting, to resume markup of S. 1484, promoting the development of oil shale resources by revising the authority to lease lands containing oil shale deposits, S. 506, reinstating and validating certain numbered U.S. oil and gas leases, and other pending calendar business.
3110 Dirksen Building

Environment and Public Works
Business meeting, to mark up S. 1692, providing for the operation, maintenance, and construction of deep-draft channels and national harbors.
4200 Dirksen Building

Foreign Relations
To hold hearings on activities of the International Atomic Energy Agency (IAEA), focusing on its programs of safeguards.
4221 Dirksen Building

10:30 a.m.
Conferees
On S. 884, authorizing funds for fiscal years 1982 through 1985 for commodity price support programs administered by the Department of Agriculture, for agriculture research and conservation, and agriculture exports.
Room to be announced.

1:30 p.m.
Foreign Relations
To hold hearings on the nominations of Kenneth L. Brown, of California, to be Ambassador to the People's Republic of the Congo, and Francis T. McNamara, of Vermont, to be Ambassador to the Gabonese Republic and to serve concurrently and without additional compensation as Ambassador to the Democratic Republic of Sao Tome and Principe.
4221 Dirksen Building

2:00 p.m.
Foreign Relations
To hold hearings on the Treaty of Friendship with the Republic of Kiribati (Ex. A, 96th Cong., 2d sess.), Treaty of Friendship with Tuvalu (Ex. W, 96th Cong., 1st sess.), Treaty with the Cook Islands on Friendship and Delimitation of the Maritime Boundary (Ex. P, 96th Cong., 2d sess.), and Treaty with New Zealand on the Delimitation of the Maritime Boundary between the United States and Tokelau (Treaty Doc. No. 97-5).
4221 Dirksen Building

DECEMBER 3

9:30 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To resume oversight hearings on America's role in the world coal export market, focusing on the domestic coal transportation network.
3110 Dirksen Building

Finance
Health Subcommittee
To hold hearings on competitive contracting for the administration of medicare.
2221 Dirksen Building

10:00 a.m.
Environment and Public Works
Business meeting, to resume markup of proposed amendments to the Clean Air Act (Public Law 95-95).
1202 Dirksen Building

Foreign Relations
To hold hearings on the Convention on the Prevention and Punishment of the Crime of Genocide, adopted unanimously by the General Assembly of the United Nations in Paris on December 9, 1948 and signed on behalf of the United States on December 11, 1948, (Ex. O, 81st Cong., 1st sess.).
4221 Dirksen Building

Governmental Affairs
Federal Expenditures, Research, and Rules Subcommittee
To hold hearings on proposed legislation providing for a uniform Federal procurement system.
3302 Dirksen Building

DECEMBER 4

9:30 a.m.
*Banking, Housing, and Urban Affairs
To hold hearings on the use of Defense Production Act authorities to stimulate domestic production of titanium.
5302 Dirksen Building

Finance
Savings, Pensions, and Investment Policy Subcommittee
To hold hearings on S. 829, increasing annuities payable to survivors of Tax Court judges in accordance with certain salary increases, S. 1607, providing a minimum interest and dividend exclusion for each individual, and S. 1645, permitting funds in an individual retirement account to be invested in collectibles.
2221 Dirksen Building

Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on Federal regulatory enforcement policy.
3302 Dirksen Building

DECEMBER 8

9:00 a.m.
Governmental Affairs
To hold hearings on debt collection procedures in the health professions student loan program, focusing on high delinquency rates.
5110 Dirksen Building

9:30 a.m.
Environment and Public Works

SENATE—*Tuesday, November 24, 1981*

(Legislative day of Monday, November 2, 1981)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Father in Heaven, crisis is not new to us as a people, our Republic was born out of crisis. And our leadership has never failed at such times to call upon Thee for aid. Three times in its first 3 years, the Continental Congress called for days of fasting and prayer. On the first day of the First Congress, when a diversity of religions questioned its wisdom, they decided unanimously that prayer was necessary. When they were hopelessly divided as 13 Colonies with wide and deep differences, they prayed.

At the turning point of the Revolution, the Congress said, "Forasmuch as it is the indispensable duty of all men to adore the superintending providence of Almighty God; to acknowledge with gratitude their obligation to Him . . . it is therefore recommended to set apart Thursday . . . for solemn thanksgiving and praise, that with one heart and one voice the good people may express the grateful feelings of their hearts and consecrate themselves to the service of their divine benefactor. . .

In this Thanksgiving week and at this time of need, gracious Heavenly Father, we thank Thee for Thy bountiful providence through the years and we ask for special divine intervention in our national affairs, in our families and among the citizens, in Jesus' name. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. Under the standing order, the acting majority leader is recognized.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the Senate proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask that the leader's time remaining on our side be reserved until after the two special orders.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. Under the standing order, the minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I have no need for my time. I yield it back.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ANDREWS). Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, the distinguished minority leader wishes to make a prolonged statement. I ask that following the special order that is on the calendar for the distinguished Senator from Missouri, that the Senator from West Virginia, the distinguished minority leader, be recognized, and that the time for routine morning business as already entered commence when the Senator from West Virginia has completed his statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR DANFORTH

The PRESIDING OFFICER. The Senator from Missouri (Mr. DANFORTH) is recognized.

S. 1887—AN ARGUMENT FOR PASSIVE RESTRAINTS

Mr. DANFORTH. Mr. President, 1 month ago, the National Highway Traffic Safety Administration (NHTSA) rescinded Federal Motor Vehicle Safety Standard 28. This standard, which required the installation of automatic safety belts or airbags in automobiles, would have saved lives and prevented serious injuries on the Nation's highways. I opposed rescission of the rule and, after the rescission was announced, I introduced legislation to reverse the decision.

It quickly appeared that, absent the support of the administration, the legislation had little chance of being signed into law. Therefore, today, I am introducing different legislation employing a new concept for encouraging the use of airbags in the American automobile fleet. The bill I am introducing today uses the Internal Revenue Code in two ways.

First, it allows manufacturers to claim a refundable tax credit to pay for the installation of airbags in 1984 and on later model year automobiles.

Second, it levies an excise tax on sales of new automobiles which do not employ this lifesaving technology.

In offering this legislation, I am endeavoring to meet the two major objections which were offered to Safety Standard 208. Those objections were, first, that the economic cost of passive restraints would have been imposed unfairly on the already hard-pressed auto industry, and, second, that consumers, denied the option of cars without passive restraints, would resist buying new cars.

The legislation I am introducing today will reallocate the costs of converting to safer cars to the Federal Government, which, in strictly economic terms, should bear these costs. Government would ultimately realize a net savings of over a billion dollars a year because of the use of airbags.

Accidents, in addition to killing people, cost money. According to NHTSA, the Federal Government absorbs over $6 billion of these costs every year, through social security, medicare, medicaid, aid to families with dependent children, disability insurance, and lost corporate and personal income taxes.

However, if the Nation's automobiles were equipped with airbags, NHTSA says the Government could have nearly $3.8 billion of these outlays every year. Even if all 1984 model-year cars were made with airbags, my proposal would cost the Government about $2.6 billion, thus creating a net savings of over a billion per year once airbags became commonplace on the Nation's streets.

The savings may even be greater than we think. Partly because of the increasing use of small, light, fuel-efficient cars NHTSA estimates that fatalities may increase from the current 53,000 per year to 70,000 per year by the end of the decade. This grim projection makes it even clearer that the Government stands to benefit economically from installation of air bags.

The provisions of this legislation will shift the consumer cost differential in favor of the car with the improved safety design.

In addition, there will be insurance incentives favoring the airbag automobiles. I am writing to the heads of the Nation's major insurance companies to ask their commitment to pass the savings which they would achieve through

the use of airbags on to policyholders Some companies already offer sizable discounts to the owners of the few airbag cars on the road today.

NHTSA, in evaluating Standard 208 pointed out that companies providing auto, health, and life insurance set their rates according to loss experience, and, once airbags are widely used on American streets, could reduce premiums by as much as $40 per car per year for automobile insurance and $30 per person per year for life insurance.

Mr. President, the proposal I am advancing today is novel. Nothing like it has yet been considered by Congress. It would help make affordable safe automobiles available to the American people. It would help to make insurance affordable for all Americans, and it would help to reduce Federal expenditures for medical and other expenses by making them unnecessary.

I hope the administration, as well as my colleagues on the Finance Committee and elsewhere in Congress, will join me in moving forward with this legislation. Senator PACKWOOD, who chairs the Finance Subcommittee on Taxation and Debt Management, has assured me that this proposal will be the subject of hearings in the subcommittee before January 29.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1887

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That part I of subchapter A of chapter 32 of the Internal Revenue Code of 1954 (relating to motor vehicle excise taxes) is amended by adding at the end thereof the following new section:

"SEC. 4065. FAILURE TO INSTALL AIRBAGS.

"(a) IMPOSITION OF TAX.—There is hereby imposed on the sale by the manufacturer of each 1984 or later model year passenger automobile with respect to which a qualified automatic safety airbag has not been installed a tax of $300.

"(b) DEFINITIONS.—For purposes of this section—

"(1) QUALIFIED AUTOMATIC SAFETY AIRBAG.—The term 'qualified automatic safety airbag' means an automatic safety airbag which meets the requirements of section 126 of the National Traffic and Motor Vehicle Safety Act of 1966.

"(2) PASSENGER AUTOMOBILE.—The term 'passenger automobile' has the meaning given such term by section 501(2) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2001(2)).

"(3) MODEL YEAR AND MANUFACTURER.—The terms 'model year' and 'manufacturer' have the meanings given such terms by paragraphs (4) and (5), respectively, of section 4064(b).".

(b)(1) Subsection (d) of section 1016 of such Code (relating to reduction in basis of automobile on which gas guzzler tax was imposed) is amended—

(A) by inserting "or 4065" after "4064" each place it appears, and

(B) by inserting "or Airbag Tax" after "Gas Guzzler Tax" in the heading thereof.

(2) The last sentence of subsection (a) of section 4221 of such Code (relating to certain tax-free sales) is amended by inserting "or 4065" after "4064."

(3) Section 4293 of such Code (relating to exemption for United States and possessions) is amended by inserting ", 4065," after "4064".

(4) The last sentence of paragraph (2) of section 6416(b) of such Code (relating to tax payments considered overpayments in the case of specified uses and resales) is amended by inserting "or 4065" after "4064".

(5) Subsection (e) of section 4217 of such Code (relating to leases) is amended—

(A) by inserting "or 4065" after "4064" each place it appears in paragraphs (1) and (2) thereof,

(B) by inserting "or total airbag tax" after "total gas guzzler tax" each place it appears in paragraph (2), and

(C) TOTAL AIRBAG TAX.—The term "total airbag tax" means the tax imposed by section 4065.

(6) The table of sections for part I of subchapter A of Chapter 32 of such Code is amended by adding at the end thereof the following new item:

"SEC. 4065. Failure to install airbags.".

(c) The amendments made by this section shall apply with respect to 1984 and later model year automobiles (as defined in section 4065(b) of the Internal Revenue Code of 1954).

SEC. 2. (a) Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting immediately before section 45 the following new section:

"SEC. 44H. CREDIT TO AUTOMOBILE MANUFACTURERS FOR INSTALLATION OF AIRBAGS

"(a) CREDIT ALLOWED.—In the case of a manufacturer of 1984 model year or later passenger automobiles, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the product of—

"(1) $300, multiplied by

"(2) the number of such passenger automobiles which—

"(A) are manufactured in the United States by such manufacturer, and

"(B) with respect to which such manufacturer has installed an automatic safety airbag which meets the requirements of section 126 of the National Traffic and Motor Vehicle Safety Act of 1966.

"(b) DEFINITIONS.—

"(1) IN GENERAL.—For purposes of this section, the terms 'passenger automobile' and 'manufacturer' have the meanings given such terms by paragraphs (2) and (8), respectively, of section 501 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2001).

"(2) MODEL YEAR.—The term 'model year' has the meaning given such term by section 4064(b)(4).".

(b)(1) Subsection (b) of section 6401 of such Code (relating to amounts treated as overpayments) is amended—

(A) by striking out "and 43 (relating to earned income credit)," and inserting in lieu thereof "43 (relating to earned income credit), and 44H (relating to installation of automatic safety airbags)", and

(B) by striking out "and 43" and inserting in lieu thereof ", 43, and 44H".

(2) Sections 44C(b)(5), 44D(b)(5), 44E(e)(1), and 55(b)(2) of such Code are each amended by striking out "and 43" and inserting in lieu thereof "43, and 44H".

(3) Section 56(c) of such Code is amended by striking out "and 44G" and inserting in lieu thereof "44G, and 44H".

(4) Paragraph (4) of section 6201(a) of such Code (relating to assessment authority) is amended—

(A) by striking out "or section 43 (relating to earned income)," and inserting in lieu thereof "section 43 (relating to earned income), or section 44H (relating to installation of automatic safety airbags),", and

(b) by striking out "under section 39 or 43" in the heading thereof.

(c) The table of sections for subpart A of part IV of subchapter A of Chapter 1 is amended by inserting before the item relating to section 45 the following item:

"Sec. 44H. Credit to automobile manufacturers for installation of airbags."

(d) The amendments made by this section shall apply to airbags installed in 1984 or later model cars in taxable years in which such airbags were installed.

Mr. DANFORTH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, I ask unanimous consent that the order entered to recognize the distinguished minority leader be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, we now have the subject of the special order for the distinguished Senator from Kentucky. Does he wish to have that reserved for later in the day?

Mr. ROBERT C. BYRD. Yes, Mr. President, I would appreciate it if the distinguished acting Republican leader could reserve that order for Mr. FORD until later.

Mr. STEVENS. Mr. President, I ask unanimous consent that the special order entered for the distinguished Senator from Kentucky take place after the period for routine morning business.

How long will routine morning business be?

The PRESIDING OFFICER. Twenty minutes.

Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that there now be a period for routine morning business, not to extend beyond 12 noon, and that Senators may speak therein without limitation of time.

79-059 O-85-15 (Pt. 22)

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 12:15 P.M. TODAY

Mr. STEVENS. Mr. President, the distinguished Senator from Georgia (Mr. MATTINGLY) is to be recognized during the period for routine morning business. The distinguished Senator from Connecticut wishes to make a statement following that. After the statement by the distinguished Senator from Connecticut, if no other Senator wishes to speak during the period for routine morning business, I ask unanimous consent that the Chair recess the Senate until 12:15 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. The Senator is referring to the Senator from Connecticut (Mr. DODD); is that correct?

Mr. STEVENS. Mr. DODD, yes.

I understand there may be other Senators who will seek recognition during the period for routine morning business and it is the desire of the leadership to put the Senate into recess following the statements made during routine morning business.

The PRESIDING OFFICER. Following the last continuous appearance, as the Chair understands it?

Mr. STEVENS. That is correct.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Georgia is recognized.

Mr. MATTINGLY. Thank you, Mr. President.

WELCOME HOME, BEAR

Mr. MATTINGLY. Mr. President, yesterday I, as did millions of other Americans, saw the "Bear"—Jim Brady—come home. I stood watching this man of grace and wit demonstrate for all of us the indomitability of the human spirit. I recall the words of John F. Kennedy when he said:

To be courageous requires no exceptional quality, no magic formula, no special combination of time, place and circumstance. It is an opportunity that sooner or later is presented to us all.

Mr. President, certainly Jim Brady has demonstrated that type of courage, and more. Defying all odds and in a manner and time no man would have chosen, the Bear showed us the true greatness of the human spirit. He has, in this season of thanksgiving, reminded this Senator and, I am sure, others of our countless blessings as individuals and as a nation.

So today, Mr. President, I join with others in saying welcome home Bear, you have been missed, your courage has enriched our spirits, and your grace and wit has lifted our hearts. God bless you, Jim.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HAYAKAWA). Without objection, it is so ordered.

CAN HOUSE COPYRIGHT TV?

Mr. FORD. Mr. President, since the issue of televising the proceedings of the Senate remains unresolved before us, I ask unanimous consent to insert in the RECORD an article from the November 19 issue of Roll Call which deals with a problem the House is having in making access to its broadcast signals equally available to all users.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CAN HOUSE COPYRIGHT TV?

(By Rich Burkhardt)

A controversy over whether the cable television network that broadcasts the House proceedings daily should be forced to sell their signal to anybody who asks for it could eventually wind up with the House copyrighting the broadcasts.

On the one side is Rep. Charles Rose (D-NC), chairman of the House Broadcasting System (HBS), who says that there have been complaints that the Cable-Satellite Public Affairs Network (C-SPAN) has denied access to the system to stations who are not cable subscribers.

The opposing viewpoint is taken by C-SPAN President Brian Lamb, who believes that their position has largely been misunderstood and that a mountain is being made out of a molehill.

Joan Teague, staff director of HBS, said that there have been at least eight to ten letters over the past year from organizations that say C-SPAN has refused to sell them their signal because they are not affiliated with cable systems. It is these letters, she said, that prompted Rose to consider copyrighting the signal.

Should that eventually be done, she said, C-SPAN would still be able to disseminate their signal to cable systems nationwide, but they would also be forced to supply non-cable customers who request the service at a reasonable rate.

Although the copyrighting of the signal could eventually mean that Congress could add restrictions on who could carry the broadcasts under what conditions, it is intended to have exactly the opposite effect, according to Rose.

"If we were to copyright the signal, it would not be for the purpose of limiting its use," he said. "It would be for purposes of widening access to it."

"I'm not absolutely wedded to the idea of copyrighting the House TV signal," he said. "But I am absolutely wedded to the idea that the signal belongs to the taxpayers and I don't want anyone carrying that signal to assert a property right to it."

Lamb contends, however, that C-SPAN is not trying to claim any property right over the actual floor signal, but that they are only trying to sell their service. He also points out that C-SPAN does not have the power to deny anybody access to the House signal.

"They (the House) are trying to control how we operate our network," Lamb said. "Anyone can pick up the same signal at no cost directly from the House. Once we get it and mix it with our programming, it belongs to us."

Lamb also believes that if it wasn't for the cable television industry's willingness to absorb the costs of broadcasting the House proceedings, they wouldn't be on the air today in any form.

"Back in 1967 when they first said they were going to televise, there was not one group who wanted to take gavel to gavel coverage," he said. "It would not have happened if the cable industry hadn't come in to do it, and we went through a long period when nobody wanted to watch it, then slowly it began to pick up.

"It's been done in a nonprofit way; nobody's been out to make a buck off of it," he continued.

Lamb also points out that throughout the first years of its existence, C-SPAN has done exactly what they originally told the House that they would.

"We said that we would pick up the signal, move it to the satellite, and provide it to cable systems, and we have fulfilled that promise," he said.

One station that tried to obtain the C-SPAN signal unsuccessfully was WNVT-TV, an educational channel located on the campus of Northern Virginia Community College in Annandale that transmits throughout the metropolitan Washington area on channels 53 and 14. Since the District of Columbia doesn't have cable TV at present and therefore couldn't get the House broadcasts, WNVT wanted to take the C-SPAN signal and broadcast it to D.C.

Dan Ward, Vice President and General Manager of WNVT, said that after they had cleared the broadcasts with the House, they had requested C-SPAN to supply them with a signal, but C-SPAN refused.

"They said that they were doing this for cable systems only, that it wasn't available for open-system broadcast," Ward said.

Had they been able to pick up the C-SPAN signal, it would have been ideal for their purposes, Ward said.

"The C-SPAN uplink was about 3 miles from us, and they were already bringing it into northern Virginia anyway," he said. "We already have a satellite receiver, and all we would have had to do was turn it in their direction."

However, C-SPAN's refusal to send WNVT the signal did not stop them from broadcasting the House live; it merely delayed things for a while. They held their first live broadcasts of the House last Thursday and Friday, taking the feed directly from the House.

Present plans for WNVT are to broadcast any live proceedings that occur after 3 PM daily, when they conclude their regular programming day. The complete day's proceedings will be broadcast on tape-delay later that night, and once a new tower is completed which will enable them to add another channel, the broadcasts will go out live daily on the new channel.

Lamb admits that C-SPAN would not sell the signal to WNVT when they made their request about six months ago, but said that "at the time, we had a policy not to sell to non-cable entities," a policy which has since changed.

Furthermore, Lamb says, their policy of not selling the signal to WNVT did not stop the station from obtaining the House broadcasts; it just meant that they had to make their own arrangements for broadcasting of the signal.

Since the time they changed their policy in August of this year, Lamb said, there has not been a great demand on them for the signal from non-cable outlets; he estimates they currently have "a half-dozen to a dozen" non-cable customers.

"There is not a groundswell of interest in this country to provide the House signal," he said. "All this furor is based on a couple of companies who wrote their Congressmen and said they should have it because it is in the public domain. But we're not preventing them from getting it, if they want to come in and take it from the House, that's fine."

One evidence that the C-SPAN policy has changed in recent months is the fact that George Mason University's TV system will begin carrying live coverage of the House Dec. 1, using the C-SPAN signal, even though they are not a cable company.

Mike Kelly, who heads the George Mason program, said that they will have a separate channel available for the Senate if they eventually decide to televise their session, and that they will carry other C-SPAN programming when Congress is not in session.

The George Mason system will be available within a 35-mile radius of Washington for office buildings only at the start. Although it will be regular over the air broadcasting, it will operate at a higher frequency than regular broadcasts, which means that a converter similar to that used in the Home Box Office system will be needed to unscramble the signal.

When C-SPAN does not have programming on the air, the George Mason system will either broadcast university programming or air a UPI and stock market "crawl," so it will be operational 24 hours a day.

What will the cost for all this be? "Less than $500 a year," Kelly said.

TWO-YEAR BUDGET CYCLE WOULD REMOVE DELAYS AND CHAOS IN BUDGET PROCESS

Mr. FORD. Mr. President, yesterday I briefly observed that our current difficulties with the vetoed continuing resolution were largely attributable to our 1-year appropriation cycle and only the most recent example of the need for changing to a biennial system. Today I would like to talk in a little more detail about why I believe we must go to a 2-year budget and appropriation cycle.

In the past, when our country was smaller and our problems were fewer and simpler, it was possible and we succeeded in making all the necessary budget decisions in both the executive and legislative branches of Government on an annual basis. For some time now that has not been possible, and we have had to live with hastily considered annual appropriation bills, and all too often, continuing resolutions with virtually no time for careful and thoughtful consideration.

By budgeting and appropriating for only 12 months at a time we have so compressed the available period for dealing with the thousands of complex issues that now arise in Federal budgets that it is simply impossible to make fully enlightened decisions. In his veto message yesterday the President revealed how this problem afflicts the executive branch. He said:

When reports came to us in September that spending and the deficit for Fiscal Year 1982 were rising, we took action to stem the tide. On September 24, I asked for a reduction of 12 percent in the appropriations for nearly all nondefense discretionary programs and a modest reduction in our planned program to strengthen the national defense.

Imagine, 6 days before the 1982 fiscal year was to begin the President sent this kind of message to Congress. I would say that the resolution he received and vetoed was better than he had any right to expect under these circumstances.

While avoiding the consequences of rush continuing resolutions, and realistically enlarging the time for consideration of regular budget resolutions and appropriations bills are alone compelling justifications for changing to a 2-year budget cycle, there are other equally worth reasons to make this change.

The uncertainties which confront the State and local government officials each year can be mitigated substantially, if not totally eliminated. Today as in most of our recent years it has been impossible for State and local governments to know what part Federal funds would play in their spending plans until long after the fiscal year has begun. And to make matters worse, there are 22 States which have already gone to 2-year budgeting, and articulating their planning to a 1-year Federal budget cycle is even more complicated.

Second, if the Federal Government goes to a 2-year budget, not only will there be more time for good analysis and decisionmaking on the important spending issues, with predictably better results, there will also be more time for the authorizing committees of Congress and the executive agencies to conduct meaningful and constructive oversight of ongoing programs. And, the time available for consideration of new policies and programs will lengthen, with again predictably good results.

Taking the frenetic haste out of the budget process will not only make for better spending decisions, but the longer budget cycle should clearly bring some stability and discipline to our economy and contribute to achieving the goals of balanced budgets and reduced inflation. Just changing from 1 to 2 years the period of expectation of budget adjustments to inflation and other factors affecting the economy will alone dampen the rate of increase in prices, and the concomitant need for increases in wages. Indexing a 2-year cycle has got to be less inflationary than adjusting at the end of each year.

The 2-year budget idea is attracting more and more supporters. I believe its time has come.

In the House of Representatives, Congressman PANETTA and 35 of his colleagues have sponsored H.R. 1010, a bill similar to S. 1683. The General Accounting Office has commented favorably on the biennial budget proposal. Numerous individual budget experts favor early action to bring about this change.

Mr. President, on September 30, the last day of fiscal 1981, several of our colleagues and I introduced S. 1683, the Budget and Oversight Improvement Amendments of 1981. One of the principal features of this legislation is to change the budget cycle of the U.S. Government from a 1- to a 2-year cycle.

I said at that time that our action was prompted by the recent experience with budget and appropriations bills in Congress, particularly the familiar delay in enacting general appropriations bills and by a growing conviction that an annual budget cycle is no longer suitable to the needs of the Federal Government.

On that day not one of the 13 general appropriations bills for the fiscal year beginning the next day had passed, and the Congress was 2 weeks late in agreeing to the required second concurrent resolution on the budget for fiscal year 1982. That was 8 weeks ago.

Today is November 24, and still not one of the 13 regular appropriations bills for fiscal year 1982 has been enacted, and the required second concurrent resolution on the budget, which should have been agreed to 10 weeks ago, has not even been reported out of committee. And look at the situation yesterday. The entire Government nearly came to a halt, because the continuing resolution to provide the funds necessary to keep the Government operating fell apart because there was not adequate time to come up with a package representing substantial agreement before the clock ran out.

Mr. President, a schedule that cannot be followed any better than that is simply not a schedule at all.

It is certainly not for lack of effort that the appropriations bills and the second resolution have not been passed. It is certainly not for lack of interest. Indeed, the interest and the effort are so intense and so all consuming that hardly anything else has been done either.

Mr. President, the simple fact is that a 1-year cycle prohibits full debate on the budget and consideration of major policy issues. Instead we have resolved ourselves to pro forma reviews of most of the budget. There is not sufficient time. No sooner do we finish the job than we have to begin again, and repeat everything for the next fiscal year. Such repetition is not only wasteful, it is counterproductive. It is frenetic activity solely for the sake of activity.

And to what purpose do we continue this frenzy? Do we think that the spectacle of furious action and the excitement of round-the-clock sessions are satisfactory substitutes for insuring the orderly operation of the Government of this great republic?

Mr. President, it has taken us a long time to recognize the need for a 2-year budget. The annual appropriations process was not working well before 1974, and the passage of the Congressional Budget Act in that year only made matters worse. Listen to the words of Dr. Alice

Rivlin, Director of the Congressional Budget Office, in a recent article in the March–April 1981 issue of Challenge:

In particular, the annual budget cycle is a pernicious one. For most activities of government, annual review is too frequent.

And later in the same article, she says:

An obvious first step toward reducing the frequency of decisions on government programs would be 2-year appropriations for almost everything. This would allow the Congress to use the first year of each 2-year session for oversight and the second to enact a 2-year appropriation.

She notes that annual review of all spending is wasteful and impedes consideration of major issues and that a better approach would "involve fewer, less frequent appropriations, a multiyear planning cycle, but with room for short-run flexibility in a few programs."

In her testimony before the Senate Committee on Governmental Affairs on October 29 of this year, she again stated her support for a biennial budget, saying:

The procedures of the budget process today force Members of Congress to make so many budgetary decisions each year that they cannot possibly take time to make them in light of thorough review and informed debate. The process could be dramatically improved by drastically reducing the numbers and frequency of budget decisions that must be made each year.

Currently, for many programs, the Congress must each year debate and pass an authorization bill, set an appropriation level in an appropriations bill, and make provisions for the activity in the concurrent budget resolutions. In addition, this year and last, the Congress may also have had to make decisions about the program or activity as part of the reconciliation process. The results of these multiple, annual actions are a crowded Congressional calendar and delays in the passage of key budgetary legislation. Authorizations are not enacted before appropriations bill must be brought up; the appropriations bills do not get enacted before the start of the fiscal year; and indeed, the Congress barely finishes the budget for one fiscal year before it is forced to begin consideration of the budget for the next year.

It is not clear that a thorough annual review of all federal programs would be desirable even if it were possible. It is hard to think of examples of activities that really need thorough reexamination and redirection each year. Too frequent changes can be counterproductive. Transfer payments need to be predictable, so that peoples' lives are not disrupted. Military capability suffers if signals change too often. Procurement costs can go up, not down, if production lines are alternately speeded up, slowed down, or even halted pending Congressional action. In grant programs, frequent changes and uncertainty are costly and disruptive to recipients, primarily state and local governments. Indeed, almost all programs would work better if authorizations and appropriations were enacted for several years at a time. About the only exceptions are disaster assistance, military contingencies, or countercyclical programs where triggering mechanisms are not appropriate.

One alternative to the overcrowded calendar of the annual process would be to move to a biennial budget. I have long believed that authorizations for federal activities should be for a minimum of two, and preferably three or more years. In addition, appropriations for most federal activities could also be placed on a cycle of at least two years' length. Furthermore, there are no technical obstacles to setting spending ceilings and revenue floors for a two-year period in a budget resolution.

One can imagine a dramatically different Congressional calendar under these changes. In the first session of any term, the Congress could adopt a budget resolution, authorizations, and appropriations for two fiscal years. During the second session Congressional committees would be free to conduct oversight of authorizations and supplementals, or revisions to authorizations or budget resolutions as necessary. The next Congress, considering reauthorizations and appropriations during its first session would be then be able to take advantage of the groundwork done by the previous Congress. It would be free, of course, to revise the budget handed on to it by the previous Congress.

Mr. President, S. 1683 would bring this into effect. Let me outline some of the changes S. 1683 would make. First and most important, it would convert the budget cycle from 1 to 2 years. The first concurrent resolution on the budget would be considered and agreed to in the first session of a Congress, as would authorization bills. Committees' reports of their allocations of the resolution totals would be due October 1. These would be the last budget related events of the first session and would provide the general framework and benchmarks for the actions in the second session on spending bills.

In the second session, the focus would be on spending bills and on the second resolution and reconciliation. The 2-year cycle permits adequate time to be provided for each of the steps. For example, S. 1683 provides 8 weeks for committees to comply with reconciliation instructions and for a reconciliation bill or resolution to be agreed to, instead of the 10 days provided by the current process.

S. 1683 provided 2 months for committees to prepare their reports of their allocations under the first resolution. This is related to another provision of the bill requiring such reports to contain budget account detail so they can be the occasions for serious committee consideration of budget priorities and can be reliable benchmarks for determining if spending bills are within the budget targets.

The timing of the economic reports from the Congressional Budget Office, of views and estimates, and of the first resolution are such that all committees can benefit from the CBO estimates and so that the Budget Committees can have time to consider the views and estimates reports in their work on the first resolution. The constraints of a 1-year period are such that it was not and is not possible to make that a reality in the present budget cycle. S. 1683 makes other changes to improve the budget process, and I urge my colleagues to study it carefully.

I urge my colleagues to join me and Senators BUMPERS, PELL, and DANFORTH as cosponsors of S. 1683, and I urge the committees to which it has been referred to give it full and careful attention at their earliest opportunity.

I ask unanimous consent that there be inserted in the RECORD immediately following my remarks the table on the back of today's Senate Calendar setting forth the status of the appropriations bills and an editorial from the Lexington Leader, dated October 8, 1981, entitled "Two-year budgeting system worth serious consideration."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[1] Senate amendment 4 in disagreement amended.

TWO-YEAR BUDGETING SYSTEM WORTH SERIOUS CONSIDERATION

If Americans are confused and frustrated at budget time in Washington, think what it is like for lawmakers and officials who must put together the complicated and often-hated document known as the federal budget.

Consider the hundreds of hours spent in the legislative and executive branches making line-item decisions and trying to justify them.

Consider also that no sooner is the task completed than it is almost time to start working on next year's budget.

So prolonged is the annual agony that one lawmaker, U.S. Sen. Wendell Ford, Kentucky Democrat, wants to do something about it.

Sen. Ford has proposed legislation that would establish a two-year budget process. Ford would be the first to admit that his bill is not an innovative approach. Kentucky and at least 20 other states operated on a two-year fiscal cycle.

Innovation is not the aim, efficiency is the purpose of Ford's move, and we think the idea deserves some serious consideration in the nation's capital.

The need for changing the budget process is obvious. For example, as the government was set to begin a new fiscal year, Congress had not finished legislative action on any of 13 separate appropriations. In reality, that forces the government into a day-by-day operation under the traditional continuing resolution.

We agree with Sen. Ford that such a makeshift system is a sad commentary on the budgeting process.

This year's failure to meet deadlines was no exception, only once in the past five years have all 13 appropriations bills been completed at the start of the fiscal year. Also in the past five years, Ford explains, deadlines for the first and second budget resolutions have been met only twice out of 10 reporting dates.

That adds up to the inescapable and almost embarrassing conclusion that Congress is not performing its budgeting job satisfactorily.

In addition to bringing about needed efficiency in the budget process, a two-year system might be a road to stricter spending discipline and financial accountability. There might be a domino effect on the national economy if a modicum of stability in federal fiscal policy could be achieved.

Sen. Ford also makes a pertinent point when he says the two-year operation would allow government agencies to plan more efficiently for implementation of programs.

The Kentucky lawmaker is not alone in his boost for a new system. He cites the present director of the budget, David Stockman, as a possible cohort, Stockman co-sponsored similar legislation when he was in Congress. In addition, Dr. Alice Rivlin, director of the Congressional Budget Office, and the General Accounting Office, back the two-year idea.

Given the grand mess which the budget period brings to federal government, and the confusion in the minds of lawmakers and taxpayers, a two-year system might answer many of the problems. Certainly it deserves a chance.

Mr. FORD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE COMMANDER IN CHIEF DEFEATS HIS OWN TROOPS

Mr. PROXMIRE. Mr. President, somehow this great American press of ours—and it is a great, free, highly competent press—missed one of the most ironic and interesting stories of the year. President Reagan marched into battle in the last few days and won a smashing victory. He slapped down a continuing resolution of the Congress and really—as the press reported—played hard ball in doing so. He won, but over whom?

Consider that the President's foe was the continuing resolution we had passed continuing spending until July 15, 1982, at a level the President considered excessive. In the House it is true that the Democratic leadership and the House Democrats voted and worked for the resolution. It is also true that in the House the Republican leadership and the Republican Members voted and worked against the resolution. So the resolution passed the House in the face of a clear announcement from the White House that the President strongly opposed the legislation and intended to veto it.

Now what happened in the Republican Senate? In view of the President's emphatic opposition to the resolution and his announced determination to veto it. Why did not the Republican Senate kill it? At this point, Mr. President, we had one of the most conspicuous man-bites-dog developments on a matter of great national import in recent years. Yes, indeed, the Republican leadership could have killed the resolution in the Senate. But what did they do?

It was astounding, Mr. President. The Republican majority leader spoke and voted for the resolution the President so strongly opposed. His assistant spoke and voted for the resolution. The Republican manager of the resolution, the chairman of the Appropriations Committee, who had led the Senate conferees, voted and spoke for the resolution the President so emphatically opposed. On the other hand, the Democratic leader, Senator BYRD, supported the President and opposed the resolution, so did the assistant leader, so did I as the Democratic floor manager.

In one of the strangest and most contradictory debates in this body in a long time, Republican Senator after Republican Senator would get up to speak in vehement denunciation of the resolution and then without finding a single good word to say for the resolution announce he intended to vote for it. For it, Mr. President. And then came the vote. Of the 53 Republicans, my tally shows that 3 Republicans did not vote, 3 voted in support of the President and against the resolution, and 47 voted for the resolution and against the President. And this came from a party in the Senate that has given the President more consistent support than any President previously has enjoyed from his party in this body in a long, long time. On the other hand, Democrats voted against the resolution and for the President overwhelmingly. Of 46 Senate Democrats, 12 were absent, 1 opposed the President and voted for the resolution, and 33 supported the President and voted against the resolution.

So the President not only lost in the Republican Senate, but he lost entirely because Republican Senators voted against him. And this was a deliberate calculated, hard-fought achievement. A number of Republican Senators first voted to support the President and opposed the resolution. At one point, 1 minute before the vote was tallied, it was losing by about 10 votes. Then the Republican leadership sent out the word and Republicans overwhelmingly switched. Result: The resolution the President opposed passed—owing entirely to support from the President's own loyal Senate Republicans.

How do we explain this remarkable story? Why did Republicans vote overwhelmingly to apparently defy their President and pass what he called a big spending, budget-busting resolution which he announced he intended to veto? Mr. President, only one explanation makes sense. The President wanted the resolution that he opposed passed. Can anyone who is old enough to recognize that there really is not a Santa Claus, that the tooth fairy does not really exist, honestly believe that the President actually wanted that resolution killed when it is clear that he passed the word—he must have passed the word—to his Senate supporters asking them to vote for the budget-busting resolution?

Pass it. Now think of the implications of this. The President opposed to the resolution, crusading in the country against it, but wanting it passed. Why? So he could close down part of the Government on Monday and issue a veto and require the Congress to conspicuously say "Uncle, raise the white flag and pass the resolution the President wanted passed."

Mr. President, this was strictly Hollywood. The press has hinted at this but they have never told the true and full story of this Senate vote. This is what reveals it. That story has not been told.

All of what happened on Monday was unnecessary. Suppose the President passed word on Sunday that he wanted the resolution killed in the Republican Senate. Does anyone really doubt that the Senate would have killed that resolution forthwith? We could have acted on the resolution before 5 p.m. on Sunday. The Speaker could have and would have sent another resolution to the Senate identical to the resolution we passed at about 5:15—24 hours later on Monday.

If the President had told his Senate Republicans to kill the resolution certainly they would have done exactly that on Sunday. We could have promptly passed the continuing resolution the President wanted. There would have been no closedown of the Government Monday. The taxpayers would have saved several million dollars. And the President would have secured a genuine victory—not a closedown the Government victory—not a victory over his own troops in the Senate. But he would have forced the Congress to kill the resolution he opposed. He would have won the victory without the expensive, unnecessary, show-business bath for the taxpayers that we have gone through.

Somehow the American press—the best press in the world—has missed one of the most obvious stories of the year. How the President's big battle of the week was fought against his own troops, and how he ordered them into defeat—so he could win a victory.

THE GENOCIDE TREATY, EXTRADITION, AND MAINTENANCE OF CONSTITUTION RIGHTS

Mr. PROXMIRE. Mr. President, according to a recent article in the New York Times, the United States and West Germany are considering a proposal to revise the extradition procedure for Americans accused of war crimes in West Germany. After studying the article, I am struck by the fact that American extradition treaties are carefully conceived and worded, and closely scrutinized so as to provide for maximum protection of the rights of American citizens.

Both the West German Federal Ministry of Justice, and our own Department of Justice have expressed interest in this new proposal. While simplifying the extradition process, the new proposal continues to stress that the accused is afforded full legal protection of his rights under the Constitution. Even under this new simpler version of the treaty, there remain extensive provisions for guaranteeing these critical rights of Americans.

Under the new proposal, before extradition occurs, American authorities must prove that all of the following have occurred:

First. That the West German Government has officially lodged charges against the accused;

Second. That support in the form of legally admissible evidence indeed exists; and

Third. That the proposed extradition conforms to all legal protections and procedures of existing extradition treaties.

While this new proposal offers the possibility of speedier trials for suspected war criminals, it reinforces a point which I and other supporters of the Genocide Treaty have emphasized time and time again. The Genocide Treaty would not allow random extraditions of American citizens for trial in foreign courts.

The simple fact is that there is no provision for extradition within the Genocide Convention. Ratification of the treaty would not affect existing extradition treaties to which the United States is a party. As the understanding accompanying the treaty states:

> Nothing in Article VI shall affect the right of any state to bring to trial before its own tribunals any of its nationals for acts committed outside the state.

Simply stated, any state may put on trial its own citizens for acts committed outside of that state. Separate extradition treaties provide for transfer of persons suspected of committing war crimes for trial elsewhere. The Department of Justice and the State Department use great care to assure both the legality and constitutionality of any extradition treaty to which the United States is a party. This is exemplified by the careful review now taking place concerning the West German Extradition Treaty regarding war criminals. Certainly, this concern would be even greater in the examination of any extradition treaty arising from the implementation of the Genocide Convention.

TO ESTABLISH THE U.S. ACADEMY OF PEACE

Mr. MATSUNAGA. Mr. President, I am today introducing, with Senators MARK O. HATFIELD and JENNINGS RANDOLPH as principal cosponsors, and Senators MARK ANDREWS, MAX BAUCUS, JOSEPH R. BIDEN, RUDY BOSCHWITZ, BILL BRADLEY, DALE BUMPERS, QUENTIN N. BURDICK, ROBERT C. BYRD, HOWARD W. CANNON, JOHN H. CHAFEE, THAD COCHRAN, ALAN CRANSTON, JOHN C. DANFORTH, DENNIS DECONCINI, DAVID DURENBERGER, THOMAS F. EAGLETON, J. JAMES EXON, WENDELL H. FORD, GARY HART, FOWELL HEFLIN, JOHN HEINZ, WALTER D. HUDDLESTON, DANIEL K. INOUYE, ROGER W. JEPSEN, J. BENNETT JOHNSTON, NANCY LANDON KASSEBAUM, EDWARD M. KENNEDY, PATRICK J. LEAHY, CARL LEVIN, RUSSELL B. LONG, CHARLES MCC. MATHIAS, JOHN MELCHER, HOWARD M. METZENBAUM, GEORGE J. MITCHELL, DANIEL PATRICK MOYNIHAN, FRANK H. MURKOWSKI, CLAIBORNE PELL, LARRY PRESSLER, DAVID PRYOR, DONALD W. RIEGLE, PAUL S. SARBANES, JIM SASSER, ALAN K. SIMPSON, ARLEN SPECTER, ROBERT T. STAFFORD, JOHN C. STENNIS, PAUL E. TSONGAS, LOWELL P. WEICKER, and HARRISON A. WILLIAMS as cosponsors—a total of 52 cosponsors—a bill which would implement the recommendations of the U.S. Commission on Proposals for the National Academy of Peace and Conflict Resolution and establish the U.S. Academy of Peace.

Mr. President, because of our Nation's heritage, power and prestige, whether we like it or not, we must acknowledge the fact that the United States is the major force for world peace. In truth, the American commitment to peace is as old as our republic itself. At the end of the American Revolution, when the founders of our Nation were drafting a new constitution, a "Plan for a Peace Office" was published in a popular almanac. The proposed Peace Office was envisioned as an integral component of the new government, and it was to have as its objective the education of Americans in the art and science of peace.

The original "Plan for a Peace Office" has been attributed both to Benjamin Rush, a prominent physician and signer of the Declaration of Independence, and to Benjamin Bannecker, a black mathematician who was the publisher of the almanac in which it first appeared. George Washington, himself, as our Nation's first President, proposed the establishment of a peace agency within the Federal Government.

In this century, the desire for an institution devoted to peace reappeared in 1935 when U.S. Senator Matthew M. Neely of West Virginia introduced legislation providing for the establishment of a Federal Department of Peace. The proposed Department closely resembled the Rush/Bannecker Peace Office.

A Bureau of Peace and Friendship, to be located in the U.S. Department of Labor, was also proposed in 1935 by U.S. Representative Fred Bierman of Iowa. The Bureau, to be headed by an eminent sociologist, was to carry out sociological research on matters pertaining to peace and war. Research was also the focus of two resolutions introduced in the House in 1945 and 1947 by then-Representative Everett M. Dirksen of Illinois. The Dirksen resolutions would have established a Division of Peace within the U.S. Department of State.

Research and education were the principal objectives of these early proposals, but, in later years, the concept of a Federal institution devoted to peace was expanded. In 1945, Senator Alexander Wiley of Wisconsin introduced legislation to create a small, high-level Department of Peace with the Secretary serving, among other things, as the U.S. Representative on the United Nations Security Council.

Mr. RANDOLPH. Will the Senator yield?

Mr. MATSUNAGA. I shall in a moment. This is a terrible time for the Senator to interrupt, because this is what I was going to say:

In that same year, then Representative JENNINGS RANDOLPH of West Virginia introduced a Department of Peace bill which incorporated for the first time the idea that the international exchange of people and ideas is an effective means of promoting peace. I am happy to report that that same JENNINGS RANDOLPH, now a U.S. Senator from West Virginia, remains strongly committed to this idea and is a principal cosponsor of the bill I am introducing today. The Randolph concept is an integral part of our bill.

Mr. President, now I am happy to yield to the Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I appreciate that the able Senator from Hawaii yields to me for this comment.

Mr. President, I commend the effective statement of the able Senator from Hawaii (Mr. MATSUNAGA) as he discusses something that in a sense is new, but it is also in a sense something that has been before Congress in one form or another since June 1945.

The Senator has mentioned Senator Wiley and that the introduction of his measure in the Senate was the same month that I had the introduction of a somewhat similar measure in June 1945. The Senator's reference to him is historically correct and I add that these were the words of Senator Wiley at the time that he introduced the measure in that year. The Senator from Wisconsin, speaking in this Chamber, said:

I would like to see this great Nation be the first on Earth to establish a Department of Peace. And I would like to see the world peace capital on free American soil, not at Geneva, Vienna or the scene of past failures, hates, fears and intrigues.

I think, Mr. President, that Senator MATSUNAGA has given us, at this time, a fresh look, a new dimension, at the problems of world peace because they now are centered in a world where what happens that might be negative from the standpoint of conflict or war touches every other part of the world in a matter of seconds—not weeks or months or even years.

Little did any of us realize, at the time of the introduction of the measures that have been thoughtfully mentioned by the Senator, the full and dreadful accuracy of our fears regarding an attitude of international unconcern toward the development of nuclear weapons.

Mr. President, I shall, at this time, not speak formally, but I wanted to touch upon the interest indicated by Senator MATSUNAGA in Senator Wiley at the time we introduced the Peace Department measure, the same month, in the House and the Senate.

I thank the Senator.

Mr. MATSUNAGA. I thank the Senator from West Virginia. He is a principal cosponsor of this measure, and has been, indeed, active in the area of peace.

Mr. President, congressional hearings were held on the measures introduced in 1945 and 1947, but in that era the real developments in the field of foreign affairs were the successful creation of the Marshall plan and the subsequent addition of a technical assistance program in 1949.

In 1955, President Dwight D. Eisenhower pointed with concern to the "unprecedented destructive power of the new weapons and the international tensions which powerful armaments aggravate." He appointed a Special Assistant to the President for Disarmament. That individual, Gov. Harold Stassen of Minnesota, was given Cabinet rank and was often referred to as the Secretary of Peace.

Also in 1955, Senator Mike Mansfield of Montana and Representative Charles Bennett of Florida proposed the creation of a Joint Congressional Committee for a Just and Lasting Peace, and Representative Harold Ostertag of New York introduced a bill which included the concept of a National Peace College which would carry out both education and training.

Between 1959 and 1961, the proposal which eventually became the Arms Control and Disarmament Agency took shape in Congress. Two of the most prominent sponsors of the 1960 bills were Senator Hubert Humphrey of Minnesota, who proposed a national peace academy, and Senator John F. Kennedy of Massachusetts, who proposed an arms control research institute.

In 1963, President Kennedy, speaking at the American University commencement exercises here in Washington, D.C., observed that "The pursuit of peace is not as dramatic as the pursuit of war, but we have no more urgent task." He spoke of peace as "the necessary rational end of rational men." He made it clear that he was not referring to some vague concept of universal good will, but to a practical and attainable peace, "based not on a sudden revolution in human nature, but on a gradual evolution in human institutions."

Since 1963, I have been a principal sponsor of legislation to establish a national institution dedicated to the pursuit of peace, and I, too, have found that peace is a most difficult concept to sell. In 1976, after my election to the Senate, I joined Senator RANDOLPH and Senator MARK HATFIELD of Oregon in introducing legislation to establish a Cabinet-level Department of Peace including, among other things, a National Academy of Peace. We decided that Congress and the American people were probably unaware of the long history of this proposal and its great potential, so we decided to pursue a strategy calling for a study of the various peace academy proposals. In 1978, Congress authorized a 1-year study as part of the Education Act amendments of that year, Public Law 95–561. A nine-member Study Commission, with three members selected by the President of the United States, three by the President pro tempore of the Senate, and three by the Speaker of the House of Representatives, was appointed in the latter part of 1979. I had the privilege of serving as Chairman of the Commission, other members of which included the following:

Vice Chairman: Dr. James H. Laue, Director of the Center for Metropolitan Studies at the University of Missouri, St. Louis, Missouri.

Honorable John Ashbrook (R-Ohio), Member of the U.S. House of Representatives.

Mr. Arthur Barnes, President of the New York Urban Coalition of New York, New York.

Dr. Elsie Boulding, Chairman of the Department of Sociology at Dartmouth College, Hanover, New Hampshire.

Dr. John Dellenback, President of the Christian College Consortium in Washington, D.C.

Mr. John P. Dunfey, President of Dunfey Hotels Corporation of Hampton, New Hampshire.

Honorable Dan Glickman (D-Kansas), Member of the U.S. House of Representatives.

Mr. William F. Lincoln, Director of the Center for Collaborative Planning and Community Services, situated in Watertown, Massachusetts.

The U.S. Commission on Proposals for the National Academy of Peace and Conflict Resolution was mandated by Congress to examine the various proposals for a national peace academy, to decide whether or not such an institution should be established, and to make recommendations with respect to its size, scope, and location. The Commission held 12 public hearings in as many American cities, from Boston to Honolulu, and the Commissioners reviewed the existing literature relating to conflict resolution and held many informal meetings with many varied individuals and organizations. Thousands of witnesses, both experts and plain citizens, testified or wrote to the Commission to express their views.

Upon the conclusion of these activities, the Commission decided that a focused Federal investment in peace education is necessary to stimulate broad Government, private, and voluntary participation in international peace endeavors. Furthermore, the Commission concluded that such an investment would help the United States achieve its twin goals of international peace and international security. The Commission found ample evidence that conflict resolution skills exist and are being utilized on the local, State and national levels, but they have never been fully recognized or effectively utilized by the U.S. Government.

What would the Academy of Peace look like? What would it do? How much would it cost? These were also questions which were raised and addressed during the Commission's study.

As envisioned by the Commission, the U.S. Academy of Peace would be a federally chartered, nonprofit corporation. Its core budget would come from congressional appropriations, but it would also solicit supplemental private funding. Its principal facilities would be located within the Washington, D.C. area, but it would provide outreach and extension programs to meet the needs of people throughout the country.

As interdisciplinary, educational institution, the Academy would provide graduate and postgraduate educational programs for which students at institutions of higher education could receive credit. It would conduct training, workshops and other continuing education services for public and private sector individuals and organizations, aimed at developing and strengthening their conflict resolution skills, and it would conduct research and disseminate information about its findings. The Academy would respond to the needs and concerns of Congress, the

executive branch, and individuals and organizations in private enterprise and voluntary associations.

A Center for International Peace would be established within the Academy to which leaders from this Nation and abroad would be appointed to study, and the Academy would establish the award of a Medal of Peace to be presented annually by the President of the United States.

The cost of such an Academy is modest indeed. The bill we are introducing today would authorize the establishment of a $15 million fund for the purchase of facilities for the U.S. Academy of Peace. In addition, funds in the amount of $6 million would be authorized for the Academy's operations during its first year. Our bill contains a $10 million authorization for the Academy's second-year operations, adding up to a total authorization of $31 million, which is less than one-tenth of the cost of a single B–1 bomber. It is a modest amount, indeed, when compared to the cost of repairing the ravages of war or maintaining constant readiness for war. Since the end of World War II, the United States has provided other nations with over $236 billion in military assistance, economic and technical aid, much of it to repair the damage of that war in Europe and the Pacific Basin.

Currently, Congress has under consideration a proposal to spend billions of dollars for an additional 100 B–1 bombers. The cost of a single B–1 is either $280 million, if you believe the Defense Department, or $400 million if you believe the Congressional Budget Office. If we struck an average between the two estimated costs, we would arrive at the figure of $340 million, enough to establish and operate 11 U.S. Academies of Peace for a 2-year period.

Of course, the Peace Academy would not eliminate our need for a strong national defense, but by learning to cope with international disputes without resort to violence, we would increase our national security and reduce our reliance on costly weapons. Establishment of the Peace Academy would enable us to declare without reservation that peace is indeed the rational end of rational Americans. It would establish the United States as the first industrialized country in the world to take positive action toward insuring world peace in the future by teaching future leaders of the world the art of peacemaking, the art of settling international conflicts without resort to violence.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1889

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "United States Academy of Peace Act".

DECLARATION OF FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds and declares that—

(1) a living institution embodying the heritage, ideals, and concerns of the American people for peace would be a significant response to the deep public need for the Nation to develop fully a range of effective options, in addition to armed capacity, that can leash international violence and manage international conflict;

(2) people throughout the world are fearful of nuclear war, are divided by war and threats of war, are experiencing social and cultural hostilities from rapid international change and real and perceived conflicts over interests, and are diverted from peace by the lack of problem-solving skills for dealing with such conflicts;

(3) many potentially destructive conflicts among nations and peoples have been resolved constructively and with cost efficiency at the international, national, and community levels through proper use of such technique as negotiation, conciliation, mediation, and arbitration;

(4) there is a national need to examine the disciplines in the social, behavioral, and physical sciences and the arts and humanities with regard to the history, nature, elements, and future of peace processes, and to bring together and develop new and tested techniques to promote peaceful economic, political, social, and cultural relations in the world;

(5) the peacemaking activities of Americans throughout government, private enterprise, and voluntary associations can be strengthened by a national institution devoted to international peace research, education and training, and information services;

(6) there is a need for Federal leadership to expand and support the existing international peace and conflict resolution efforts of the Nation and to develop new comprehensive peace education and training programs, basic and applied research projects, and programs providing peace information;

(7) the Commission on Proposals for the National Academy of Peace and Conflict Resolution, created by the Education Amendments of 1978, recommended establishing an academy as a highly desirable investment to further the Nation's interest in promoting international peace;

(8) an academy, strengthening and symbolizing the fruitful relation between the world of learning and the world of public affairs, would be the most efficient and immediate means for the Nation to enlarge its capacity to promote the peaceful resolution of international conflicts; and

(9) the establishment of an academy is an appropriate investment by the people of this Nation to advance the history, science, art, and practice of international peace and the resolution of conflicts among nations without the use of violence.

(b) It is the purpose of this Act to establish an independent, nonprofit, national institution to serve the people and the Government through the widest possible range of education and training, basic and applied research opportunities, and peace information on the means to promote international peace and the resolution of conflicts among the nations and peoples of the world without recourse to violence.

DEFINITIONS

SEC. 3. As used in this Act, the term—

(1) "Academy" means the United States Academy of Peace established under this Act;

(2) "Board" means the Board of Directors of the Academy; and

(3) "Center" means the Center for International Peace of the Academy.

ESTABLISHMENT

SEC. 4. (a) There is hereby established the United States Academy of Peace.

(b) The Academy is an independent nonprofit corporation and an organization as defined in section 170(c)(2)(B) of the Internal Revenue Code of 1954. The Academy does not have the power to issue any shares of stock or to declare or pay any dividends. No part of the financial resources, income, or assets of the Academy or of any legal entity established by the Academy may inure to the benefit of a director, officer, employee, or agent of the Academy, except as reasonable compensation for service or payment for expenses.

(c) The Academy shall maintain its principal office in the District of Columbia with a designated agent or agents to accept service of process for the corporation. Notice to or service upon an agent shall be deemed notice to or service upon the Academy.

(d) The Academy may rent, lease, purchase, or receive and hold in its name property for offices, schools, and other facilities and to carry out activities under this Act. As determined by the Board, the Academy may establish offices, schools, and other facilities outside the District of Columbia for purposes not inconsistent with this Act.

(e) As determined by the Board, the Academy may establish, under the laws of the District of Columbia, a legal entity which is capable of receiving, holding, and investing public and private funds for purposes in furtherance of the Academy under this Act. The Academy may designate such legal entity as the "Endowment of the United States Academy for Peace".

(f) The Academy is liable for the acts of its directors, officers, employees, and agents when acting within the scope of their authority.

(g) The Academy has the sole and exclusive right to use and to allow or refuse others the use of the terms the "United States Academy of Peace", "Center for International Peace", and "Endowment of the United States Academy of Peace" and the use of any official United States Academy of Peace emblem, badge, seal, and other mark of recognition or any colorable simulation thereof. No powers or privileges hereby granted shall interfere or conflict with established or vested rights secured as of September 1, 1981.

POWERS AND DUTIES

SEC. 5. (a) The Academy may exercise the powers conferred upon a nonprofit corporation by the District of Columbia Nonprofit Corporation Act consistent with this Act, except for section 5(o) of the District of Columbia Nonprofit Corporation Act (section 1005(o) of title 29 of the District of Columbia Code.)

(b) The Academy may—

(1) establish a Center for International Peace and appoint to it for periods up to two years scholars and leaders in peace from the United States and abroad to pursue scholarly inquiry and other appropriate forms of communication on international peace and conflict resolution and, as appropriate, provide stipends, grants, fellowships, and other support to the leaders and scholars;

(2) establish such divisions, programs, schools, and offices as the Board deems appropriate to carry out this Act;

(3) enter into formal and informal relationships with other institutions, public and private, for purposes not inconsistent with this Act;

(4) conduct research and make studies, particularly of an interdisciplinary or a multidisciplinary nature, into the causes of war and other international conflicts and the elements of peace among the nations and peoples of the world, including peace theories, methods, techniques, programs, and systems, and into the experiences of the United States and other nations in resolving conflicts with justice and dignity and without

violence as they pertain to the advancement of international peace and conflict resolution;

(5) develop programs to make international peace and conflict resolution research, education, and training more available and useful to persons in government, private enterprise, and voluntary associations, including the creation of handbooks and other practical materials;

(6) provide peace education and research programs at graduate and postgraduate levels that lead to degrees as well as to certificates and other forms of recognition;

(7) conduct training, symposia, and continuing education programs for practitioners, policymakers, policy implementers, and citizens and noncitizens directed to developing their skills in international peace and conflict resolution;

(8) develop for publication or other public communication and disseminate the products of the Academy;

(9) establish a clearinghouse and other means for disseminating information from the field of peace learning to the public and to government personnel;

(10) establish a United States Medal of Peace, and any other medals or honors the Board periodically may recommend, to be awarded annually with appropriate ceremony by the President of the United States, upon recommendation to the President by the Board, to one or more individuals or groups deserving of exemplary recognition for personal or group contribution to international peace education, training, or research. A medal shall be accompanied by a cash award in an amount determined by the Board. A person associated with the Academy may receive a medal or other award; and

(11) secure directly and without reimbursement, upon request of the president of the Academy to the head of any Federal department or agency, information necessary to enable the Academy to carry out the purposes of this Act if such release of the information would not unduly interfere with the proper functioning of a department or agency.

(c) The Academy may undertake extension and outreach activities under this Act by making grants and entering into contracts with institutions of postsecondary, community, secondary, and elementary education including combinations of such institutions, with public and private educational, training, or research institutions including libraries, and with public departments and agencies including State and territorial departments of education and of commerce. No grant may be made to an institution unless it is a nonprofit or official public institution. A grant or contract may be made to—

(1) initiate, strengthen, and support basic and applied research on international peace and conflict resolution;

(2) promote and advance the study of international peace and conflict resolution by educational, training, and research institutions, departments, and agencies;

(3) educate the Nation about and educate and train individuals in peace and conflict resolution theories, methods, techniques, programs, and systems;

(4) assist the Academy in its publication, clearinghouse, and other information services programs; and

(5) promote the other purposes of this Act.

(d) The Academy may respond to the request of a department or agency of the United States Government to investigate, examine, study, and report on any issue within the Academy's competence. A request may be refused for reason of cost or of inappropriateness to the Academy's purposes or independence.

(e) The Academy may enter into contracts for the proper operation of the Academy, including maintenance of its offices, schools, and other facilities.

(f) The Academy may appoint and fix the compensation and duties of officers, employees, and agents and establish such advisory committees, councils, or other bodies as the efficient administration of the business and purposes of the Academy may require.

(g) The Academy may adopt, amend, and alter bylaws, not inconsistent with the laws of the United States and the District of Columbia, for the management of Academy property and the regulation of Academy affairs.

(h) The Academy may obtain grants and contracts and receive gifts and contributions from government at all levels, international organizations, and private agencies, organizations, institutions, and individuals.

(i) The Academy may charge and collect subscription fees and develop for publication or other public communication, and disseminate, periodicals and other materials.

(j) The Academy may charge and collect fees and other participation costs from persons and institutions participating in the Academy's direct activities authorized in subsection (b).

(k) The Academy may sue and be sued, complain, and defend in any court of competent jurisdiction.

(l) The Academy may adopt, alter, use, and display a corporate seal, emblem, badge, and other mark of recognition and colorable simulations thereof.

(m) The Academy may do any and all lawful acts and things necessary or desirable to carry out the objectives and purposes of this Act.

BOARD OF DIRECTORS

SEC. 6. (a) The powers of the Academy shall be vested in a Board of Directors unless otherwise specified in this Act.

(b) The Board of Directors shall consist of fifteen members appointed as follows:

(1) two Members of the Senate, one from each of the major political parties, to be appointed by the Senate President pro tempore no later than five days after the confirmation of the members nominated by the President;

(2) two Members of the House of Representatives, one from each of the major political parties, to be appointed by the Speaker of the House no later than five days after the confirmation of the members nominated by the President; and

(3) eleven persons, no more than six of whom may be members of the same political party and none of whom may be employees of the Federal Government, appointed by the President of the United States, by and with the advice and consent of the Senate. Not later than ninety days after the date of enactment of this Act, the President shall nominate the eleven individuals for the initial Board and transmit their names and any other information to the Senate. If the Senate fails to confirm a nominee, it shall so inform the President. The President shall submit the name of a new nominee within fifteen days of notice of rejection by the Senate.

(c) A director shall take an oath of office administered by the Vice President of the United States within two weeks after appointment, if a member of Congress, or after confirmation by the Senate, if a Presidential appointee.

(d) Members of the Board of Directors shall serve the following terms of office:

(1) A Member of Congress appointed to the Board shall serve for a single term of six years and only while serving as a Member of Congress.

(2) When submitting nominations for the initial Board, the President shall stipulate by name four directors who shall serve for five year terms, four directors who shall serve for four year terms, and three directors who will serve for three year terms. Thereafter, each Presidential appointee, except for a director appointed to fill an unexpired term, shall serve for a five year term. No Presidential appointee may serve on the Board for more than ten years.

(3) No person may be appointed to less than a full term unless appointed to fill an unexpired term.

(e) Whenever a vacancy occurs on the Board before the expiration of a director's term of office, the vacancy shall be filled—

(1) if a Member of Congress, pursuant to paragraph (1) or (2) of subsection (b) with the appointment made to a full term no later than thirty calendar days after the vacancy occurs; or

(2) if a Presidential appointee, by the Board submitting a list of nominees of no less than three and no more than five names to the President no later than thirty calendar days after the vacancy occurs. The President shall select a nominee from the list and submit the nominee's name to the Senate for confirmation no later than thirty calendar days after receiving the Board's recommendations.

(f) At least ninety days but no more than one hundred and twenty days before the timely expiration of the term of office of any Presidential appointee to the Board, the Board shall submit to the President a list of no less than three and no more than five recommendations for each position. The President shall submit the name of the nominee for each position, selected from the Board's list of recommendations, to the Senate for confirmation at least forty-five calendar days before expiration of the term of office to be filled.

(g) A director may be removed from the Board as follows:

(1) A member of the Board appointed from the Congress may be removed by the appointing authority for malfeasance in office, persistent neglect of duties, or inability to discharge duties.

(2) A member of the Board appointed by the President may be removed by the President, upon the recommendation of ten members of the Board, for malfeasance in office, persistent neglect of duties, or inability to discharge duties. A recommendation may be made only persuant to action taken at a meeting of the Board, which may be closed pursuant to the procedures of subsection (i). Only members who are present may vote. A record of the vote shall be maintained. The President shall be informed immediately by the Board of the recommendation. If the President removes the member, the President shall nominate a successor pursuant to subsection (e).

(h) No member of the Board may participate in any decision, action, or recommendation with respect to any matter which directly and financially benefits the member or pertains specifically to any public body or any private or nonprofit firm or organization with which the member is then formally associated or has been formally associated within a period of two years.

(i) Meetings of the Board shall be conducted as follows:

(1) The President shall stipulate by name the nominee who shall be the first Chairman of the Board. The first Chairman shall serve for a term of three years. Thereafter, the Board shall elect a Chairman every three years from among the directors appointed by the President and may elect a Vice Chairman if so provided by the Academy's bylaws.

(2) The Board shall meet at least semiannually, at any time pursuant to the call of the Chairman or as requested in writing to the Chairman by at least five members of the Board, and as may be provided by the bylaws of the Academy not inconsistent with this

Act. A majority of the members of the Board shall constitute a quorum for any Board meeting.

(3) Upon majority vote of the members of the Board, the Board shall adopt, and may from time to time amend, such bylaws as are necessary for the proper management and functioning of the Academy.

(4) All meetings of the Board shall be open to public observation and shall be preceded by reasonable public notice. Notice in the Federal Register shall be deemed to be reasonable public notice for purposes of the preceding sentence. The Board may close those portions of a meeting, upon a majority vote of its members present and with the vote taken in public session, which are likely to disclose information likely to affect adversely any ongoing peace proceeding or activity or to disclose information or matters exempted from public disclosure pursuant to subsection (c) of section 552(b) of title 5 of the United States Code.

(j) A director appointed by the President shall be entitled to receive the daily equivalent of the annual rate of basic pay in effect for grade GS–18 of the General Schedule in section 5332 of title 5 of the United States Code for each day during which the director is engaged in the performance of duties as a member of the Board.

(k) While away from his home or regular place of business in the performance of duties for the Academy, a director shall be allowed travel expenses, including a per diem in lieu of subsistence, not to exceed the expenses allowed persons employed intermittently in Government service under section 5703(b) of title 5 of the United States Code.

OFFICERS AND EMPLOYEES OF THE ACADEMY

SEC. 7. (a) The Board shall appoint the president of the Academy and such other officers as the Board determines to be necessary. The president shall be a nonvoting ex officio member of the Board. All officers shall serve at the pleasure of the Board. The president shall be appointed for an explicit term of years. Notwithstanding any other provision of law limiting the payment of compensation, the president and other officers appointed by the Board shall be compensated at rates determined by the Board, but no greater than those provided for by level I of the Executive Schedule of chapter 53 of title 5, United States Code.

(b) The Board shall authorize the president and any other officials or employees it designates to receive and disburse public and private moneys, obtain and make grants, enter into contracts, establish and collect fees, issue certificates and other honorifics, and undertake all other activities necessary for the efficient and proper functioning of the Academy.

(c) The president, subject to Academy bylaws and general policies established by the Board, may appoint, fix the compensation of, and remove such employees of the Academy as the president determines necessary to carry out the purposes of the Academy. In determining employee rates of compensation, the president shall be guided by the provisions of title 5, United States Code, relating to classification and General Schedule pay rates.

(d) The President may request the assignment of any Federal officer or employee to the Academy by an appropriate department, agency, or congressional official or Member of Congress and may enter into agreement for the assignment, provided the affected officer or employee agrees to the assigment and the assignment causes no prejudice to the salary, benefits, status, or advancement within the department, agency, or congressional staff of the officer or employee.

(e) No officer or full-time employee of the Academy may receive any salary or other compensation for services from any source other than the Academy during the officer's or employee's period of employment by the Academy, except as authorized by the Board.

(f) Officers and employees of the Academy shall not be considered officers and employees of the Federal Government except for purposes of the provisions of title 28, United States Code, which relates to Federal tort claims liability, and the following provisions of title 5 of the United States Code, which relate to Federal tort claims liability, and the following provisions of title 5 of the United States Code, subchapter I of chapter 81 (relating to compensation for work injuries); chapter 83 (relating to civic service retirement); chapter 87 (relating to life insurance); and chapter 89 (relating to health insurance). The Academy shall make contributions at the same rates applicable to agencies of the Federal Government under the provisions of title 5 referred to in this section.

(g) No part of the income or assets of the Academy or of any legal entity created by the Academy shall inure to any agent, employee, officer, or director or be distributable to any such person during the life of the corporation or upon dissolution or final liquidation. Nothing in this section may be construed to prevent the payment of reasonable compensation for services or expenses to the directors, officers, employees, and agents of the Academy in amounts approved in accordance with the provisions of this Act.

(h) The Academy shall not make loans to its directors, officers, employees, or agents, or to any legal entity created by the Academy. A director, officer, employee, or agent who votes for or assents to the making of a loan or who participates in the making of a loan shall be jointly and severally liable to the Academy for the amount of the loan until repayment thereof.

PROCEDURES AND RECORDS

SEC. 8. (a) The Academy shall monitor and evaluate and provide for independent evaluation if necessary of programs supported in whole or in part under this Act to insure that provisions of this Act and the bylaws, rules, regulations, and guidelines promulgated pursuant to this Act are adhered to.

(b) The Academy shall prescribe procedures to ensure that grants, contracts, and financial support under this Act are not suspended unless the grantee, contractor, or person or entity receiving financial support has been given reasonable notice and opportunity to show cause why the action should not be taken.

(c) In selecting persons to participate in Academy activities, the Academy may consider a person's practical experience or equivalency in peace study and activity as well as other formal requirements.

(d) The Academy shall keep correct and complete books and records of account, including separate and distinct accounts of receipts and disbursements of Federal funds and of non-Federal funds. The Academy's annual financial report shall identify the use of each source of funding and shall present a clear description of the full financial situation of the Academy. Nothing in this section prevents the Academy from using Federal and non-Federal funds together in any grant, contract, program, or other expenditure of the Academy consistent with this Act.

(e) The Academy shall keep minutes of the proceedings of its Board and of any committees having authority under the Board.

(f) The Academy shall keep at its principal office a record of the names and addresses of its Board members; copies of this Act, of any other Acts relating to the Academy, and of all Academy bylaws, rules, regulations, and guidelines; required minutes of proceedings; a record of all applications and proposals and issued or received contracts and grants; and financial records of the Academy. All items required by this subsection may be inspected by any Board member or the member's agent or attorney for any proper purpose at any reasonable time.

(g) The accounts of the Academy shall be audited annually in accordance with generally accepted auditing standards by independent certified public accountants or independent licensed public accountants, certified or licensed by a regulatory authority of a State or other political subdivision of the United States. The audit shall be conducted at the place or places where the accounts of the Academy are normally kept. All books, accounts, financial records, files, and other papers, things, and property belonging to or in use by the Academy and necessary to facilitate the audit shall be made available to the person or persons conducting the audit, and full facilities for verifying transactions with the balances or securities held by depositories, fiscal agents, and custodians shall be afforded to such person or persons.

(h) The Academy shall provide a report of the audit to the President of the United States and to each House of Congress no later than six months following the close of the fiscal year for which the audit is made. The report shall set forth the scope of the audit and include such statements, together with the independent auditor's opinion of those statements, as are necessary to present fairly the Academy's assets and liabilities, surplus or deficit, with reasonable detail, including a statement of the Academy's income and expenses during the year including a schedule of all contracts and grants requiring payments in excess of $5,000 and any payments of compensation, salaries, or fees at a rate in excess of $5,000 per annum. The report shall be produced in sufficient copies for the public.

(i) The Academy and its directors, officers, employees, and agents shall be subject to the provisions of section 552 of title 5, United States Code (relating to freedom of information).

INDEPENDENCE AND LIMITATIONS

SEC. 9. (a) Except as otherwise provided in this Act, the Academy shall not be considered a department, agency, or instrumentality of the Federal Government. Nothing in this Act may be construed as limiting the authority of the Office of Management and Budget to review and submit comments on the Academy's budget request at the time it is transmitted to the Congress.

(b) No political test or political qualification may be used in selecting, appointing, promoting, or taking any other personnel action with respect to any officer, employee, agent, or recipient of Academy funds or services or in selecting or monitoring any grantee, contractor, person, or entity receiving financial assistance under this Act.

FUNDING

SEC. 10. (a) For the purpose of purchasing a principal office and other buildings and grounds for the legal entity authorized to be established under section 4(e) and the Academy's Center, offices, schools, and other facilities in or within easy reach of the District of Columbia and necessary to carry out this Act, there are authorized to be appropriated to the Academy a buildings and grounds capitalization fund of $15,000,000 which shall remain available to the Academy without regard to fiscal year limitations.

(b) For the purposes of establishing the structure and programs and administering the affairs of the Academy, there are authorized to be appropriated for the fiscal year ending September 30, 1983, $6,000,000 and for the fiscal year ending September 30, 1984, $10,000,000. Moneys authorized to be appropriated and appropriated for the fiscal year ending September 30, 1983, shall remain available to the Academy through the fiscal year ending September 30, 1984.

(c) The Board of Directors may transfer to the legal entity authorized to be established under section 4(e) any funds not obligated or expended from appropriations to the Academy for a fiscal year, and such funds shall remain available for obligation or expenditure for the purposes of such legal entity without regard to fiscal year limitations. Any use by such legal entity of appropriated funds shall be reported to each House of the Congress and to the President of the United States.

DISSOLUTION OR LIQUIDATION

SEC. 11. Upon dissolution or final liquidation of the Academy or of any legal entity created pursuant to this Act, all income and assets of the corporation or other legal entity shall revert to the Treasury of the United States.

Mr. MATSUNAGA. Mr. President, I am happy now to yield to the Senator from West Virginia, a cosponsor of the measure.

The PRESIDING OFFICER (Mr. WEICKER). The Senator from West Virginia is recognized.

Mr. RANDOLPH. Mr. President, on June 29, 1945, it was my privilege, as a Member of the House of Representatives, to introduce H.R. 3625, a bill to create a Cabinet-level Department of Peace.

That bill, Mr. President, was dedicated to the concept that if indeed there are any fruits of war, this country should by necessity begin to master the arts of peacemaking, and to legitimize and institutionalize those skills within the formal structure of the U.S. Government.

I said in 1945—and it is being made more chillingly clear to us in these troubled times—"it is utter folly to believe that we can keep secret the atomic bomb and other devices of warfare, because it would raise a suspicion among other countries and cause them to develop substitutes which will be just as deadly, perhaps more deadly, within a matter of a very few years."

Also in June 1945, Senator Alexander Wiley of Wisconsin introduced a similar peace bill in the Senate, and at that time he said:

I would like to see this great Nation be the first on earth to establish a Department of Peace. And I would like to see the world peace capital on free American soil, not at Geneva, Vienna or the scene of past failures, hates, fears and intrigues.

Little did any of us realize, I believe, the full and dreadful accuracy of our fears regarding an attitude of international unconcern toward the development of nuclear weapons.

I left the House in 1946, and by the time I returned to Washington in 1958 as a U.S. Senator, many of our fears had already been realized.

Among criticisms voiced in 1945—and some you will surely hear repeated now—against the creation of a peace arm of our Government, will be that it is the function of the Secretary of State to maintain the peace.

To a substantial extent, our past Secretaries of State have been seekers of peace. We gratefully acknowledge the dedication of Secretary Dean Rusk for his quiet but continuous search for honorable conditions of peace. But his example has not always been characteristic of all our Secretaries of State.

If you look at the record closely, one can hardly say that Secretary Lansing was exemplary of peaceful ways in the conduct of our policy toward Mexico in 1915. Nor could it have been said of Secretary Seward with respect to his belligerent posture toward Maximillian in Mexico in 1864, or his pursuit of American "manifest destiny" in the Pacific and Caribbean at the same time during the years immediately following.

Within the present world climate, there is a necessity to maintain a frequently combative, or at least assertive, posture within the Department of State. But it is this kind of day-to-day prescription of the State Department's tasks that, to a great extent, disqualifies it as the sole, ideal mechanism for introducing fresh insights to the problems of disarmament and achieving visable conditions for world peace.

By the spring of 1959, after I had returned to Capitol Hill as a Member of the U.S. Senate the year before, I again introduced a bill, S. 2332, to create a Cabinet-level Department of Peace. In June 1961, both Senator Wiley and myself cosponsored a bill, S. 2180, introduced by Senator Hubert Humphrey, to create a U.S. Disarmament Agency for World Peace and Security. In 1968 and 1969, I again cosponsored legislation to create a Department of Peace.

In 1976, a bill, S. 1976, was introduced by Senator Vance Hartke of Indiana, to create the George Washington Academy of Peace—a subcabinet level official arm of our Government committed to the ideals of peacemaking—or nonviolent techniques for conflict resolution.

So, in spite of the criticisms you may hear against creating a Department, or an Academy of Peace, I continue to believe such an agency will contribute much toward the attainment of the conditions for which the world so desperately yearns—even though it may seem paradoxical at a time when the President has announced a military buildup in response to perceived Soviet pressures. The Academy, once established and in the posture of training specialists in conflict resolution techniques, could bring us closer to the effective and systematic treatment of problems of disarmament than we have been any time during recent years. We must do something before the nuclear club is further enlarged.

Senator Humphrey's bill, S. 2180, did not provide full Cabinet-status for a "Peace Officer," but it did place such an Officer at the level of an Under Secretary and clearly established him as a principal adviser to the President on disarmament matters, working solely under the direction of the President and the Secretary of State.

Mr. President, I am giving a brief history of the various efforts in the Senate, and the House of Representatives, over the years to establish a peace arm of the U.S. Government structure in order to reassure other countries—including the Soviet Union—that although we are committed to a necessarily strong defense structure, we are also disposed to pursue the art of peacemaking—and that our commitment to peace must be visible—institutionalized in our government—not just rhetoric.

Mr. President, during the early years of introducing legislation to create either a Cabinet-level Department of Peace, or a Peace Officer to be a principal adviser to the President—we did not have the years of disarmament negotiations of a nuclear age that we have now. At that time, problems of disarmament and arms control had not become so technically complex, nor as threatening to world peace, as they are now.

For the very reason—not in spite of it—that our State Department has developed this experience and expertise, a Peace Academy created and made operational now, could avail itself of that knowledge—indeed it could not afford not to do so—and could work in concert with and as a complement to, a Secretary of State. Indeed, there is a compelling reason for the argument that the head of a Peace Academy would not—must not—become enmeshed in the bureaucratic structure of the Department of State. He must have freedom to explore new and possibly controversial avenues of exchange without being burdened by the weight of the past, or torn by the conflicts of contending schools of thought within the Department of State—if the Academy is to serve a purpose—that of perfecting techniques of arbitration, mediation and negotiation for peaceful conflict resolution.

In the spring of 1961, Thomas F. Murray, a former member of the Atomic Energy Commission, referring to the concept of a new third generation weapon in an entirely different category from that of the H-bomb, stated that:

All that may be said of it here is that it is primarily antipersonnel in destination and effect—hence it is apt for proper military uses, and it need not create suicidal hazards for the country that employs it.

More recently, we heard basically the same kind of rhetoric applied to a limited nuclear war and the possibility that one could be fought on European soil, without ever involving the two major powers—the United States and the Soviet Union.

I believe the curious implications of these statements, even though when taken out of context they take on more sinister implications than were intended by either spokesman, lead peoples of the world to think that we in the United States believe that homicide is more acceptable, morally, than suicide.

Further, I believe that such statements come to be viewed by many uninformed people as policy statements of national and international significance when advocated by presumably responsible and reasonable men on grounds of pure speculation or assumption. I suggest that we eliminate guesswork and assumption in foreign policy formulations pertaining to war versus peace—disarmament versus military buildups and weapons stockpiling.

It is a frequently voiced, popular assumption that if only the United States and the Soviet Union would come to terms on disarmament, then we would immediately have billions more dollars to spend on schools, health care, social services, or other worthy purposes.

On the contrary, peacemaking can and most probably will be expensive. But it will never be as expensive as today's defense budget—never nearly so much. But

we do not really know how much it might cost. We wish only to make a modest start, and from there proceed to make fundamental, systematic, and comprehensive studies in the arts of making peace.

Two days ago, President Reagan made a foreign policy speech intended to relieve the anxieties of our allies, the Soviet Union, and the American people who, for 10 months, have heard nothing but his announced increase in defense spending, weapons stockpiling, the sale of AWACS, and recent references to the unholy specter of a so-called limited nuclear war. Two days ago, the President of the United States said: "I understand their concerns. Their questions deserve to be answered."

President Reagan then went on to reaffirm America's commitment to continuing what he termed "the longest European peace in this century," and he further pledged his administration, himself, and our country to achieving arms-reductions agreements based on the principles outlined in his proposal to the Soviets, asking them to share our commitments and to match their often-repeated professions of concern for peace by positive actions.

Finally, President Reagan stated that the American concept of peace goes well beyond the absence of war. Americans have long known this statement to be true.

Having heard his statement on foreign policy with regard to arms reductions and an end to the unhealthy and unconscionable competition between the two world powers, let us support the President now as he and his negotiators go to the bargaining table. This is no time for suspicion that his proposal was merely for propaganda purposes. It is no time for suspicion by anyone at any level of any government or its people. It is a time for hope.

It will not be easy—and the President knows this. He also knows he has made a sincere start toward a U.S. commitment to world peace efforts. It is high time.

It is high time we begin, in some small way, to move the world with painstaking and careful effort toward more visible, believable, and lasting conditions of peace. It is a cruel irony that the quest for peace, which so enlists the hopes of the world's millions, has become so heavily burdened by the present multitude of hard, complex, and highly technical problems. But desire and good will are not enough. They are necessary, but they are not sufficient. The task ahead will also require the utmost patience, determined effort, and disciplined and professional intelligence.

I am pleased, Mr. President, to have been the chief sponsor of the bill, S. 469, which created the "Commission to Study Proposals to Establish a Peace Academy." When I introduced S. 469, with the sponsorship of Senators MARK HATFIELD and SPARK MATSUNAGA, and helped guide it to enactment, it was the culmination of 36 years of effort on my part—begun in 1945.

I hope the President, our President, who has just given us hope for a negotiated peace, will endorse this proposal we introduce today.

The Study Commission, established for 1 year, during which time it conducted a series of public hearings and forums nationwide under the able leadership of its Chairman, my friend and colleague SPARK MATSUNAGA, recently delivered its final report recommending the establishment of a National Academy for Peace. It was my privilege, with its cosponsors, Senators HATFIELD and MATSUNAGA, to be at the White House on October 20, to present the first copies of the Commission's final report to President Reagan, and later to the Speaker of the House, and the President pro tem of the Senate.

Mr. President, it is gratifying to be able to join Senator MATSUNAGA, Senator HATFIELD, and 49 other Senators for a total of 52 in introducing today, a bill for the establishment of a National Peace Academy.

Mr. President, it is appropriate, and I ask unanimous consent that a "Prayer for Peace," by Frederick Brown Harris the Chaplain of the U.S. Senate in 1961, be printed in the RECORD.

There being no objection, the prayer was ordered to be printed in the RECORD, as follows:

A PRAYER FOR PEACE

Father of all men, in a day of tribulation, when the very foundations of human society seem to be resting on sinking sand, Thou has called us to dedicate our brief and little lives to vast and vital causes.

In the midst of world conditions that baffle us, of swift social currents which sweep away our strongest bulwarks and of evil forces whose hideous cruelty stabs our anguished hearts, we confess that the world in which our lot is cast is too much for us.

Forgive us that it has taken the dreadful threat of a global war for us to recognize that all peoples must work out the common concerns of humanity together, or else go down together into the flaming burial of a final suicidal holocaust.

Because there is no solution of the world's ills, save as it springs from Thy sovereignty and from the hearts of men, we pray, for ourselves, create in us clean hearts, O God, and renew right spirits within us, that we may contribute worthily to mankind's abiding peace.

We ask it in the Redeemer's name. Amen.

Mr. RANDOLPH. Mr. President, I wish to indicate that it is gratifying to me, having begun the long quest with legislation introduced when I was a Member of the House in 1945, to be joined with 49 other Senators in the presentation of this measure.

I also add that we remember the former eloquent and endurable Senator from Illinois, Everett Dirksen, as the minority leader in the Senate, but I am recalling now that he introduced a peace measure in 1947 which embodies some of the thoughts that have been expressed here and some of the substance of what we are working on, while he was a Member of the House of Representatives. Senator Dirksen began serving in the House in 1933—the same year I began my own service in the House. We were sworn in at the same time as the new President—Franklin D. Roosevelt. Senator Dirksen served as a member of the House from 1933 to until 1948. He did not seek reelection that year; in 1950, he sought, and was elected to the U.S. Senate where he served until his death in 1969.

It was shortly before he left the House that Senator Dirksen, as a Representative from the 16th Congressional District in Illinois, presented in that body a measure in an attempt to establish a Department of Peace within our governmental structure. He was thinking in terms of world peace.

And I hope that Senator BAKER, the able majority leader of the Senate today, will not feel it inappropriate for me, as we present this peace bill for introduction, to have mentioned his father-in-law, Senator, and before that Representative, Everett Dirksen, who associated himself with legislation for peace in 1947. That is when Everett Dirksen, as a Member of the House of Representatives, had a bill that embodied some of the thoughts that we have embraced in this legislation today.

I am very happy that the majority leader is in the Senate as we present formally this measure, a measure that is inclusive with 52 Members of this body joining together.

Someone said to me, "Why does it take so long to do something, to even study peace proposals and then to introduce legislation? Why so many cosponsors? Is it because an election year is coming up?"

Well, times, of course, call for the presentation of legislation that perhaps would never be presented except for very real reasons.

I take this moment to say that in 1942 the State of Georgia had 18-, 19-, and 20-year-old voting privileges and responsibilities for its youth in that State.

The State of Georgia was first in 1942. I introduced a constitutional amendment in 1942 that we do what Georgia had done, that the Nation be joined in a constitutional amendment. When did it come to pass? Not then, not a few years later, but presenting it over and over again finally by the two-thirds majority of those Senators and Representatives present, why, the 18-, 19-, and 20-year-old amendment to the Constitution passed here in 1971—29 years later.

In only 90 days the sufficient number of States, 38, had ratified the constitutional amendment for 18-, 19-, and 20-year-old voting.

So I say to Senator MATSUNAGA we must not weary in well-doing. We started on this road for hoped-for world peace a long time ago, just as we did on extending the privileges and responsibilities to our young people to join in the use of the American ballot.

I appreciate the consideration of my colleagues as I have discussed this matter.

The PRESIDING OFFICER. The distinguished majority leader is recognized.

Mr. BAKER. Mr. President, I commend the distinguished Senator from West Virginia for his initiative in this respect, and I am pleased to say that those of us on this side of the aisle are happy indeed to join him in urging the adoption of this resolution. It is typical

of the Senator from West Virginia that he would bring this matter to the attention of the Senate, as he has.

He referred to the fact that my late father-in-law, Senator Dirksen from Illinois, served in the Congress during this time, and I would remark parenthetically that JENNINGS RANDOLPH is the only remaining Member of the Senate who came here in January of 1933 in the House of Representatives when Everett Dirksen was sworn in as a Member of the House of Representatives.

Everett Dirksen and JENNINGS RANDOLPH were friends for many, many years, and I am pleased to say that I have always claimed that friendship not only for family purposes but for my own as well.

I have an inordinate amount of admiration for my chairman—I always refer to him as my chairman, as he was for many years, chairman of the Public Works Committee, and which is now the Environment and Public Works Committee—and whatever I am, good or bad, was due to his tutelage of a freshman Senator assigned to that committee who served under Chairman RANDOLPH.

Mr. President, I am pleased to say that that measure is cleared on this side, and we are prepared to proceed to its consideration.

Mr. THURMOND. Mr. President, I just want to say that I may be the only person in the Senate who was a delegate when Franklin D. Roosevelt was nominated. I was superintendent of schools at that time, and I was a delegate to that convention in Chicago in 1932.

I am not sure, was the Senator from West Virginia a delegate to that convention? Was he a delegate to that convention in 1932 when Roosevelt was nominated?

Mr. RANDOLPH. I was not privileged to be at the convention but I was highly honored to campaign in that year with Franklin Roosevelt who was to become our great President. On the same day that he was chosen I was elected as a Member of the U.S. House of Representatives from the Second District of West Virginia.

We were on the same ticket again for our positions in 1936, 1940, and 1944, and were successful.

I have cherished always my personal and official friendship with Franklin Roosevelt.

I would also say for the record that I was at the Democratic Convention in 1912, sitting on the knee of my father when Woodrow Wilson was nominated in nearby Baltimore at the last convention of either party ever held in that city.

I was also very active with my democracy in 1924 when I covered the Democratic Convention that nominated John W. Davis. I have been there six times. My first convention as a delegate from the State of West Virginia was in 1948.

Mr. THURMOND. I congratulate the able Senator for his long record of distinguished service going back there.

I happen to have been a delegate, as I stated, at the convention in 1932 in Chicago when Roosevelt was first nominated. I would not take time to repeat now the conditions that existed at that time and everything that went on, but we in the South and over the Nation at that time were in a deep depression, and Franklin D. Roosevelt was nominated, and I want to say further that during his early years in office I think he did a lot of good things.

Later he did some things I did not approve of, such as trying to pack the Supreme Court and began the big spending in this country.

But times have changed, and I must say I think he was a great man though, and as history unfolds I am sure it will record him and the good things he did along with others of which some people disapproved.

MARKING THE 100TH ANNIVERSARY OF THE BIRTH OF FRANKLIN DELANO ROOSEVELT ON JANUARY 30, 1882

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate House Concurrent Resolution 220.

The PRESIDING OFFICER. The clerk will state the concurrent resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 220) marking the year 1982 as the 100th anniversary of the birth of Franklin Delano Roosevelt on January 30, 1882.

The Senate proceeded to consider the concurrent resolution.

Mr. RANDOLPH. Mr. President, it is a privilege to support House Concurrent Resolution 220 to provide for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt. In the past, the Congress has created centennial commissions to plan national observances honoring Presidents. Further, the Congress has met in joint session to commemorate the birth of other Presidents. Thus, this is a highly appropriate effort.

House Concurrent Resolution 220 establishes a 16-member bipartisan joint committee on arrangements to provide for the centennial anniversary of the birth of Franklin Delano Roosevelt. The joint committee is instructed to arrange a joint meeting of the Congress on January 27, 1982, or on a day selected by the Speaker of the House of Representatives, issue appropriate invitations, and coordinate its functions with the activities of other centennial organizations as it deems appropriate.

The concurrent resolution further instructs the joint committee to appoint an executive director to serve without compensation and to accept other volunteer services at its discretion.

Mr. President, this is a modest proposal when compared with other commemorative actions that the Congress has authorized to honor past Presidents.

For quite some time I have urged that the Congress authorize an appropriate commemoration of the 100th anniversary of the birth of Franklin Roosevelt. In the 96th Congress on October 16, 1979 I introduced Senate Joint Resolution 116 for this purpose. On that day, Representative JIM WRIGHT of Texas introduced House Joint Resolution 423 in the House of Representatives which was a companion resolution to Senate Joint Resolution 116.

Senate Joint Resolution 116 was considered by the Senate Committee on Rules at a public hearing on December 12, 1979. I joined Pare Lorentz, F. D. R.'s noted documentary film maker and the author of "The Days of Franklin D. Roosevelt: A Chronicle," and Dr. William R. Emerson, director of the Franklin Delano Roosevelt Library at Hyde Park, N.Y., in testifying before the Rules Committee.

Neither Senate Joint Resolution 116 or House Joint Resolution 423 passed during the 96th Congress.

On March 26 of this year, Representative WRIGHT introduced a revised Roosevelt centennial resolution in the House of Representatives. This resolution, House Joint Resolution 221, has 123 cosponsors. It provided for the acquisition of the Lorentz manuscript and its deposit in the Roosevelt Library. It also provided for a joint committee to oversee and coordinate activities relating to the proper observance of the centennial of Franklin Roosevelt's birth.

On April 29, I introduced Senate Joint Resolution 76, identical to Representative WRIGHT's. It has 43 cosponsors. These resolutions do not provide for printing the Roosevelt Chronicle due to the costs.

It was our hope that a way would be found to not only purchase but also to have printed the scholarly chronicle by Pare Lorentz. Regrettably, budgetary restrictions have overtaken us in a sense. It is not possible to secure approval of a resolution with sufficient funding to achieve either of these objectives with respect to the Lorentz chronology. Thus, we are today considering a proposal to authorize a joint session of the Congress.

Mr. President, it was my privilege to serve in the House of Representatives during the first 100 days of the Roosevelt administration and subsequently during his entire Presidency. Franklin Roosevelt was elected in 1932 and sworn in as President on March 4, 1933. I took my seat in the House on March 9 of that year.

As Senators know, he was reelected four times. He led this country through what was probably our most severe domestic crisis and in a great armed conflict in defense of freedom—World War II.

Sir Winston Churchill wrote of F. D. R.:

His life must . . . be regarded as one of the commanding events in human destiny.

Those of us who were privileged to know and work with Franklin Delano Roosevelt during his Presidency were well aware that we were in the company of one of the most extraordinary leaders our Nation has ever had. The great humanistic approach he brought to Washington were expressed superbly in his acceptance speech for renomination to the Presidency on June 27, 1936. F. D. R. said:

Governments can err, Presidents do make mistakes, but the immortal Dante tells us that divine justice weighs the sins of the cold-blooded and the sins of the warm-hearted in different scales. Better the occasional faults of a Government that lives in a spirit of charity than the consistent omissions of a Government frozen in the ice of its own indifference.

The Roosevelt administrations had heart and compassion and cared about people.

Another distinguished English historian, Sir Isiah Berlin, in his recent book, "Personal Impressions," said:

Roosevelt's greatest service to mankind (after ensuring the victory against the enemies of freedom) consists in the fact that he showed that it is possible to be politically effective and yet benevolent and human . . . Roosevelt's example strengthened democracy everywhere, that is to say the view that the promotion of social justice and individual liberty does not necessarily mean the end of all efficient government; that power and order are not identical with a straitjacket of doctrine, whether economic or political; that it is possible to reconcile individual liberty—a loose texture of society—with the indispensable minimum of organising and authority; and in this belief lies what Roosevelt's greatest predecessor once described as "the last, best hope of earth."

A distinguished Republican elder statesman, Henry L. Stimson, wrote of F. D. R.:

He was an ideal war commander in chief. His vision of the broad problems of the strategy of the war was sound and accurate, and his relations to his military advisers and commanders were admirably correct. In the execution of their duties he gave them freedom, backed them up, and held them responsible. In all these particulars he seems to me to have been our greatest war President. . . . Lastly and most important, his vision and interpretations of the mission of our country to help establish a rule of freedom and justice in this world raised a standard which put the United States in the unique position of world leadership. . . .

Mr. President, we do honor to our country when we pay tribute to Franklin Delano Roosevelt. It is gratifying that the Senate is taking favorable action on House Concurrent Resolution 220.

The resolution (House Concurrent Resolution 220) was agreed to.

The preamble was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. RANDOLPH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR MONDAY, NOVEMBER 30, 1981

DISPENSING WITH READING OF JOURNAL, NO RESOLUTIONS OVER UNDER THE RULE, DISPENSING WITH CALL OF CALENDAR, AND ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate reconvenes on Monday, November 30, 1981, the reading of the Journal be dispensed with, no resolutions come over under the rule, the call of the calendar be dispensed with, and following the time allocated to the two leaders under the standing order, there be a period for the transaction of routine morning business not to exceed 30 minutes in length, with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT UNTIL MONDAY AND RECESS UNTIL 10 A.M. ON TUESDAY

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in adjournment under the previous order, under the terms of the House concurrent resolution, until 12 noon on Monday; and that when it completes its business on Monday it stand in recess until the hour of 10 a.m. on Tuesday, December 1.

The PRESIDING OFFICER. The Chair understands some question has been raised as to the time for the convening of the Senate on Monday.

Mr. BAKER. The resolution provides for 12 noon on Monday, does it not?

The PRESIDING OFFICER. Without objection, the Senate will convene at 10 a.m. on Tuesday next.

Mr. BAKER. I thank the Chair.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, there are certain items on Monday's Executive Calendar which are cleared for consideration on our side of the aisle. May I inquire of the minority leader if he is in position to consider those nominations under the Judiciary on page 2 and continuing through Department of Justice on page 3?

Mr. ROBERT C. BYRD. Mr. President, the nominations have been cleared on this side of the aisle.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nominations I have identified.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk proceeded to read various nominations under the Judiciary and the Department of Justice.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed en bloc.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President of the United States be immediately notified that the Senate has given its consent to these nominations.

The nominations considered and confirmed en bloc follow:

THE JUDICIARY

Jesse E. Eschbach, of Indiana, to be U.S. circuit judge for the 7th circuit.

James C. Cacheris, of Virginia, to be U.S. district judge for the eastern district of Virginia.

Richard A. Posner, of Indiana, to be U.S. circuit judge for the 7th circuit.

John H. Moore II, of Florida, to be U.S. district judge for the middle district of Florida.

David V. O'Brien, of the Virgin Islands, to be U.S. district judge for the district of the Virgin Islands for the term of 8 years.

Clyde H. Hamilton, of South Carolina, to be U.S. district judge for the district of South Carolina.

DEPARTMENT OF JUSTICE

Jim J. Marquez, of Kansas, to be U.S. attorney for the district of Kansas for the term of 4 years.

Robert N. Miller, of Colorado, to be U.S. attorney for the district of Colorado for the term of 4 years.

James M. Rosenbaum, of Minnesota, to be U.S. attorney for the district of Minnesota for the term of 4 years.

Ronald D. Daniels, Jr., of New Hampshire, to be U.S. marshal for the district of New Hampshire for the term of 4 years.

NOMINATION OF JAMES C. CACHERIS, OF VIRGINIA, TO BE U.S. DISTRICT JUDGE FOR THE EASTERN DISTRICT OF VIRGINIA

Mr. WARNER. Mr. President, I rise in support of the nomination of Judge James C. Cacheris, a nominee for a Federal judgeship for the U.S. District Court in the Eastern District of Virginia.

When I undertook the search for candidates for this judicial post, my single most important criterion was that a nominee must have demonstrated clearly, during the course of his or her career, the personal commitment to dispense equal justice for everyone under the law.

I determined that candidates for this nomination should have acquired a background which enables an understanding of life's broadest experiences with people, particularly those in lesser economic circumstances.

Finally, it was my position that the judicial robe, never an imperial robe, symbolizes the majesty of the law. Those who don it must always be conscious of the common, everyday humanity and dignity which binds us equally together.

In my judgment, a judge's task demands persons of the highest order of intelligence, capable of interpreting the law, analyzing the issues, and making findings of fact. It demands integrity unquestioned, and honesty unsullied. It demands a very special person.

Mr. President, Judge James C. Cacheris is that kind of special person. Throughout his career he has demonstrated all of the qualities and qualifications I have described. He has served in capacities which have enabled him to understand life's broadest experiences with people of all walks of life.

He has demonstrated through his deliberations his dedication to the bench and his ability to apply in a tireless fashion the principles of equality under the law.

His nomination as a Federal judge on the U.S. District Court in the Eastern District of Virginia deserves the full support of all Members of the Senate.

Mr. HARRY F. BYRD, JR. Mr. President, I wish to congratulate my colleagues for their confirmation today of the nomination of James C. Cacheris of Fairfax, Va., as a Federal district judge for the Eastern District of Virginia.

Judge Cacheris has served 10 years as a Virginia state circuit judge. During his tenure on the State bench, he has molded an outstanding record.

I have known Judge Cacheris for a number of years. He was recommended to me with others in 1977 for appointment to the position of Federal district judge by my Judicial Advisory Commission. I was delighted to recommend his appointment to this same position nearly 4 years ago.

I am pleased that President Reagan nominated him, and I am equally pleased that the Committee on the Judicary and the U.S. Senate unanimously approved his appointment.

I am confident he will develop the same enviable record in the Federal Judiciary as he has as a member of the Virginia system.

NOMINATION OF JOHN H. MOORE II, OF FLORIDA, TO BE U.S. DISTRICT JUDGE FOR THE MIDDLE DISTRICT OF FLORIDA

Mrs. HAWKINS. Mr. President, I am extremely pleased that the Senate responded so quickly to my call for action on the nomination of Judge John H. Moore II, to the Federal District Court in the Middle District of Florida.

It is a remarkable accomplishment that Judge Moore was confirmed so promptly by the Senate when this judgeship has been vacant for more than 3 years.

Floridians owe special thanks this Thanksgiving to Senator THURMOND and his excellent staff on the Judiciary Committee for the prudent and efficient manner in which they handled this nomination.

For many years, the Honorable John H. Moore II, has been a pillar of the judicial community. He is widely known for his astute, meticulous, and fair judicial reasoning which is clearly expressed in the numerous landmark opinions he has rendered which will have a lasting effect upon the role of the courts in today's complex society.

Judge Moore received his undergraduate education at Cornell University and Syracuse University and was awarded his doctor of jurisprudence from the University of Florida. He served with distinction in the U.S. Navy and currently holds the rank of commander in the U.S. Naval Reserve.

From 1967 to 1977, Judge Moore served as a circuit judge of the 17th Judicial Circuit of Florida. Since August 1977, Judge Moore has served on the Fourth District Court of Appeals. In recognition of his judicial ability he was selected and currently serves as chairman of the Florida Judicial Qualifications Commission.

Judge Moore is a man who has unselfishly and with great accomplishment given his career to the noble cause of justice. His selection for the judgeship for the middle district of our State is certainly a great and deserved compliment to his lifelong endeavors.

It is indeed appropriate that this fine servant of the people and arbiter of justice be appointed to this high judicial position. America is fortunate to have one of such unquestionable integrity to work with us for the betterment of society. Judge Moore's life has been exemplary. He will surely strengthen our system of justice.

NOMINATION OF CLYDE H. HAMILTON, OF SOUTH CAROLINA, TO BE A U.S. DISTRICT JUDGE FOR THE DISTRICT OF SOUTH CAROLINA

Mr. THURMOND. Mr. President, I rise today to state my support for a most impressive and capable attorney from South Carolina, Mr. Clyde H. Hamilton, who has been nominated to be a U.S. district judge for the District of South Carolina.

Mr. Hamilton, a native of Edgefield, S.C., obtained his undergraduate degree from Wofford College in 1956. After graduation he entered the U.S. Army and advanced to the rank of first lieutenant prior to his discharge in 1958. He then attended George Washington University Law School where he served as a member of the Law Review editorial staff prior to obtaining his J.D. degree in 1961.

From 1963 to the present, Mr. Hamilton has served with distinction with one of South Carolina's most prestigious law firms, Butler, Means, Evins, and Browne of Spartanburg, S.C.

Mr. Hamilton is a member of the American Bar, South Carolina, and Spartanburg County Bar Associations. He is a past member of the American Judicature Society as well as the South Carolina Bar Association's Judicial Reform Committee. He recently was appointed to membership on the South Carolina Supreme Court Board of Commissioners on Grievances and Discipline.

I will not attempt to name all of the awards Mr. Hamilton has received nor the many organizations he has served. Suffice it to say, I consider Clyde Hamilton to be an able and competent attorney, an outstanding citizen, and a fine American. He is an individual of excellent moral character and a person whose loyalty to his county and personal integrity are above reproach. It was my privilege to recommend Mr. Hamilton to the President for the position of district court judge. I wholeheartedly support his nomination and urge my colleagues to vote for his confirmation.

Mr. President, the able and distinguished Congressman from the Sixth Congressional District of South Carolina wrote me a letter on November 21, 1981, in behalf of Mr. Hamilton for Federal district judge, and I ask unanimous consent to have printed in the RECORD Congressman NAPIER's letter.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C., *November 21, 1981.*

Senator STROM THURMOND,
Chairman, U.S. Senate Judiciary Committee, Washington, D.C.

DEAR MR. CHAIRMAN: I regret that I was called away yesterday while awaiting to testify in behalf of the Honorable Clyde Hamilton for his judgeship confirmation and was unable to return to speak on his behalf.

Although Mr. Hamilton is not a native of the Sixth Congressional District, I had wanted to testify for two reasons. First, his mother was from Marlboro County, and his maternal ancestry includes some of the most distinguished families who have rendered public service there. Mr. Hamilton comes from a long tradition of public spirited forebearers, particularly the Odom and Newton families. As such, we in the Sixth Congressional District take great pride in his nomination for a judgeship. Second, as a member of the South Carolina Bar, I want to attest to the reputation he bears. The name Clyde Hamilton, among members of the Bar in South Carolina, is a name which means honor, integrity, fairness, and legal excellence. He will serve well, and will bring great credit to the bench.

If possible, I would appreciate your making this letter part of the hearing record, and again, I regret I had to leave just prior to testifying.

Yours very truly,

JOHN L. NAPIER,
Member of Congress.

REMOVAL OF INJUNCTION OF SECRECY

Mr. BAKER. Mr. President, I ask unanimous consent that the injunction of secrecy be removed from the Radio Regulations—Geneva, 1979—and a Final Protocol—Treaty Document No. 97–21—transmitted to the Senate today by the President of the United States; and ask that the treaty be considered as having been read the first time, that it be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed, and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Radio Regulations (Geneva, 1979) and a final protocol signed on behalf of the United States at Geneva on December 6, 1979, with several reservations.

I transmit also, for the information of the Senate, the report of the Department of State with respect to the 1979 Radio Regulations.

The 1979 Regulations constitute a revision of, and a complete replacement for, the Radio Regulations (Geneva, 1959), as amended by six Partial Revisions, to which the United States is a party. The primary purpose of the present revisions is to update the existing regulations to take into account technical advances and the rapid development of certain services and to harmonize the decisions taken at specialized radio conferences since 1959. The new regulations, with the few exceptions noted below, are consistent with the proposals of and positions taken by the United States at the 1979 World Administrative Radio Conference.

At the time of signature, the United States Delegation submitted reservations to several of the decisions included in the Regulations. It was felt in these few cases, that the decisions could adversely affect an important national interest. In addition, the Administration considers it necessary to maintain in force the reservation of the United States associated with a frequency allotment plan included in the Partial Revision adopted by the 1974 World Maritime Administrative Radio Conference. The specific reserva-

tions, with reasons, are given in the report of the Department of State.

The 1979 Radio Regulations will enter into force on January 1, 1982 for Governments which, by that date, have notified the Secretary General of the International Telecommunication Union of their approval thereof. Subject to the reservations mentioned above, I believe the United States should be a party to the Regulations from the outset, and it is my hope that the Senate will take early action on this matter and give its advice and consent to ratification.

RONALD REAGAN.

THE WHITE HOUSE, *November 24, 1981.*

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

FINAL REPORT OF THE COMMISSION ON PROPOSALS FOR THE NATIONAL ACADEMY OF PEACE AND CONFLICT RESOLUTION

Mr. THURMOND. Mr. President, as the President pro tempore of the Senate, I have received the final report of the Commission on Proposals for the National Academy of Peace and Conflict Resolution from my colleague from Hawaii (Mr. MATSUNAGA). This report is available for review by my colleagues in my President pro tempore office.

PRAISE OF AMERICA'S YOUTH

Mr. HEFLIN. Mr. President, I speak today in praise of the tremendous accomplishments made by several youth conservation organizations in southern Alabama in the aftermath of Hurricane Frederic. On September 12, 1979, Hurricane Frederic struck Mobile, Ala., and the surrounding gulf coast region resulting in millions of dollars of damage to the entire area. The devastating effects of this hurricane resulted in the destruction of some of the most beautiful forestry in America.

Fortunately, recovery from this disastrous event has proceeded rapidly due to the cooperation and tremendous assistance put forth by local officials and citizens, the State of Alabama, and the Federal Government.

I am particularly proud of the youth conservation groups in Mobile County who dedicated themselves unselfishly to assist the Mobile County soil and water conservation office with several recovery projects following the devastating effects of Hurricane Frederic.

Among the organizations involved in this tremendous effort were the Mobile area Boy Scouts, Girl Scouts, and 4–H Club members. Their tireless dedication resulted in the planting of at least 8,500 pine trees throughout the Mobile area. Indeed, the courage, spirit, and cooperation of these dedicated youth groups and the tremendous service they have rendered to the Mobile area will long be remembered by all who were affected by the devastation of Hurricane Frederic.

I am also proud of the Boy Scouts of America who have designated "Conservation" as the central theme of their national program for the coming year. The theme of the program will be entitled "SOAR—Save Our American Resources—For the Better Life." Through this program, the Boy Scouts of America intend to illustrate the role conservation plays in creating a wise and intelligent management system for our country's natural resources.

I am proud of these young Americans for the enthusiasm and dedication they display as they act with foresight by addressing conservation and other related issues which are so vital to the preservation of our Nation's natural resources for the future benefit and enjoyment of others.

S. 1276, THE THOR POWER BILL

Mr. HEFLIN. Mr. President, I speak in support of S. 1276, a bill to correct a very serious tax problem that the small business community is facing today as a result of the Thor Power case decided by the Supreme Court in 1979.

In many instances, small businesses, such as farm implement dealers, will stock spare parts to the machines they sell for several years. Dealers do this in order to have the ability to supply their customers with these spare parts even though they no longer carry the particular machine the parts were manufactured for. Because these parts are considered obsolete inventory and have little chance of being sold, the dealer should be able to write down these parts over a period of time to reflect their true value. However, the Internal Revenue Service, as confirmed by the Supreme Court in the Thor Power decision, has disallowed this accounting procedure.

In the Thor Power case, a tool manufacturer wrote down to zero value what it regarded as "excess" inventory, but continued to hold the goods for sale at their original prices. Thor credited those amounts to its inventory accounts, thus decreasing closing inventory, increasing cost of goods sold, and decreasing taxable income for that year. It was Thor's contention that reducing obsolete inventory to scrap value reduced its entire inventory to the lower of cost or market value in accordance with its accounting methods.

The IRS, and subsequently the Tax Court, found that Thor's write down of excess inventory conformed with generally accepted accounting principles as required under section 446(a) of the Internal Revenue Code. However, the IRS disallowed the offset, stating that Thor's inventory accounting method did not clearly reflect income, a requirement under 446(b) of the Code.

A major concern of the IRS in disallowing this particular inventory accounting method is the practice of many businesses of arranging their inventory deductions each year in order to lower taxable income. This is done by taking large deductions for excess inventory in profitable years and little or no deductions in less profitable years. The IRS was attempting to eliminate these practices and rightly so. However, in doing so, hundreds of farm implement, automobile and other dealers have been detrimentally affected.

After the Thor Power decision, the IRS will not allow dealers to reflect the true value of their obsolete inventory by writing it down to reflect actual business experience. This interpretation of the Code fails to take into consideration the realities of business operations.

Without this ability to write down obsolete inventory, the dealers must continue to carry these particular items at their initial price. The IRS has issued proclamations stating that taxpayers who have used this accounting method to write down obsolete inventory must now include this greater value in income. This is obviously not a true reflection of the company's income. There is also the possibility that many small businesses who have used the write-down method for many years to devalue obsolete inventory will now be audited and forced to pay large sums in back taxes. This could be financially disastrous for many small businesses.

S. 1276 would provide relief to the many dealers who are faced with this problem and at the same time achieve the legitimate goals the IRS seeks. Under this bill, beginning on January 1, 1981, a business with a net worth of less than $25 million can elect to write off its excess inventory in a specific manner. The bill allows these dealers to completely write off excess inventory over a 4-year period, although the write-off cannot begin until the year after the item is purchased. Once the dealer has adopted this accounting procedure, he may not change, thereby avoiding the possibility of juggling inventory deductions year after year. This procedure will better reflect actual business experience and allow the businessman to adopt an accounting procedure that reflects the true value of obsolete inventory.

Mr. President, I urge my colleagues to work for the expeditious passage of this bill and provide needed relief to the small business community that now suffers under the Thor Power decision.

TAXES AND THE ELDERLY

Mr. BRADLEY. Mr. President, many Americans mistakenly assume that the Federal income tax is not important for the elderly.

It is true that less than one-half of all older Americans pay Federal income tax because:

Social security is exempt from Federal income tax; and

Millions of elderly persons do not have enough income to file a return.

However, nearly 11 million persons 65 or older had a sufficient amount of income to file a return for taxable year 1978, the latest date for which information is available.

These individuals—as well as other older Americans—have a direct and important stake in assuring that our tax laws are equitable and soundly conceived.

They also have a vital interest in assuring that tax relief provisions remain current, such as the credit for the

elderly and the capital gains exclusion for older homeowners.

Taxes are clearly a high priority concern for the elderly. This point was made emphatically at the recent National Retired Teachers Association and American Association of Retired Persons' Legislative Council meeting.

The council developed a comprehensive legislative package on a wide range of issues. However, special attention was devoted to several front burner issues, such as inflation, inadequate income in retirement, energy, health care, and taxes. While some of these issues were addressed in the 1981 Economic Recovery Tax Act, the legislative council's tax recommendations nonetheless highlight important concerns for Members of Congress to consider in shaping tax policy affecting older Americans.

Mr. President, I commend this statement to my colleagues and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

1981 FEDERAL AND STATE LEGISLATIVE POLICY

TAX POLICY

The Associations will pursue a number of objectives in the tax policy area. The first is equity for the elderly. The amount of federal taxes paid by the elderly must be as fair and unburdensome as possible. This objective should be consistently applied among subgroups of older people.

The second objective is economic. Tax policy ought to be used to help direct the economy along paths which would lead to a reversal of current trends of low or no productivity growth, declining rates of saving and investment, and extraordinarily high rates of inflation. At the same time, unemployment rates must be restrained and optimum, real GNP growth rates restored and maintained. Certainly, a reversal of these trends is essential to strengthening government income support programs, promoting the growth and security of private pensions, and providing for the great numbers of elderly persons who have inadequate incomes.

The third tax policy objective is to encourage "self-help" retirement planning efforts. Because social security alone cannot provide the elderly with an adequate income people need to be encouraged to save for their own retirement.

Often these objectives combine so that a policy position that is clearly beneficial for the elderly is also beneficial for the economy and conductive to retirement saving. For example, the nation's economic problems are attributable, in part, to the decline in the rate of savings and investment. Yet the tax structure promotes consumption and discourages savings. Not only has this bias against saving hurt the elderly, who tend to be savers, but it has also hindered the nation's economic progress and inhibited the accumulation of savings and other income producing investments for retirement.

Although current tax policy tries (without much success) to encourage some retirement savings by providing a deduction of up to $1,500 ($1,750 if a spouse is included) for contributions to an Individual Retirement Account (IRA), a worker can only utilize an IRA if he is not a participant in a private pension plan. This restriction effectively eliminates half of the private sector work force from IRA eligibility. Moreover, workers who are thus ineligible for IRA's may also end up with no private pension benefit, if they fail to stay on a job long enough to acquire a vested right to one. Persons in this latter situation reach retirement with neither an IRA account nor a private pension benefit.

To deal with this situation, the Associations support a two-pronged strategy: provide compensation for inflation losses to those who can no longer save and encourage those who can save to do so. First, the $200 ($400 for joint returns) interest and dividend exclusion, which was enacted in 1980 and which is to be effective in 1981 and 1982, should be made permanent. Additionally, because the elderly must often draw down their savings account principal for living expenses and because of the effect high inflation has on the value of savings accounts, the amount of the exclusion should be increased to at least $500 ($1,000 for joint returns) for persons age 65 and over.

Second, to encourage those who can continue to save, existing savings mechanisms, such as IRA's (and also Keogh plans) and private pension plans, should be strengthened through tax policy. Employees who participate in a public or private pension plan should be given the option to contribute to either the plan or an IRA. A tax deduction should be provided for these contributions, and the deductibility limits that were set in 1974 for amounts contributed to IRA's should be raised considerably and then indexed to reflect the effect of inflation. In addition, tax credits should be available as an alternative to tax deductions to help reach lower income people, who might not necessarily respond to a deduction approach.

Another matter of concern involves recent proposals that would subject one-half of a person's social security benefits to federal income taxation. The Associations are strongly opposed. A further tax on retirees is uncalled for in these present inflationary times. Most of the elderly who would find their income tax liability increased as a result of this proposal, are by no means high-income individuals. Furthermore, arguments in support of these proposals that the tax treatment of social security benefits should be modeled on the present tax treatment of pension payments are not persuasive. Social security, as it exists today, is simply not a pension; it is a form of social insurance. Because social security benefits are very different from pension payments, equivalent tax treatment is inappropriate.

To enhance equity among retiree subgroups, the tax relief available to retirees living on taxable (non-social security) forms of retirement income should be increased and made comparable to that accorded recipients of social security. Presently, the tax relief available to public employee (non-social security) retirees under the Tax Credit for the Elderly (TCE) lags far behind the tax advantages automatically available to social security recipients. To remedy this inequity, legislation ought to be enacted to increase and automatically cost index the maximum amounts that can be taken into account in computing the credit, so that these amounts are equivalent to, and keep pace with, average annual social security payments. In addition, the "adjusted gross income limits" currently applied ought to be removed or substantially raised to make the credit available to more elderly taxpayers.

Other tax equity measures that the Associations recommended include the following:

First, a tax credit should be provided for the residential day-care expenses incurred for elderly dependents. (See Health Policy section for further discussion.)

Second, widows, widowers and single elderly individuals should be allowed to qualify as a head-of-household and to use the preferential tax rates.

Third, the earned-income tax credit should be made available to elderly workers by broadening its eligibility rules to include individual workers, even though they have no children in the home.

Fourth, the one-time exclusion of gain from the sale of a principal residence by persons age 55 or over should be rolled back to taxable years, beginning after December 31, 1977.

Fifth, the age at which an IRA account must be distributed should be increased from age 70½ to 75.

Sixth, the double taxation of dividend income should be eliminated.

Seventh, the $15,000 adjusted gross income phase-out of the "sick-pay" exclusion should be increased at least in the case of two-member family units.

Eighth, an automatically increasing measure of tax relief should be targeted for those elderly income components that are relatively fixed, like private pension benefits and interest from savings accounts.

Because of the adverse economic effects they will prompt, the large payroll tax increases that are scheduled under current law should be at least partially rolled back. Payroll tax increases raise the cost of labor (relative to capital) and thus add to both inflation and unemployment. In place of these planned increases, limited amounts of "general revenues" ought to be introduced into the social security programs on a temporary basis. (See Income Policy section for further discussion.) However, the associations will not support any plan which would derive those general revenues from a value-added tax. Such a tax would significantly increase the tax burden of the elderly and aggravate the wage and price spiral which is contributing greatly to current levels of inflation.

As tax cut proposals are considered, such as lower tax rates on capital gains or more rapid depreciation for plant and equipment, their compatibility with the nation's economic objectives will serve as the critical test of Association support, especially where they involve no direct increase or decrease in tax liability for the elderly. For example, the Associations will not support massive tax cuts if they are potentially inflationary. (See Economic Policy section for further discussion.)

As a means of handling the special problems elderly taxpayers face in preparing their federal income tax returns, Congress in 1978 created the "Tax Counseling for the Elderly" program. Given the success of the program to date and the increasing complexity of the tax laws, the program ought to be expanded significantly. At the same time, a serious effort should be undertaken to simplify the tax code.

MAJ. GEN. MARY E. CLARKE

Mr. HEFLIN. Mr. President, it is with a great deal of pride that I ask my colleagues to join me in honoring Maj. Gen. Mary E. Clarke who recently retired at Fort McClellan, Ala., ending a 36-year career of dedicated service to our Nation. Her endless dedication has proved to be not only a credit to our country and the Army, but also to my home State of Alabama where she has served as the Army's Director of Human Resources Development, Office of the Deputy Chief of Staff for Personnel, at Fort McClellan.

General Clarke's distinguished military career began in 1945 when she enlisted at Fort Des Moines, Iowa. Early in her commissioned career, she commanded the Women's Army Corps detachments at the Army Chemical Center, Edgewood Arsenal, Md.; Valley Forge General Hospital in Pennsylvania; and Tokyo, Japan.

Other assignments were in recruiting, military personnel and intelligence. From 1966 to 1967, she served as executive assistant to the Chief of Plans and Policies, Office of Economic Opportunity,

Washington, D.C. From this assignment, she next served as commanding officer, Women's Army Corps Basic Training Battalion at Fort McClellan, Ala.

From 1968 to 1971, she was assigned to the Office of the Deputy Chief of Staff of Personnel, Department of the Army in Washington, D.C. In March 1971, she moved to the Presidio of San Francisco and an assignment as the WAC staff adviser from the 6th U.S. Army.

From there, she returned to Fort McClellan, Ala., to serve as the commander/commandant of the U.S. Women's Army Corps Center and School from 1972 to 1974 during expansion of the corps. In September 1974, she was assigned as Chief, WAC Advisory Office, Military Personnel Center, Washington, D.C.

In August 1975, she was promoted to brigadier general and became Director of the Women's Army Corps. In May 1978, she assumed command of the U.S. Army Military Police School/Training Center at Fort McClellan. She was promoted to major general in November 1978.

In August 1980, she assumed her present duties as Director of Human Resources Development, Office of the Deputy Chief of Staff for Personnel, Headquarters, Department of Army.

General Clarke was the third Army woman to become a brigadier general and the first woman to command a major Army installation.

General Clarke's decorations and awards include the Legion of Merit, the Meritorious Service Medal, the Army Commendation Medal, the Good Conduct Medal, and most recently she was honored by receiving the highest decoration for peace time service, the Distinguished Service Medal.

Her civilian honors include an honorary degree of doctor military science from Norwich University, Northville, Vt.; an honorary professorship in military science from Jacksonville State University, Jacksonville, Ala.

She has also been listed in the 1978–79 and 1980–81 editions of Who's Who in America; in the 1981–82 edition of Who's Who of American Women; and the sixth edition of the World Who's Who of Women.

I am very proud of General Clarke for her unselfish devotion and dedication to the Armed Forces of our great country. Her exemplary dedication and that of those like her serve as the pillars of strength for the preservation and security of our Nation for generations to come.

General Clarke, for your unselfish service and unyielding dedication, we are deeply grateful; for your outstanding accomplishments we are very proud.

THE COAL DISTRIBUTION AND UTILIZATION ACT OF 1981

Mr. BRADLEY. Mr. President, I am pleased to cosponsor this important piece of legislation. The Coal Distribution and Utilization Act of 1981 is designed to lower the cost of moving coal. By so doing, coal consumers and coal exporters can benefit. Expansion of coal exports can help expand coal ports, such as the Port of New York and New Jersey, Camden, and Philadelphia, without the air pollution, noise and safety hazards associated with railroads. In addition, coal is essential to meeting basic world energy needs in the 1990's and beyond.

Writing in "Foreign Affairs" (winter 1979–80), Ulf Lantzke, the executive director of the International Energy Agency, suggested that world coal production must at least triple by the end of the century.

Such a level of increased coal use would, he wrote, "require the movement in world trade of at least 700 million tons of coal a year." To do this, Lantzke emphasized:

> Efficient, economic and environmentally acceptable coal transportation systems must be developed that can service expanded trade and use. This will be particularly challenging in the United States where both unit trains and slurry pipelines must be used to move the West's vast coal reserves to market.

The 1980 report of the World Coal Study, an international group from 16 major coal-using and coal-producing countries, concluded that world coal production would have to increase 2.5 to 3 times in the next 20 years and forecast that world trade in coal would have to grow 10 to 15 times above 1979 levels.

The report identified the United States and Australia as the two nations most capable of meeting coal import needs. While recognizing restrictions caused by water availability in some regions of the United States, the report nonetheless found that "slurry pipelines offer a promising alternative to barge and train for long-distance transport of coal."

The Interim Report of the Interagency Coal Export Task Force, published by the Department of Energy in January, 1981 projected that the United State would have 38 percent of the world's steam coal market by the year 2000, with exports rising from 28 million short tons in 1985 to 197 million short tons in 2000.

The task force identified coal handling and storage problems at ports as the immediate barrier to expanding the U.S. role in world coal trade. It described long delay at ports with high demurrage costs adding an average of some $6 to $6.50 per ton to the cost of shipping coal overseas. "Even more serious than demurrage costs are the problems posed by untimely or undependable delivery to power plants dependent on coal."

The task force concluded that coal pipelines "are economical alternatives to rail or waterborne inland coal transport." It recommended enactment of eminent domain authority for coal pipelines and proposed Federal support for engineering studies of offshore coal slurry loading of large bulk carriers.

The world coal study addressed the role of coal slurry pipelines in coal export as follows:

> Perhaps the most important aspect of all in looking at future transport of coal is the need to consider transport within the context of a coal chain. Coal transport systems—inland transportation, export ports, maritime transport, and local distribution—are the essential links between producers and consumers although frequently independent of both. Unless transport development is integrated with the planning for mines, power stations, and other coal facilities, delays will occur and coal trade will fail to expand at the rate required.
>
> Usually, coal in bulk form is transported in ships as dry lumps . . . Transporting the coal overseas in other forms would be more economical if by doing so more rapid or cheaper loading or discharge methods could be used or a higher energy density of the cargo achieved. Because the ocean transportation costs represent about 20–30 percent of the CIF (cost, insurance and freight) costs of the coal, there is strong incentive to search for ways to lower costs. . . .
>
> Among the alternatives under consideration are coal-water slurries and coil-oil slurries. Although the use of coarse slurries merely as a technique for rapid loading and discharging at the ports has been proposed, a more significant development would be the loading and movement of slurries transported by pipeline from inland mines to the ports.

In addition to slurrying coal to an export terminal for traditional dry coal export, coal slurry export facilities are now technically feasible. In June 1980, the National Technical Information Service of the U.S. Department of Commerce completed a report on the Pacific Bulk Commodity Transportation System which the Boeing Engineering & Construction Co., of Seattle, Wash., proposes to develop near Port Hueneme, Calif.

The report describes the facility as follows:

> The slurry storage/terminal facility located two miles southeast of Port Hueneme, California, is comprised of onshore facilities, a submarine offshore pipeline system and a single point mooring system.
>
> The onshore facilities are comprised of a recovery storage ponds, a reslurry/recovery system, and the necessary onshore pumping and piping system to deliver 6,000 DLT/hour to a Soco type vessel offshore. Further the onshore facilities include a physical water treatment system capable of removing coal fines from vessel decant water. Water is to be used by others and the fines are to be returned to the berthed Soco vessel.
>
> The offshore piping system includes dual 40-inch diameter pipelines for slurry delivery to the Soco vessel which will be located approximately 14,200 feet offshore and a 36-inch return water pipeline to onshore facilities. All pipelines will be concrete coated and buried. The offshore piping system will deliver coal at a rate of 6,000 DLT/hour at state-of-the-art concentrations and flow rates.
>
> The single point mooring system will be connected to the submarine pipeline system by a pipeline and manifold and underbuoy hoses. Floating hoses will connect the single point mooring system with the Soco vessel manifold. The SPM will be located offshore and is designed to accommodate 300,000 DWT Soco type vessels with 75-foot draft.

Extensive studies have been made of slurry shipping by the U.S. Maritime Administration and others. The studies have shown that integrated slurry shipping systems are viable and technically and economically feasible. In fact, at least one European country, Holland, is seriously studying a slurry terminal to accommodate future imports of coal.

In a paper recently presented at the Fifth International Technical Conference on Slurry Transportation, I. D. Hoogendoorn of SHV Nederland nv, indicates the following advantages of a slurry versus conventional terminal:

> The greatest advantages of a slurry terminal over a conventional terminal will be

the simplicity of the system, as it consists of pipelines and pumps, which provide more opportunities for automation than mechanical handling equipment as the process industry shows us. And for the Rotterdam area where yearly more demanding antipollution standards will be developed, a slurry terminal will be more adequate to meet those standards than a conventional terminal fitted with modern dust suppression systems.

Mr. Hoogendoorn also says that from the feasibility studies made to date for a conventional versus slurry terminal, the slurry facility possesses superior economics.

He reports that a slurry terminal may be built about 30 percent cheaper than a conventional terminal and that the entire cost structure as a percentage of the final costs per throughput ton are more than 25 percent less than the conventional system.

Thus, coal slurry pipelines can play an import role, not only in the domestic transportation of coal, but also in the Nation's expanding coal export trade.

I urge my colleagues to study and support this legislation.

SEVENTH ANNUAL REPORT OF THE NATIONAL COMMISSION FOR EMPLOYMENT POLICY

Mr. THURMOND. Mr. President, as the President pro tempore of the Senate, I have received the "Seventh Annual Report" of the National Commission for Employment Policy. This report is available for review by my colleagues in my President pro tempore office.

LACK OF SUPPORT FOR NATO IN EUROPE

Mr. THURMOND. Mr. President, I wish to call to the attention of the Senate an editorial published in the November 23, 1981, issue of U.S. News & World Report.

Written by News Editor Marvin Stone and entitled "Taking U.S. for Granted?," this article points to the heavy burden borne by our Nation to protect the NATO nations, and the fact that this effort by the United States is often unappreciated.

The United States faces a similar situation in Japan, where that country contributes very little to its own defense while depending upon the United States for its umbrella of security.

As our Nation goes through hard economic times, I feel sure that the contributions of our allies to the defense of the Free World will receive increased attention.

Mr. President, I ask unanimous consent that this editorial be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TAKING U.S. FOR GRANTED?

(By Marvin Stone)

Americans are justified in being irritated over the wave of neutralism sweeping across the European nations of the North Atlantic Treaty Organizations. But it is the Western Europeans themselves who should be most concerned, for it is they who stand to lose the most.

For three decades, the people of Western Europe have lived behind the shield of U.S. military power, relying on the Americans to deter Soviet aggression. After all, Americans saved their skins in the past.

For too long, Europeans have taken for granted this American protection. Their efforts in their own defense have been grudging and limited. For too long, also, some Europeans have smugly assumed that if war should break out between the superpowers, it would be fought at long range, with nuclear warheads rocketing back and forth between the U.S. and Russia—with Europe totally spared.

Now, more and more Europeans are beginning to realize that they are not likely to escape so easily—that part of such a war would almost surely be fought on European soil. Those nuclear weapons that Russia keeps adding to its Eastern European arsenal are aimed directly at Western Europe, not at the U.S.

The reaction to this realization seems to us not only illogical but dangerous. Instead of joining eagerly with the U.S. in an effort to beef up Europe's deterrent capability, and thus enhance their own security, masses of Europeans are opposing that effort.

They have staged a series of noisy demonstrations against a NATO plan to deploy more tactical nuclear weapons in Western Europet to counter the Soviet buildup. Protesting crowds totaling 850,000 turned out in five European capitals in mid-October. The banners they carried were not only antinuclear, such as "Stop the NATO Missiles," but some were anti-American saying "Yanks Go Home."

The policy that these protesters advocate is variously described as pacifism, isolationism or neutralism. But to us, it seems nothing less than appeasement, calling to mind the efforts to placate Adolf Hitler in the late 1930s.

These Europeans seem to believe that by rejecting nuclear weapons they can appease the Soviets and buy insurance against attack. Their hope, it appears, is that, if war does break out, the Russians will direct their nuclear arsenal only at the U.S., not at Europe. In American slang: "Let's you and him fight."

Fortunately, European governments are more supportive of the NATO plan than are these protesters. Five countries agreed to accept the new missiles that NATO wants to install. But two of those countries—Holland and Belgium—are now backing away, and West Germany's government is under severe pressure to follow suit. The alarming possibility is increasing that the NATO plan will founder.

Still more alarming, to defense planners in the U.S. and allied nations, is this: Europe's growing mood of neutralism is threatening to undermine the overall NATO defense system that is so vital to the security of the entire Western World. Should the alliance disintegrate, writes Richard Allen, the President's national-security adviser, "the United States might have to withdraw to its own hemisphere, and Western Europe would be thrown onto its own resources."

And so our allies have been warned: If they refuse to do their part—or take their share of the risks involved—in defending themselves, the United States will be forced to reconsider its commitment to Western Europe.

The U.S. has more than 300,000 troops and almost that many dependents stationed in Europe. How long will Americans be willing to leave them there without the most modern weapons they need to protect themselves?

One remembers the resolutions former Senator Mike Mansfield repeatedly introduced urging a phased withdrawal of American troops from Europe. They never got very far. But American patience is not limitless. European pacifists might some day regret suggesting that the "Yanks Go Home."

ARTHUR FLEMMING

Mr. MATHIAS. Mr. President, whenever a distinguished public servant retires from Government, it gives cause for regret. But when a man like Arthur Flemming, the chairman of the U.S. Civil Rights Commission, leaves public service, the effect is more profound.

Not only are his talents, his experience, and his spirit denied to the Federal Government, but so too is his example. And for five decades, Arthur Flemming's example has inspired generations of civil servants in the Nation's Capital.

Mr. Flemming's record in the public and private sector is remarkable. In academia, in his church, in Government service, Mr. Flemming has been consistently outstanding. He has demonstrated his dedication to scholarship and the education of our young people by serving as president of his alma mater, Ohio Wesleyan University, the University of Oregon, and Macalester College.

A devout Methodist all of his life, Mr. Flemming had the opportunity to serve as president of the National Council of Churches for 3 years in the late sixties.

Mr. Flemming's Government career began in 1939, when President Roosevelt appointed him to the U.S. Civil Service Commission. At 34, he was one of the youngest men ever to serve in that capacity.

During the Eisenhower years, Mr. Flemming was Director of the Office of Defense Mobilization, and later, Secretary of Health, Education, and Welfare.

It was during his term as Secretary of HEW that Mr. Flemming's commitment to civil rights clearly emerged. One of his responsibilities in that office was to carry out President Eisenhower's directive to organize the first decennial White House Conference on Aging.

Thus began a lifetime commitment to the rights of the elderly, which was recognized officially in his appointment as Commissioner of the Administration on Aging in 1973. Mr. Flemming has described his work with the elderly as "one of the most satisfying experiences I have had in my lifetime."

His consistent goal in this area has been to combat the all-too-prevalent attitude in our society that people over 65 should be placed "on the shelf."

When Arthur Flemming became Chairman of the U.S. Commission on Civil Rights in 1974, he brought to this new office the same enthusiasm and intelligence that had marked all his previous work. Under his tutelage, the Commission has left virtually no civil rights issue unexamined.

It has produced insightful and penetrating reports on the progress blacks, women, ethnic minorities, native Americans, the handicapped and the elderly have made toward true equality in our society. No issue has been too controversial for the Commission to explore, no allegation of discrimination too insignificant for it to consider.

Mr. Flemming has been tireless in the

struggle to protect our cherished civil rights. His testament to us is that the struggle is unending, that we must always be vigilant against encroachments on our most basic rights and liberties.

Under his leadership, the Civil Rights Commission has been our most zealous guardian against such intrusions.

All who seek to promote justice and freedom in our society owe a great debt to Arthur Flemming.

He has set a high example. That example will surely animate the work of the Commission long after he is gone.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

PRESIDENTIAL APPROVALS

A message from the President of the United States reported that the President had approved and signed the following acts:

On November 13, 1981:

S. 1322. An act to designate the U.S. Department of Agriculture Boll Weevil Research Laboratory building, located adjacent to the campus of Mississippi State University, Starkville, Miss., as the "Robey Wentworth Harned Laboratory"; to extend the delay in making any adjustment in the price support level for milk; and to extend the time for conducting the referenda with respect to the national marketing quota for wheat and upland cotton.

On November 16, 1981:

S. 736. An act to provide for the control of illegally taken fish and wildlife.

On November 20, 1981:

S. 195. An act to recognize the organization known as the U.S. Submarine Veterans of World War II.

S. 999. An act to amend the Earthquake Hazards Reduction Act of 1977 and the Federal Fire Prevention and Control Act of 1974 to authorize the appropriation of funds to the Director of the Federal Emergency Management Agency to carry out the earthquake hazards reduction programs and the fire prevention and control program, and for other purposes.

S. 1672. An act to expand the membership of the U.S. Holocaust Memorial Council from 60 to 65, and for other purposes.

MESSAGE FROM THE HOUSE

At 11:03 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House passed the following bill, with an amendment:

S. 1493. An act to deauthorize several projects within the jurisdiction of the Army Corps of Engineers.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOMENICI, from the Committee on the Budget, without amendment, and without recommendation:

S. Con. Res. 50. An original concurrent resolution reaffirming the congressional budget for the U.S. Government for fiscal years 1982, 1983, and 1984 (with additional and minority views) (Rept. No. 97-279).

By Mr. MOYNIHAN, from the Select Committee on Intelligence:

Special Report entitled "Implementation of the Foreign Intelligence Surveillance Act of 1978 (Rept. No. 97-280).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DANFORTH:

S. 1887. A bill to amend the Internal Revenue Code of 1954 to expedite the installation of automatic safety airbags; to the Committee on Finance.

By Mr. SYMMS (for himself, Mr. GRASSLEY, Mr. DURENBERGER, and Mr. CHAFEE):

S. 1888. A bill to amend the Internal Revenue Code of 1954 to clarify the tax treatment of variable annuity contracts; to the Committee on Finance.

By Mr. MATSUNAGA (for himself, Mr. HATFIELD, Mr. RANDOLPH, Mr. ANDREWS, Mr. BAUCUS, Mr. BIDEN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. ROBERT C. BYRD, Mr. CANNON, Mr. CHAFEE, Mr. COCHRAN, Mr. CRANSTON, Mr. DANFORTH, Mr. DECONCINI, Mr. DURENBERGER, Mr. EAGLETON, Mr. EXON, Mr. FORD, Mr. HART, Mr. HEFLIN, Mr. HEINZ, Mr. HUDDLESTON, Mr. INOUYE, Mr. JEPSEN, Mr. JOHNSTON, Mrs. KASSEBAUM, Mr. KENNEDY, Mr. LEAHY, Mr. LEVIN, Mr. LONG, Mr. MATHIAS, Mr. MELCHER, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. PELL, Mr. PRESSLER, Mr. PRYOR, Mr. RIEGLE, Mr. SARBANES, Mr. SASSER, Mr. SIMPSON, Mr. SPECTER, Mr. STAFFORD, Mr. STENNIS, Mr. TSONGAS, Mr. WEICKER, and Mr. WILLIAMS):

S. 1889. A bill to establish the United States Academy of Peace, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. PROXMIRE:

S. 1890. A bill to authorize the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. ROTH (for himself, Mr. NUNN, Mr. RUDMAN, and Mr. CHILES):

S. 1891. A bill to protect the confidentiality of information filed by individual taxpayers with the Internal Revenue Service, to promote the effective enforcement of Federal and State criminal laws, to facilitate judicial resolution of challenges to Internal Revenue Service summonses, and for other purposes; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DANFORTH:

S. 1887. A bill to amend the Internal Revenue Code of 1954 to expedite the installation of automatic safety airbags; to the Committee on Finance.

(The remarks of Mr. DANFORTH on this legislation appear earlier in today's RECORD.)

By Mr. SYMMS (for himself, Mr. GRASSLEY, Mr. DURENBERGER, and Mr. CHAFEE):

S. 1888. A bill to amend the Internal Revenue Code of 1954 to clarify the tax treatment of variable annuity contracts; to the Committee on Finance.

TAX TREATMENT OF VARIABLE ANNUITY CONTRACTS

● Mr. SYMMS. Mr. President, the Treasury and the IRS have been on a 5-year program to substantially restrict annuities as a base for retirement security. In 1977, the IRS released a revenue ruling that was quickly and decisively overturned by a Federal district court. However, due to a technical device, that decision was overturned.

The Treasury has continued in its attempts to do administratively what they unsuccessfully tried to get Congress to legislate in 1978. On September 25, 1981, the Treasury issued Revenue Ruling 81-225, which changes the tax treatment of variable annuity contracts funded with mutual fund shares.

This most recent Treasury ruling is grounded on a public access policy argument; that is, a person who invests in mutual fund shares through an annuity should not achieve tax deferral if a person who invests directly in the same mutual fund shares is taxed currently. The Treasury ruling is designed to prevent the use of annuities in situations where the capital used to purchase the annuity is invested in an asset that could have been purchased directly without the use of an annuity. This latest theory of Treasury's has never been stated anywhere in the more than 50-year history of the rules governing annuity taxation.

I am introducing legislation which will provide certainty in this area by clarifying questions that the ruling did not address so that companies and consumers alike can make informed, thoughtful financial decisions. I am introducing this legislation not because I agree with the ruling, but because it is critical that Congress act expeditiously on this matter.

Let me briefly address the aspects of the legislation. First, my legislation reverses the egregious abuse of administrative discretion concerning the retroactive application of the ruling. Without warning or rationale, that ruling imposes a 1981 tax liability on persons who in good faith and often on the advice of independent tax advisers purchased these annuities with the understanding that earnings from them would be deferred pursuant to the tax law as in effect for over 50 years.

The public access rationale could not have been foreseen and is contrary to at least three recently published rulings that sanctioned variable annuities where mutual fund shares that supported the variable annuity were also offered through another account to the general public. Further, it will be almost impossible for any insurance company to compute and report the earnings on the annity as required by the retroactive application of this ruling. In short, the retroactive application of this revenue ruling, based on agency whim rather than clear statutory guidance, is inherently inequitable.

Second, under the Federal securities law, variable annuity contract holders have the right to remove an investment manager. It would be an extraordinarily curious result for the exercise of those

rights to lead to a negative tax consequence; nor should the tax law, through administrative action particularly, indirectly repeal our securities law. Consequently, my legislation clarifies that an independent investment manager is permissible. Of course, my legislation does not allow the contract holder himself to be the investment manager.

Finally, the tax law has for years clearly sanctioned the tax-free, like-kind exchange of one annuity contract for another. Contract holders wishing to change investment orientation to reflect our ever-changing economic conditions should be able to accomplish this same goal by allocating or reallocating contract amounts pursuant to the terms of a single contract without formally going through the cumbersome and expensive administrative aspects of the more formalistic exchange procedure.

As I stated previously, I do not agree with the direction that Treasury has taken on the issue of taxing "wrap-around" annuities. Presently, the Treasury is beginning a complete review of the taxation of life insurance companies, and their present policy on annuities will be reviewed as well.

However, in the meantime, it is absolutely essential that the technical, clarifying changes be made with regard to Revenue Ruling 81–225, so that companies and consumers alike will not be unduly harmed.

I urge all of my colleagues to join me as a cosponsor of this bill. I am pleased to be joined in sponsoring this legislation by Senators GRASSLEY, DURENBERGER, and CHAFEE. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1888

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That

(a) Section 72(o) of the Internal Revenue Code of 1954 is redesignated as section 72(p).

(b) Section 72 of the Internal Revenue Code of 1954 is amended by adding the following new subsection:

"(o) VARIABLE ANNUITY CONTRACTS, ETC.—For purposes of this section, an "annuity" includes but is not limited to, a variable annuity contract or a contract with reserves based on a segregated asset account (as defined in section 801(g)(1)) and;

"(1) such segregated asset account may be a unit investment trust and may include sub-accounts,

"(2) the assets of such accounts or sub-accounts funding a variable annuity contract or a contract with reserves based on a segregated asset account may consist of shares of regulated investment companies registered under the Investment Company Act of 1940, provided that such shares are not available for purchase by the general public except through the purchase of a variable annuity contract,

"(3) such contract may allow the contract holder to allocate or reallocate contract amounts attributable to his contract among such sub-accounts or other segregated asset accounts, and

"(4) the investment managers of such regulated investment companies need not be members of a controlled group (as defined in section 851(c)(3)) of which the insurance company issuing such contract is a member.

"For purposes of this title, assets, including shares of regulated investment companies, acquired to provide funding for such variable annuity contracts or contracts with reserves based on a segregated asset account shall be deemed to be property owned only by the insurance company.".

(c) EFFECTIVE DATES.—

(1) Except as provided in paragraph (2) or (3), the tax treatment of any payment made by a contract holder on or before September 25, 1981 with respect to any annuity described in Revenue Ruling 81–225 shall be determined without regard to such Revenue Ruling 81–225 (and without regard to any other regulation, ruling, or decision reaching the same results, or results similar to the results set forth in such Revenue Ruling) and with full regard to the rules in effect before such Revenue Ruling.

(2) With respect to any contract described in section 403(a), 403(b) or 408(b) of the Internal Revenue Code of 1954, the amendments made by subsection (b) shall only apply to a payment made on behalf of an individual included after September 25, 1981 under such contract.

(3) The amendments made by subsection (b) shall apply to contracts entered into or payments made by a contract holder (other than those contracts or payments described in paragraph (2)) after September 25, 1981 with respect to an annuity described in subsection (b).●

By Mr. MATSUNAGA (for himself, Mr. HATFIELD, Mr. RANDOLPH, Mr. ANDREWS, Mr. BAUCUS, Mr. BIDEN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. ROBERT C. BYRD, Mr. CANNON, Mr. CHAFEE, Mr. COCHRAN, Mr. CRANSTON, Mr. DANFORTH, Mr. DECONCINI, Mr. DURENBERGER, Mr. EAGLETON, Mr. EXON, Mr. FORD, Mr. HART, Mr. HEFLIN, Mr. HEINZ, Mr. HUDDLESTON, Mr. INOUYE, Mr. JEPSEN, Mr. JOHNSTON, Mrs. KASSEBAUM, Mr. KENNEDY, Mr. LEAHY, Mr. LEVIN, Mr. LONG, Mr. MATHIAS, Mr. MELCHER, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. PELL, Mr. PRESSLER, Mr. PRYOR, Mr. RIEGLE, Mr. SARBANES, Mr. SASSER, Mr. SIMPSON, Mr. SPECTER, Mr. STAFFORD, Mr. STENNIS, Mr. TSONGAS, Mr. WEICKER, and Mr. WILLIAMS).

S. 1889. A bill to establish the U.S. Academy of Peace, and for other purposes; to the Committee on Labor and Human Resources.

(The remarks of Mr. MATSUNAGA and Mr. RANDOLPH on this legislation appear elsewhere in today's RECORD.)

By Mr. PROXMIRE:

S. 1890. A bill to authorize the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, and for other purposes; to the Select Committee on Indian Affairs.

DISPOSITION OF CERTAIN INDIAN TRUST FUNDS

Mr. PROXMIRE. Mr. President, today I am introducing a bill which will allow the Lac Courte Oreilles Band of Lake Superior Chippewa Indians to use up to 20 percent of the funds in their land claims trust accounts to cover or reduce overdrafts in the tribe's general account located in the State Bank of Drummond in Drummond, Wis.

The tribe's financial problems are a result of their underrecovery of Federal contract support funds, known as indirect costs, which the tribe had expected to receive from various Federal agencies.

Recovery of indirect costs presents a problem for Indian tribes throughout Wisconsin. Therefore I am encouraged that the Select Committee on Indian Affairs will hold hearings on this matter within the next several months.

ADDITIONAL COSPONSORS

S. 1701

At the request of Mrs. HAWKINS, the Senator from California (Mr. HAYAKAWA), and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of S. 1701, a bill to amend title 28, United States Code, to authorize the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing children and other specified individuals.

S. 1881

At the request of Mr. SASSER, the Senator from Maryland (Mr. SARBANES), the Senator from Connecticut (Mr. DODD), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Missouri (Mr. DANFORTH), and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of S. 1881, a bill to provide for the issuance of a commemorative stamp to honor the dedication of the Vietnam Veterans Memorial.

SENATE JOINT RESOLUTION 110

At the request of Mr. HATCH, the Senator from Idaho (Mr. SYMMS) was added as a cosponsor of Senate Joint Resolution 110, a joint resolution to amend the Constitution to establish legislative authority in Congress and the States with respect to abortion.

SENATE JOINT RESOLUTION 123

At the request of Mr. HAYAKAWA, the Senator from Utah (Mr. GARN), and the Senator from Nevada (Mr. CANNON) were added as cosponsors of Senate Joint Resolution 123, a joint resolution authorizing the President to proclaim "National Disabled Veterans Week."

SENATE RESOLUTION 246

At the request of Mr. MOYNIHAN, the Senator from Illinois (Mr. PERCY), the Senator from Connecticut (Mr. DODD), the Senator from Michigan (Mr. RIEGLE), and the Senator from Rhode Island (Mr. PELL) were added as cosponsors of Senate Resolution 246, a resolution relative to the hunger strike of Andrei Sakharov and Yelena Bonner.

SENATE CONCURRENT RESOLUTION 50—ORIGINAL CONCURRENT RESOLUTION REAFFIRMING THE CONGRESSIONAL BUDGET

Mr. DOMENICI, from the Committee on the Budget, reported the following original concurrent resolution; which was placed on the calendar:

S. CON. RES. 50

Resolved by the Senate (the House of Representatives concurring), That pursuant to section 310(a) of the Congressional Budget Act of 1974, the concurrent resolution on the budget most recently agreed to with respect to the fiscal year 1982 (H. Con. Res. 115, Ninety-seventh Congress) is hereby reaffirmed.

SEC. 2. It is the sense of the Congress that—

Whereas the current budget projections are for large deficits in the range of $76,000,000,000 to $92,000,000,000 in fiscal year 1982; in the range of $96,000,000,000 to $136,000,000,000 in fiscal year 1983; and in the range of $103,000,000,000 to $165,000,000,000 in the fiscal year 1984; and

Whereas these large deficits are a primary cause of the historically high interest rates now prevailing; and

Whereas these interest rates are bringing many small businessmen, the automobile industry, farmers, and the housing sector near collapse; and

Whereas the unemployment rate has reached 8 per centum and is likely to increase further; and

Whereas the economy has entered into a recession which could last for many months:

Now therefore it is the sense of the Congress that the economic crisis now facing the American people is so severe that solutions must be found immediately; and

Further, it is the sense of the Congress that the President should submit a plan as soon as possible, to bring interest rates down, to decrease unemployment to decrease substantially inflation, and to balance the budget in fiscal year 1984; and

Further, it is the sense of the Congress that Presidential guidance and leadership is essential to reach these goals.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, November 24, at 1:30 p.m., to hold a hearing on treaty No. 97–9, the International Wheat Agreement.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, November 24, at 1 p.m., to hold a hearing on the nomination of Frank Shakespeare to be a member of the Board of International Broadcasting.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

CANADIAN LUMBER IMPORTS

● Mr. HATFIELD. Mr. President, as the Members of the Senate well know, the U.S. economy is in a precarious position. This is even more true of my home State of Oregon. Currently, Oregon unemployment is running better than 10 percent statewide. In the lumber and housing industries, unemployment is twice the statewide average. We Oregonians desperately need markets for Pacific Northwest lumber.

Simultaneously, the Canadians have been shipping to the U.S. Atlantic coast approximately 1 billion board feet of British Columbia Douglas-fir and other Northwest species. Recently, I wrote an editorial on this subject in On Beach magazine, an Oregon publication.

I ask that that article be printed here in the RECORD.

The article referred to is as follows:

THE IMPORT OF BRINGING MARITIME POLICY BACK TO THE REALM OF MARITIME REALITY

(By MARK O. HATFIELD)

Of the first 11 laws passed by the first U.S. Congress, five addressed marine concerns. This was an indication of the importance our newborn government placed on sea-borne commerce. Today, the U.S. has the largest and strongest economy in the world, and our imports and exports are second to none. One of every seven manufacturing jobs in the U.S. is for export. The produce from one of every three acres of U.S. farmland is exported. Thus, America's interest in ocean commerce is as strong as that of the young America of our founding fathers. Yet, U.S. flagships carry less than 5 percent of America's imports and exports.

This dismal statistic makes it apparent that the U.S. shipping industry badly needs a change if it is ever to flourish again. Some argue that we need to tighten access to U.S. freight, making it the exclusive, or semi-exclusive, preserve of American ships, thus assuring a market for a U.S. flag merchant fleet. Others, like myself, argue that this philosophy was the cause of our present predicament and not a solution, and that opening the U.S. registry in a deregulated maritime atmosphere is the preferred course to a revitalized American merchant fleet. In this article, I would like to illustrate the latter argument through a case in point.

Thirty years ago, Oregon sawmills were shipping nearly a billion board feet of lumber to eastern U.S. markets, by ocean-going vessels. Since then the total has consistently declined. Today, water-borne shipments are about 3,000 board feet per year. That is about one three-thousandth of the former total, a percentage which gives meaning to the word negligible. There is no lack of demand for west coast lumber on the Eastern seaboard, however. In 1978, 1.06 million board feet of western lumber was shipped to the Atlantic coast.

In 1979, amidst one of the worst housing slumps in recent history, 900 million board feet of western lumber went east by ship. The only surprise is the identity of the supplier. British Columbia shipped 897 of those 900 million board feet to the East coast. Washington, Oregon and California competed for the other three million board feet, capturing .4 percent of the total market. The cause of this anomaly is our reliance on a system of Admiralty laws which were compiled during the days of sail. Central among these laws is the Merchant Marine Act of 1920, or "The Jones Act." The intent of this Act was to preserve and promote U.S. shipping and shipbuilding, and one of the devices called for in the Act was "cabotage," the practice of limiting U.S. coastal trade to ships built and registered in the U.S. and manned by U.S. citizens. At the time, such a provision was logical. There was a glut of American built freighters on the market as a result of the recent World War, Europe was trying to rebuild its business sector and find employment for its citizens as we were, and the seamen's Labor Unions were young and hungry.

Unfortunately, over the years the U.S. Merchant Marine has lost its competitive edge. From a high of nearly 5,000 vessels after World War II it has declined to 453 today. This is only 2.5 percent of the world's approximately 23,000 vessels. What has led to this sad situation? In brief, the U.S. shipping industry simply can't compete. With the world's fleet tremendously overbuilt after World War II all shipyards experienced a slump. Enterprising businessmen like Aristotle Onassis bought U.S. "Liberty" ships and negotiated with small nations for lax registry incurring laws which would help keep operation costs low. These became "flag of convenience" nations with huge foreign built, foreign owned shipping fleets. It is ironic that one of the most common flags in harbors the world over is the "star and stripes" of Liberia, the African nation built by former American slaves.

As shipbuilding languished the world over, some nations took to subsidizing shipbuilding and repair. What seemed folly at the time has proven very wise, as these nations develop better shipbuilding technology, allowing them to build larger ships faster and more cheaply. Equally important, many developing nations have been operating those new ships with smaller crews at lower wages. U.S. crew requirements have not been revised to take advantage of technologically advanced ships resulting in unrealistic crew-size requirements.

Returning to the effect on Oregon lumber the combination of The Jones Act and low foreign shipping costs have created a situation so anomalous that it could have been penned by author Joseph Heller of Catch 22 fame. The Canadian businessman shipping goods to the U.S. east coast can ship lumber via a foreign flag vessel for about $70 per million board feet. His U.S. counterpart has no such option. Years of Jones Act mandated restrictions have reduced the U.S. coastal fleet to a nominal presence. In most cases, the Oregon lumberman, even if he were willing to pay the price, could not find a Jones Act vessel to carry his lumber to the east coast. Only rail provides a reasonable alternative, and reasonable, in this case, only addresses the issue of availability, not cost. The U.S. shipper currently pays $124.50 per million board feet to ship western lumber to the east coast by rail. This is $51 more than his Canadian competitor can ship by water.

The result is exactly what one would assume. Canadian shippers have monopolized the water-borne commerce of western lumber to the U.S. east coast, and enjoy a significant competitive advantage in overall U.S. trade in west coast lumber.

Certain portions of The Jones Act as written in 1920 are anachronistic in todays highly competitive ocean shipping environment. And, as a maritime state, with a huge lumber industry, Oregon has a stake in a maritime law which promotes rather than impedes coastal shipping.

Recently I was given the opportunity to offer a bill to change portions of The Jones Act. This bill would exempt lumber shipments from Jones Act restrictions until competitive American vessel are available. In practice, our Oregon lumbermen would be required to apply to the Secretary of Commerce for suspension of The Jones Act with respect to the transportation of lumber, including plywood. If the Secretary determines that there are no domestic vessels reasonably and economically available for such transport he must suspend the Act for that port within 45 days. Such suspension would terminate when the Secretary determines that the problem no longer exists.

This law is designed to be in effect for two years. I hope that under the new Administration a new maritime policy will be established which will revitalize the use of U.S. flag shipping. Such an effort was made last year by Congressman Pete McCloskey of California, but with lackluster Administration support it did not get past the Merchant

Marine and Fisheries Committee. Maritime lobbies have traditionally had influence far beyond their numbers. They are notably resistant to change. However, they are slowly being decimated by their own policies, and as their influence wanes, change is inevitable.

President Reagan has stressed his commitment to revitalization through private investment. He has carried himself like a true leader, and I believe he has the momentum to make some sweeping changes which are long overdue. I will be addressing the broader issue of U.S. maritime policy as this session of the 97th Congress continues, but meanwhile, I will continue to offer small changes which help bring maritime policy back to the realm of maritime reality.

Mr. HATFIELD. Mr. President, for a more comprehensive picture of the decline which has taken place over the last 30 years, I have this record of lumber shipments by cargo ship to the American east coast. The chart was supplied to me by Dant & Russell, Inc., an Oregon shipper.

I ask that the chart be printed at this time in the RECORD.

The chart referred to is as follows:

LUMBER SHIPMENTS BY CARGO TO THE ATLANTIC COAST

	From British Columbia		From United States		
	Board feet	Percent	Board feet	Percent	Total, board feet

Mr. HATFIELD. Mr. President, I am aware that there are more elements to this problem than simply the cost of shipping Western U.S. lumber to the east coast, Canadian provincial government subsidies to the Canadian lumber industry have allowed Canadian shippers to sell at substantially below the actual value of the timber. These benefits take the form of artificially low-stumpage prices, rail and energy subsidies, and finally, low-shipping charges as a result of using foreign carriers.

Senators PACKWOOD and DANFORTH will be addressing these issues today in a hearing before the Senate Commerce Committee. The distinguished Senators plan an inquiry into the extent of hidden subsidies which are available to the Canadian lumber industry. They and I have also suggested to the American lumber industry that it pursue its case before the International Trade Commission. Ample precedent exists to redress such injury through enforcement of countervailing duties or antidumping duties. These laws were revised in the Trade Act of 1979 to simplify and accelerate enforcement.

After lengthy consideration, I have decided not to introduce the bill which I described in the article. A similar bill was heard in the House of Representatives and rejected. In a timeworn tactic, opponents of the bill demanded that all the diverse problems of the U.S. lumber industry be solved before progress be made on any of them. While I reject that strategy, it is plain to me that to introduce a bill which would exempt lumber from the Jones Act would be an exercise in futility. Even if we succeed in getting such a bill through the Senate, the House will not be willing to address the issue during the Congress.

I do encourage the Commerce Committee to inquire into the hidden subsidies which I mentioned, and would also like to see the International Trade Commission address this issue. The lumber industry, which is the backbone of Oregon's economy, is in deep trouble. While I do not ask the Federal system to come to the aid of the State, I would like to ask that the Federal Government do what it can to ease the burden of the predatory pricing policies of our international neighbors.●

SNUBBIES AND HANDGUN CONTROL

● Mr. KENNEDY. Mr. President, the central feature of handgun control legislation which I have proposed for many years, and which Congressman RODINO and I have introduced again this year—S. 974, the Handgun Crime Control Act of 1981—is the ban on the sale of what some call "snubbies": small, concealable handguns. Studies have repeatedly shown that they are the preferred instrument of criminals, and the source of most of our handgun violence.

These findings were reinforced recently by an extensive report prepared by the Cox News Service—which I introduced in the RECORD on October 5. These findings were also summarized in Sunday's Washington Post by Joseph Albright. As he succinctly outlines, the Cox news reporters found, after exhaustive research and months of analysis, that the one characteristic involved in crimes committed with a handgun was a snubbed-nose gun.

Many other studies have also proven that concealability is a major contributing factor—but not the only factor—associated with the escalation of handgun violence in our society. It is for this reason that the thrust of the Kennedy-Rodino bill is to control the manufacture, sale or transfer of handguns with a barrell length of 3 inches or less for revolvers and 6 inches or less for pistols. This will ban the snubbies, as the Washington Post has called for and which I strongly support.

Mr. President, I ask that Mr. Albright's article and the editorial from the Washington Post be printed at this point in the RECORD.

The material is as follows:

[From the Washington Post, Nov. 23, 1981]

BAN THE SNUBBIES

Yesterday's Outlook section contained an analysis by Cox Newspaper reporter Joseph Albright that suggests a way out of the sterile—and murderous—deadlock over whether to control handguns. Mr. Albright and his colleagues looked behind the familiar slogans in the hope that the facts would provide clues to a more useful approach. They found one. After analyzing records of 14,000 guns used in street crimes, they discovered that the one characteristic most of these guns had in common was not the low quality, low price or foreign origin that characterizes the so-called Saturday Night Special. Rather, 11 of the 15 handguns most often used in the commission of murder, armed robbery and other street crimes had snub-nosed barrels of 2.5 inches or less. That is, the most attractive feature from the criminal's viewpoint was—not surprisingly—concealability. The short-barreled gun also turns out to be the weapon of choice for assassins. According to Mr. Albright, 10 to the 15 assassination attempts on major American political figures since 1835 involved the most concealable type of handgun available at the time. Included in the list are the attacks on Presidents Lincoln, Roosevelt, Ford and Reagan.

"Snubbies," as they are called, are frequently expensive and of relatively high quality. But regardless of the price their short barrels mean inaccuracy at anything beyond point-blank range. They should therefore be of little interest to legitimate hunters, hobbyists and target-shooters.

The favorite argument of those who oppose handgun control is that banning or registering guns would disarm only law-abiding citizens. The argument has been raging for years with no agreement in sight. Mr. Albright's findings suggest that there is a way selectively to disarm criminals—by banning the "snubbies," their weapon of choice. Those who feel safer with a gun in the bedside table or next to the cash register can continue to keep one there. There is no need that it be very small. But the gun that slips into pocket or purse as easily as a wallet could—and should—be outlawed.

[From the Washington Post, Nov. 22, 1981]

BAN SNUBBIES AND SOLVE THE GREAT HANDGUN DEBATE

(By Joseph Albright)

With their slender butts and cute little muzzles, they look like toys. One flick on the trigger and out barks one-third of an ounce of lead at 700 miles per hour, shaped to plow a mushroom cavity into someone's gut. Beyond the range of a card table they are inaccurate, so they are little use to hunters and target shooters. Their sole advantage is that they leave no unsightly bulges when they are concealed. In gun magazines they are called "snubbies."

Handguns of all sizes were instruments of 10,000 murders and another 550,000 crimes of violence in 1977. There are about 50 million handguns in circulation. So in a given year, one out of every 100 handguns in the nation's private handgun arsenal is involved in a crime. Based on the findings of our computer analysis of more than 14,000 handguns used in crimes during 1979, that one gun is very likely to be a "snubbie."

This conclusion, drawn from an investigation by four reporters in the Cox Newspapers Washington bureau, may point to a way out of the impasse in the national debate over handgun control. Neither side in the debate has been willing to take a microscopic look at what sorts of guns actually are used in crime. That is exactly what my associates and I have tried to do.

Contrary to popular impression, most street crime guns are not cheap, low-caliber, foreign-origin "Saturday Night Specials." When we compiled a list of the 15 leading crime handguns, we were surprised to find that only two fit that exact description. Ten of the 15 were made in American factories out of American-made components. Of these 10, seven were made by Smith & Wesson, Colt and Charter Arms, all makers of high-quality, relatively expensive guns.

Above all, criminals seem to prefer concealability. Of the 15 leading crime handguns, 11 had snub-nosed barrels measuring 2.5 inches or less. Four of these "snubbies" were expensive, well-made American guns. Three others were low-budget specials also made in America. The remaining four were inexpensive weapons assembled by small plants in Miami from sets of gun parts shipped in from Italy and Germany.

We found that one of the Miami-assembled imports—the Roehm .22-caliber revolver—was the country's single leading crime instrument. In 1979 one out of every 12 handguns traced in a street crime case was a short-barreled Roehm .22. It is a "Saturday Night Special" by anyone's description, typically retailing for $39.95. It is assembled in a Miami warehouse by the German-owned RG Industries Inc. out of gun parts shipped from its West German affiliate, Roehm GmbH. President Reagan was wounded with the best-selling Roehm .22, the RG14, last spring.

The second-ranking crime handgun was the snub-nosed Smith & Wesson .38 caliber Chiefs Special. Advertised as a police "back-up" weapon, the Chiefs Special is also sold to civilians through sporting goods stores for prices ranging from $170 to $240. Imagine a gun slightly less than half the length and weight of a traditional Colt Six-Shooter. That's a Chiefs Special.

Both the Roehm-origin .22 and the Chiefs Special are examples of guns that are statistically more prone to crime than the average handgun. About 4 percent of the handguns in the United States are Roehm-origin .22s. But our study found they represented 7.9 percent of handguns traced by police at crime scenes. Similarly, Smith & Wesson's light-framed "snubbies"—the standard Chiefs Special and its several variants—make up no more than 3 percent of the handguns in the United States. But they turned up in 5.9 percent of street crime cases in which a handgun was traced.

Small handguns have been favored for big name shootings as well as for humdrum crimes.

President Ford was nearly assassinated in 1975 when Sara Jane Moore pulled the trigger of a Chiefs Special and missed. Mayor George Moscone of San Francisco was killed with a Chiefs Special in 1978. A year ago, Washington cardiologist Dr. Michael Halberstam was also killed with a Chiefs Special. Former Alabama Gov. George Wallace was paralyzed by a Charter Arms Undercover in 1972. Former Beatle John Lennon was murdered by an Undercover in 1980.

Checking in historical archives, we found that since 1835, the weapons used in 10 out of the 15 assassination attempts on major American political figures were among the most readily concealable varieties of pistols then on the market. In addition to Reagan, Ford, Wallace and Moscone, Andrew Jackson, Abraham Lincoln, William McKinley, Franklin D. Roosevelt, Huey Long and Robert F. Kennedy all were fired at with smaller-than-normal handguns.

The size of a handgun is only one indicator of its criminal tendencies. Recently purchased guns of all sizes are more likely to be found at crime scenes than older guns. A tabulation by the Treasury's Bureau of Alcohol, Tobacco and Firearms shows that 18 percent of the crime guns traced in 1979 were a year old or less. The next largest category was two-year-old guns, representing 10 percent of the crime guns. After that, the percentages trailed off year by year—6 percent of the crime guns were eight years old, 4 percent nine years old and so on. It was almost as if guns exuded a radioactive half-life as crime instruments.

What comes out of all this is that some kinds of handguns—newly acquired ones, and those which can be most readily hidden—are more prone to crime than others.

This disparity in criminal tendencies is wide enough to raise questions for those on all sides of the handgun control controversy.

For the ban-the-handgun crusaders: Instead of tilting at all handguns, why not concentrate on restricting those kinds of guns that are statistically shown to be crime-prone? Isn't a criminal record the best measure of whether a certain kind of gun should be freely sold?

For people who like to shoot handguns: Why fight to preserve palm-sized handguns when they aren't ideal for shooting burglars and they are almost useless for hunting and target practice? Why defend the right of fast-buck assembly plants to import gun parts and slap them together to make handguns that no hobbyist would want to fire?

Clearly, the old familiar gun control proposals—registration, licensing, waiting periods for gun purchases—are going nowhere in Washington. If there remains any emotional bridge that joins the pro-gun and anti-gun people, it is that they are all against crime. That may turn out, in the long run, to be more important than it sounds.

In the 1920s almost everyone came to the conclusion that machine guns had no redeeming social value for civilian use. The result was the National Firearms Act of 1934, a law which passed Congress because it split the gun issue in two. It left handguns alone. And it clamped down hard on "gangster-type weapons" such as machine-guns, sawed-off shotguns, fully automatic rifles and silencers.

The National Firearms Act, which is still in effect, allows citizens without criminal records to own machine guns—if they have written permission from federal and local authorities. Each "gangster-type weapon" must be registered with the federal government, and a $200 transfer tax is due to the Treasury any time one is sold.

Based on the criminal record of snub-nosed handguns, people on all sides of the gun control issue have to wonder whether "snubbies" have earned the same treatment as machine guns.

LEADING SOURCES OF DISTRICT OF COLUMBIA CRIME WEAPONS, 1979

[In percent]

	Murder	Armed robbery	Assault/rape	Total
(1) Smith & Wesson, Inc. (M), Springfield, Mass.	21	19	18	19
(2) Colt Industries (M), Hartford, Conn.	15	20	19	19
(3) Roehm GMBH, Germany (M), RG Industries, Inc., Miami (P)	9	11	12	11
(4) Harrington & Richardson (M), Gardner, Mass.	8	8	10	9
(5) Iver Johnson Arms (M), Middlesex, N.J.	7	4	2	3

Key: (M) manufacturer; (P) parts assembler.

Source: Cox Newspapers analysis of handguns involved in 71 murders, 86 armed robberies, and 137 aggravated assaults (including 3 rapes) in the Washington, D.C., metropolitan area from January to September 1979. The guns were traced by the U.S. Bureau of Alcohol, Tobacco and Firearms, and records were obtained through a Freedom of Information Act request.

SORTING THROUGH 250,000 BLIPS OF INFORMATION

Our starting point was a reel of computer tape imprinted with detailed descriptions of 14,268 criminals' handguns. The guns were confiscated by police and federal agents in street crime cases in 18 metropolitan areas during the first nine months of 1979. The records were funneled into a Treasury Department computer when local police officers called Washington to have the guns traced back to their manufacturers by contacting Treasury's Bureau of Alcohol, Tobacco and Firearms.

This summer we obtained a copy of the computer tape through the Freedom of Information Act, after the government had deleted the names of retail gun dealers and gun purchasers. We then sorted through 250,000 blips of information on the criminal handguns, arranging them by makers and models with the aid of American Management Systems, a Rosslyn computer firm. Our study did not cover shotgun or rifle crimes, since nearly all the police tracing requests involved handguns. In any event, handguns account for more than three-fourths of all gun murders and more than 90 percent of robberies in which some gun was used, judging from national Justice Department surveys.●

NATIONAL ADOPTION WEEK/RECOGNITION OF MODEL STATE ADOPTION ACT

● Mr. TOWER. Mr. President, every year, the week of Thanksgiving is known as "National Adoption Week." This year, it seems especially appropriate to recognize the continued diligence and unwaivering commitment which the Reagan administration and the Department of Health and Human Services have shown in developing a revised Model State Adoption Act which will truly assist States in eliminating barriers to adoption of "special needs" children.

The recent publication of the Model Act is the result of over a year's work on

the original draft model which was published in February 1980 and which, in my view, had far exceeded the original desire of Congress to help place "special needs" children in adoptive homes. I was especially concerned that the original Model Act recommended such controversial practices as breaking open adoption records, giving putative fathers' rights over those of the biological mother, and giving approval to various "baby broker" agencies through State licensure.

As Senators may know, I actively expressed my disapproval of the original draft model by introducing a resolution of disapproval in the Senate and testifying before the Child and Human Development Subcommittee. I am very pleased that the new Model State Adoption Act, by addressing itself strictly to facilitating the adoption of "special needs" children, does not endorse the practices which the original act had proposed.

Like all of us, I am hopeful that, as State governments incorporate all or part of the Model Act into their existing adoption laws, more doors will be opened to the homeless children of our country in order that they can receive the type of care which they both need and deserve.●

MUSINGS OF AN ARKANSAS TRAVELER

● Mr. PRYOR. Mr. President, a long time and close friend of mine, Roy Reed, has reported for the New York Times for many years on the strange and wonderful ways of people in the South, and particularly in the State of Arkansas. He has covered fish fries, coon suppers, political rallies, beauty pageants, duck-calling contests, craft fairs, and birthday parties. Roy Reed knows the ins and outs of Arkansas probably better than anyone else I know.

Now Mr. Reed has retired from the Times and lives in Hogeye, Ark., up in the Ozarks. In between spaghetti suppers and fried chicken feasts, he teaches journalism at the University of Arkansas.

In Sunday's New York Times travel section, Roy Reed published the "Musings of an Arkansas Traveler." He is himself a celebrated Arkansan, and in his article he mentions others: The late Vance Randolph, a university historian who is best known as a folklorist and collector of Arkansas tales; and Ernie Deane, a writer in Fayetteville who keeps up the tradition of Ozark folklore.

Mr. Reed's story might be an informal guide to the mountains, if you are unfamiliar with the ways of that country. But for the rest of us, and for me in particular, this is another colorful chapter in Roy Reed's chronicle of the life and times of the people of north Arkansas. I ask that it be printed in the RECORD.

The article follows:

MUSINGS OF AN ARKANSAS TRAVELER

(By Roy Reed)

A tropical rainstorm from the Gulf of Mexico, 600 miles to the south, has been flooding my pasture here in Hogeye, Ark. for three days. The warm air that blew in with the rain has made everybody cranky. Ozark farmers are ready for frost, not summer showers. In this far corner of the South, half an hour from Oklahoma and an hour from Missouri, the Gulf of Mexico is as alien as New York. The hill people of the Ozarks are Southerners, but this low-country damp reminds us that the South, like an old Ford tractor, is held together by haywire.

The hill people do not travel much, especially farther South. I have to venture down occasionally for some necessity, but I try to get home before dark. The Ozarker's attitude toward travel may unnerve some visitors. The mountaineer sees traveling as a symptom of rootlessness, or worse, and he studies the visiting traveler closely for clues to the disorder. The armadillo was studied the same way when it moved in from Texas a few years ago.

For those visitors who come anyway, there is a guidebook to the Ozarks. It has no maps, no restaurant ratings and no puffery from the Chamber of Commerce. It is a paperback from Avon Books published by arrangement with the University of Illinois Press. The author is Vance Randolph, now dead, the foremost folklorist of the Ozarks. The book is annotated by scholars. It has a lengthy introduction and two thoroughly academic prefaces. The title contains a verb not normally heard at church suppers, but the pertinent nouns are "Snow and Other Ozark Folktales."

The yarns are obscene by the standards of the Moral Majority. They date to the 1800's and the early 1900's. Mr. Randolph never found a publisher who would include them in his more scholarly works. Thanks to a change in taste, the tales were published by themselves in the late 1970's, shortly before the author died. They were an instant bestseller in this region. Mr. Randolph, for the first time in his life, made some money. He complained to a friend who had smuggled a bottle of whiskey into his nursing-home room that he had devoted all his life to serious scholarship and now he was doomed to be remembered as a dirty old man.

The tales are one thread of the intellectual history of the mountain people. They are ungrammatical, irreverent and bawdy. They also shed light on the mountaineer's view of man in nature. If a traveler takes the time to scrutinize the hill people, while being scrutinized, he will find the unintimidated wholesomeness and easygoing frankness that Mr. Randolph recorded in his works.

Mr. Randolph's notorious little book was on sale recently, along with his other books, at the annual War Eagle Fair, near Hindsville, Ark. The three-day fair has drawn millions of visitors since it opened in the fall of 1954 on the banks of the War Eagle River. Those who exhibit and sell their works must meet rigid standards. Clay Anderson of Branson, Mo., a magazine publisher, was at this year's fair selling Ozarks books and magazines. He displayed Mr. Randolph's other books prominently, but he tucked "the snow book," as it is called in polite company, under the counter.

He told a friend about a typical sale. The customer browsed a while, then asked, "Is this all of Vance Randolph's books?" Mr. Anderson replied, "No, there is one more." The customer nodded and scratched his head in a show of trying to remember the title while Mr. Anderson reached under the counter. "Yeah," the customer said, "that's the one I was looking for," and the book changed hands without the title's being spoken.

The War Eagle Fair has other problems with standards. It has been so successful that on the third weekend of October, every road leading to War Eagle Farm is littered with makeshift "crafts fairs" selling everything from rather good quilts and carvings to outright junk. The most nettlesome of the competitors has set up shop just across the bridge. Ernie Deane, a writer who is president of the old Fair Association, calls the upstart business "that damned flea market across the river." Kentucky Fried Chicken had a concession at the rival establishment this year and undersold the fair's fried chicken by a dollar a plate. Every 15 minutes, the peace of War Eagle Farm was disturbed by the WHAP WHAP WHAP of a helicopter, the latest addition from across the river. The main view offered by the enterprising pilot was of the throngs at the War Eagle Fair. Mr. Deane said he heard the noise especially close once, and when he looked up, the sapsucker was not a hundred feet above the tents.

A few miles northeast of War Eagle, at Eureka Springs, the faculties of taste and discrimination have been suspended year-round. Gerald L. K. Smith, the noted anti-Semite, moved his headquarters from California to Eureka Springs several years ago. He spent millions at the old resort constructing imitations of scenes from the "Holy Land." The project includes a thoroughly anti-Semitic Passion Play. There is a "Christ Only Art Gallery" featuring, on the same wall, a painting attributed to Titian and a portrayal of the Last Supper made with butterfly wings.

The capstone of the late Mr. Smith's early works is an enormous statue of Christ. It is cube with outstretched arms. The statue occupies the highest point of land at Eureka Springs and is out of sight from only a few wooded corners in the entire town.

On the other side of Eureka, on an oak-covered slope, is a religious symbol named Thorncrown Chapel. Like Mr. Smith's Holy Land, Thorncrown is nondenominational. Unlike Mr. Smith's place, the chapel does not charge for admission.

Thorncrown was designated by E. Fay Jones, an Ozarks architect who studied with Frank Lloyd Wright. The building is glass, wood and stone, in those respective proportions. It huddles against the hill and humbles itself among the leaves, reaching only as high as the oaks that share the slope. But honest men have been heard to gasp as they come into sight of it. An articulate agnostic of my acquaintance was struck silent as he walked inside and looked up, and I thought I saw him bow his head.

The tour buses stop first at the Christ of the Ozarks statue and finally wind up at Thorncrown Chapel. The tourists study both with the same exclamations of muted rapture, and then they snap pictures and go home.

Extremes of quality can sometimes be found under the same roof in this part of the South. I recently visited a restaurant called Lost Bridge Lodge near Garfield, on the Missouri border. The rain had just stopped. My friends and I sat in a grand dining room on top of a mountain and watched the sun go down in glory over Beaver Lake. Then came the food. The prime rib and the broiled steaks were excellent. The jägerschnitzel was chicken-fried steak in masquerade, with gristle. Side by side on the wine list were Puilly Fuissé and Pink Catawba.

To make up for the fraudulent schnitzel, the restaurant throws in free entertainment. The staff are all musicians and singers. Our waitress, bringing dessert, stopped in the middle of the floor and sang, "I'm Just a Girl Who Can't Say No." The hostess sang "Turn Back, Old Man" from the arm of Norman Findahl's chair, and distracted him from his sirloin.

The Ozarks have restaurants of unqualified excellence. But there may be other problems for the patron. A few miles southwest of Garfield is a grape-growing village called Tontitown, the oldest Italian settlement in the Ozarks. One night several years ago I was eating spaghetti and fried chicken at Mary Maestri's, the oldest restaurant in Tontitown and one of the best in Arkansas. Mrs. Maestri,

who was about 90, was sitting at the back. Her son, Ed, was standing at my table.

"You'd feel different if they were trying to build it through your kitchen instead of my farm," I said.

He went back to the cash register and pouted, and I ate my spaghetti and sulked. Both Ed and his mother are dead now. The Chambers of Commerce are still trying to build a freeway through the Ozarks, and I am still sore about it. A new generation of Maestris is in charge of the oldest restaurant in Tontitown. Their food is still excellent; I eat there every chance I get. A quarrel is fun, but good spaghetti is hard to find. Close to home, anyway.

The muscadine, a cousin of the scuppernong, is a wild grape that grows in much of the south. The Carolinians make wine out of it. That is their business, but the best thing that can happen to a muscadine is to be put in a glass of jelly. Muscadine jelly is tart and deep purple. It tastes as well as a possum, and it sticks to a biscuit. It has always been the favorite jelly in the middle latitudes of the South.

Unfortunately, the muscadine vine does not prosper in the Ozarks. The climate is too cold. Ozark hillbillies who have developed a taste for muscadine jelly have to go about 100 miles south into the Ouachita Mountains and compete with the hillbillies there for the stuff. The Ouachitas (pronounced washitaws) had a bumper crop of muscadines this fall. The roadside vendors advertise the jelly as "Muskydine," "Muskydime," "Muscadime" and "Muscdime." I recently brought home a glassful labeled "Muscdine."

The hills run out about 25 miles south of Grannis. Once he is that far south, the crankiest hillbilly will go on and trespass in the low country now and then. I headed south during a cold spell last winter and went all way to New Orleans. If a man has to have a city—and I would like to see the social scientists get serious about that question—he can do worse than New Orleans.

I am hiding at Bernie's house. "Yeah," he is saying, "crime is bad in New Orleans. Like everywhere else.

"How you like that orange?" In New Orleans, a man is measured by his trophies: the age of his house, the exclusivity of his club, the glamour of his Mardi Gras krewe. Bernie has just got home from the French Market with a trophy that will cause friends to fall out in South Louisiana—a box of Plaquemines Parish navels. Louisiana oranges are usually available only from November to January, and then in limited quantities. This is mid-February.

The French Market smelled like roasting coffee beans and rotten onions. Bernie, who is a lawyer, sampled a strawberry under the nose of a vendor and walked away. His back said "lousy" and his face said "not bad." He stopped to speak with his friend Henry Sciambra, and studied the Sciambra Company's produce while he inquired of the Sciambra family. He stopped in front of an orange crate and looked bored. The label was hidden by a sack.

"What kinda oranges?"

"Louisiana." Mr. Sciambra glanced sideways.

Bernie walked away, his eyes on potatoes, peppers, cauliflowers. "Watcha gettin' for 'em?"

"Ten dolluhs."

Bernie studied an onion in the light of the door. He saw that he was the only customer. "Guess I'll take 'em."

I bite into the orange again. "Not bad," I reply. New Orleans is a long way from home, but a decent orange is like good spaghetti. It is worth a little trouble.●

SUGGESTIONS FOR A MISCELLANEOUS TAX BILL

● Mr. DOLE. Mr. President, there is some possibility that the House will shortly send to the Senate a miscellaneous tax bill that extends certain expiring provisions and deals with a few minor, noncontroversial tax matters. The bill is unlikely to arrive in the Senate before mid-December. If any bill is to pass this body and be enacted this year we will have to add only amendments of a similar nature and to do so rather quickly. I want to advise my colleagues of a procedure that I feel may permit us to pass a minor bill this year.

I suggest that the committee agree to amendments in accordance with the following criteria:

First, the Finance Committee has held hearings on the amendment.

Second, the amendment involves no real revenue loss.

Third, the amendment is not controversial: For example, it is not opposed by the committee or the Treasury Department.

If agreement on such noncontroversial amendments can be reached it may be possible to get a bill enacted this year. If not, we may have to wait until next year to address these matters in the context of a larger tax bill.

Any Member who has a noncontroversial tax amendment he or she would like to offer to this bill may have a staff member contact Bob Lighthizer, chief counsel, Senate Finance Committee (4–4515).●

THE ELECTIONS IN HONDURAS

● Mr. HELMS. Mr. President, on Sunday, November 29, Honduras will hold elections to elect a President. These elections are a welcomed event, signifying Honduras dedication to the democratic process. Freedom-loving people everywhere commend Honduras for holding such elections, and wish the country well.

But no election is worth the effort if it is not free and fair. Thus, there is a special obligation on the part of the Government of Honduras, and especially the Honduran military to insure that the people of that critical Central American nation will be participating in an election with proper ballot security, and with as little occasion for fraud as possible. Even in the most experienced democracy, there are frequent allegations of fraud and election rigging. Many such allegations prove to be well founded, and the democratic process is put in jeopardy. The recent elections in the District of Columbia provide an example.

No election outcome is valid unless recognized by all elements contending for power. Thus, again, the military in Honduras has a special obligation to insure not only the integrity of the electoral process, but of the election outcome as well.

Mr. President, it is in the interest of stability in the volatile Central American region for there to be a free and fair election in Honduras.●

MEDICALLY UNDERSERVED AREA DESIGNATIONS

● Mr. CRANSTON. Mr. President, during the debate on Thursday, November 19, on the proposed second continuing resolution, House Joint Resolution 357, which incorporated by reference certain provisions of H.R. 4560, the Labor, Health and Human Services, Education, and Related Agencies Appropriations Act, 1982, the Senator from Massachusetts (Mr. KENNEDY), the Senator from Missouri (Mr. EAGLETON), and I discussed certain language in the Senate Report No. 97–268, accompanying H.R. 4560, regarding the process for reassessing designations of medically underserved areas—MUA's.

That colloquy appears in the RECORD for that date on pages 28445 and 28446. During the course of our colloquy, three documents were referred to—an October 14, 1981 Federal Register notice announcing the proposed redesignations of MUA's and the adjustment of the weights for two of the Index of Medical Underservice—IMU—indicators; an October 28, 1981, Federal Register notice listing the MUA's proposed to be redesignated; and a document showing the IMU weighting changes that the Department of Health and Human Services has proposed.

I believe that, for the information of my colleagues and the public, the October 14 notice and the document showing the IMU weighting changes should be printed in the RECORD. The very lengthy October 28 notice simply provided the list of areas proposed to be deleted from the current listing of MUA's and extended, until November 27, 1981, the period provided for comments on the October 14 notice; it appears beginning on page 53320 of the Federal Register for that date.

Therefore, Mr. President, I ask that copies of the former two documents be printed at this point in the permanent RECORD.

The material referred to is as follows:

[Department of Health and Human Services—Human Services Administration]

DESIGNATION OF MEDICALLY UNDERSERVED AREAS; PROPOSED DELETIONS

Agency: Health Services Administration, HHS.

Action: Notice.

Summary: This notice is to advise all interested individuals and organizations, particularly Health Systems Agencies and State Health Planning and Development Agencies, of proposed deletions from the list of areas that have been designated as Medically Underserved Areas (MUAs). Governors of affected States will be consulted by letter regarding proposed deletions in their States. The proposed MUA deletions result from changes in available data and revisions in the weighting of the data since the last publication of the list of MUAs in the Federal Register. This notice also meets the newly enacted notification requirements of section 905 of Pub. L. 97–35.

Date: Individuals and entities wishing to comment on the proposed deletions or the revisions in the weighting of data must do so by November 13, 1981.

For further information contact: Mr. Richard Crooke, Chief, Positive Programming Branch, Division of Monitoring and Analysis, Bureau of Community Health Services, Room 6-22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone number 301 443-1022.

Supplementary information: Criteria and procedures for MUA designations and a list of MUA designations were last published in the Federal Register on October 15, 1976 [41 FR 45718-45777] The designation of MUA has significance for eligibility or priority in a number of Federal health programs including:

(1) Community Health Centers (Public Health Service (PHS) Act, section 330);

(2) Health Maintenance Organizations (PHS Act, Title XIII);

(3) Health Systems Agencies (PHS Act, Title XV);

(4) Health Resources Development (PHS Act, Title XVI); and

(5) Medicare/Medicaid Reimbursement for Rural Health Clinic Services (Social Security Act, Titles XVIII and XIX).

The October 15, 1976, Federal Register previously referenced provides that: "The MUA list will be revised and published periodically, based on the most recent data available nationally. The updates will be based on changes in the actual values of the indicators or adjustments in the cut-off level." The most recent national data are:

1. The 1978 U.S. Bureau of the Census estimates by county for the physician/population ratios and for the population over 65 years of age.

2. The 1978 physician data from the American Medical Association and the American Osteopathic Association by county.

3. The 1973-1977 infant mortality data by county.

4. The 1970 U.S. Bureau of the Census Population by county, Minor Civil Division (MCD) or Census County Division (CCD) and Census tract for the population under poverty.

5. The 1970 U.S. Bureau of the Census population by MCD/CCD and census tract for the population 65 years of age and over.

Preliminary 1980 census data are anticipated to be available in July 1982.

This proposed list of MUA deletions results from an analysis of the more recent data described above. In addition to noting the changes in the actual values of the indicators, the Department has adjusted the weights applied to the actual values of two of the indicators—infant mortality and primary care physicians per 1,000 population—in order to reflect the changes in those indicators nationally since 1975. Between 1975 and the present, there has been a decrease in the national rate of infant mortality per 1,000 live births (from 17.7 to 15.9) and an increase in the shortage ratio of primary care physicians per 1,000 population (from .250 to .286). Therefore, the weight distributions for these two indicators were revised accordingly.

These indicators are two of four indicators used in computing the index of medical underservice (IMU), which is the score used to determine whether an area is medically underserved. The Department adjusted the weights assigned to these two indicators so that their respective values as part of the IMU would remain stable notwithstanding the changes in national data regarding infant mortality and physician/population ratio.

Comments are invited from all interested individuals and organizations within 30 days from the date of this notice as to any aspect of this proposed list of MUA deletions, including comments about particular areas on the list and comments on the statistical/methodological revisions described above.

Projects funded from the above-mentioned sources which are located in any of the areas proposed to be deleted, should contact the appropriate Department of Health and Human Services Regional Office for further information.

Dated: September 29, 1981.

JOHN H. KELSO,
Acting Administrator,
Health Services Administration.

CHANGES IN WEIGHTING OF CERTAIN INDEX OF MEDICAL UNDERSERVICE INDICATORS

The basis for identifying medically underserved areas (MUAs) and populations is the index of medical underservice (IMU). The IMU is obtained by applying weights to data on the following indicators:

(1) ratio of primary care physicians to population;

(2) infant mortality rate;

(3) percentage of the population which is age 65 or over; and

(4) percentage of the population with family income below the poverty level.

The procedures and initial values for the weights were published in the Federal Register on October 15, 1976 (41 FR 45718-45777) (attached). The sum of the weights for each indicator is the IMU score. An IMU score of 62.0 was used as the cut-off point between underserved and adequately served areas. Recently, the IMU score for all areas was recomputed using the most current national data and revised weights for primary care physician-to-population ratio and infant mortality. The most recent national data used in the IMU recalculations were:

1. The 1978 U.S. Bureau of the Census estimates by county for total population and for the population over 65 years of age.

2. The 1978 physician data from the American Medical Association and the American Osteopathic Association by county.

3. The 1973-1977 infant mortality data by county.

4. The 1970 U.S. Bureau of the Census counts by county, Minor Civil Division (MCD) or Census County Division (CCD) and Census tract for the population under poverty.

5. The 1970 U.S. Bureau of the Census counts by MCD/CCD and census tract for the population 65 years of age and over.

Since 1975, there has been a decrease in the national rate of infant mortality per 1,000 live births (from 17.7 to 15.9) and a change on the definition of a health manpower shortage area (from .250 primary care physicians per 1,000 population to .286). Since the weights assigned in 1976 no longer adequately reflect the relative situation of various areas they were shifted to reflect these changes.

Attachments.

[Department of Health, Education, and Welfare—Public Health Service]

MEDICALLY UNDERSERVED AREAS AND POPULATION GROUPS—DESIGNATION

The purpose of this notice is to publish the current list of medically underserved areas as designated by the Secretary of Health, Education, and Welfare. The notice describes how the index of medical underservice is used to produce the list of medically underserved areas, and sets forth the procedure for ongoing revision of the list.

The Secretary's first designation of medically underserved areas, under the provisions of the Health Maintenance Organization Act of 1973 (Pub. L. 93-222), appeared as a notice in the Federal Register on September 2, 1975 (40 FR 40315-451). The notice contained a full description of the methodology for determining medical underservice. Single copies can be obtained from the appropriate DHEW Regional Office.

Sections 1302(7) and 330(b)(3) of the Public Health Service Act state that the term "medically underserved population" means the population of an urban or rural area designated by the Secretary as an area with a shortage of personal health services or a population group designated by the Secretary as having a shortage of such services.

Under the provisions of the Health Maintenance Organization Act, projects that will draw not less than 30 percent of their membership from medically underserved populations may receive priority funding.

Section 330 of the Public Health Service Act, established by Pub. L. 94-63, provides that grants may be made to public and nonprofit private entities for projects to plan, develop, or operate community health centers which serve medically underserved populations.

Section 1611(d)(2) under Title XVI of the PHS Act, established by Pub. L. 93-641, requires that in any fiscal year not less than 25 percent of the amount of a State's allotment under Part B of title XVI available for obligation in that fiscal year shall be obligated for projects for outpatient facilities which will serve medically underserved populations. The legislative history of title XVI makes clear that the Secretary is expected to utilize the same operational definition of a medically underserved population for title XVI purposes as is used elsewhere in the PHS Act. (See S. Rept. No. 93-1285 at 59.)

Health maintenance organization, community health center, and health facility applicants who wish to apply for funding under the above sections should consult this list to determine which areas in their localities are medically underserved. To learn if there have been changes subsequent to the publication of this list, applicants should contact their local planning agencies.

APPLICATION OF THE INDEX OF MEDICAL UNDERSERVICE

The basis for identifying medically underserved areas and populations is the index of medical underservice (IMU). The IMU is obtained by applying weights to data on the following indicators:

(1) Ratio of primary care physicians to population:

(2) Infant mortality rate;

(3) Percentage of the population which is age 65 or over; and

(4) Percentage of the population with family income below the poverty level.

County-level data are used for two of the indicators: the physician-to-population ratio and the infant mortality rate. For the two census indicators (percentage of the population below the poverty level and percentage of the population age 65 or over), county, minor civil division (MCD), or census county division (CCD) data are used in non-metropolitan areas, and census tract data are used in metropolitan areas. A weighted value is determined for each indicator and the sum of these values forms the IMU score.

In the development of the current MUA list, the 1975 median IMU score of all U.S. counties, 62.0, was used as the cut-off point between underserved and adequately served areas. Index values were computed for each non-metropolitan county, and those counties with scores of 62.0 or below are listed as medically underserved. Index values were then computed for all MCD/CCDs in non-metropolitan counties with scores greater than 62.0, and those MCD/CCDs with scores of 62.0 or below are on the list. In metropolitan areas, defined here as census tracts which lie within standard metropolitan statistical areas (SMSA), the IMU was computed for each census tract and all census tracts with scores of 62.0 or below are on the list. Areas with a

population of fewer than 500 (whether counties, MCD/CCDs, or census tracts) were excluded from consideration as underserved to eliminate listing such places as parks and airports.

The list of areas resulting from application of the IMU was then revised based on approved deletions and additions recommended by the comprehensive health planning (CHP)[1] agencies.

ONGOING REVISION OF THE MUA LIST

The MUA list will be revised and published periodically, based on the most recent data available nationally. The updates will be based on changes in the annual values of the indicators or adjustments in the cut-off level Health systems agencies (HSA)[2] or CHP agencies may at any time recommend changes in the list to reflect local knowledge of medical underservice. As current local data are not available nationally and some areas may be included or excluded inappropriately, HSAs are urged to review the list and to recommend deletions and additions.

All health systems agency recommendations will be reviewed to determine acceptability. If the recommended deletion of an area is accepted, that deletion will be considered permanent until the HSA requests reinstatements of the area. If the recommended addition of an area is accepted, the addition will be subject to periodic review to determine the validity of its retention based on the latest available data, i.e., data for years more recent than those urged to support the recommendation for addition.

PROCEDURE FOR SUBMISSION OF RECOMMENDATIONS

A recommendation for deletion or addition of an area must be accompanied by the agency's reason for the recommendation. All computations, as well as data sources and dates, must be submitted with a recommendation for addition of an area except when the area has a population of fewer than 500 and an IMU of 62.0 or less. If there has been public involvement in the recommendations, the material submitted should include a description of such involvement, e.g., documentation of relevant public meetings, copies of the agency's published notice of intent to review its area to identify pockets of medical underservice, or satisfactory demonstration that the agency governing or advisory board as representative of the community has had adequate review opportunity and has approved the recommendations of the HSA.

Health systems agencies and official CHP agencies are to send their recommendations to: Division of Monitoring and Analysis, Bureau of Community Health Services, DHEW. 5600 Fishers Lane, Rockville, Maryland 20852.

Also, a copy of the recommendations is to be sent to the appropriate DHEW, Regional Office (for address, see 45 CFR 5.31(b)).

Deletions. Recommendation for deletion of an area must be accompanied by identification of the area as it appears on the MUA list and the reasons for the recommendation.

Additions. Recommendation for addition of an area to the MUA list must be based on computation of an IMU score of 62.0 or less, using locally available data or data more recent than that used for this list. (See data sources under the heading, "The List of Medically Underserved Areas.") Before computing an IMU for an area with fewer than 500 population, the HSA should check with the Bureau of Community Health Services (address above) to determine whether or not the IMU for that area is 62.0 or less.

The following information must accompany a recommendation for addition of an area:

(a) Geographic identification of the area (names, census codes, or a map outlining the area proposed).

An area proposed for designation as medically underserved must be or approximate either:

(1) A county (in non-metropolitan areas),

(2) A minor civil division (MCD) or census county division (CCD) (in non-metropolitan areas),

(3) A census tract (in metropolitan areas), or

(4) A group of census tracts, MCDs, or CCDs which constitute a "natural neighborhood" for MUA designation. These groups can be listed as underserved if the IMU for the combined area is 62.0 or below. Because of the homogeneity of a neighborhood, such groupings may constitute more natural areas for designation as medically underserved than units such as individual census tracts, MCDs, and CCDs.

(b) Data on the four indicators and computations of the index of medical underservice.

(1) Percentage of population with incomes below the poverty levels. (The definition of poverty used in the 1964 Social Security Administration version adopted by the Federal Interagency Committee in 1969.)

This percentage must be computed from 1970 Census of Population data or more recent update thereof, if any, as follows: The number of persons in families with incomes below the poverty level in the identified area is added to the number of unrelated individuals with incomes below the poverty level; this total is divided by the resident population minus members of the Armed Forces living in barracks, students in dormitories, and inmates of institutions; and the result multiplied by 100.

The figures used to compute this percentage (the resident population, inmates of institutions, Armed Forces living in barracks, students in dormitories, and the number of persons with incomes below the poverty level) must be stated. The data can be obtained from the 1970 U.S. Census Bureau publications or tapes. If the data is obtained from more recent sources, both data and sources must be identified.

Compute the percentage of population with incomes below the poverty level for the appropriate area: census tracts or combinations of census tracts in metropolitan counties; MCD/CCD or combinations of MCD/CCDs in non-metropolitan counties; or the whole non-metropolitan county. Convert the computed percentage to the weighted value V_1 using Table V_1.

TABLE V_1—*Percentage of population below poverty level*

In the left column find the range which includes the percentage of population below poverty level for the area being examined. The corresponding weighted value, found opposite in the right column, should be used in the formula for determining the IMU.

Percent below poverty	Weighted Value V_1
0	25.1
.1– 2.0	24.6
2.1– 4.0	23.7
4.1– 6.0	22.8
6.1– 8.0	21.9
8.1–10.0	21.0
10.1–12.0	20.0
12.1–14.0	18.7
14.1–16.0	17.4
16.1–18.0	16.2
18.1–20.0	14.9
20.1–22.0	13.6
22.1–24.0	12.2
24.1–26.0	10.9
26.1–28.0	9.3
28.1–30.0	7.8
30.1–32.0	6.6
32.1–34.0	5.6
34.1–36.0	4.7
36.1–38.0	3.4
38.1–40.0	2.1
40.1–42.0	1.3
42.1–44.0	1.0
44.1–46.0	.7
46.1–48.0	.4
48.1–50.0	.1
50+	0

(3) Percentage of population age 65 or over.

This percentage must be computed from 1970 U.S. Census of Population data or more recent update thereof, if any, as follows: The number of persons age 65 or over in the identified area is divided by the resident population of that area, and the result multiplied by 100.

The figures used to compute this percentage (number of persons age 65 or over, and the resident population) must be stated. These data can be obtained from U.S. Census Bureau publications or tapes. If data are obtained from other more recent sources, data and sources must be identified.

Compute the percentage of population age 65 or over for the appropriate area: Census tract or combination of census tracts in metropolitan counties; MCD/CCD or combination of MCD/CCD's in nonmetropolitan counties; or the whole nonmetropolitan county. Convert the computed percentage to the weighted value, V_2 using Table V_2.

TABLE V_2—*Percentage of population age 65 and over*

In the left column find the range which includes the percentage of population age 65 and over for the area being examined. The corresponding weighted value, found opposite in the right column, should be used in the formula for determining the IMU.

Percent age 65 and over:	Weighted Value V_2
0– 7.0	20.2
7.1– 8.0	20.1
8.1– 9.0	19.9
9.1–10.0	19.8
10.1–11.0	19.6
11.1–12.0	19.4
12.1–13.0	19.1
13.1–14.0	18.9
14.1–15.0	18.7
15.1–16.0	17.8
16.1–17.0	16.1
17.1–18.0	14.4
18.1–19.0	12.8
19.1–20.0	11.1

[1] Prior to the implementation of Pub. L. 93-641, recommendations were made by the areawide CHP agencies under the authority of Section 314(b) of the PHS Act, and by State CHP agencies under Section 314(a) of the Act (Pub. L. 89–749). In April 1976, with the designation of the first health systems agencies under Section 1515 of the PHS Act (Pub. L. 93–641), phase-out of the 314(b) CHP agencies began. The CHP phase-out process is expected to be completed by early 1977 when all of the over-200 health systems are operational and the transfer of areawide health planning functions has been realized. For the 314(a) CHP agencies, a corresponding substitution of State health planning and development agencies (under the authority of Section 1521 of the PHS Act) began on July 1, 1976. Until the phase-out is completed, federally funded CHP agencies will continue to make recommendations for the MUA list.

[2] In Hawaii, Rhode Island, the District of Columbia, the Virgin Islands, Guam, the Trust Territories in the Pacific Islands, and American Samoa, the State health planning and development agencies (SHPDA) carry out the functions of health systems agencies (see Section 1536 of the PHS Act).

Percent age 65 and over:	Weighted Value V_2
20.1–21.0	9.8
21.1–22.0	8.9
22.1–23.0	8.0
23.1–24.0	7.0
24.1–25.0	6.1
25.1–26.0	5.1
26.1–27.0	4.0
27.1–28.0	2.8
28.1–29.0	1.7
29.1–30.0	.6
30+	0

(3) Infant mortality rate.

This rate must be computed as an aggregate rate for the 5-year period 1969 through 1973, or more recent period of 5 consecutive years, as follows: the total number of deaths of infant residents (deaths between birth and age 1 year) during the 5-year period in the county containing the identified area is divided by the total number of live births to residents of the county during the same period and the result multiplied by 1,000. For counties with fewer than 100 live births over the 5-year period, the IMU may be computed using the State infant mortality rate instead of the county rate. The infant mortality rate for a subcounty area which includes the identified area and has had at least 4,000 births over the 5-year period will be accepted in lieu of the county rate. The number of infant deaths and live births for the subcounty area and the sources of data used must be stated, together with the infant mortality rate computed from them. Data on infant deaths and live births may be obtained from official State agencies or the annual editions of the U.S. Public Health Service publication entitled "Vital Statistics of the United States."

Compute the infant mortality rate for the county and convert it to the weighted value V_3 using Table V_3.

TABLE V_3—*Infant mortality rate*

In the left column find the range which includes the infant mortality rate for the area being examined or the area in which it lies. The corresponding weighted value, found opposite in the right column, should be used in the formula for determining the IMU.

Infant mortality rate:	Weighted Value V_3
0–10.0	26.0
10.1–11.0	25.6
11.1–12.0	24.8
12.1–13.0	24.0
13.1–14.0	23.2
14.1–15.0	22.4
15.1–16.0	21.5
16.1–17.0	20.5
17.1–18.0	19.5
18.1–19.0	18.5
19.1–20.0	17.5
20.1–21.0	16.4

(4) Ratio of primary care physicians to population.

This ratio should be computed by dividing the number of primary care physicians in the county which contains the identified area by the civilian non-institutional population, and multiplying the result by 1,000. Figures used for the number of primary care physicians and the civilian non-institutional population (resident population minus the resident members of the Armed Forces and inmates of institutions) and their sources must be stated. For the purpose of these computations, primary care physicians are defined to include the total number of active doctors of medicine (M.D.) and doctors of osteopathy (D.O.) who spend at least 50 percent of their time engaged in direct patient care in the fields of general or family practice, internal medicine, pediatrics, or obstetrics, and gynecology. The computations must include all non-Federal physicians meeting the above definition.

Compute the physician ratio for the county and convert to weighted value V. using Table V.

TABLE V_4—*Primary care physicians per 1,000 population*

In the left column find the range which includes the ratio of primary care physicians per 1,000 population for the county being examined, or the county in which the area being examined lies. The corresponding weighted value, found opposite in the right column, should be used in the formula for determining the IMU.

Primary care physicians per 1,000 population:	Weighted value V_4
0	0
.001–.050	.5
.051–.100	1.5
.101–.150	2.8
.151–.200	4.1
.201–.250	5.7
.251–.300	7.3
.301–.350	9.0
.351–.400	10.7
.401–.450	12.6
.451–.500	14.8
.501–.550	16.9
.551–.600	19.1
.601–.650	20.7
.651–.700	21.9
.701–.750	23.1
.751–.800	24.3
.801–.850	25.3
.851–.900	25.9
.901–.950	26.6
.951–1.000	27.2
1.001–1.050	27.7
1.051–1.100	28.0
1.101–1.150	28.3
1.151–1.200	28.6
Over 1.200	28.7

(5) Computation of the index of medical underservice. The IMU is computed by using the formula: $IMU = V_1 + V_2 + V_3 + V_4$.

If the IMU score for an area is 62.0 or below, the area may be recommended for addition to the MUA list. If the IMU score is greater than 62.0, the area may be recommended for deletion.

POSSIBLE EXCEPTIONS

The Secretary recognizes that there may be certain areas which do not qualify for the MUA list solely on the basis of the computed IMU. An area can have unusual conditions which reduce the availability or accessibility of primary medical care but which are not reflected in the area's overall IMU score. If there are mitigating circumstances which would bear on the value of a particular indicator, there can be in-depth review of the additional information affecting the factors involved in computing the IMU.

Conditions that reduce the availability of medical services by increasing demand could be, for example, an area that has a large influx of migrant farmworkers which substantially alters the physician-to-population ratio during the growing season; or an area that has had a significant increase since the 1970 census in the number of persons age 65 or over, or in the number of persons living in poverty. Also, accessibility factors, such as physical barriers, lack of all-weather roads, severe weather a major portion of the year, distance to or time spent to reach sources of primary care, or relevant socio-economic factors may help to qualify an area for consideration. To the extent possible, the information describing unusual conditions should be quantified and verified by the recommending HSA. Areas designated as Critical Health Manpower Shortage Areas (as authorized by Section 329(b) of the PHS Act) are designatable as medically underserved.

Recommendations for designation as a medically underserved area based on unusual conditions should (a) be prepared by the health systems agency, (b) state the primary cause of the medical underservice, (c) describe all factors causing the underservice, (d) be supported by all relevant data, sources, and dates, and (e) be submitted through the Regional Office to: Director, Bureau of Community Health Service, DHEW, 5600 Fishers Lane, Rockville, Maryland 20852.

Alternatively, the Regional Office, with the concurrence of the health systems agency, can directly supply such information to the Bureau of Community Health Services.

THE LIST OF MEDICALLY UNDERSERVED AREAS

The index of medical underservice on which the list is based was computed using data from the following sources:

Center for Health Services Research and Development, 1973 Physician County Summary File. Chicago American Medical Association, 1974.

Master File of Osteopathic Physicians, December 31, 1974. Chicago American Osteopathic Association, 1975.

U.S. Bureau of the Census, 1970 Census of Population, 2d and 4th Count Files.

Maternal and Child Health Studies Project, 1969–1973 Infant Mortality County Summary File, Washington. Information Sciences Research Institute, 1976.

The list is structured with the States in alphabetical order. There are four headings which identify total counties, minor civil divisions/census county divisions within counties, census tracts within counties, and groups of census tracts. The MCD/CCDs are identified by name; the census tracts are identified by number. Areas in each of the sections are listed alphabetically by county.

Groups of census tracts are listed only when the HSA or CHP agency has certified that particular groupings form natural areas for designation. Census tracts which individually qualify for designation but have been combined with other tracts in groups have been marked with double asterisks in the group listings.

The following areas are designated by the Secretary as medically underserved.

Dated: October 4, 1976.

THEODORE COPPER, M.D.,
Assistant Secretary for Health.

●

INTERNATIONAL AVIATION

● Mrs. HAWKINS. Mr. President, recently, the Appropriations Committee submitted to the Senate its Department of Transportation and related agencies appropriations bill, H.R. 4209. The bill was accompanied by Committee Report No. 97–253 which contained language highly critical of the present U.S. policy on international aviation. Before the Senate passed the bill several Members of this body made statements on the floor which made it quite clear the language in the report should not be construed as endorsing a change in the current U.S. policy. This policy has, and should continue to be, one of pursuing greater competition among international air carriers.

The language in question made certain assertions to a negative impact the current U.S. policy is having on American flag carriers as they try to compete in the international market with other nation's flag carriers. This language made the assertion that all of America's flag carriers were suffering financial losses as a result of having to compete with nationally subsidized foreign carriers.

Some of this information is incorrect. I am aware that one relatively new U.S. entrant into the international aviation arena earned over $2.2 million in net income in the transatlantic market and over $1.3 million in net income in its Latin American division in the year ended March 31, 1981. Further, for the more recent 12-month period ending June 30, 1981, it earned $5.2 million in net income on its highly successful transatlantic operations. During this same period, another U.S. transatlantic carrier earned over $20 million on its overseas operation. Mr. President, the underlying predicate of this report—that the procompetitive policy of the United States has produced poor carrier financial results—is highly suspect.

Taken by itself, the report language could be interpreted as a final judgment on the effectiveness of the current U.S. policy in providing better service at lower costs in a more efficient manner in international airline markets. It might even be interpreted to mean foreign governments support of their national airlines is responsible for losses by American carriers.

Currently, the United States is anticipating bilateral negotiations with several countries to establish reciprocal agreements on international flight restrictions, requirements, pricing policy, and route limitations. In fact, the United States is actively engaged in negotiations with Japan to establish the terms upon which our two countries will carry on international air service. It would be most unfortunate if the language in Senate Report 97–253 were to have a detrimental effect on the current negotiations with Japan or on any international negotiations in the future.

Fortunately, the language in question does not appear in the Conference Report No. 97–331 which was filed in the House of Representatives to accompany H.R. 4209. However, there is no specific comment disavowing the Senate report's language attacking the current U.S. policy either. I would like to voice my strong support for a continuation of the current efforts to bring greater competition into international aviation passenger markets.

Bringing about consumer advantages from greater competition is a complex matter. International aviation is no exception. Up to now, foreign trading partners have favored continuing past restrictive policies. These same policies were endorsed by the United States until 1977. At that time, the United States took bold deregulation steps, bringing the advantages of competition to airline passengers all over the world. Deregulation is also meeting with approval here at home. Our airlines, consumers, and even the bureaucrats whose jobs at the CAB are being phased out have said, "Airline deregulation is working."

Already, the United States has concluded more liberal agreements with Germany, Belgium, several countries in Latin America, and in the Far East. The United States is opening the door to greater competition all across the globe. For any part of the Government of the United States to retrench, or to even give a signal that retrenchment is possible, would undermine further progress.

The report suggests, quite inaccurately in my view, that neither new airlines nor incumbent carriers have taken advantage of the new international marketing opportunities produced by the new U.S. policy. Here again, the report is in serious error. One new U.S. firm in my State has entered four transatlantic scheduled service air markets and provides transatlantic charter service in four other markets, all with U.S. manufactured wide-bodied aircraft. Further, its scheduled route service network has in the past 2 years expanded to 15 Caribbean and Central American points. New international air services have also been provided by many incumbent carriers. In short, a strong case can be made for the proposition that U.S.-flag carriers have taken very good advantage of the marketing opportunities that have been produced by the recent U.S. policy—opportunities that some would apparently wish to see eliminated.

For all these reasons, I for one am pleased that the language appearing in Senate Report No. 97–253 does not appear in the Conference Report No. 97–331. I hope this sends a clear signal that the U.S. policy will remain favorable to increased competition in the international aviation market.●

THE B–1 BOMBER

(By request of Mr. BAKER, the following statement was ordered to be printed in the RECORD:)

● Mr. GOLDWATER. Mr. President, during the past few weeks, lying in the hospital, I had the opportunity to review my thoughts on the B–1 bomber and the debate which has continued in the Congress on that subject.

Mr. President, most of my life has been spent in and around aviation. Throughout these years, I have flown airplanes of every description and size.

During this time, I was privileged to serve in the Army Air Corps, the Air National Guard and the Air Force Reserves.

Also, for the last 30 years, with one interruption, I have been privileged to serve here in the U.S. Senate with the opportunity to assess many military recommendations and decisions. Never—and I repeat, never—have I been more convinced of the value of a weapons system than I am today of the value of the B–1 bomber.

Mr. President, the United States must

build that aircraft for the defense of our Nation and the freedom of our people.

We have debated this issue long and loud with this debate reaching its peak in 1977. What has occurred since then? Clearly, several things have happened.

The Soviets have increased the accuracy of their ICBM's making one leg of the Triad, our land-based missile force, somewhat more vulnerable. Inflation has been so prevalent since 1977 that the B–1B will cost about twice what we could have purchased it for in 1977.

The question is often asked, "Why do we even need the strategic bomber leg of the Triad?" The answer is reasonably straightforward. We have spread our requirements across three strategic legs which decreases the vulnerability of each.

As with the other two legs, the strategic bomber has certain unique advantages over the other two.

The bomber is the controllable, recallable element of the Triad able to attack fixed or mobile targets with nuclear or conventional weapons. The bomber can project a U.S. presence in other regions of the world on short notice.

Arguments have been raised about penetration ability against Soviet defenses and whether we ought not to go ahead with an advanced technology bomber (ATB). A couple of things concern me in that regard. My first concern hinges on the gap between when we can achieve an initial operational capability (IOC) with the B–1 (1986) versus the earliest projected IOC for the ATB (1990).

That gap of an absolute minimum of 4 years is unacceptable in my view. My other concern, which I know is shared by many of my colleagues, is the technological uncertainty surrounding the ATB.

Although the ATB may or may not require a "revolutionary breakthrough" for development, it is clear that the uncertainties are there. In the meantime, why not take advantage of the innovations we have achieved since the ill-advised cancellation of the B-1 program in 1977.

Fortunately, when former President Carter canceled the B–1 program, someone in his administration was wise enough to recommend that we continue test and development.

As a result, the Air Force has conducted an extensive test and evaluation program with the four B–1 prototype aircraft. In fact, the last flight in the B–1 test program was flown on April 29 of this year.

Where does that leave us? Well, it leaves us in a much more knowledgeable position than we were in 4 years ago. We know that we have an aircraft that can penetrate Soviet defense systems for many years.

The B–1 will be able to penetrate at higher speeds and lower altitudes than a B–52. By virtue of some spinoffs from the Stealth programs, the B–1 will now have a radar profile that is 100 times less than that of the B–52.

Earlier, I mentioned the survivability of the various legs of the Triad. The B–1 is most certainly more survivable than the B–52.

It can use smaller, shorter runways, and get off the ground and away from the airfield of departure much quicker. The B–1 also uses 25 percent less fuel than the B–52 and thus has greater range.

Some people are arguing that the cost is too high. Of course the cost is high. The truth is, however, that it would cost as much in modifications to keep the B–52 fleet active into the 1990's as it will to build our force of 100 B–1's. We must be willing to pay for national defense.

If we can determine potential economies in the program, let us do so by all means, but let us not lose sight of the objective. That objective is our national security and, as a derivative, the freedom of our people. In this effort, we must move forward without delay to build the B–1 bomber in quantity.

As I reflect on my over 50 years' experience in the field of aviation and reflect on our current situation, my conclusions are certain. This could well be the most important decision that we in the U.S. Senate reach in our lifetime. The security of our Nation and the rest of the free world could hinge on what we decide on the B–1.

But let us put things in perspective. Since 1977, the Soviets have continued an unrelenting buildup of their strategic forces. They have improved their air defenses and they have continued to demonstrate, in Afghanistan and elsewhere, that they are intent on achieving military superiority. We cannot ignore these facts and we must, without delay, proceed with the B–1.

We now have an opportunity to let our President begin strategic arms reduction talks (START) with a message from the American people. We can let him know that we strongly support his drive for arms reductions and peace in the world, but we will not let our defenses down while he works toward that goal.

Mr. President, it is time to proceed without delay to full production of the B–1 bomber, and I strongly urge my colleagues to support the President and the Defense Department in this very important recommendation.●

NUCLEAR WASTE POLICY

● Mr. MITCHELL. Mr. President, the Senate Environment and Public Works Committee, of which I am a member, recently reported its version of the National Nuclear Waste Policy Act of 1981, S. 1662, legislation which addresses the critical national issue of nuclear waste disposal.

Nuclear wastes have been piling up in America since 1942, when the first military weapons powerplant began operation. The amount of wastes multiplied with the operation of the first commercial reactor in 1957.

In its most recent report, the Nuclear Regulatory Commission estimates that in 1981 spent fuel generated from commercial powerplants will total 9,105 metric tons. Similarly vast quantities of low-level wastes exist.

Take for example uranium mill tailings, the least radioactive of the six forms of nuclear waste, about which a recent New Yorker article stated the following:

The 1980 Oak Ridge inventory counted 2.955 billion cubic feet of radioactive tailings—enough to provide a twelve-inch-thick pavement for three four-lane highways from coast to coast—at 21 active uranium mills and 24 inactive ones.

These figures make clear that no matter what happens to the nuclear power industry in the future, the problem of what to do with existing wastes will persist. They are questions which I believe must be addressed immediately. If every nuclear powerplant in the country closed tomorrow, and if the United States stopped producing nuclear bombs the day after, there would remain the problem of disposing of the vast quantity of existing wastes.

As these wastes have built up since 1942, an enduring flaw has existed in our Nation's nuclear development program, military, and civilian: That is the complete absence of a plan to dispose of nuclear wastes.

In effect, the Nation's nuclear energy policy has provided for the development of nuclear power, while virtually ignoring its hazardous by-product. The legislation reported by the Environment Committee sets forth a comprehensive policy to deal with this dangerous, unsound omission in a critical area.

S. 1662, as introduced, was referred jointly to the Energy and Environment Committees. During the Environment Committee's deliberations on the original bill, my concern focused on what I considered to be its excessively diverse strategy for solving the nuclear waste problem.

By providing for such an approach, composed essentially of four disparate parts, the bill would divert the Department of Energy's attention away from safe geological disposal sites in the long term to several alternative modes of interim storage in the short term.

Overall, S. 1662 would have the effect of maximizing the risks of waste management, limiting State and public participation, and expending a potentially large sum of taxpayers' dollars to subsidize temporary waste storage.

To briefly summarize, the bill would provide for a costly Government commitment to a Federal away-from-reactor (AFR) storage program. I am opposed to such a program. I believe that interim storage in an AFR should be handled and paid for by the private sector. There is little doubt, as well, that an AFR program would have the effect of increasing the risks associated with the transportation of wastes.

The bill would permit a test and evaluation (T. & E.) facility to be located in a proposed geological repository site. The placement of wastes in a site considered for a geological repository would, in effect, prejudice any future site selection process, and thereby have the potential effect of bypassing the full licensing process and creating a de facto repository site.

The legislation would require DOE, within 1 year of enactment, to submit to Congress a proposal for at least one monitored, retrievable storage (MRS) facility. The requirement would, once again, divert the concentration of the Department away from the safer and more es-

sential alternative of long-term geological repositories.

The Environment Committee significantly redirected the focus of the legislation from various forms of temporary waste management to a clear emphasis on permanent geological disposal. The committee's legislation provides for the storage and disposal of nuclear wastes in a safe and timely manner through the following changes in S. 1662:

A provision which makes discretionary the Secretary's authority to provide a Federal AFR program, and which requires that a standard of need for such a program be strictly established;

A requirement that a utility must demonstrate to the NRC its need for an interim license prior to approval;

A timetable for geological repositories which has been lengthened to insure a thoughtful review of sites instead of the fast-track siting provided in S. 1662;

A mandate that the T. & E. facility be located in an existing research and development (R. & D.) site;

A mandate that the monitored, retrievable storage facility be "co-located" at the site of a repository or reprocessing plant, and that it not be licensed until 2 years after the NRC has licensed the repository or reprocessing plant;

A requirement that the fund containing the 1.0 mil per kilowatt hour fee be used to cover any excess costs of the Federal AFR program;

A mechanism which provides for extensive participation by States and Indian tribes to begin at the time the DOE has identified a potentially acceptable site, and for compensation to the State or tribe for their costs of participation and for any impacts of the project;

A separate title which establishes a defense waste management program similar to that provided for civilian wastes, and which essentially requires that defense waste sites meet the same strict public health, safety, and environmental standards required of civilian sites.

Three amendments which I offered to the bill were accepted by the committee. These amendments provide greater State and public involvement in interim licensing procedures for onsite storage expansion, and assure that greater care is taken before such licenses are approved.

Two of the three amendments deal specifically with the granting of interim licenses, which is a matter of great concern to me. The State of Maine has intervened in Maine Yankee's petition for a license amendment for onsite expansion.

Maine Yankee plans to use a new technology, commonly called pin compaction, which has never before been approved by the NRC at any nuclear facility in this country.

It is vital that the Maine public be able to fully participate in the license amendment hearing process. Maine's attorney general advised me that S. 1662 as introduced would seriously jeopardize the State's ability "to participate meaningfully in a decisionmaking process which has the potential for significant impact on the health and welfare of the citizens of the State of Maine."

Accordingly, my two amendments would:

Prohibit the granting of interim licenses for the first application received by the NRC to expand onsite storage capacity by the use of a new technology;

Require that the Nuclear Regulatory Commission members—not their staffs—act on applications for interim licenses for onsite storage capacity.

A third amendment which I proposed regards the hearing procedure provided for in S. 1662. My amendment provides that a hearing board may deem that an adjudicatory hearing is necessary solely on the basis of "a genuine and substantial dispute of fact."

The amendment provides the board greater freedom in determining that a hearing is imperative to resolve outstanding disputes.

During the committee's consideration of the bill, I also cosponsored an amendment that restricts the Department of Energy's use of commercial spent fuel for military purposes. The administration's plan to obtain plutonium from commercial reactors for the nuclear weapons program would effectively destroy the historical distinction between the peaceful and military uses of the atom.

Blurring the distinction between "atoms for peace" and "atoms for war" would also seriously undermine our nuclear nonproliferation policy. The United States has long been an outspoken supporter for a system of international safeguards which is founded on this distiction, and is rooted in the treaty on the nonproliferation of nuclear weapons. The administration's plan would effectively abandon the principles which are the basis of the international nonproliferation regime.

The plan would signal to other nations that the United States has adopted a policy of do as we say, and not as we do.
